**OO LPAR**, in the British district of Surat, presidency of Bombay a town situate on a small river which, eight miles farther west, falls into the Gulf of Cambay. Population 3 500. Distance N. from Surat 12 miles. Lat. 21 17' long 72 47'

**OOMDEE**.—A town in the British province of Sattara, presidency of Bombay 103 miles E. by S. of Sattara. Lat. 17 14, long 75 39'

**OOMERKOTE**.—See **OMERKOTE**.

**OOMNEE**.—A town in the territory of Oude 126 miles N. from Lucknow and 60 miles E. from Pilschhaet. Lat. 28 40, long 80 51'

**OOMRAIR**, in the recently leased territory of Nagpore, a town on the right bank of the river Amb a tributary of the Wengunga. Iron-ore is found in its vicinity. Distance from the city of Nagpore, S.E., 24 miles. Lat. 20 50' long 78° 22'

**OOMRAIT**.—A town in the recently ceded territory of Nagpore or Berar, situate 72 miles N.N.W. from Nagpore, and 56 miles E.N.E. from Balool. Lat. 23 7', long 78 45'

**OOMRAWAH** in the British district of Shahjehanpore Seat. gov. of the N.W. Provinces, a village on the route from Futtehgurh to the cantonment of Shahjehanpore and 16 miles S.W. of the latter. Lat. 27 46', long 79 50'

**OOMRAWUTTEE**.—A town situate on the route from Nagpore to Aurangabad, and in one of the districts of Hyderabad which has been transferred to the British government. It is a place of great commercial importance several considerable firms are established here, and most of the influential merchants of Upper India, as well as those of Bombay of any note, have either correspondents or branch houses at this place. The subordinate of some of these firms spread themselves over the cotton growing districts, and make advances to the cultivators, or assist them in paying their kists, on the agreement that the produce shall be at the disposal of their employer. When the crop is ready for picking, the cultivator for the most part has nothing farther to do with it the speculating capitalist being apprehensive that if the cultivator were permitted to gather it, much would be perished by him. When picked, it is transferred to Oomrawuttee, where are large warehouses appropriated to its reception,

and where it is cleaned and repacked for exportation, either from Bombay or from Calcutta. This place being within one of the districts recently ceded by the Nizam to the British government in satisfaction of arrears of subsidy it now partakes of all the advantages enjoyed by the dominions of that government in India, and among them, that of freedom from the hateful effects of transit duties. It will moreover be connected with the port of Bombay by means of a branch from the main line of the Great Indian Peninsula Railway Company. Distance from Bombay, N E 350 miles from Hyderabad, N 245 Lat. 20 50', long 77° 48'

**OOMREE**, in the British district of Allahabad, lieutenant-gov of the N W Provinces, a village on the route by Rajapoor ferry from the cantonment of Allahabad to Banda, and nine miles W of the former Lat. 25 27 long 81 45'

**OOMREIT**—A town in the British district of Kara, presidency of Bombay, 32 miles E by S of Kara. Lat. 22 40 long 73 10'

**OOMBOWREE** in the British district of Futtehpore, lieutenant-gov of the N W Provinces, a village on the route from Cawnpore to Futtehpore and 14 miles N W of the latter Lat. 26 3 long 80 45'

**OOMURER**, in the British district of Mynpoore, lieutenant-gov of the N W Provinces, a village on the route from the city of Agra to Etawah, and 28 miles N W of the latter. The road in this part of the route is good the country cultivated, and studded with small villages Lat. 27 4' long 78 44'

**OOMURGURH**, in the British district of Muttra, lieutenant-gov of the N W Provinces, a small town on the route from the cantonment of Allypore to that of Etawah and 44 miles S E of the former. It has a market, and is supplied with water from wells. The surrounding country is open with a clayey soil, well cultivated Lat. 27 22 long 78 25'

**OOMURKEIR**—A town in the native state of Hyderabad, or the Nizam's dominions, situate on the left bank of the Payne Gunga river and 161 miles N N W from Hyderabad. Lat. 19 33 long 77 45'

**OONA**—A town in the peninsula of Kattywar, province of Guzerat, situate 102 miles S from Rajkote and 96 miles S E by E from Poorbender Lat. 20 50' long 71° 2'

**OONCHADEH**, in the British district of Allahabad, lieutenant-gov of the N W Provinces, a village on the route by the Kutra Pass from Allahabad to Rewa, and 28 miles S E of the former Lat. 25 14', long 82° 15'

**OONCHADEH**, in the British district of Allahabad, lieutenant-gov of the N W Provinces, a town on the route from Allahabad to Palamow 33 miles S E of the former Lat. 25° 1', long. 84° 17'

**OONCHOD**—A town in the native state of

Gwalior, or territory of Scindia's family situate 52 miles S E by E from Oojein, and 71 miles S W by W from Bhopal. The united pergunnahs of Sonkash and of Oonchod yielding an annual revenue of 90,000 rupees, were, by the treaty of Gwalior in 1844 placed under British management, and allocated for the maintenance of the augmented Gwalior contingent. Lat. 22 44, long 76 28'

**OONDA**—A town in the British district of Bancoora, lieutenant-gov of Bengal, 87 miles N W by W of Calcutta. Lat. 23 7, long 87 14

**OONDRACONDAH**—A town in Hyderabad, or the Nizam's dominions, 82 miles E by S. from Hyderabad, and 75 miles N W from Guntoor Lat. 17 6' long 79 44'

**OOND SUBWEYA**, in the peninsula of Kattywar province of Guzerat, a small prant or district. It is bounded on the west by the prant of Kattywar and on all other sides by that of Gohi war lies between lat. 21 18'—21 30' long 71 38'—71 55' is twenty-six miles in length from north-east to south west, and thirteen in extreme breadth. No official return has been made of the area, but, according to a probable approximation, it may be stated at 174 square miles. It is a level, low district, extending on each side of the river Setronjee, and on the north side of the Wulhak hills and contains fifty three villages and a population of 11 873 persons, and held chiefly by Rajpoots. They pay collectively a tribute of 12 878 rupees annually to the Guzerowar

**OONDURGAON**—A town in the British district of Sholapoor, presidency of Bombay, 32 miles N W of Sholapoor Lat. 18° 1', long 75 39'

**OONDWA NULLAH**, in the British district of Bhangulpoor, lieutenant-gov of Bengal, a small stream discharging itself into the Ganges on the right side. It drains an extensive hill or shallow lake, becoming a morass during the dry season, and in the periodical rains having a great body of water. It gives name to a village with an antique fort, to which in 1768, the army of Meer Oosin Ali, subahdar of Bengal, then engaged in hostilities with the East-India Company fled, after being defeated in a general engagement near Sootee. On the intrenchments were mounted about 100 pieces of artillery, and they were manned by a force estimated at 60 000 men. It was, however, taken by the British in September by a night attack from two different points, one of these movements being intended to divert the attention of the enemy from the other which, it is stated, was undertaken upon the information of a soldier, who, having deserted from the British army to that of Meer Oosin had become tired of the latter service, and made his peace with his former employers by affording them assistance. The slaughter of the garrison is represented as great, the survivors having rendered them incapable of defending

themselves with effect, though the number of the assassins did not exceed 3 000 men of all arms. Oondwa Nallah is on the route from Burhampoor to Rajmahal, 70 miles N of former eight S. of latter 188 N of Calcutta, by Burhampoor. Lat. 24 58', long 87 58'.

**COONJARA**, in the Rajpoot state of Jeypore, a considerable town the principal place of the small raj or state held by a junior branch of the reigning family of Jeypore. The rajah resides here, in a fort of masonry. The town is surrounded by a wall with ditch. Distant S. of Jeypore 70 miles. Lat. 25 55' long 76 10'.

**COONTAREE**—A town in the British district of Palamow, lieutenant gov. of Bengal, 46 miles N W of Palamow. Lat. 24 18' long 83 30'.

**COONYENEE**, in the British district of Bareilly division of Pilleebheet, lieutenant gov. of the N W Provinces, a village on the left bank of the Bhagul river on the route from the town of Pilleebheet to Nagesna, and 16 miles N W of the former. Lat. 28° 46' long 79° 41'.

**COOPIN UNGADY**—A town in the British district of South Canara, presidency of Madras, 30 miles E. of Mangalore. Lat. 12° 50', long 75 20'.

**COOPLANA**—A town in the British district of Hyderabad, in the province of Secnde, presidency of Bombay, 66 miles S W of Hyderabad. Lat. 24° 30', long 68° 5'.

**COORAGHUM**—A town in the native state of Cochin, presidency of Madras, 33 miles N from Cochin, and nine miles S. from Trichoor. Lat. 10° 26', long 76 17.

**COORALWADA**—A town in the British district of Cuddapah, presidency of Madras, 53 miles N of Cuddapah. Lat. 15° 14', long 78 57'.

**COORHA**, in Bundelcund, a town the principal place of a raj or principality known by the name of Oorcha or Tahrre. It lies three or four miles to the right or south-west of the route from Agra to Benar. 142 miles S.E. of the former, 181 N of the latter, and on the left or west side of the river Betwa. Tienkenthaler, writing eighty years ago, describes it as situated on a rocky eminence, as being about three miles in circuit, surrounded by a wall of unhewn stones piled one upon the other with out cement with three lofty gateways. The fortress, situate within the town, is represented as a fine structure, containing the handsome residence of the rajah, as well as a splendid palace built for the accommodation of the Padshah Jehangir. The communication with the rest of the town the winter states to be by means of a wooden bridge the fortress during the periodical rains being insulated by a branch of the flooded Betwa. In the town is a temple ornamented with lofty spires.

The raj of which this town is the capital was estimated, in 1833, to contain 2,160 square miles, 640 villages, with a population of 122,000 souls; yielding a revenue of 10,00,000 rupees (100,000*l.*), and maintaining a force of 1,200

cavalry and 4 000 infantry. The revenue appears to be on the decline, as in 1837 it was estimated at only 6 00 000 rupees (60,000*l.*), while the military force in 1847 was computed at between 7 000 and 8,000 men, of whom more than 7 000 were infantry. The rajah pays to the Jhaast chief, through the British government, 3 000 rupees per annum, as quit-rent for the jaghire of Terhowlee.

The rajah of Oorcha is considered the head of the Boondela race of Rajpoot origin, being descended from a spurious branch of the Gurh wars. According to a recent authority Hurdeo, one of the Gurhwar family, came into the country with a slave-girl, and took up his abode at Gurh Kurar in the neighbourhood of Oorcha. He was there invited to give his daughter in marriage to the rajah of Oorcha, but refused, on account of objection to his caste or descent. After much importunity however he gave his consent, on condition that the rajah should at the marriage feast partake of the prepared viands, and thus lose all distinction of caste. The rajah consented, was poisoned with all his family, and the Gurhwar obtained possession of the country. His son was called Bundela, because he was the offspring of a bandee or slave-girl, and this name has been given to his descendants. This origin of the family is assigned by Elliott to the beginning of the thirteenth century, but Franklin is of opinion that the event occurred as late as the close of the fourteenth century. The town of Oorcha was built in 1631, by Pratsap Hrad, the chief of the Bundela. Mad hiker Sah, his grandson, appears to have advanced his raj to considerable prosperity by gaining the favour of Akbar. Barsing Deo the son and successor of the last-mentioned rajah was a notorious freebooter, and thence called Dang, a name equivalent to robber, from which circumstance Bundelcund is also called Dangaya. The desperate character of Barsing Deo pointed him out to Selim, son and declared heir of Akbar as a proper instrument to put off the celebrated Aбуlfaal, his father's favourite and minister, and who was thought unfavourable to the prince's views. Barsing Deo accordingly laid an ambushade for Aбуlfaal, at Borkh Sarre, as he proceeded towards Gwalior in his return from the Deccan, and, notwithstanding a valorous defence, the enormous minister was killed, and his head sent to Selim, by whom the murderer was amply rewarded. Jagber Singh, son and successor of Barsing Deo revolted against the sovereign of Delhi, but was overpowered, driven to take refuge in Gondwana, and his country seized by the conqueror Fehar Singh, however, his brother was reinstated, and the Oorcha rajah continued feudatories of the padshahs of Delhi until the dissolution of the empire. The raj or principality has been, however much reduced, Duttees being formed out of it, probably by partition arising out of family arrangements, as its chief is of the same lineage as the rajah of Oorcha. The territory of Jhansee was

wrested from Oorcha in 1783, by the Mah ratta, the small raj of Sumpter was also severed from Oorcha, but the time and cause of the event are uncertain. The rajah, though he received assistance from the Peshwa in 1783, at no time acknowledged that potentate as his sovereign and in the treaty concluded between the East-India Company and him, in 1812 it is set forth, that by him and his ancestors his present possessions have been held during a long course of years, without paying tribute or acknowledging vassalage to any other power. By the terms of this treaty the rajah professed obedience and attachment to the British government, which guaranteed his possessions to him free of tribute, and undertook to protect his territories from foreign aggression, the rajah abstaining from collusion with any powers in alliance with the British government, or dependent on it. In 1842 Oorcha assumed such a refractory attitude that a military demonstration on the part of the British authorities was found necessary.

The rajah Soojan Singh for the most part residing at Tehree one of his towns forty miles south-east of Oorcha, was of late years generally styled rajah of Tehree. Soojan Singh died in 1854 leaving no issue, whereupon the neighbouring Bundela chiefs were required to indicate the nearest collateral heir to the late rajah capable of adoption. Hummer Singh being the party selected, was installed as rajah, and a regent appointed during his minority. The town of Oorcha is distant 100 miles S W of Calpee, 137 W of Banda, 248 W of Allahabad, 743 N W of Calcutta. Lat. 25 21, long 78 43.

OORCHA, in Bussahir a village and halting-place for travellers in Koonawar is situated on a mountain side near the right hand of the Taglakhar river a considerable feeder of the Sutlej. The vicinity is remarkable for the great number of manes, or peculiar structures devoted to the purposes of the Lamaic religion. These are low tumuli or mounds, of lengths varying from ten to 200 feet, two feet broad, and three or four feet high, constructed of loose uncemented stones, and covered at top with numerous pieces of slate of all shapes and sizes, with sentences carved in the Oorchen or sacred character the most common being the mystic exclamation, Oom mane pemee com. There is always a path on each side of these erections, and the devotees invariably pass them on the right hand even though this observance should entail the necessity of taking a circuit of a quarter of a mile as Gerard has sometimes known to be the case. The road and country are dreary in the extreme presenting nothing but a rugged surface of rock bare, and formed generally of the jagged edges of slate strata. A few dwarf deciduous spring from crevices, and are almost the last trees in the journey eastward from central Koonawar to the Tartarian table-land, the parching and freezing gusts of which check the growth of all

trees, except a few scantily-distributed birches. Here, at the end of July the thermometer rose in a tent to 93°, and in the open air to 79°, a high temperature for a spot having an elevation of 11,296 feet above the sea. Lat. 31 38, long 78 37.

OORCHAN.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, 35 miles S.E. by S. from Sholapoor and 155 miles W from Hyderabad. Lat. 17° 15', long 76° 14'.

OORJUAH, in the British district of Etawa, lieutenant-gov. of the N W Provinces, a town, the principal place of the pergunnah of the same name, situated on the route from Allahabad to Etawa, and 39 miles S.E. of the latter. It has a bazar and is abundantly supplied with water. Population 5,645. Lat. 26° 28' long. 79° 38'.

OORMEL, or URMAL, a river running in Bundelkund, and in lat. 24° 50' long 79° 36'. Its course is first northerly then sweeps round nearly in a semicircle north easterly, easterly, and south easterly. Having run sixty miles, it falls into the river Cane on the left bank, in lat. 24° 58' long 80° 9'.

OORNEE, in Koonawar a district of Bussahir is a village near the right bank of the Joola, which about a mile below falls into the Sutlej on the right side. It is situated in a rugged and barren country amidst huge masses and precipitous of gneiss. Lat. 31° 22', long 78° 10'.

OOROOLEE.—A town in the British district of Poona, presidency of Bombay, 20 miles E. of Poona. Lat. 18° 30', long 74° 11'.

OORUN.—A town in the British district of Tannah, presidency of Bombay 10 miles E.S.E. from Bombay. Lat. 18° 53', long 78° 1'.

OOSAINEE, in the British district of Agre, a village on the route from the city of Agre to Mynpoorie, and 21 miles E. of the former. The road in this part of the route is good, the country cultivated. Lat. 27° 13', long 78° 24'.

OOSOOTTA.—See HOSKOTTA.

OOSKEITH, in the British district of Budaon, lieutenant-gov. of the N W Provinces, a town, the principal place of the pergunnah of the same name. Lat. 27° 45', long 79° 18'.

OOSSOOR.—A town in the British district of Salem, presidency of Madras, 82 miles N N W of Salem. A stud establishment is maintained at this place by the government and it appears from an official statement, showing the average cost of horses passed for the service from the breeding department, that the expense at Oosoor contrasts favourably with the cost of horses purchased at Bombay. Lat. 12° 46', long 77° 51'.

OOTAKAMUND, a town in the British district of Coimbatore, presidency of Madras, and the principal sanitary station on the Neilgherry Hills, has an elevation of 7,300 feet above the level of the sea, and is 1,300 feet higher than the minor station of Kotaguri and

**Ootacoor** It is situated in an open valley almost in the centre of the hills, protected by the Dodabetta range on the north-east and south, but open to the westward. According to the authority already quoted, "the only town on the hills properly so called, is Ootacamund, and even this term can only be applied legitimately to the native portion of the settlement, since the residences of Europeans are too widely dispersed along the slopes of the valley to admit at present of its further extension. So rapidly however is the number of houses increasing, that before long the term town will not be inappropriately applied to the whole settlement." The site of Ootacamund was first occupied in 1822. The mean annual temperature is 58° the rain-fall on an average of four years, was found to amount to forty four inches. An elegant church which has been recently enlarged is one of the greatest ornaments of the settlement. There are also public gardens, and the site has been selected for one of the meteorological stations of the Madras presidency. Ootacamund is 32 miles N.W. by N. of Coimbatore. Lat. 11° 24', long. 76° 47'.

**OOTALOOR**—A town in Hyderabad, or the territory of the Nizam situate six miles S.W. from the left bank of the Manjira river and 60 miles N.W. from Hyderabad. Lat. 18° 5' long. 78°.

**OOTAMPOLLIAM**—A town in the British district of Madras, presidency of Madras, 54 miles W. by S. of Madras. Lat. 9° 49' long. 77° 33'.

**OOTCH**, in Bahawalpore a city situate four miles from the left bank of the Punjnad river, amidst beautiful groves. It is formed of three distinct towns, a few hundred yards apart, and each surrounded by a ruinous brick wall. The streets are narrow and meanly built, but the houses are large, and well supplied with wares and there is considerable general traffic. These towns are built on mounds, formed by the materials of great cities formerly existing here. In the immediate vicinity are prodigious quantities of ruins, still in such preservation that they could be easily rendered habitable. Ootch is regarded with veneration by Mahomedans, in consequence of containing five shrines of deceased pirs or saints, Sayids reputed descendants from Mahomet. Lat. 29° 13', long. 71° 8'.

**OOTERPORA** in the British district of the Twenty-four Pergunnahs, lieut.-gov. of Bengal, a town situate on the right bank of the river Hooghly. In this town an income-tax has been imposed upon the inhabitants for the production of funds for municipal purposes. Lat. 22° 35', long. 88° 25'.

**OOTGIR**, or **DEOGURH**.—A town in the Rajpoot state of Kerowly situate on the left bank of the Ohumbul river and 38 miles S.E. W. from Kerowly. Lat. 26° 6' long. 77°.

**OOTHA**, in the British district of Allah-

abad, lieut.-gov. of the N.W. Provinces, a village on the route by the Kutra Pass from Allahabad to Rewa, and 30 miles S.E. of the former. Lat. 25° 13' long. 82° 14'.

**OOTRACH**, or **TUROOH**, a district in the lower or southern mountains of the Himalayas, is bounded on the north by Basmahr, on the east by Raees and Rumsahr, on the south by Joobul (of which state indeed it now forms part), and on the west by Poondur and Koth Raes, and has an area probably of between sixty and seventy square miles. It lies between lat. 30° 55'—31° 6' long. 77° 42'—77° 54'. It consists almost entirely of a portion of the crest and declivities of a lofty range proceeding from Wartoo Mountain in a south west direction to the river Tons. The general elevation is probably very considerable, as the summit of Tungur Peak, a little above the north western frontier is 10,102 feet. The population of Ootrach is estimated by De Cruz at 2,500, the annual revenue at 3000, of which amount, the sum of 281 was paid by the rannas as tribute to the East-India Company. The armed fol- lowers of the chief were computed at about 100. On the expulsion of the Ghoorkas in 1815, this state was granted to a claimant alleged to be the heir of the rana dispossessed by those invaders. It was, however, subsequently ascertained that the claim was fraudulently made to the prejudice of an elder brother, and he was compelled to abdicate in favour of his son, a pecuniary allowance being at the same time assigned to his nephew. But the mal-administration of this petty state subsequently rendered it necessary to depose this prince also and on account of the insignificance of Ootrach, and the small amount of its revenue, it was deemed advisable to incorporate it with Joobul.

**OOTRA DROOG**.—A town in the Mysore, 47 miles N.E. by N. from Seringapatam, and 32 miles W. from Bangalore. Lat. 12° 58', long. 77° 10'.

**OOTUNCURRAY**—A town in the British district of Salem, presidency of Madras, 49 miles N.E. by N. of Salem. Lat. 12° 16', long. 78° 35'.

**OOTURHEE**, in the British district of Cawnpore, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Futtahgurh to that of Cawnpore and 28 miles N.W. of the latter. Lat. 26° 46', long. 80° 8'.

**OPAH**.—A town in the British district of Chota Nagpore, lieut.-gov. of Bengal, 17 miles E.N.E. of Lohadaga. Lat. 23° 32', long. 85°.

**OPERAI**, in Bundelcund, in the territory of Duttiah, a town on the route from Banda to Gwalior, 160 miles W. of the former. It has a bazar and water is plentiful. Lat. 25° 46' long. 78° 27'.

**OPERRBUNDA**.—A town in the British district of Beardsloom, lieut.-gov. of Bengal, 150 miles N.W. of Calcutta. Lat. 24° 10', long. 86° 55'.

**ORAI**, in Baidoland, in the British territory of Jaleum, a small town on the route from Calpee to Jhansoe, 22 miles S.W. of the former. It has a bazar and adequate supply of water. Lat. 25° 57', long 79° 31'.

**ORAYE**.—A town in the British district of Balasore, province of Cuttack, lieut.-gov. of Bengal, 61 miles S.W. by S. of Balasore. Lat. 20° 48', long 86° 30'.

**ORISSA**.—An extensive tract of India, comprising the British district of Cuttack part of the British district of Midnapore and the wild and unsettled region lying to the westward of those, and between them and the territory of Nagpore. It lies between lat 17° 16'—22° 28' long 81° 35'—87° 20'. The area, according to official report, is 52,995 square miles. It is bounded on the north by the British district of Mirzapore, on the north-east by the British districts Palamow, Pachete, Raungurh, and Midnapore, on the south-east by the Bay of Bengal and the Northern Circars, on the west by Nagpore or the territory of Berar and the British districts denominated the Ceded Territory of Saugor and Nerbudda. The maritime part of Orissa, forming the British district of Cuttack, is described under that name in the alphabetical arrangement.

The scanty notices which we have respecting this extensive tract, represent it as consisting of an extensive range of mountains, the continuation of the Eastern Ghats. Some of the summits of these attain an elevation considerably exceeding 2,000 feet, and one summit has been estimated by an intelligent traveller to have an elevation of 4,000 feet above the level of the sea. Timber abounds in the vast forest, which extends uninterruptedly from the banks of the Godavary to those of the Ganges, a distance of nearly 600 miles. The geological character of the mountains is primary, being granite, gneiss in large quantities, and mica-slate and throughout the rocks garnets are interspersed in surprising abundance. In many places the gneiss has a strongly marked porphyritic character and elsewhere passes by imperceptible transition into sandstone or is overlaid with laterite. In the northern part there is much primary limestone, intermixed with quartz and mica-slate. Iron-ore is very abundant in many places and in the midland parts, in the vicinity of the town of Sambhulpore, diamonds, gold, and rubies are found in the detritus of rocks and there is reason to conclude that they exist in situ in the neighbouring mountains. It has been stated that promising indications of coal have been observed but it has not yet been found in any part of the district. The climate during the hot season is in the close of spring and early part of summer is extremely sultry the thermometer reaching 115° in the shade and this very high temperature acting on decayed vegetation, saturated with moisture, is productive of deadly malaria, rendering the climate one of the most unhealthy in India. This unfavourable circumstance, more than any

other prevents the settlement and adequate cultivation of a country having a vast extent of well watered and fertile soil suited for the successfully raising most of the valuable inter-tropical products. Wild beasts are numerous there are the wild elephant, the gaur, a huge bovine quadruped, wild buffalo, sylgax (Antelope picta) wild swine deer of various kinds, the antelope, porcupine, hare monkey, squirrel, tiger leopard, bear, wolf, hyena, jackal, fox, and wild dog. The dhanusa (*Buceros indica*) or rhinoceros-bird is common but in general the ornithology of the district has been neglected. Enormous snakes infest every jungle and ravine. Motte, a traveller who visited the country in the latter part of the last century, mentions having seen near Sambhulpore an immense snake, worshipped as a deity and alleged to be coeval with the world. It was lodged in a cavern at the foot of a rock and came out once a week to take his food consisting of a kid and some fowls offered to him by his votaries and picketed on a small plain before his den. After the monster had gone back to its den the traveller examined its traces in the muddy soil and concluded its diameter to be about two feet. Kittice, who visited this locality in 1838, or sixty years later than Motte, states that he was informed that this monstrous snake was still living, and able to enjoy the offerings of his votaries. The bon-lurks in every jungle, and attains enormous size; venomous snakes are also very numerous, as are scorpions and centipedes. Fish swarm in the numerous streams and tanks, and form a considerable portion of the food of the population.

The general slope of the surface is eastward, except in the extreme southern part, where a few feeders flow southward to the Godavary. At the northern extremity also, some small rivers flow northwards, and discharge themselves into the Son a large feeder of the Ganges. The rest of the rivers flow eastward, and discharge themselves into the Bay of Bengal. Of these the principal are the Mahanuddee and the Brahminy. There are a great number of rapid and large torrents, which during the rainy season, fall either into the greater streams or into the Bay of Bengal.

The population is estimated at 4,554,818. There are four principal divisions of the population—1. The Uria, Orisa, or Odia, being Brahmimists, and inhabiting principally the plains and valleys, more especially in the western tracts, towards the British district of Cuttack. 2. The Coles, in the northern part, a race also called Hoo, semibarbarous, yet not sunk in the lowest stage of savage brutality. 3. The Khonds in the middle part, and 4. the Samras or Sauras, in the south. These three last races are considered the aborigines of the tracts which they now inhabit, and of others much more extensive, of which they have been dispossessed by the encroachments of the more recent population, generally denominated Hindoo. The Coles are rather favourably

debauched by a recent writer, who commends their love of truth, honesty, obliging willingness, and happy, ingenious disposition, the more striking as contrasted with the treachery and falsehood of the wily Hindoo. He represents them as hospitable to strangers, and ready to relieve the indigent, altogether a lighthearted, kind people but very irascible, and so prone to feel deeply injuries, whether real or imaginary, that they frequently vent their resentment or grief in suicide, to which they are frightfully addicted. In occasional collision with British troops, they have not shown themselves remarkable for courage. These rude people have been won over by proselytizing Brahminists to a certain observance of their rites and festivals, and are besides polytheists, worshipping several imaginary deities, whom they strive to propitiate by sacrifices they however say that as they have never seen those deities, they cannot assign them shapes. The Khonds who inhabit the central part of Orissa, are represented as having made some progress in civilization. Agriculture is practised by them with a degree of skill and energy which is rarely surpassed in India, and which has produced a degree of rural affluence rarely paralleled. The same writer however, represents the population to be so scanty as to suggest grave doubts of his accuracy, either as to the numbers of the people, or to their alleged proficiency in agriculture. As to physical constitution, the Khonds are of the average stature of the Hindoos muscular robust, symmetrical, and active. The skin varies in hue in different individuals, from deep copper-colour to yellowish olive. The face is rather handsome, with high expanded forehead, prominent cheek bones, nose aquiline in some instances, though not in all but generally broad at the top, lips full but not thick, mouth rather large. The whole physiognomy is generally indicative of intelligence and determination, blended with good humour. They fight with bows and arrows, slings and battle-axes, and are considered to be brave, neither giving nor taking quarter. Their good qualities are stated to be love of independence, heavy hospitality, and industry, but they are dreadfully vindictive, and addicted to drunkenness. They are polytheists, believing in the existence of various imaginary divinities, and worshipping the earth, the moon, the god of war and many other objects beside the Hindoo goddess Kali. The god of the earth is, however, the most revered, and under the influence of a detestable superstition, his votaries seek to propitiate him by the sacrifices of human victims generally children, bought for the purpose from those who steal them from neighbouring people. It appears to be a rule, that no Khond should be sacrificed and no victim is considered to be acceptable unless bought with a price. This horrible rite is intended to induce the god of earth to favour them with plentiful crops. At the time appointed by their priests, a feast is held, and

after it has continued for two days and two nights, a some of drunken and obscene reveling, the victim is brought out on the third day and bound to a stake. Its limbs are then broken and the priest having struck it with an axe the crowd set upon it, and crying aloud,

"We bought you with a price no sin rests on us," hew the living body into pieces, each carrying away a bloody morsel, which they throw on the earth in some part of their grounds. The number of human beings yearly murdered in this manner was formerly very great. Macpherson states that he found seven victims held in readiness for immediate sacrifice in a valley two miles long, and less than three-quarters of a mile wide. The British government has made strenuous efforts to check the practice, but the Khonds adhere to the sanguinary rite with dreadful pertinacity, and with unflinching ferocity defend their fastnesses, where, for the greater part, malaria would inevitably destroy an invading force. There is reason, however, to hope that ere long the country will be purged from these fearful crimes. By an act of the government of India, passed in September 1845 the Governor General is empowered to withdraw the districts where they prevail from the jurisdiction of the ordinary authorities, and to place them under a special officer called "the agent for the suppression of Meriah sacrifices," who is of course selected with particular regard to vigilance, energy, firmness, and discretion. The Saurias are slaves to the same superstitious as are the Khonds, but are considered much more savage and barbarous. They are represented "as in general a harmless peaceable race, but so entirely destitute of all moral sense, that they will as readily and unscrupulously deprive a human being of life as any wild beast of the woods, at the orders of a chief or for the most trifling remuneration." The language of the Urias is a dialect of Sanscrit closely resembling the Bengalee and the basis of the alphabet is the Nagari. The Gond language is spoken in some parts towards the western frontier. The Khonds use two distinct dialects, each containing many words of Tamil and Telugoo. Of the dialects of the Coles we have no information.

Sambulpoor the only considerable town in the country. Boud, and Sohnpoor are described under their respective names in the alphabetical arrangement. The principal routes are 1. From north-east to south-west, from Calcutta, through Midnapore, to Sambulpoor. 2. From east to west, from Cuttack, through Sambulpoor, to Nagpore and Kamptee.

The decline of the ancient royal house of Orissa dates from the death, in 1524 of Rajah Parth Rudra Deo, an event which the Hindoo monarchy was not destined long to survive. Its downfall may be regarded as consummated in 1592 when a lieutenant-governor arrived from the Mahomedan kingdom of Bengal to assume charge of the administration of Cuttack. With the exception of this province,

and a portion of Midnapore, Orissa was acquired by the East-India Company in 1765 by virtue of the firman of Shah Alum, emperor of Delhi, granting the dewanry of Bengal, Behar, and Orissa.

**OSIMLEE.**—One of the Comysa hills states it is surrounded entirely by the other hill states, and extends from lat 26° 20'—25° 59', long. 91° 26'—91° 41'. It is forty three miles in length from north to south, and sixteen in breadth, and has an area of 380 square miles.

**OSMANPOOR.** in the British district of Agra, Bent. gov. of the N W Provinces, a village on the route from the city of Agra to Bareilly, by Khasganj and 14 miles N E of the former Lat. 27° 18' long 78° 11'

**OSSOOR.**—See Oosoor.

**OTTAPUDARUM.**—A town in the British district of Tinnevely presidency of Madras, 28 miles N E by E of Tinnevely Lat. 8° 55' long 78° 5'

**UDANULLA.**—See Oosdwa Nulzan

**OUDE,** a province so called from the ancient city of the same name, is bounded on the north and north east by the territory of Nepal on the east by the British district of Goruckpore, on the south-east by the British districts Azimgarh and Jounpore on the south by the British district Allahabad on the west by the Doab, including the British districts Futeelpore Cawnpore and Furruckabad and on the north west by Shahjehanpore It lies between lat 25° 34'—29° 6', long 79° 45'—83° 11' is 270 miles in length from south east to north west, and 160 in breadth. The area is 23785 square miles. The north and north eastern part, lying along the base of the Sub-Himalaya, or continuation of the Sewalik range, has not been well explored by Europeans it forms part of the Terai or wooded marsh stretching through that part of Hindostan and, suffering from a deadly malaria, is scarcely habitable. Thief sentinals, who penetrated into this tract, states it to be generally a forest, impassable on account of the close growth of trees, underwood, and reeds, and giving shelter to the elephant, rhinoceros, deer, wild kine wild hog, and deer The general surface of the Oude country is a plain declining from north west to south east, according to Buxter at the rate of seven inches per mile, and hence in that direction is the course of the principal rivers, the Ganges Chowka, Ramganga, Raptee, Surjoo or Ghogra, Gomtee, and Banoo. The elevation of Burmdeo guardhouse, at the north-western angle is estimated by Webb at 798 feet above the sea that of the left bank of the Ganges, at the south-eastern point, may be concluded to be 346 ft

The climate of Oude is dry during the greater part of the year and subject to wide extremes, the temperature sometimes rising to 115°, and at others sinking to 35° The cool season extends through November, December, Janu-

ary, and February and is pleasant and salubrious, though occasionally rather chilly sometimes to such an extent that thin ice appears on shallow water but in sheltered spots the sun has considerable power throughout the season. March, April May and June, are the hot months noon daily bringing a westerly wind, loaded with fine light greyish sand which obscures the horizon gives a sombre hue to the entire atmosphere and is so sultry and drying as to cause woodwork to crack The temperature, however, generally diminishes towards sunset, and rarely continues oppressive throughout the night. Occasionally the wind blows from the east all day and is loaded with oppressive vapour from the swamps of Bengal or Assam The power of the hot winds is observed to be steadily on the increase Sometimes hurricanes, accompanied by thunder lightning, and rain, set in, and do extensive damage The annual fall of rain varies greatly in amount, as the rains sometimes commence in the middle of June and terminate in October while at other times they last only two months. The consequence is, that in some years eighty inches fall in others not more than thirty

Besides the huge quadrupeds which haunt the marshy forests of the Terai the following wild animals are found in the country—the tiger wolf hyena, jackal, fox hare, deer, ayghau or blue antelope, wild hog, porcupine, otter mongoose squirrel rat, musk rat, wild cat, bat, and flying fox. Tigers are so numerous, that, during the visit of Von Orlich to Lucknow, a hunting party killed forty of them, some of great size, the skin of one having measured nine feet from the head to the tail Wolves are very abundant, and destroy many persons, especially children, whom they carry off even from the houses of the towns. These ferocious animals are often spared when in the power of the natives from a mischievous superstition that their death causes the destruction of the slayer's house. Wolves are not the only devourers of children hyenas carry off many

The principal alimentary articles of the spring crop are wheat, barley, gram, called also chana (Oler arretumum), masur (Ervum lens) mustard, and some other oil plants. Kusum (Carthamus tinctorius) grown for dyestuff, is also an article of the crop. Of the crop reaped in autumn, the principal article is rice, sown in those parts liable to inundation. In the Ayeen Akbery the rice of Oude is stated to be 'incomparable for whiteness, delicacy, odour and digestiveness' The other principal articles of this crop are millet of various sorts, maize, makra (Cynodorus coccineus), joar (Holcus sorghum), bajra (Holcus setivus), urdh (Phaseolus marninus), koda (Paspalum frumentaceum) moth (Phaseolus aconitifolius), urhur (Cajanus flavus) and til (Sesamum orientale) The cultivation of the sugarcane is very circumscripted and the produce, from mismanagement, execrable though soil and climate appear rather well adapted for its

growth Potatoes have been introduced, and their cultivation is on the increase, but rather slowly. The growth of opium receives some attention, and might be immensely extended, but the drug from the slovenly and injudicious manner in which it is prepared and its bad character from adulteration, scarcely commands a remunerating sale. Hemp is cultivated for the sake of its products in the shape of bag, gunja, charas, and similar powerful narcotics. Generally each village has a patch of ground under tobacco. Most of the esculent vegetables of temperate climates succeed in the cool season. Cotton is raised in many places throughout the country and is of good quality though inferior to that of Bundelcund. The quantity however is not sufficient for the demand, and much is imported from Bundelcund and the Doab.

Though Oude appears to have ceased to be an independent realm at a very remote period, the population have a highly warlike character the territory in proportion to its extent, supplying a surprising number of soldiers to the army of the East-India Company and to those of Gwalior, Hyderabad and Alwar. Most of the troops of the last-mentioned power are said to be natives of Oude. Though the kingdom has been for several centuries under Musulman sway much the greater portion of its inhabitants are Hindoos. If a judgment may be formed on the relative amount of the different classes stated by Butler in the enumeration of the population of the towns, the Musulman proportion forms a very insignificant part. The first class of Hindoos, in number and influence, are the Brahmins, who are divided into sub-castes, too numerous and intricate to be here enumerated. The next in numbers and importance are the Chhatris, or military caste in which the Rajpoots rank first, and are divided into a great number of sub-castes. The Brahmins have numerous and preposterously strict regulations respecting intermarriages, the Chhatris, on the contrary admit intermarriages between all tribes of their own caste. The proposal of marriage is made by the girl's father, who, in proportion to his means, incurs a large expenditure less in the way of dowry than is presents to the youth and his relations, and in feasting the families and acquaintances on both sides. Among most Brahmin tribes, however humble the station of the parties, no marriage can take place without an expenditure of 700 rupees of which 100 are laid out in trinkets for the bride, fifty for culinary utensils, fifty for clothes; 100 as a present to the youth from the head of the girl's family, 100 similarly presented by the same person to the youth's father, a sum, sometimes amounting to 150 rupees, distributed in presents of four rupees each to the youth's relatives, the remainder being expended in feasting, which continues five days. The matrimonial ceremony is performed when the parties chiefly concerned are

about thirteen years of age sometimes later but never until they are past the age of nine. Cohabitation commences at fourteen, and there is then a repetition of the same merry-making but at half the expense. Important characters in society are the Bhatas, hereditary bards or minstrels, who perambulate from house to house, sing the praises of the inmates, and are rewarded with presents of money, horses, arms, and clothing. The Musulmans, probably are for the most part Shiahs, or those who reject from the Khalifates the first three successors of Mahommed, revering exclusively his grandson Ali.

The entire population of Oude is understood to be 2 970 000 affording an average of 125½ to the square mile. The dwelling-houses of the people are generally built either of unburned brick, or of layers of mud, each about three feet in breadth and one foot high. The roofs are made of square beams, placed a foot apart, and covered above with planks laid crosswise over which are mats, and a covering of wet clay, well rammed down and a foot and a half in thickness. The walls are carried up to six or seven feet above the upper surface of the roof to afford a concealed place of recreation for the females of the family and during the rains this small elevated court is covered with a slight roof of bamboos and grass. These thick mud covered roofs are very durable. Around the houses there are usually verandas, covered with pentroofs of tiles. Inside, the beams and covering are exposed to view without any ceiling the floors are of earth, well beaten down and smoothed and are partially covered with mats or on great occasions, with cotton carpets. In the front of the house is a chabutra, or raised platform of earth, open to the air at the sides, and having a roof of tiles or grass supported on pillars. Here the neighbours meet and chat in the evenings.

The language in use in Oude is Hindustanee or Urdu with a greater admixture of Persian and Arabic, and less of Hindoo, than in places more eastward.

The principal routes are — 1 That from Cawnpore, north-east, to Lucknow being the only regularly made road in the kingdom. From Lucknow a route proceeds north west to Seetapore cantonment, and there diverges, one branch continuing its former direction to Shahjehanpore cantonment, the other proceeding north by Kharagch, and thence up the valley of the Ghogra into Kumaon. 2 A much frequented route proceeds from Mynpoore, being joined by that from Futehgurh across the Ganges at Nanaow Ghat, in lat. 26 52', and thence in a direction from west to east to Lucknow. 3. from Lucknow, a route lies in a north-easterly direction to Sakrona cantonment, and thence to Bureach and on to Telegaore, in the vicinity of the Terai or marshy forest at the southern base of the first range of mountains, 4. from Lucknow also a road proceeds eastward to Fyzabad and the city of Oude, and crossing there the frontier

# OUDE

by ferry over the Ghogra, continues to hold an easterly course through the British district of Goruckpore to the cantonment and town of that name 5 a route proceeds in a north westerly direction from Fyzabad to Bekrora cantonment 6 a route proceeds in a north easterly direction from Sultanpore cantonment crossing the Ghogra by ferry near Kusba-Tanda, and thence proceeding to Goruckpore cantonment 7 from Allahabad a route lies northward to Pertabgurh, and thence in the same direction to Sultanpore 8 a route leads from Allahabad north west to Lucknow 9 a route runs in a direction first north-easterly then south-easterly from Cawnpore to Sultanpore 10 another proceeds in a south-easterly direction from Cawnpore to Pertabgurh 11 a much frequented route proceeds from Lucknow south easterly to Sultanpore cantonment and thence into the British district of Jaunpore, and to the cantonment of that name 12 another leads from east to west, from Jaunpore cantonment to Pertabgurh. With the exception of the military road from Cawnpore to Lucknow, the ways are wretched tracks, in many places scarcely passable for wheals. A project for the construction of a railway through this province has been laid before the public.

The kingdom contains the following divisions and subdivisions.—I. Chakia Sultanpore containing pergunnahs 1 Sultanpore 2 Jagdispore, 3 Gunda, 4 Isuuli 5 Tappa. AII 6 Bilahri II Chakia Aldema containing pergunnahs 1 Aldema, 2 Akbarpore 3 Dostpore, 4 Berbar 5 Tanda. III Chakia Pertabgurh containing pergunnahs 1 Pertabgurh 2 Amethi 3 Dalpore Paltu IV Chakia Panchamrat containing pergunnahs 1 Mangla, 2 Bat Haveli or Faizabad 3 Rampore V Chakia Damsawara containing pergunnahs 1 Rajitpuria, 2 Harba, 3 Atelea, 4 Maulwanwa, 5 Kurnanwa, 6 Daundiskhara, 7 Haangany 8 Mayranw 9 Hardargah 10 Rao Bareli 11 Dalama, 12 Sarendi 13 Bardar VI Chakia Salon, containing pergunnahs 1 Salon Khaz, 2 Paradipore, 3 Jayis, 4 Atuba. VII Chakia Ahladgan containing pergunnahs 1 Ahladgan 2 Bihar 3 Mauikpur 4 Rampore. VIII Chakia Gonda Bahrach containing pergunnahs 1 Bahrach 2 Gonda Khaz, 3 Munumadabad, 4 Bari 5 Atraula. IX Chakia Berkar Khairabad, containing pergunnahs 1 Khairabad 2 Nuncharanrik, 3 Khirdahpur 4 Bangar 5 Mahandi, 6 Bilgram 7 Fattipur Biwa, 8 Bandia 9 Mahabad 10 Kakori 11 Bynaur 12 Kasand, 13 Malanwa. X Chakia Saadi, containing pergunnahs 1 Sandi, 2 Pali, 3 Saromnagar 4 Shahabad XI Chakia Rasulabad, containing pergunnahs 1 Rasipur 2 Rasulabad or Miyanganj 3 Asima, 4 Unaw or Onaw 5 Mihan XII Chakia Lucknow containing pergunnahs 1 Badauli Daryabad 2 Goshanganj 3 Dewe-Jahangirabad, 4 Kurd, 5 Sadhar

53

Lucknow the capital as well as the towns of Fyzabad Ayodha or Oude Roy Bareilly, Shahabad Khyregurh Manikpore, Bahrach Sahganj Banjit, Purna Tanda, and some others of less importance, will be found noticed in their respective places under the alphabetical arrangement.

In natural Advantages, Oude may be justly considered to surpass most parts of India. The defence of its south western frontier is facilitated for a long distance by the line of the Ganges, fordable only in very few places, and in those but for a short period of the year. The soil of the country is amongst the most fertile its climate, though rather warm is favourable both to animal and vegetable life its means of irrigation and of water-carriage are very extensive and conveniently distributed for the welfare of every quarter. Accordingly it need excite no surprise that the most judicious and liberos inquiries should have pointed out this tract, the primitive Kooma, as one of the earliest seats of Indian government and civilisation. Buchanan conjectures the settlement to have taken place 1366 years before the Christian era the reign of Rama, so celebrated in Hindoo romance and mythology 776 years and the restoration of the kingdom destroyed by hells aggression he attributes to Vikramaditya, king of Oojein anno 67 B.C. It is probable that the independence of Oude was lost and no further separate notice appears to be made of it in Indian record. At the close of the twelfth century after the conquest of Canauj by the Mussulmans Oude was subdued by Mihammed Bakhtiar Khilmi, an officer sent for the purpose by Kuthuddin Aibak viceroy of India, for Mohammed Ghori sultan of Ghuznee. It thenceforward became an integral part of the realm of the sovereigns of Delhi, and on the conquest of the empire by Baber was easily subdued. On the dismemberment of the Mogul empire it was about 1760 seized by Shuja-ud-dowlah the vizier of the empire and also viceroy of Oude. The following is the table of the sovereigns of Oude —

A.D	—	Saadat Ali Khan.
		Sekdaryag
1756		Shuja-ud-dowlah
1775		Asaph ud-dowlah.
1797		Vizier Ali apurious, and displaced in favor of Saadat,
1798		Saadat Ali brother of Shuja-ud-dowlah
1814		Ghazee-ood Deen Hyder, son of Saadat Ali
1827		Nuseer-ood Deen Hyder, son of Ghazee-ood Deen.
1837		Mahomed Ali Shah, brother of Ghazee-ood Deen.
1842		Umjud Alee Shah, son of Mahomed Ali
1847		Wajid Alee Shah, son of Umjud Alee Shah.

Shuja-ud-dowlah having in 1768 made com-

men came with Meer Casm in raising the arms of the East-India Company was, May 13th 1764 repulsed in an attack on the British army at Patna. And on the 22nd of the same month was totally routed at the battle of Buxar. In the following year 1765, the British army, entering Oude occupied Lucknow and again defeated Shuja-ud-dowlah, who in the same year was glad to make peace, putting Shah Alum the titular emperor of Hindostan or Great Mogul in possession of the districts of Allahabad and Corah. In 1768 reports reached the government that the Nawab Vizier was making extensive military preparations with a view to obtain possession of the provinces of Corah and Allahabad. A reduction of his military force was considered necessary and by the treaty of November 1768, the Nawab Vizier stipulated not to "entertain a number of forces exceeding 35 000 men. Of this number, there were to be—cavalry 10 000 ten battalions of sepoy, not to exceed 10 000, the Nujib regiment, consisting of 5,000 men with matallocks 500 artillery and the remaining 2 500 were to be irregulars neither to be clothed armed, nor disciplined after the manner of the English sepoy or Nujib regiment. The ill-advised Shah Alum having transferred his claim to the provinces of Corah and Allahabad to the Mahrattas, was considered to have forfeited those possessions, and by the treaty of 1773 they were transferred to the Nawab Vizier in consideration of the sum of 50 00 000 rupees. In 1774 the British troops auxiliary to the Nawab Vizier having overthrown the Rohilla power the greater part of Rohildand became subject to that potentate Shuja-ud-dowlah died in January, 1774 and was succeeded by his eldest son Asaph ud-dowlah who at his accession ceded by treaty to the East-India Company Benares Jounpore and some contiguous districts and in return the English engaged 'to defend the sculab of Oude at all times.' It was also stipulated that a brigade of British troops, consisting of two battalions of Europeans one company of artillery, and six battalions of sepoy, should be stationed in Oude whenever required by the vizier, for the support of which he engaged to pay monthly 2,50,000 rupees, an annual amount of about 312,000*l*. By agreement, 1781 one regiment of sepoy was added, for the purpose of protecting the office treasury, and person of the resident at Lucknow, at an expense of 30 000*l* annually and it was provided that Fasmullah Khan the Rohilla chief, having forfeited his independence, the Nawab Vizier should occupy his dominions, and pay him a moneyed income. In 1787 the Nawab Vizier agreed to fix his subsidy at 500 000*l* per annum, in which sum was included the additional expense on account of troops, the allowance to Saadut Ali Khan, the Rohilla steward, and the expenses of the British residency. In 1797, a great increase of the Company's military establishment having taken place, the vizier consented to defray the expenses of two

regiments of cavalry, one European and one native, the additional charge not exceeding 50 000*l* per annum making the total subsidy 555,000*l* per annum. In 1797 the vizier Asaph ud-dowlah died and the British government recognised the succession of his supposed son Visier Ali. The spuriousness of Visier Ali's birth being however soon after established, Saadut Ali the brother of the late vizier, was placed on the musnud.

By existing treaties, the Company were bound to defend the territories of Oude against all enemies. In order to enable them to fulfil this engagement, and at the same time to provide for the protection of their own dominions, they had largely increased their military establishment by the addition of new levied regiments both of infantry and cavalry, and in consequence thereof Saadut Ali agreed, in 1798 to increase the subsidy to 780 000*l* per annum. The Nawab Vizier also ceded the fortress of Allahabad, and gave 80,000*l* to the Company for its repairs, and 30 000*l* for those of Futehghurh. The British troops in Oude were not to consist of less than 10 000 men including Europeans and natives, cavalry infantry and artillery and should it become necessary to augment the Company's troops beyond the number of 13,000 men the vizier agreed to pay the actual difference occasioned by the excess above that number. The threatened invasion of Zeman Shah attracted the attention of the Marquis Wellesley (then earl of Mornington) to the state of Oude. It was desirable to substitute efficient troops for the unskilful and undisciplined force maintained by the vizier, and to place the defence of the Oude frontier against foreign invasion upon a more substantial basis. To accomplish these objects, the pecuniary subsidy was commuted for a territorial cession and by treaty 10th November, 1801 the Nawab Vizier ceded the Southern Doab and the districts of Allahabad, Azimgurh Western Goruckpore and some others, estimated to yield in the aggregate an annual revenue of 1 35 23,474 rupees or 1 852,847*l*. In July 1814 Saadut Ali Khan died, and was succeeded by his son Ghazree-ood Deen Hyder. In the month of October of that year the government of Oude lent the East-India Company 1 000,000*l*. A second loan of like amount was obtained in the following year in aid of the war against Nepal and on its successful termination in the beginning of 1816 the British authorities transferred to Oude the whole of the Terai, or marshy forest stretching along the north-eastern frontier of that country. This tract had been ceded by the government of Nepal, and the subsequent transfer to Oude was in liquidation of one million sterling of the loan made by the Nabob Vizier. In 1818, the Nabob Vizier formally renounced his dependence on the Great Mogul, or titular emperor of Hindostan, and assumed the title of King of Oude, the assumption being recognised by the British authorities. The financial exigencies

occasioned by the Burmese and Bhurtpore wars led the British government, in 1825 to apply to the ruler of Oude for aid, and another crore of rupees (a million sterling) was obtained as a loan in perpetuity at an unvarying interest of five per cent. Nussur-ood Deen Hyder ascended the musnud in 1827 on the death of his father Ghazee-ood Deen. In 1829 the British government agreed to receive as a special loan the sum of 624 000*l.* the interest of which was to form a provision for certain members of his majesty's family and in 1833 at the request of the king the British government consented to receive 30 000*l.* and to guarantee the appropriation of the interest thereof to the relief of the poor of Lucknow. In 1837 Nussur-ood Deen Hyder died, without legitimate issue and was succeeded by his uncle Mahomed Ali Shah though not without a sharp but very short struggle the Begum having raised a disturbance which by the promptitude and firmness of the British resident, Colonel Lowe, was suppressed in the outset. In 1842 on the death of Mahomed Ali Shah, his son ascended the musnud and the opportunity was embraced for pressing the reforms requisite to place the kingdom in a state of tranquillity and security. A limited period was assigned for effecting the required work and in default of performance, it was distinctly intimated that the country would be placed under British management. The intimation proved totally ineffective. Unyud Alee Shah died in 1847 when his son Wajid Alee Shah ascended the throne. In weakness and profligacy the new sovereign equalled perhaps even surpassed his predecessors. The progress, without intermission was from bad to worse. At length the home government felt bound to extend its sanction to the adoption of such measures as might be requisite to give effect to the provisions of the treaty of 1801. A new treaty was accordingly prepared for the acceptance of the king whereby the administration of the territories of Oude would have been transferred to the British government, ample provision being made for the dignity, affluence, and honour of the king and of his family. This treaty the king refused to sign whereupon the treaty of 1801 was declared to be null and void, and a proclamation was issued, declaring that the government of the territories of Oude was thenceforth vested exclusively and for ever in the East India Company.

**OUDE.**—A town in the kingdom of the same name. It is situate on the right bank of the river Ghogra, which Buchanan considers here to be "fully larger than the Ganges at Chunar" and which is navigable downwards to its mouth upwards to Mendiya Ghaut in the district of Barilly. It extends about a mile in a south-east direction from the adjoining recent city of Fyzabad the breadth of the town is something less from north-east to south-west, or from the river landwards. The greater part of the site is on gently

swelling eminences but to the north-west, or towards Fyzabad, is low. Most of the houses are of mud and thatched, though a few are tiled. Here in a large building a mile from the river is an extensive establishment, called Hanumanpur or Fort of Hanu man in honour of the fabled monkey god the auxiliary of Rama. It has an annual revenue of 50 000 rupees, settled on it by Shuja ud daulah formerly Nawab Vizier. It is managed by a malik or abbot, the spiritual superior and the revenues are dispensed to about 500 bairags or religious ascetics, and other Hindoo mendicants of various descriptions, no Mussulman being allowed within the walls. Other establishments of similar character are Nagnrukilla, Rum Parahad ka-Kana, and Badiya-Kund maintaining respectively 100 350 and 200 bairags. Close to the town on the east, and on the right bank of the Ghogra, are extensive ruins, said to be those of the fort of Rama, king of Oude hero of the Ramayana, and otherwise highly celebrated in the mythological and romantic legends of India. Buchanan observes, that the heaps of bricks although much seems to have been carried away by the river extend a great way that is, more than a mile in length and more than half a mile in width and that, although vast quantities of materials have been removed to build the Mahomedan Ayodha or Fyzabad, yet the ruins in many parts retain a very considerable elevation nor is there any reason to doubt that the structure to which they belonged has been very great when we consider that it has been ruined for above 2 000 years. The ruins still bear the name of Hanqurb or 'Fort of Rama', the most remarkable spot in which is that from which according to the legend Rama took his flight to heaven carrying with him the people of his city in consequence of which it remained desolate until repopled by Vikramaditya, king of Oojein, half a century before the Christian era, and by him embellished with 369 temples. Not the smallest traces of these temples however now remain and according to native tradition they were demolished by Aurungzebe who built a mosque on part of the site. The falsehood of the tradition is, however, proved by an inscription on the wall of the mosque, attributing the work to the conqueror Babur, from whom Aurungzebe was fifth in descent. The mosque is embellished with fourteen columns of only five or six feet in height, but of very elaborate and tasteful workmanship, said to have been taken from the ruins of the Hindoo fane, to which they had been given by the monkey general Hanuman who had brought them from Lanka or Ceylon. Altogether however the remains of antiquity in the vicinity of this renowned capital must give a very low idea of the state of art and civilization of the Hindoos at a remote period. A quadrangular coffer of stone, whitewashed, five ellis long, four broad, and protruding five or six inches above ground, is pointed out as

the cradle in which Rama was born, as the seventh avatar of Vishnu and is accordingly abundantly honoured by the pilgrimages and devotions of the Hindus. Ayodha or Oude is considered by the best authorities to be the most ancient city in Hindostan and Prinsep mentions that some of its coins in the cabinet of the Asiatic Society of Bengal are of such extreme antiquity that the characters in which their legends are graven are totally unknown. According to Elphinstone, from thence the princes of all other Indian countries are sprung. Buchanan conjectures that it was founded by Brahmins, whom he considers as an immigrant race more advanced in civilization than the indigenous Indians. 'These personages came from western Asia, introducing with them the Sanskrit language generally admitted to be radically the same with the Persian dialect while the languages spoken among all the rude tribes that inhabit the fastnesses of India, and which are, probably, remains of its ancient tongue, have no sort of analogy to the languages of the West. This author supposes the city to have been founded by Vaisnavata, one of this race, about 1366 years before the Christian era. He considers that its renowned ruler Rama perished a c 775 involved in the destruction of his city by the hostile confederacy of his sons that being rebuilt it suffered a similar fate under the reign of Vridhalala, a c 512 and having lain for centuries desolate was rebuilt a c 87 by Vikramaditya, the celebrated king of Cojen. Tod however and Wilford, fond of large numbers, place the foundation of Ayodha in an era more than 2000 years B.C. The former writer states, without comment a tradition that Lucknow distant eighty miles from the present city of Oude, was formerly one of its suburbs. The great decline of Oude is of comparatively recent date, as it is described in the Ayeen Akbery as one of the largest cities of Hindostan, and it is further stated. In ancient times this city is said to have measured 148 coes [perhaps 200 miles] in length and thirty six coes in breadth. It is esteemed one of the most sacred places of antiquity. With the haveli or municipal district attached the city is assessed in the Ayeen Akbery at 50 209 rupees, a sum so moderate as to throw discredit on the previous statement of its being one of the greatest cities of India. The present population according to Butler is 8 000 including 500 Mussulmans. Distant E. from Lucknow 75 miles, N from Allahabad 95 Lat. 26 47 long 82 11

**OUDEYPORE**—See **COONTOON**.

**ODUNPOOR**, in the territory of Oude, a town on the route by Shahabad from Lucknow to Shahjehanpore 14 miles S of the latter. It is situated on the north western frontier towards the British district of Shahjehanpore and according to Heber, is what would be called a moderate-sized market-town

in England." It is situate close to an extensive grove of mango-trees, in the midst of which is a shrine of Siva. The surrounding country is rather well cultivated, especially under cotton. Lat. 27 42, long 86°

**OUNLA**—See **AMOLAGANT**.

**OUR**—A town in the Rajpoot state of Jodhpore situate on the right bank of the Sookree river and 64 miles S.S.W. from Jodhpore Lat. 25 28' long 73 50'

**OURAD**—A town in Hyderabad, or the territory of the Nizam 84 miles N.W. by W. from Hyderabad and 109 miles E.N.E. from Sholapoor Lat. 18 14 long 77 29'

**OURAHEE**—A town in the territory of Oude, situate on the left bank of the Ghogra river and 60 miles N.N.E. from Lucknow Lat. 27 39', long 81 28'

**OURLAGONDA**—A town in Hyderabad, or the territory of the Nizam 92 miles E. from Hyderabad and 76 miles N.W. by N. from Guntoor Lat. 17 14 long 79 54'

**OURUNGA**—A river rising in lat. 20 37 long 73 38' on the western slope of the Syadree range of mountains, and flowing in a westerly direction for thirty three miles through the native states of the Daung rajahs and Banada, and fifteen miles through the British district of Surat, falls into the Arabian Sea, in lat. 20 36' long 72 56'

**OWEN ISLAND**—One of the islands forming the Mergu Archipelago. It is about four miles in diameter and its centre is in lat. 11 15' long 98 21

**OWLUA KHASS**—A town in the British district of Seron hent gov. of Bengal 22 miles S.E. of Bettiah Lat. 26 33', long 84 49

**OWNCHUH**, in the British district of Myspoorie hent gov. of the N.W. Provinces, a town 13 miles N.W. of the town of Mynpoorie Lat. 27 19', long 78 53

**OWRA**—A town in one of the recently sequestered districts of Hyderabad or dominions of the Nizam situate 59 miles N.F. from Sholapoor and 145 miles N.W. from Hyderabad Lat. 18 16, long. 76 34

## P

**PAAREE**—A town in the Rajpoot state of Seerocoe five miles S.E. from Seerocoe, and 93 miles E. by W. from Jodhpore Lat. 25, long 72° 51'

**PA BANG**—A town of Burmah 130 miles E. by N. from Prome, and 109 miles N.N.E. from Pegu. Lat. 19 8 long 96 59'

**PABUL**—A town in the British district of Poona prandency of Bombay 26 miles N.N.E. of Poona Lat. 18 50' long 74 8

**PABUR**, a river of Bussahir has its source close to the Burenda Pass, in a lake called Charanai, about a mile in circuit, whence the

stream rushes forth over a perpendicular rock forming a fine cascade. Above are enormous banks of snow 80 or 100 feet in thickness which have crumbled, and partly fallen outward into the lake. This spot is in lat. 31° 27' long 78° 12' and has an elevation of 13,839 feet above the sea. The river holds a southerly course of between ten and eleven miles to the confluence of the Sipoon, at an elevation of 8,344 feet above the sea, and in lat. 31° 18' long 78° 4', and in that distance has the enormous average fall of 545 feet per mile. Continuing its course in the same direction for about eleven miles to Chergaon it there receives at an elevation of 5,985 feet, and in lat. 31° 13' long 77° 56' the Andryes flowing from the north west. For this last portion of its course it has an average fall of 254 feet per mile. The valley through which it thenceforth holds its way is the finest part of Bussalur being beautiful fertile and highly cultivated, and from the amount of its elevation above the sea, enjoying a genial climate. The river flows still in a south westerly direction between ten and eleven miles to Rooron lat. 31° 12' long 77° 48' and at an elevation of 5,100 feet there it takes a southerly direction of about twenty five miles to its confluence with the river Tona, in lat. 30° 56' long 77° 54' after a total course of about fifty eight miles. Fraser describes it as a large clear and rapid stream at Rangarh about fifteen miles above its mouth.

**PABYA RIVER**—An offset of the Yennan one of the branches of the Irawaddy the chief river of Burmah. The Pabya runs in a south easterly direction intersecting a portion of the valley lying between the Irawaddy and the Syang and falls into the latter after a course of about fifty miles in lat. 18° 58' long 96° 30'.

**PACHAMRAT** a district of the territory of Oude is bounded on the north-east by the river Ghogra, dividing it from the British district Goruckpore on the south east by the district of Aldemaun on the south west by Sultanpore and on the west by Bainswara. Its centre is in about lat. 26° 50' long 81° 53'.

**PACHETE** a British district in the lieutenant-governor of Bengal, is denominated from the town of the same name. It is under the jurisdiction of the Governor-General's agent for the south west frontier. It is bounded on the north by the British districts Rangarh and Beerbhoom on the east by the British district Bancoora on the south by the British districts Poorania, Barabhoon, and Sughbhoon on the west by the British district Chota Nagpore. It lies between lat. 22° 56'—23° 54' long 85° 46'—87° 10' is 105 miles in length from north-east to south west, and ninety five in breadth. The area is 4,792 square miles. The information respecting its aspect and physical geography is very scanty. Jaquemont, who traversed the northern part from east to west, describes the country as marked by hills from 400 to 600 feet high over-run with forest or

jungle, in some places intersected with plains or open vales of limited extent. About lat. 23° 35' long 85° 50' near the town of Pacheta, and skirted by the river Damonda he observed a mountain having as he conjectured, an elevation of 2,600 or 3,000 feet. About fifteen miles more south west is Ragonathpore and near the centre of the district the same traveller examined several hills, the rocky formation of which was of granite, the elevation about 900 feet. In the vales and plains rice is the staple crop interspersed with oil-seeds and some other products of less importance but much of the country now covered with jungle or waste, bears marks of having been formerly cultivated. Its present condition probably arises from the injudicious rural economy of the natives, under which the soil is cropped until exhausted and then neglected until the rust of many years gives hope of its again becoming productive. The geological formation is described by Jaquemont as generally primitive consisting of either granite gneiss, or syenite. In the northern part of the district however according to the received theories, it appears to be of a later era, coal being found near Jaria in lat. 23° 44' long 86° 25' and iron ore existing in great abundance at a short distance. The south western part appears to be a mass of mountains and ravines, connected with the adjacent highlands of Chota Nagpore. The district is traversed by some considerable rivers the source of which being to the south east, indicates the general slope of the country to be in that direction. Among the principal of these may be enumerated the Damonda the Soobunreka, and the Coswa. Many torrents discharge themselves into these greater streams, the country being fully under the influence of the periodical rains and the drainage is good, in consequence of the rapid declivity of the surface. This tract is considered to have been considerably improved since its incorporation with the dominions of the East-India Company villages formerly deserted having become re-inhabited, many more having been built and culture much extended. An investigation some time since took place into an alleged case of suttee reported to have been authorised by the rajah of Pacheta, a petty potentate of hill jungle in this district but the inquiry resulted in the acquittal of the rajah. There does not appear to be any collection of residences which can be properly termed a town. Pacheta, regarded as the capital Ragonathpore Jajda, and Chas, are noticed under their respective names in the alphabetical arrangement. The great trunk road from south east to north west from Calcutta to the North West Provinces, through Burdwan passes through the northern part of the district, the other route between the capital and the North-West Provinces through Bancoora and Hazareebagh, lies through the middle of the district. The only remaining route of any importance is from east to west, from Bancoora, through Jajda, to Chota Nagpore. Pacheta is within

# PAC—PAH

the limits of the dewanny granted to the British in 1785 by Shah Alum, emperor of Delhi.

**PACHETE**, reputed the principal place of the British district of the same name a ruined town six miles south west of the right bank of the river Damocoda. It is situate midway between the new and old line of road from Calcutta to the N W Provinces and about ten miles from each line. Distance from Calcutta N W, 150 miles. Lat. 23 36 long 86 50'

**PACHIPONTA**—A town in the British district of Vizagapatam presidency of Madras, 56 miles N by W of Vizagapatam. Lat. 13 30 long 83 10'

**PACKBURRAH** in the British district of Moradabad, lieut. gov. of the N W Provinces, a village on the route from the town of Moradabad to Mozuffurnugger, and six miles W of the former place. It is situate in an open country partially cultivated. Distant N W from Calcutta 590 miles. Lat. 28 50', long 78 44'

**PACTNA**, in the British district of Kumaon lieut. gov. of the N W Provinces, a town on the route from Almora to Pilibheet, 19 miles S E of the former. Lat. 29 21, long 79 49'

**PADRA**—A town in Guzerat or domions of the Gulowar, situate eight miles W S W from Baroda, and 36 miles N by E from Broach. Lat. 22 12 long 72 7'

**PADROO**—A town in the Rajpoot state of Jodhpoor situate 11 miles E from the left bank of the Loones river and 82 miles S W from Jodhpoor. Lat. 25 32, long 74 11'

**PADSHAHGANJ** in the district of Sultanpore, territory of Oude, a village two miles S W of the cantonment of Sultanpore. Here a foydar or commandant of police resides in a square building of masonry. Butler estimates the population at 300 of whom 100 are Mussulmans. Lat. 26 18', long 81 59'

**PADSHAH MAHAL** in the British district of Subarnpore a ruined palace built by Shahjehan is situate at the spot where the river Jumna enters the plain and opposite the point where the Delhi Canal passes off to the south west. Distant N W from Calcutta 1 030 miles, elevation above the sea 1,276 feet. Lat. 30 20', long 77 39'

**PADSEAHPOOR**, in the British district of Goorgoon lieut. gov. of the N W Provinces, a small town on the route from Hansi to Muttra, by Goorgoon distant 25 miles S W of Delhi. It is situate among rocky hills, and has still a bazar though much fallen away from its state during the time of the Patai sovereigns of Delhi. Lat. 28 22' long 77 6'

**PADSEAHPOOR**.—A town in the British district of Belgaum, presidency of Bombay 21 miles N E by N of Belgaum. Lat. 16 5, long 74 48'

**PADSEAHPOOR**.—See SHANPUR.

**PADUR**.—A town in the British district of Combaotoor presidency of Madras, 73 miles N E. of Combaotoor. Lat. 11 41, long 77 49'

**PAGHAM MEW**—A town of Burmah, situate on the left bank of the Irrawady river and 99 miles S W by W from Ava. According to Hamilton this city, in remote times, was the residence of a long dynasty of kings, and is still famous for its numerous temples, to count which is among the proverbial impossibilities of the Burmese. Lat. 21 7' long 94 42'

**PAGODA POINT**—The southernmost extremity of the district of Bassein province of Pegue, named from a pagoda standing upon it. Lat. 15 08' long 94 18'

**PAGODA POINT**—A prominent headland on the coast of Tenasserim at the entrance of the small river on which is situate the town of Amherst. Lat. 16 5 long 97 35'

**PAHAREE**—See PUEHAREE.

**PAHARGURH** in the territory of Gwalior or possessions of Sondia a family, a town 28 miles S W of the fort of Gwalior, situate on a sandstone hill whence its name. Lat. 26 11, long 77 44'

**PAHARPOOR** in the Daman division of the Punjab a town situate on the right bank of the Indus 186 miles S by W of the town of Pesbawar. Lat. 32 8 long 71 3'

**PAHARPOOR**, in the British district of Furruckabad lieut. gov. of the N W Provinces a village on the route from the cantonment of Bareilly to that of Futehgurh and seven miles N E of the latter. The road in this part of the route is good the country level fertile, and very well cultivated. Lat. 27 28, long 79 41'

**PAHLADPOOR**, in the British district of Budaon lieut. gov. of the N W Provinces, a village on the route from Agra to Bareilly and 68 miles N E of the former. It is situate in a depressed place, formerly the bed of the Ganges, but now deserted by the stream and dry. Lat. 27 52' long 78 46'

**PAHLUNPORE**—A petty state under the political superintendence of the presidency of Bombay, comprising the divisions of Dhandar, Deesa, and Dhuneyra. It lies between lat. 23 57'—24 41 and long 71 51'—72 45'. It is bounded on the north by the Rajpoot principality of Sorohie, on the south by the Puttan district on the east by the Guicowar district of Keyralla, and by that of Danna and on the west by the petty chieftainship of Thuraid. It contains about 300 villages. The rivers that water the Pahlunpore territory are the Bunasa, Surraswatee, and Numrodakee, with other small streams. They all take their rise from the mountains in the north-east, and fall into or disappear near the Bunn. The principal of them is the Bunasa, on the banks of which is the Deesa canton

## PAH.

ment. There is but one good road through the district, but it is of some importance, being the route by which most of the commerce from Hindostan, including the great mart of Pallee finds its way to the different bouders on the Cutch, Kattywar and Guzerat coasts and again from those bouders to the north.

The number of inhabitants is about 130 000 of these, one-seventh are Musulmans, the rest Hindoos. There appears to be a remarkable disparity between the numbers of male and female children and from the paucity of the latter it has been suspected that female infanticide is practised. Major Brown, who is guined into the subject in 1845 acquitted the people of this horrible charge and assigned the following three causes for the disparity above adverted to first, early marriages, under which female children were regarded as adults secondly the marriage of females with foreigners, thirdly an excess of male births. This statement does not, however appear altogether conclusive. If the practice of early marriage caused a diminution of the apparent number of female children by throwing them into the class of adults, it must, at the same time, have unduly increased the latter class, and created therein an apparent disparity of females over males. The second cause, if it existed to any great extent, would to that extent account for the disparity but its existence is asserted only not proved and if proved, would further require to be shown that it operates so as to withdraw a large number of females from the country not after attained maturity but during the period of childhood. So, also with the third alleged cause it is not proved and it is very naturally asked, Why should this great preponderance of male over female births occur in Pahlunpore rather than anywhere else? There is certainly no reason *a priori* to conclude that the district is in this respect an exception to the rest of the world. Another British officer however, Captain Leake, concurs in the belief that infanticide is not practised and the result of the latest inquiries (1848) is only the conclusion, that no light can be thrown upon the subject.

The Pahlunpore state pays no tribute of any kind to the British government, but merely the expenses of its agent amounting to 500 rupees per mensem but it pays 60 000 rupees yearly tribute to the Guicowar state. The revenues of the state including land-tax and customs, average nearly 800 000 rupees per annum the disbursements, including civil, military and agency charges, allowances to the late Shumshere Khan's family and relatives of the present chief amount to about 200 000 rupees per annum. If to this be added the tribute of 50 000 rupees to the Guicowar there remains a sum of about 50 000 rupees for the expenses of the chief and his household. In 1844 a criminal court for Pahlunpore and the neighbouring petty states was established, on the principle of the political agent's court in Kattywar and the Myhee and Bowa Canons.

The only engagement with neighbouring states is with the petty Rajpoot district Daunta, joining the eastern boundary of Pahlunpore. In 1819, that state having suffered severely from the depredations and incursions of the Coolies of the neighbouring districts north and east of it, its chief sought the assistance of Pahlunpore. It was granted, on an agreement between the two states, that for the support to be afforded, Pahlunpore should receive seven annas in the rupee of all the revenue collected in Daunta. The contract was approved and confirmed by the British government, and still remains in force. The native force consists of 115 horsemen and 416 foot-soldiers, they are stationed on the frontiers and in different villages as police to protect the district from incursions of the Coolies and Bheels of the neighbouring states, and to afford protection generally. From the tranquillity which has usually prevailed it is to be inferred that they are efficient. The only troops subsidised by this state are 150 (ulcowar horse and 100 Guicowar foot. They consist generally of foreigners and are commanded by jemadars, who receive thirty rupees per mensem for each horseman and ten rupees per mensem for each foot soldier all expenses of arms and horses being included in these respective amounts. They were first raised in 1817. They are bound to serve wherever they are ordered but the foot-soldiers generally remain stationed in the town of Pahlunpore together with a portion of the horsemen for the protection of its different gates. The rest of the horsemen are posted in detachments on the frontier most open to the incursions of plunderers. Formerly an officer receiving 600 rupees per mensem was appointed to command them, but they are now under the charge of the political superintendent.

Our first connection with this state was in 1813. For some years previously the chief power had been in the hands of a faction of Soudes jemadars, who in 1812 murdered the then reigning dewan Peeruz Khan when out hunting under suspicion that he was about to restrict their authority. Having committed this act, they offered the dewanship to his only son, Futeh Khan the present chief and then only thirteen years of age. By the advice of his mother he refused the offer and through his late father's karkaroes, petitioned the Guicowar and British governments for assistance and protection from his father's murderers. In the mean time the jemadars, having seized and placed him in strict confinement, invited his uncle, Shumshere Khan then chief of the district of Deesa and Dhuneyra, to Pahlunpore, to undertake the management of affairs. This chief, who had been superseded in the dewanship by Peeruz Khan eighteen years before, although he had since constantly waged a petty war with Pahlunpore, and sometimes with success, had no hand in the death of the dewan. He however, accepted the offer made to him, but in the mean time, inter-

sumee in favour of the rightful heir being considered necessary by both the British and Guicowar governments, Captain Carnac, then Resident at Baroda, proceeded to Pahlunpore, with a force furnished by those governments, under the command of General Holmes. On the road, information was received that, on the approach of this force to Pahlunpore, the jemadars intended to carry off Futeh Khan, in order that his presence might give a sanction in the country to any lawless measures which it might suit their interest to pursue. In this design however Shumshere Khan did not participate, and he was afterwards fully exonerated from all suspicion. In hopes of preventing the meditated act, the force marched with all practicable speed to Pahlunpore, which was threatened with assault unless Futeh Khan was immediately given up. Thereupon he was sent to the British camp and Shumshere Khan shortly afterwards surrendered himself. Captain Carnac intimated to the rebellious jemadars that if they submitted, their personal safety would be insured and anything they had to urge in defence of their late proceedings would be attended to, but, fearing the displeasure of the British government, they fled with a few followers, to the hills whence, from the great strength of the country and the smallness of the force disposable for the purpose it was not considered advisable to follow them. The town was given up without resistance.

In consequence of Futeh Khan's youth and inexperience, it became necessary to ascertain if any members of his family were fit to superintend the affairs of the state during his minority. After a strict examination none were found to whom the trust could safely be committed, all being deficient in intellect, education or habits of business or from other causes incapable. Under these circumstances, the choice of a guardian became a point of some difficulty as the interposition of the Guicowar's authority was a measure which it was most desirable to avert. After some consideration, it was deemed the most advisable course, with a view to the suppression of anarchy and intestine feuds, and to the gratification as far as practicable of the feelings of all parties, to unite the interests of the young chief Futeh Khan with those of his uncle Shumshere Khan. The management of affairs during the minority of the young chief was accordingly offered to Shumshere Khan. He at first refused and urged his priority of pretension to the gaddue over the family of the late chief. Into this claim it consequently became requisite to inquire, and the result of the researches instituted by Captain Carnac was a conviction that it was untenable. Shumshere Khan after a time acquiesced in the decision and finally after much discussion it was agreed that he should be associated with Futeh Khan and, having no male issue of his own, that he should adopt the latter as his son, and make him heir to all his possessions, including the districts of

Doms and Dhuneyra with the exception, in the event of a son being subsequently born to him, of a small provision for such offspring. The differences which prevailed having been apparently settled by this compromise, agreements were signed by the respective parties before Captain Carnac and on the 22nd December 1818 the ceremony of investing Futeh Khan with the rule of Pahlunpore, and his adoption by Shumshere Khan, took place, in presence of that officer and several other gentlemen, as well as the principal people of the place, to whom the arrangement appeared to be entirely agreeable. To make the tie more binding it was afterwards agreed that Shumshere Khan should give his daughter in marriage to Futeh Khan. From this date until 1816 although dissensions were not unknown it does not appear they were considered of sufficient moment to require the interference of the British government but at the latter end of that year Futeh Khan complained to the resident at Baroda of his uncle's conduct in alienating the revenues of the state, and other malpractices. Lieutenant Robertson was thereupon deputed to inquire into the alleged grievances and both parties being summoned to Sidpore (eighteen miles from Pahlunpore) a lengthened investigation of the different charges took place and it was fully proved that Shumshere Khan had on several occasions departed from his agreement as guaranteed by the British government. It appeared that since he had held the management of affairs the debts of the state had greatly increased that the Guicowar's tribute of 50 000 rupees had remained unpaid since 1813 and that within three years last preceding Shumshere Khan had without the signature or permission of Futeh Khan, given away nearly 100 villages, to waredars, distant relations of his own and to others, in order to attach them to his person thereby alienating from the state nearly 50 000 rupees, or upwards of one-fifth of its yearly revenue. It was also reported to the agent, on good authority, that Shumshere Khan had threatened to take the life of the young chief should he be deprived of the management of affairs. Lieutenant Robertson having received his instructions from the resident, then addressed a letter to Shumshere Khan in the name of the British government, informing him that, in consequence of his having failed in administering the affairs of the state according to his agreement, as shown in the foregoing inquiry, it was deemed necessary with a view to the security of the rights and interests of Futeh Khan to divest him (Shumshere) of all authority in the state and that any resistance to this measure would deprive him of all claim to consideration and put an end to any chance of retaining his authority over Doms. On receiving this letter Shumshere Khan, as a last resource, opened a private communication with Futeh Khan, trying to persuade him that the British government, in interfering between them, merely

wished to benefit itself at their joint expense, and that Futteh Khan would thereby become a mere pensioner on that government. He suggested a restoration of the relations of friendship for their mutual benefit, and proposed at once to carry into effect the marriage of his daughter with Futteh Khan, a measure long before agreed on but which had been delayed by the dissensions of the contracting parties. These solicitations and promises seem to have answered their intended purpose, for Futteh Khan secretly left the agent's camp in company with Shumshere Khan, and proceeded with him and his followers to Pahlunpore. On this Lieutenant Robertson returned to Baroda, and a field force under Colonel Elington was detached to Pahlunpore to effect a settlement of its affairs, Captain Miles being appointed to accompany it and conduct the negotiations.

On the 10th October, 1817 the force having arrived in the neighbourhood of Pahlunpore it was attacked by the troops under Shumshere Khan who, after a slight skirmish retreated within the walls. The town was then assaulted and carried. Shumshere Khan and all his followers retreating towards the hills northward taking Futteh Khan with them. Detachments from the British force having followed the fugitives, Shumshere Khan took shelter in the foreign territory of Neesaj and Futteh Khan shortly afterwards came to Captain Miles and submitted himself to the British government, who taking into consideration his youth and inexperience, and being aware that he had acted by the advice and influence of others, refrained from visiting his error in the manner which he might reasonably have expected. Of his inability to conduct his own affairs, he himself however soon became painfully conscious for a few days after his return, he addressed a letter, through Captain Miles to the Guicowar requesting that prince to use his interest with the British government to allow him an English gentleman to superintend his concerns, and also asking that the Guicowar government would depute a respectable native as vakool, to assist him in his revenue accounts, and make arrangements for the payment of the yearly tribute to that state. Both requests were consented to, and after some negotiation, the villages unlawfully alienated from the state by Shumshere Khan having been resumed, articles of agreement in supercession of all former treaties were sealed and delivered by Futteh Khan to Captain Miles, and afterwards approved and confirmed by the British and Guicowar governments, with the exception of one article, the number of troops to be subsidised was reduced from 250 to 150, the state being considered unequal to bearing the expense of the greater force. Under this agreement, Futteh Khan engaged to hold no communication with Shumshere Khan or his adherents. Captain Miles was shortly after confirmed in his appointment as political agent, to superintend the affairs of Pahlunpore. In 1819,

Shumshere Khan having given himself up nine villages, whose net revenue amounted to 25,000 rupees per annum, were appropriated for his support, to revert to the state at his death. This event happened in 1834, when provision was made for his widows and servants, to the amount of 6,000 rupees yearly in addition to the revenue of four villages amounting to 6,000 rupees making a total of 12,000 rupees. His daughter had been married to Futteh Khan shortly after his submission. By the arrangement which has thus existed with this state since 1817 the British government exercises a control over its finances, the different charges and expenditure being fixed, and no extra disbursement of any heavy amount being admitted without its special sanction. All interference, however with its internal affairs is limited to recommending measures when called for leaving the execution of them to the authorities.

The interference of the British government has been of the greatest advantage to this petty state. From the day a British agent was placed in charge of its affairs, it has continued to prosper instead of being a scene of anarchy and confusion, ruled as it often had been by a band of foreign mercenaries, and overwhelmed with debts, it is now in a flourishing condition in the enjoyment of perfect immunity both from foreign oppression and internal dissension and unembarrassed by oppressive debts.

The present dewan of Pahlunpore derives his descent from a tribe of Afghans, who occupied Behar in the reign of Hoomayon emperor of Delhi. In 1682, Futteh Khan, one of his ancestors, was dewan of Shalore, now a large district of Marwar adjoining Pahlunpore. During his dewanship he received from the emperor of Delhi, in gift, the districts of Pahlunpore, Deesa, and Sachore. He died in 1688, leaving one only son, by name Peer Khan, whose claim to the dewanship was set aside by his uncle Kurnaul Khan on the plea of incapacity. During Kurnaul Khan's reign and in the year 1698, Shalore and Sachore were resigned by him to Marwar. Pahlunpore and Deesa only were retained in the family, who then thence to reside at the former place, which from this date became the seat of government. In 1704 Peerose Khan succeeded his father Kurnaul Khan. Peer Khan's claim having been again passed over he applied to Delhi, and obtained a sannd of investiture from the royal court for his patrimonial rights. By some mistake, or through the intrigues of Peerose Khan's vakool who also went to Delhi to support his master's rights (it is said indeed, that the writer of the sannd was bribed by him), the name of Peerose Khan was inserted in the sannd instead of that of Peer Khan, unknown to the court. Thus lost the latter his rights; for Peerose Khan, standing on the letter of the sannd refused to resign, and Peer Khan was eventually prevented not to urge his claim, and remained satisfied with the grant of ten or

# PAH—PAL.

twelve villages for his maintenance. He died in 1736, leaving an only son, named Futeh Khan who, at his decease, left three sons—Tay Khan, Peerose Khan (the present chief's father, who was murdered in 1812) and Mahomed Khan. Peerose Khan the second son some years afterwards laid claim to the chieftanship, but for a long period without effect, the other branch of the family being too powerful.

Peerose Khan, the son of Kumaul Khan died in 1721, and was succeeded by his son Kurreen Khan who, in 1738 was followed by his son Par Khan. In 1743 Par Khan having died childless, was succeeded by his uncle Bhadur Khan, son of Peerose Khan and brother to Kurreen Khan. In 1781 Sulteen Khan his son, reigned, and in 1784 was succeeded by his son Sheer Khan. In 1791 Sheer Khan having died childless was succeeded by his nephew Moohariz Khan through the intrigues of his mother a sister of Sheer Khan's, but he only reigned for about two years, being superseded by Shumabere Khan of whom mention has already been made. Shumabere Khan was a grandson of one of the brothers of Bhadur Khan and was assisted in the usurpation by such of the chiefs of the district as were hostile to Moohariz Khan. During the disturbances which followed, Peerose Khan, the son of Futeh Khan whose claims had so long been overlooked now urged them afresh and Shumabere Khan having fled to Deesa, his rival was installed in 1794 with it is alleged the unanimous voices of the people. The murder of Peerose Khan in 1812 was followed by the events which have been already recounted.

PAHLUNPORE in Guzerat, a town the capital of the petty state of the same name and situate on the route from Neemuch to Deesa. It is surrounded by a wall, and has some trade and manufactures there being within it many artificers of various kinds, and shopkeepers. The population is estimated at 50,000. The chief, styled Nawab, who is also chief of Deesa, is descended from a tribe of Afghans settled in Behar in the time of Humayun, emperor of Delhi, and established in their present possessions in the reign of Aurangzebe. Distance from Neemuch, W 160 miles from Deesa, S E, 18 miles from Ahmedabad, N., 80 miles. Lat. 24 12 long 73° 28'

PAHTUN—A town in the British province of Sattara, presidency of Bombay, 23 miles S.S.W. of Sattara. Lat. 17 22, long 78° 55'

PAL.—A town in the British territory of Tanasserim, 108 miles N.N.W. of Tanasserim. Lat. 15° 20', long. 98° 36'

PALAKA in the Daman division of the Punjab, a town situated 38 miles W from the right bank of the Indus, 69 miles W by S. of the town of Mooltan. Lat. 29 57, long 70° 34'.

PAIK THOUNG—A town in the British

territory of Tanasserim, 51 miles N.E. by N of Moulmein. Lat. 17 5' long 98 8

PAIMSAH KA PURWA in the territory of Oude, a village on the route from Lucknow to Sultanpore 70 miles S.E. of the former. It is well provided with good water. Lat. 28 25, long 81 40'

PAINTEE, in the British district of Moradabad, lieut. gov. of the N.W. Provinces, a village on the route from the town of Moradabad to Moradnuggur and nine miles W of the former place. There is open ground for encamping and water can be obtained from a good well. The surrounding country is open and partially cultivated and the road in this part of the route is good. Distant N.W. from Calcutta 897 miles. Lat. 28 51 long 78 41

PAIRA—A river rising in lat. 19 33' long 78 39 on the eastern slope of the Western Ghats, and flowing through the Ahmednuggur collectorate in an easterly direction for 105 miles falls into the Godavary on the right side, near the town of Toka, in lat. 19 36 long 75 8'

PAKANGGOLO—A town in Nepal, situate 18 miles E from the left bank of the Arun river and 111 miles E by N from Khatmandoo. Lat. 27 59, long 87 8'

PAK CHAN—A town in the British territory of Tanasserim 90 miles S by W of Tanasserim. Lat. 10 51, long 98 42

PAKOLIYA in the British district of Goruckpore, lieut. gov. of the N.W. Provinces, a petty town on a small feeder of the river Koyane. Buchanan states the number of its houses at 100 and consequently if six persons be assigned to each its population may be taken at 600. Distant 46 miles W of Goruckpore cantonment. Lat. 26 48, long 82 34'

PAKUL.—See BAKUL

PAL, in the Rajpoot state of Jodhpore, a village on the route from Baletra to the town of Jodhpore and five miles S of the latter. It is situate at the north eastern base of a low rocky ridge. The road in this part of the route is tolerably good and passes through a wooded tract. Lat. 26 16, long 78 4

PALAKEE in the Sinde Sagur Doab division of the Punjab, a town situate 36 miles W from the right bank of the Jhelum, 106 miles N.W. by N of the town of Lahore. Lat. 33 8' long 73 17

PALAMOW a British district of Bengal, is bounded on the north by those of Behar and Rangpur or Haorabagh on the east by the British district last named on the south by that of Chota Nagpore on the south-west by the British district Burgoonah and on the west by that of Murshidpur. It lies between lat. 23 12'—24° 22' long 85 16'—84 31' is eighty-eight miles in length from south-east to north-west, and seventy in breadth, the area is 8,463 square miles. It is an ill-explored

## PAL.

country and little comparatively is known of it, but that it is rough and irregular. Torrents are numerous in the rainy season and most of them discharge themselves into the river Koel which taking a direction north-west, passes into the British district of Behar and falls into the Son on the right side in lat. 24° 33' long 83° 58' having a total length of course of about 130 miles. The torrents quickly disappear as the dry season advances. To this, however the Koel is an exception retaining a continuous stream at all times. The mountains are everywhere covered with forest or jungle, containing a great variety of trees and shrubs amongst them the sal (*Shorea robusta*). The *Mimosa catechu*, denominated by the natives khair is very abundant and the gum catechu or terra Japonica, which is largely prepared from it, is regarded the best in India. The jungly valleys and mountains harbour the gaour a bovine quadruped greatly exceeding ordinary kine in dimensions, a full grown bull being above eighteen hands high. It is shy but when brought to bay very fierce and though many have been taken young all attempts to domesticate them have failed. There are also in those valleys the wild buffalo, elk nyliou (*Antelope picta*) various kinds of deer and antelopes. Tigers are very numerous, and lions have sometimes been destroyed. The mineral resources of the district are of considerable value and utility. At Smra, on the right bank of the river Koel in lat. 24° 5' long 84° 3' are extensive fields of good coal and iron-ore in inexhaustible quantities. Some other parts contain valuable coal fields and iron mines, and the Koel might, it is said be made available for navigation to a considerable extent. The only places which can with any propriety be denominated towns, are Gontaree, near the northern frontier, and Palamow in the middle of the district. There are however numerous villages and hamlets dispersed over it, yet altogether it is very thinly peopled. Nothing has been stated as to its separate population but the amount, united with that of Chota Nagpore, is computed to be 482,000. Its area is 3,468 square miles.

This district is part of the territory under the administration of the political agent for the north western frontier and commissioner for Chota Nagpore, to whose jurisdiction it was transferred in 1833, subsequently to an insurrection commencing in the preceding year and which overspread the whole of this district, and the adjoining one of Chota Nagpore. A strong military force was employed to reduce the disturbed districts to obedience, and subsequently order has prevailed.

**PALAMOW**—The principal place of the British district of the same name situate five miles east from the river Koel, amidst mountains containing coal and iron. Distance S.W. from Patna (Behar) 145 miles. Lat. 23° 50', long 84° 1'

**PALAB**—A river rising in the territory of

Mysore in lat. 13° 20' long. 78° 2'. It holds its course directly but generally in a south-east direction for fifty five miles, through Mysore, when it crosses the frontier into the British district of North Arcot, thirty miles below which point it passes through the gorge of the Eastern Ghats, in lat. 12° 41' long 78° 36' about eighty five miles from its source. Quitting the hills it holds a course generally east for eighty seven miles and passes by Vellore and Arcot, to lat. 12° 48' long 79° 43' where it crosses into the British district of Chingleput through which it continues its direction south-eastward for forty eight miles, to its fall into the Bay of Bengal, on the Coromandel coast in lat. 12° 25' long 80° 13' its total length of course being about 220 miles. The entrance of the river Palar or Palah about three and a half or four miles to the southward of Madras, is contracted by a bar or narrow ridge of sand made of which the river becomes of considerable width. During the rainy seasons it has a considerable volume of water, but at other times is completely dry though water may always be obtained by digging in its bed. A project has been sanctioned for constructing an aqueduct or dam across this river in the vicinity of Arcot, for the purpose of insuring a supply of water to the tanks on both sides of the river in the districts of Chingleput and North Arcot.

**PALAVÉNUM**—A town in the British district of Chingleput, presidency of Madras, 11 miles S.W. of Madras. Lat. 12° 55', long 80° 15'

**PALCOONDA**—See **PALLAKONDA**

**PALDEO** in Bundelcund a small state, or rather jaghire granted by the East-India Company to the commandant of the fortress of Kalleenjur at the time of its surrender and still held by his descendant. It is stated to have an area of twenty-eight square miles, fourteen villages, a population of 3,200 and an annual revenue of 10,000 rupees, or 1,000. The jagirdar maintains a force of 100 infantry. Paldeo the principal place, is situate in a mountainous tract 67 miles S.W. of Allahabad. Lat. 25° 6' long 80° 51'

**PALÉE**, in the British district of Georgetown, lieutenant gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name situate at the eastern base of a rocky range formed of sandstones largely intermixed with quartz. Distance S. from Delhi 13 miles. Lat. 28° 23' long 77° 18'

**PALEEKHEVRUH** or **PALEKHAIIRA**.—A town in the British district of Muttra, lieutenant gov. of the N.W. Provinces. Lat. 27° 24', long 77° 31'

**PALGHAT** in the British district of Malabar presidency of Madras, a town with a struggling town on the north or right side of the Palam, the principal feeder of the river of Ponany. It is situate in a beautiful country in that great depression in the Western Ghats,

## PAN

trict of Candalah, presidency of Bombay 54 miles E. by N of Malgaum Lat. 20 38' long 75 20'

PANCHU, in the British district of Kumaon, lieut. gov. of the N.W. Provinces, a village in the Bhotia subdivision of Juvahir, on the route to Hindos or Chinese Tartary, and 15 miles S. of the Juvahir Pass. It is situated on the right bank of the Gores, a little below the confluence of the Goonka. Elevation above the sea 11,284 feet. Lat. 30 24' long 80 13'

PANDEHWARA, or PANDLEWARA in Guzerat, or territory of the Gulcowar a town on the route from Baroda to Neemuch, 106 miles N. of former 164 S.W. of latter Lat. 23 24', long 73 40'

PANDHARPUR—See PUNDEKPOOR

PANDORNA.—A town in the territory of Nagpur or Berar 51 miles N.W. by W. from Nagpur and 70 miles N.E. by E. from Ellichpoor Lat. 21 36' long 78 33'

PAN DRAS, in Ladakh a village on the route from Le to Cashmere by the Bultul Pass from which it is distant twenty miles N.E. The land in the vicinity is in general employed for pasture and produces the *prangos pabularia*, so highly esteemed by Moorcroft for winter fodder. Izet Ullah who calls this place Panderras, observes that the road is good in this part of the route. Gholam Hyder styles the village Paen dur-ras. Professor Wilson, the editor of Moorcroft comments that it should be called Pan dras, or Lower Dras, but this does not seem justifiable as the place has higher up the course of the river and is more elevated than Dras. The elevation above the sea exceeds 9,000 feet. Lat. 34 23' long 75 47'

PANDREE in the British district of Baitool territory of Sagar and Nerbudda lieut. gov. of the N.W. Provinces, a town on the route from Baitool to Ellichpoor 37 miles S.W. by S. of the former Lat. 21 22' long 77 41'

PANDRENTON in Cashmere, an antique temple of small dimensions, standing in a reservoir or tank about four miles S.E. of Srinagar, the present capital of the valley. It is a striking specimen of the simple, massive and chaste style which characterizes the architectural antiquities of Cashmere. The ground plan is a square of twenty feet, and the roof pyramidal. In each of the four sides is a doorway ornamented with pilasters right and left, and surmounted by a pediment. The whole is constructed of blocks of regularly hewn limestone. The interior is filled with water, communicating with that without, which is about four feet deep and as the building is completely insulated, it can be reached only by wading or swimming. The purpose of its construction is not known but it is generally considered a Buddhist relic. It exhibits neither inscriptions nor sculptures,

except the figure of a large lotus carved on the roof inside. Lat. 34 2' long 74 47'

PANDURE—A town in one of the recently sequestered districts of Hyderabad presidency of Bengal 21 miles W.S.W. of Ellichpoor Lat. 21 5', long 77 15'

PANEEGONG—A town of Assam in the British district of Durrang 55 miles N.E. by E. of Durrang. Lat. 26 44' long 92 52'

PANEEPUT a British district in the territorial division of Delhi, within the lieut. gov. of the N.W. Provinces, is bounded on the west and north by Sirhind on the east by the river Jumna, separating it from the British districts of Meerutnagpur and Meerut and on the south by the British district of Delhi. It lies between lat. 28 50'—29 48', long 76 40'—77 16' is sixty five miles in length in a direction nearly south to north thirty miles in breadth in a direction at right angles to the former and contains an area of 1,279 square miles. The country is level and intersected by the Delhi Canal and its branches, as well as by numerous watercourses, ramifying in time of inundation between the Jumna and those artificial channels. Where not irrigated by the Jumna, or by canals the country is generally barren and of repulsive appearance, being in many places a waste of undulating sands, exhibiting a very scanty growth of harsh herbage or stunted shrubs. In many places the soil is covered with a saline efflorescence so abundant as to look like snow and thus in crustation though containing a large admixture of sulphate of soda with common salt, is collected and used for culinary purposes.

The population in 1853 was returned at 859,085 of which number there were Hindoos, agricultural, 167,757, non-agricultural, 88,054 Mahomedans and others agricultural, 37,280 non-agricultural 95,994. It will be seen from this return that though the Hindoos greatly preponderate in numbers, the proportion of the other classes (chiefly Mussulmans) is larger than is to be found in many parts of India. The number of persons per square mile is something more than 221. The following classification of the towns and villages of this district, with reference to population, is obtained from very recent official returns

Number containing less than 1,000 inhabitants	356
Do to more than 1,000 and less than 5,000	119
Do to 5,000 and less than 10,000	1
Do to 10,000 and more	2
Total	486

The chief places will be found noticed in the alphabetical arrangement. The land assessment has been fixed for a term of years, which will expire on the 1st July 1872. The district came into the possession of the British from Sindia in 1803, under the treaty of Serjees Anjengam.

PANEEPUT—The chief town of the British district of the same name. It is situated in a fertile tract, the resources of which are

## PAN

to a considerable extent developed by cultivation, of which irrigation by water principally drawn from numerous wells, is a very efficient part. The appearance of the place on approaching it is described by Barr as striking and pleasing. 'As we approached Paniput, the whole of the surrounding country was converted into one mass of cultivation, here and there broken by small clumps of trees, through which are to be seen the spires and cupolas of numerous temples, with their white and polished surfaces, starting from the dark foliage in which they are imbedded with an almost dazzling brilliancy. Jacquemont considered Panseput the largest town except Delhi which he had seen in Northern India. It is surrounded by walls and ramparts apparently of no great antiquity and built at different periods and in different styles, the outline being very irregular. The houses, generally built of brick and in some instances two stories high have usually balconies, and a few have cupolas. A great number however are said to be untenanted, but if this be so the place has, notwithstanding an amount of population which may entitle it still to rank as a very considerable town. The number of inhabitants in 1853 as ascertained from official report, was 22 612. The chief source of the busy scenes of life, however appears to be that created by two caravanserais which the town possesses, one on each side. The environs are overspread with the ruins of tombs many indicating by their size and style of building, that they were the memorials of persons of rank. Panseput is situated on the great military route between Western Asia, Afghanistan and the Punjab, on the one side and Central and Eastern Hindostan on the other and the plains around it have repeatedly been the field of battle for powers contending for the empire of India. Here in 1526 Baber at the head of 12,000 men, encountered and utterly routed Ibrahim the Patan king of Delhi whose army is usually estimated at about 100 000 men with 1 000 elephants. According to generally received statements, above 40 000 of the army of Delhi were slain, and among them Ibrahim whose empire was seized by Baber thus establishing the renowned Timurian dynasty. In the same locality in 1761, a battle was fought between the Afghans, commanded by their king Ahmed Durranee, and the Maharrattas, under Seikshaev Rao Bhoos. The troops of Ahmed Shah are estimated by Elphinstone at 40 000 Afghans and Persians, 15 000 Indian horse, and 38 000 Indian infantry with thirty pieces of cannon that of the Maharrattas at 15 000 infantry of whom 9 000 were regularly disciplined, 55 000 cavalry in regular pay and 15 000 predatory horse, with 300 cannon, numerous wall-pieces, and a great supply of rockets. After some hours of hard fighting the Maharrattas yielded to the superior valor of the Afghans and the military talents of Ahmed and were totally routed, their commander, and nearly the

whole of their best troops, being slain either in the battle or in flight.

Panseput is mentioned in the Ayeen Akbery as situated in the suburb of Delhi and as having a brick fort. It lies on the route from Delhi to Kurouni, and the road in this part of the route may be described as good. Distant N from Delhi 78 miles, N W from Calcutta 945 miles. Lat. 29 23 long 77 2'

PANEITH.—A town in Guzerat, or the dominions of the Guicowar situated on the left bank of the Nerbudda river and 23 miles S from Baroda. Lat. 21 51 long 73 18

PANGKONG.—A long and narrow lake 100 miles in length, with an average breadth of three indenting the eastern frontier of the dominions of Chohab Singh, the ruler of Cashmere. Its waters are clear and salt elevation above the sea 14 224 feet. Cunningham is of opinion that in former ages the Pangkong lake had an outlet at its north western extremity through a gorge in the limestone cliffs, into the present scanty stream passing by Mughb and joining the Shayah river just above the village which gives its name to the stream. Its centre is in lat 38 45 long 79 15

PANGREF.—A town in the British district of Bhoolapor presidency of Bombay, 45 miles N of Bhoolapor. Lat. 13 19, long 75 53

PANGTOOR.—A town in one of the recently sequestered districts of Hyderabad 16 miles N of Kurnool. Lat. 16 5, long 78 4

PANGLI in Hyderabad or territory of the Nizam a town 80 miles S of the city of Hyderabad. Lat. 16 15, long 78 9

PANJAL or PANCLA, in the petty hill state of Hindoor a village situated on the river Gumber and in the valley between the ridge of Ramgurbh and that of Malown. Lat. 31 5, long 76 53

PANJUR.—A river rising on the eastern slope of the Syadree range of mountains in lat. 20 53' long 73 53 and flowing through the British collectorate of Oandweh in an easterly direction for sixty two miles, and northerly for thirty miles, falls into the Taptee river on the left side in lat 21 17', long. 74 53'

PANNAH.—See PUNNAH.

PANNALAGURH.—A town in the native state of Gwalior or possessions of Scindia family, situated 40 miles S by E from Kurgon, and 107 miles N E by E from Maligaum. Lat. 21 18 long 75 54

PANSAVAL.—A town in the British district of Tanjore presidency of Madras, 37 miles S. of Tanjore. Lat. 10 16 long 79 13

PANTI in native Gurwahal a village pleasantly situated on the right bank of the Juma, and 400 feet above its bed. Lat. 30 45, long. 78 15

# PAN-PAR.

**PANWARA.**—A town in the British district of Bhagulpore, lieut. gov. of Bengal 25 miles S. by E. of Bhagulpore Lat 24 55 long 87 4'

**PANWELL**, in the collectorate of Tannah (North Concan) presidency of Bombay a small town or village on the route from Bombay to Poona, 55 miles N W of the latter place. It is situate on the estuary of a small river the stream of which fails during the dry season at which period Panwell is accessible by water only when the tide is full. At this state of the tide, communication with Bombay is practicable across the haven of that place, from which it is distant E. in a direct line 22 miles. This passage by which a considerable portion of the intercourse between the capital and the great military station of Poona is carried on has heretofore been subject to much uncertainty and delay from the varying depth of water and fluctuating strength of tides and winds but the introduction of the agency of steam will have tended to abate these inconveniences. Heber describes the place as a small-sized country town, with a pagoda, and a handsome tomb of a Mussulman saint. This pagoda is dedicated to Mahadeo or Shiva. Here is a small fortress, the extent and plan of which may still be traced, though it is now much decayed. There is a bungalow or government lodge for travellers and the road to Poona is well drained and bridged. Panwell is styled a populous town by the Court of Directors, and provision has been made for improving it. The Purna and Moulah rivers are crossed at Panowlee and Arund by indifferent ferries both of which may be avoided by the more circuitous route of Dapoorce. Distance from Poona, *via* Dapoorce 70 miles. Lat. 18 58, long 78 12'

**PAPARGHAT** in the district of Sultan poor territory of Oude, a ruined town on the route from the cantonment of Sultanpore to Jounpore, 47 miles N. W. of the latter 10 S.E. of the former. Here Asaf ud-daula, nawab ruler of Oude, who reigned from 1775 to 1797, proposed to found a capital and commenced building a palace but, having visited the work after employing 400 workmen for three years, was deterred from its completion by a pestilence which broke out among his followers. The Hindoos attributed the visitation to the wrath of their goddess Debi, to appease whom the superstitious Mussulman prince erected a temple in her honour. The temple remains and annually in the month of Chait (March April), about 4 000 Hindoos resort thither, to pay their devotions at the shrine, but remain only one night, in consequence of the pestilential air of the place. Here are bangles a mosque and the unfinished palace of the nawab. Lat. 25 10', long. 82° 17'

**PA PHOG.**—A town of Burmah, 140 miles E. by N from Prome and 118 miles N E. by N from Pegu. Lat. 10 12', long 97 7'

**PAPOUSA** —A village in the British district of Hurrseena, lieut. gov. of the N W Provinces. Lat 28 69' long 76° 8'

**PAPPAMOW** —See PHAPAMOW

**PAR.**—A river rising in lat. 20 30 long 78 43', on the western slope of the Sydreerange of mountains, and flowing in a westerly direction through the territory of the Daeng rajahs then dividing the petty native states of Dharrunpore and Pent and subsequently traversing the British collectorate of Broomch it falls into the Arabian Sea, in lat. 20 32', long 72 56'

**PARA** a river of Ladakh, rises in lat. 32° 27' long 78 8' at the north-eastern foot of the Parang pass over the Western Himalaya range, and flows through Rupahu one of the districts of Gholab Singh's dominions. Subsequently it enters the Thibet valley of Thotse, through which it flows for eighty five miles and finally traverses the district of Koonawar to its junction with the Sutlej, in lat 31 49, long 78 41'

**PARADANGA**—A town in the British district of Rungpore lieut. gov. of Bengal, 23 miles N E by E. of Rungpore. Lat 25 53' long 89 40'

**PARAMBALORE**—A town in the British district of Trichinopoly presidency of Madras, 32 miles N N E of Trichinopoly Lat. 11 15' long, 78 55'

**PARAMUTTY**—A town in the British district of Coimbatore presidency of Madras 66 miles E. of Coimbatore Lat. 10 57, long 77 59'

**PARANG**—A pass over the western range of the Himalaya Mountains. It leads from the British district of Spiti into Gholab Singh's district of Rupahu Lat 32 27' long 78 8'

**PARBUTTY (EASTERN)**, a small river in the Mahratta territory of Gwalior rises close to the town of Supree and in lat. 25° 31' long 77 46'. It first holds a northerly course for about forty miles and subsequently turning to the east for fifty miles, falls into the Sude, on the left side, in lat 25 47' long 78 31. Wilford styles it the little river Para, but is in error in stating that it winds round the town of Narwar which is situate on the right bank of the Sude twenty five miles above the mouth of the Parbutty

**PARBUTTY (WESTERN)** a river of Malwa, rises on the north side of the Vindhya range, 20 miles S. of the town of Ashta, and in lat. 22° 45', long 78 35'. It has a winding course of 220 miles, first in a north-easterly direction for eighty miles, and subsequently in a north westerly and falls into the Chumbul on the right side, in lat. 25 50' long 78 48'. It receives in its course some mountain streams, and during rains swells so as not to be fordable. It is crossed by ford on the route from Kotah to Sanger at Kukwana, 150 miles from its source, and in lat. 24 35' long 77 7', and

# PAR-PAT

"there has a bed 150 yards wide, rocky and stony bottom, and fine clear stream." At Khakhyapur sixty miles lower down the stream, and in lat 25° 7', long 76° 43', it is crossed by the route from Kotah to Calpee, and is there fordable.

**PARDUMPOOR**.—A town in the native state of Phoeon on the south west frontier of Bengal, situate on the right bank of the Aurag river, and 69 miles S.W. by W from Bumbulpoor Lat. 21, long 83 5'

**PARE**.—A town in the native state of Bhotan, situate on the right bank of the Gud dada river and 75 miles N.E. by E from Darjeeling Lat. 27 35, long 89° 23'

**PARELI**, in the petty hill chieftainship of Ghoond, tributary to Keemthul, a village situate on the right bank of the Guree, here a shallow, rapid rocky stream of very clear water. Another describes it as 'a sweet romantic village, surrounded with luxuriant cultivation.' Lat. 31 5' long 77 27'

**PARELL**.—A town in the island of Bombay containing a residence for the accommodation of the governor of the presidency with a considerable domain attached. Distance N from Bombay Castle five miles. Lat. 19 long 72° 55'

**PARGONG**.—A town in the British district of Bumbulpoor lieut.-gov. of Bengal, 43 miles W.N.W. of Bumbulpoor Lat. 21 40' long 83 24'

**PARIMBAUCUM**.—A town in the British district of Chingleput presidency of Madras, 33 miles W of Madras. Lat. 13 2' long 79 51'

**PARNEIR**.—A town in the British district of Ahmednuggur presidency of Bombay 20 miles W.S.W. of Ahmednuggur Lat. 19, long 74° 29'

**PARO**.—A town in the native state of Bhotan situate on the left bank of the Gud dada river and 64 miles E.N.E. from Darjeeling Lat. 27 23' long 89 18'

**PARO**.—A town in the British district of Chota Nagpoor lieut.-gov. of Bengal 53 miles S.E.E. of Lohadugga. Lat. 22 43', long. 85 6'

**PARSIDEYPOOR**, in the district of Saloon, territory of Onda, a town five miles N.E. of the left bank of the Saeo, 60 S.E. of Luck now. Butler estimates the population at 4 000, almost all cultivators, and of the number 3 000 Mussulmans Lat. 26 4' long. 81 34'

**PARUNGALOOR**.—A town in the native state of Poodoocottah or possessions of Rajah Tomdizan situate 23 miles S.E. by S. from Trichinopoly and 69 miles N.E. by E. from Madras. Lat. 10° 30' long 79

**PARUFUNADA**.—The principal place of a talook or subdivision of the same name, presidency of Madras. The town is also called Vampur, Veypur, and Beypoor, under

which last name it is described in the alphabetical arrangement. Parupanda or Beypoor is in lat. 11 30' long 75 51'

**PARVUTIPURAM**.—A town in the British district of Vinagapatam, presidency of Madras, 77 miles N by E of Vinagapatam. Lat. 13 48', long 83 30'

**PARYUR**.—A town in the British district of Tinnevely presidency of Madras, 70 miles N of Tinnevely Lat. 9 44, long. 77 51'

**PASKYUM**.—A town within the dominions of Gholab Singh the ruler of Cashmere 83 miles E.N.E. from Srinagar and 119 miles N from Kangra. Lat. 34 25', long 76 20'

**PASLEE**, in the British territory of Saugur and Nerbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Saun to Hoesungabad 34 miles W.N.W. of the former Lat. 22 10', long 79 20'

**PATA**.—A town within the dominions of Gholab Singh the ruler of Cashmere, 178 miles E. by N from Srinagar, and 178 miles N.E. by N from Chamba. Lat. 34 28', long 78

**PATAN**.—See **PARUN**

**PATAN** in Cashmere, a village 25 miles N.W. of the town of Srinagar. This seems to have been an important locality during the predominance of Hindooism in Cashmere as in the vicinity are the remains of two ancient buildings in a style similar to the celebrated temple at Malan. Patan is still a place of pilgrimage for the superstitious Hindoos Lat. 34 7' long 74 28'

**PATANAGO**.—A town of Burmah situate on the left bank of the Irrawady and 53 miles N from Prome Lat. 19 53 long 94 51'

**PATAPOOR**, in the British district of Cawnpore, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Cawnpore to that of Calpee, and 20 miles N.E. of the latter Lat. 26 19' long 80 1'

**PATARI** in Gurehal, a village five miles from the left bank of the Bhagorettee as the Ganges is called in the upper part of its course Lat. 30 48', long 78 25'

**PATCHMARREE**, in the territory of Nagpore or Berar a town situate among the Mahadeo Hills. In this secluded tract Appa Sahib the fugitive rajah of Nagpore or Berar, took refuge after his flight from his capital in 1818, but was expelled by the judicious and persevering operations of the British troops commanded by Col. Adams, who penetrated the most difficult recesses, reduced the strongest fastnesses, and thoroughly established the British power over that part of the Mahadeo Mountains. Distance from Hoesungabad, S.E., 53 miles S. from Saugur 100, N.W. from Nagpore 96 Lat. 23° 28' long 78° 30'

**PATCHWAREE**, in the British district of Burbhoom, lieut.-gov. of Bengal, a town among the highlands in the north of the district, on the south west route from Benham-

# PAT

poor to Bhagutpoor 58 miles N W of former, 50 S E. of latter Lat 24 31 long 87 30'

**PATRETA**, in the British district of Mirzapoor, lieut.-gov of the N W Provinces, a town surrounded by rampart and fortress, five miles south of the fort of Chunar. In 1781, when Chert Singh the refractory semindar of Benares, raised the standard of rebellion against the East India Company he garrisoned Patreta, which was stormed by Major Popham, though with considerable loss to the captors. Distant S W from Benares 18 miles N W from Calcutta by Hamaribagh and Samseram 420 Lat 25 4 long 82 54

**PATGAON**—A town in the native state of Kolapoore territory of Bombay 44 miles S.S.W from Kolapoore, and 43 miles W N W from Belgam Lat 16 8', long 74

**PATGONG**—A town in the British district of Rungpoore, lieut gov of Bengal 44 miles N N W of Rungpoore. Lat 26 17' long 89 8'

**PATHANKOT** (Afghan's Fort) in the north-east of the Punjab, and in the southern range of the Himalaya, 14 miles W of Nurpur and on the route to Chahmere. The fort has a fine appearance, is built substantially of brick has a ditch and glacis, and being situate on level ground is not commanded in any direction it consequently admits of an obstinate defence. A lofty citadel in the interior rises above the ramparts. It was built by Shah Jehan, the Mogul emperor, during his attack on Nurpur. Notwithstanding its advantageous position and great strength, it seems to be allowed to fall to decay. Elevation above the sea 1 205 feet Lat 32 16 long 75 42'

**PATHOWLEE**, in the British district of Agra, a village on the route from the city of Agra to Jeypoor and six miles W of the former Lat 27 8' long 78

**PATIALAH**—See **PUTHALA**.

**PATJAR**, in the north eastern quarter of the Punjab, a town situated 13 miles E.N.E. of Kangra, and 92 miles N N E of the town of Ludianah. Lat 32 6, long 76 30'

**PATN**—One of the principal towns in the valley of Nepal, situate on a rising ground about two miles to the south east of Khatmandoo, and near the confluence of the Bhagunty with the Moenunkra and Yookacha. The town is adorned by several handsome shifoon, and is said to be a newer town than Khatmandoo. It is also much older than the present capital, having been built by the Newars, the aborigines of Nepal before the invasion of the Ghoorkas. Lat 27 38 long 85° 17'

**PATNA**.—A British district under the lieut. gov of Bengal, named from its principal place. It is bounded on the north by the Ganges, separating it from the British districts Saran, Tirhoot, and Monghyr by which last-named district it is also bounded on the north west and south-east, on the south it is bounded

by the British districts Monghyr and Behar, and on the west and north west by the river Son, separating it from the British district Shahabad. It lies between lat. 25° 8'—25° 38' long 84° 45'—86° 10', is eighty five miles in length from east to west, and forty five in breadth the area is 1,828 square miles. The Ganges flows along its frontier in a stream fully as large as in any part of its course, being usually a mile wide, with a very rapid current during the rainy season and at all times crowded with craft. The Son forms the western and north western boundary of the district for thirty five miles, and is for that distance navigable for craft of considerable burthen. The Poonpoo and the lesser Poonpoo also traverse the district, which, in the season of the periodical rains, is everywhere intersected by torrents and watercourses. It is altogether a very fertile and highly-cultivated tract, producing abundant crops of fine rice, wheat, and barley and having its aspect enlivened by numerous orchards and groves of fruit-bearing and other trees. Much opium of fine quality is produced about Munseer and Phalwarree, in the western part of the district. The winters here are in general very mild. The hot season commences about the middle of March and terminates about the end of June the heat is very great along the banks of the Son and the Ganges, being increased by the radiation from the sands in the beds of those rivers. On the banks of the Ganges, towards the Son the west winds usually prevail from the middle of January until nearly the end of March. From thence to the middle of June, the prevalence of the east and west winds is nearly equal. From that period to the end of July the east winds are dominant, after which until the end of August, the west winds again blow. From thence to the end of October the east winds return and subsequently until the middle of January the east and west winds are nearly balanced. In the rainy season near the Ganges, there are occasionally north and south winds, and on the banks of the Son it is alleged that whatever wind may prevail in the course of the day every morning the wind blows from the south. The population is given under the article **BENGAL**. The most considerable towns—Patna, the sudder or chief civil station, as well as Dinapore, the military cantonment, and some others—are noticed under their respective names in the alphabetical arrangement. The routes are—1 From north to south, from Bankipore and Patna to Gaya, and thence continued to join the great north western route from Calcutta. 2 From east to west, along the bank of the Ganges, from Berhampore, through Bhaugulpore, Bar Patna, Dinapore, and thence across the Son to Arrah in the British district of Shahabad, 3 from north east to south west, along the right bank of the Son from Dinapore to Daudnagar and thence to Hooseenabad 4 from north-east to south-west, from Bar to the town of Behar. The district is also traversed by the East-India railway

## PAT

Patna was included under the grant of the dewanny of Bengal, Behar and Orissa, made in 1765 by Shah Alom to the East-India Company. The revenue is permanently settled.

**PATNA.**—The principal place of the British district of the same name, under the presidency of Bengal, sits on the line of the East-India railway. It comprises the city or fort, inclosed by a wall of rectangular ground plan and extensive suburbs. The city extends a mile and a half in length from east to west, along the right bank of the Ganges and three-quarters of a mile landwards from it. Many of the houses are built of brick, but the greater number of mud they are generally tiled a few only are thatched but all, with little exception look mean and slovenly. The eastern and western ramparts have each a gate in the middle, and a main street, rather wide, runs from one gate to the other but even this principal thoroughfare is neither straight nor regularly built, and the other streets or passages are narrow crooked and irregular. Numerous ghats, or flights of stairs, give access to the water of the Ganges. Within the city is the grave of the British prisoners murdered in 1763 by Sumroo the German adventurer in obedience to the order of Comd Ali the expelled nawab of Bengal. It is covered by a pillar of unsmoothed stone built partly of stone and partly of brick. There are many mosques, but they receive small care and are regarded with so little reverence, that most of them are let as warehouses. Even the principal mosque a handsome stone building is occupied in this manner and the chief Musulman place of worship at present is in the western suburb. Adjacent to this last-mentioned mosque, is a much frequented *imambara*, where 100,000 persons sometimes congregate. The principal suburb on the eastern side, called *Marungany* contains the chief market, and many store-houses for grain. The buildings being generally constructed of wood and mats have been often burned down, yet no precaution is taken to prevent a recurrence of the calamity. This suburb is joined by another denominated that of *Chattr Khan*. On the other side of the city is a long, narrow suburb extending to Bankipore, a distance of about four miles. The breadth seldom exceeds half a mile, and there are many interruptions from gardens. This is the quarter of Europeans, whose houses are scattered through it, and principally along the bank of the river, but they are in no great numbers, and of no very imposing appearance. Here is a school, under the control of a committee, consisting of nine members, two of whom are natives. The English language and literature history and the mathematics, enter into the course of study which is conducted by a head master and two assistants. Besides these, there are an *Ordoon* master and a *Hindoo* master. Within the last few years a penitentiary and house of correction have been erected within the city.

During the hot season the temperature is very high at Patna, being increased by the heat reflected and radiated from a naked expanse of sand on an extensive island in the Ganges, opposite the city. The population of the town of Patna is stated at 234,132.

Patna is a place of great antiquity, and is conjectured by Wilford to have been identical with *Padmavati*, the capital of Nanda, who, according to Prinsep, reigned over Magadha or Behar 415 years before the Christian era. Subsequently it probably formed part of the dominions of the rajah of Kunnouj on whose defeat, in 1194 by Shahabuddin sovereign of Ghor Patna, with the rest of Behar and Bengal, fell to the conqueror who annexed his acquisition to the empire of Delhi. Patna appears to have for the most part continued ostensibly at least, a portion of the empire until the death of Shih Shah the Patan who deposed and expelled Humayoon. Mohamed a relative of Shih Shah made himself master of Patna in 1645, but was soon after subjugated by Akbar Aurangzebe conferred the government of Behar on his son Azim, who resided at Patna, from that circumstance generally named *Azimabad* by the Musulmans. The English established factories here at an early period and carried on an extensive trade in opium rice and other articles. In 1763 disputes arose between the Company's servants and Meer Cossim upon the subject of transit-duties. The former claimed an entire exemption from duty though a heavy tax was paid by all native traders and the claim was supported by a majority of the council at Calcutta, who sent a deputation to the nabob at Patna, to request he would confirm it. He was however unyielding but at length gave way to an extent not contemplated or desired. In place of remitting duties on the Company's trade only he abolished all customs-duties whatever whether on British or native goods. Mortified however at the result of an act which in a moment of exasperation he had committed and which must have materially diminished his revenue, he took every means to annoy the British and before long resorted to an act of open hostility, by seizing some English boats which were lying in the river. Mr Ellis, the chief of the English factory upon this provocation made a precipitate attack upon the city and took possession of it. The British were, however soon driven from it by Meer Cossim who, following the fugitives to their factory, destroyed many of them and made prisoners of all the rest who were not so fortunate as to effect their escape. This was on the 24th June, 1763. During the four following months, several actions took place between Meer Cossim's forces and the English, which always ended in the defeat of the former. In the beginning of October his capital town, Monghyr, was besieged and taken by storm. This so enraged him that he decided on the perpetration of a deed exceeding in atrocity the murder

# PAT

of the Black Hole. He ordered the execution of all the English prisoners he had in his possession, and thus, in cold blood, 200 defenceless Englishmen whom he had imprisoned in Patna and other places, were shot or cut to pieces under the direction of a European named Samuroo, who was in the service of the nabob. Among the number was Mr Ellis the only one who was spared was Mr Fullarton, a surgeon, who afterwards effected his escape. The British took Patna by storm on the 6th November following, whereupon the nabob and his army fled to the dominions of the scutabdar of Oude, with whom he had lately entered into a treaty. In May following, the British were attacked by Meer Cossim under the walls of Patna, but after a long day's desperate fighting the enemy were routed with great loss. Thereupon the English remained in quiet possession. Patna is distant E. from Dinapore, by land, 10 miles, by water 12, E. from Benares, by Ghazepore, 187 by water 205 N W from Calcutta, land route, by way of Gaya and Hazaribagh, 377 by water 464 Lat. 25 38' long 85 15'

**PATNA** a raj in the country under the superintendence of the political agent for the south-west frontier of Bengal. It is bounded on the north by Bora Samba and Sumbulpore on the east by Sonopore and Boad, on the south by the river Tell, and on the west by Kerial. Its centre is in lat 20 40' long 83 15. It has an area of 1,158 square miles. Some years since, the country was officially reported to be continually in a state of the most wretched anarchy monstrous except by placing it under the direct management of the British government. The annual estimated revenue is 25 000 rupees the tribute which is small,—only 600 rupees, was paid with regularity. The population is believed not much to exceed 52,000. The principal town, bearing the same name, is in lat. 20° 36' long 83 9'

**PATNA**.—A town in the British district of Belgaum, presidency of Bombay, 20 miles W of Belgaum Lat 15° 52' long 74 18'

**PATODER**.—A town in the Rajpoot state of Jodhpore, 48 miles W S.W. from Jodhpore and 108 miles S.E. by E from Jaisalmeer Lat. 26° 9' long 72 24'

**PATON** is the British district of Kumaon, least gov. of the N.W. Provinces, a town on the route from Almora to the Rakus Lake, 68 miles N.E. of the former Lat. 30 14' long 80° 30'

**PATOWDHI**.—A small jaghure ismowed within the territory of Jujhur subject to the least gov. of the N.W. Provinces. The grant was made early in the present century for services against the Mahrattas by Lord Lake, to Fyze Tullish Khan, brother-in-law to Nawab Nijabat Ali Khan who, at the same time, was granted the jaghure of Jujhur. The present jaghirdar is Muhammad Akbar Ali

Khan, who derives an annual revenue of 50 000 rupees from his jaghure. Patowdhi, the principal place, is on the route from Delhi to Narnol and 40 miles S.W. of the former. It has a bazar and is well supplied with water. The surrounding country is slightly undulated in low irregular swells, with a sandy soil, partially cultivated. The road in this part of the route is sandy and heavy and bad for carts Lat. 23 18' long 76 50'

**PATREE** in Guserat, or territory of the Guicowar a town at the south-eastern angle of the Runn or Great Salt Marsh. It has a fine tank, and is surrounded by three walls, the innermost of which has a ditch, but, though formerly of considerable importance and strength, it is now much decayed. The chief, styled the Demaya, has an annual revenue of 18 000 rupees, of which he pays annually a tribute of 5 652 rupees to the British government. Distant W from Ahmed abad 52 miles. Lat. 23 10' long 71 44'

**PATREE**.—A town in Hyderabad, situate on the left bank of the Godavery river and 188 miles N.W. from Hyderabad. Lat. 19 16', long 76 30'

**PATROOD**.—A town in Hyderabad, or dominions of the Nizam, 192 miles N.W. by W from Hyderabad, and 100 miles E from Ahmednuggur Lat. 19 7' long 76 17'

**PATTARSEE**, in Sirhind, a village on the route from Kurial to Ludiana, and 73 miles N.W. of the former place. It is situate on a small eminence, overlooking a level and fertile country, but in many places swampy and in general slightly cultivated. Distant N.W. from Calcutta 1,040 miles Lat. 30° 24' long 76° 35'

**PATTERGHATTA**.—A town in the British district of Dacca Jelalpoore, least gov. of Bengal, 54 miles S.W. of Dacca. Lat. 23 10', long 89 48'

**PATUN**, called also BUTISI and TONRA. **WUTTER**.—A small Rajpoot state bounded on the north west by Shekawuttee, on the north-east by Jhujhur, on the east by Ulwar, and on the south-east and south by Jeypore. It lies between lat 27 31—27 56', long 75 48'—76 12' it is thirty miles in length from north to south, and twenty in breadth. At the time of Balaun's visit, in 1835, it was ruled by Rao Luchman Singh, chief of the Tur tribe of Rajpoots, who anticipated the proper period of accession by the murder of his father but was subsequently so haunted by remorse, that he abandoned his palace in which the foul crime was committed, and took up his abode in a temporary residence in the vicinity. The spirit of the murdered chief was supposed to inhabit the chamber which he occupied in life and a couch rose-water and a few other articles were kept constantly in readiness for his use. The country is a tract of barren hills and fertile valleys. It is tributary to Jeypore. The least accessible parts are

# PAT—PAU

inhabited by a tribe called Minas, who formerly subsisted by cattle-stealing and other plunder and who, in the exercise of their avocation undertook long journeys, either on foot or mounted on small dark-coloured camels of great speed and endurance united at some settled point, committed their depredations, and returned sometimes singly sometimes in small bodies to their fastnesses, where they divided their spoil. These marauders however have been much checked by the British forces, which have destroyed nearly all their forts so that many from necessity have had recourse to agriculture for subsistence. Patun the principal town is rather a considerable place, situate in a strong position, at the foot of a hill surmounted by a citadel. The palace is on the side of the hill, about half way between the base and summit. Distance S.W. from Delhi 100 miles. Lat. 27° 47', long 76° 9'.

**PATUN** within the limits of the territory of Bhoondee, in Rajpootana, a town situate on the left bank of the river Chumbul 32 miles S.E. of the town of Bhoondee. It is the principal place of a pergunnah of which (though locally situate, as above stated within the confines of the state of Bhoondee) two-thirds belong to the family of Scindia, having been granted by the Peshwa, who himself received it from the rajah of Bhoondee in remuneration for aid afforded against Jeypore. The other third which had been wrested from Bhoondee by Holkar, was ceded by him to the British government under the 4th article of the treaty of Maudsior. The rajah of Bhoondee was especially anxious to secure possession of Scindia's portion of Patun, as it contains his ancestral palace, as well as a magnificent temple built and endowed by his family and by the treaty concluded with the rajah in 1818, the British government engaged that this portion of the territory should be restored to its original possessor who in return engaged to pay an annual tribute of 40,000 rupees, but Scindia refusing to give up the possession those clauses of the treaty were not carried out. By the treaty of Gwahor in 1844 however the management of this part of Patun was transferred to the British, and probably this may lead to an arrangement by which the long-cherished wishes of the Bhoondee rulers may be gratified. Lat. 25° 15', long 76° 2'.

**PATUNSAONGEE**.—A town in the territory of Nagpoor or Berar situate 18 miles N.N.W. from Nagpoor and 98 miles E. by N from Ellahpoor. Lat. 21° 20', long 79° 8'.

**PATURGATTA**, in the British district of Bhagalpoor, bent-gov of Bengal a small town or village on the right bank of the Ganges, four miles N. of the ruins of Berhampoor to Dinapore, 124 miles N.W. of former. 184 E. of latter. Here are several caves and cells excavated in the rock facing the water. Lat. 25° 15', long 87° 16'.

**PATUE**.—A town in the British district of Poona, presidency of Bombay 43 miles E. of Poona. Lat. 18° 28' long 74° 31'.

**PAUDURKAORA**, in Hyderabad, or territory of the Nizam, a town near the north-east frontier towards Nagpoor or Berar. Distance from the city of Hyderabad, N. 178 miles, Nagpoor, S.W. 90. Lat. 18° 55', long 78° 49'.

**PAUGA**.—A town in the native state of Bhotan, situate on the left bank of the God dada river and 65 miles E. by N. from Darjeeling. Lat. 27° 15' long 89° 20'.

**PAUK PUTTEN** (Pura Town) in the Punjab, a town situate ten miles west of the river Ravee, and fourteen miles from Marnoke Ghat a much frequented ferry over it. The name of this town is considered to indicate its peculiar sanctity in consequence of its having been for many years the residence of a celebrated Mahometan saint, Sheikh Farid-u Din, of whose miraculous powers many traditions are recounted by the natives. Pauk Putten is supposed by Munson to have been the site of the colossal altars erected by Alexander to mark the eastern boundary of his conquests. Lat. 30° 17' long 73° 25'.

**PAULY**.—A town in the Rajpoot state of Jeypoor situate on the left bank of the Chumbul river and 88 miles S.E. by S from Jeypoor. Lat. 25° 50' long 76° 37'.

**PAULYTANNA**, or **PALITHANA**, in the peninsula of Kattywar province of Guzerat, a town in the district of Gohilwar. It is situate at the eastern base of the Satrunya, a mountain sacred to Adinath the deified priest of the Jains. As an instance of the liberal endowments and offerings made to this divinity it is mentioned that lately a rich banker of Ahmedabad presented a crown of massive gold, studded with sapphires, and of the estimated value of 35,000. The extensive summit of the mountain, surmounted by numerous steep peaks is crowded with temples, shrines, langars, and viharas or monastic retreats, connected with the belief of the Jains. The town itself is walled and contains many relics of antiquity of various eras. Distance from Ahmedabad S.W. 120 miles Baroda S.W. 105, Surat N.W. 70 Bombay N.W. 190. Lat. 21° 30', long 71° 47'.

**PAUMANEE**.—A town in the territory of Nagpoor or Berar 10 miles N.W. from Jugdulpur and 162 miles N. from Rajahmundry. Lat. 19° 20' long 81° 51'.

**PAUMBAUM** in Raneeswaram, presidency of Madras a town and the only collection of dwellings on that island except the town of Raneeswaram, is situate at the eastern extremity near the mainland of Rannad. The regular inhabitants consist chiefly of boatmen and pilots and their only occupations are passing vessels through the reef, loading them, and discharging their cargoes. There are no

# PAU—PKE

artisans, and the bazar has but a few shops, chiefly for the sale of provisions, being deficient for the most part in regard to other articles, though generally to be obtained elsewhere. Lately the prosperity of the place received a stimulus from the presence of a number of strangers employed in improving the passage between the Point of Paumbaum and the Cape Tomitorai or Kamen on the mainland, and commonly denominated the Paumbaum Passage. This passage was formerly impracticable for ships, in consequence of the obstructions caused by two parallel ridges of rocks about 140 yards apart, the north ridge being considerably the higher and termed the first or great dam in most places visible at low water though nowhere sufficiently connected to prevent entirely at any time the passage of the water the line of the south ridge or dam being also distinctly traceable at low water but only a few detached rocks on it even then appearing above. The whole, or greatest part of the space between these two ridges, was filled up by large masses of rock in various positions, but generally in directions nearly parallel to the principal ridges and usually several feet lower. Of these rocks composed of sandstone, the strata when observed in situ, are found to be horizontal. It has been surmised, on geological and historical probabilities, that at one time there was an isthmus connecting the island of Ramswaram with the mainland. Tradition countenances this belief and the original disruption by an inroad of the sea, caused by a hurricane, is by some believed to have occurred as late as the early part of the fifteenth century. Across this double ridge of rocks were two channels one affording passage for the larger craft, the other used by small boats only. A series of operations for improving the passage commenced in 1837 and extended over several years. It necessarily involved a considerable outlay but the success was commensurate with the expenditure. The cost of the operations, from their commencement in 1837 until 1854, amounted to about 25 000*l*. The result was that a channel was formed from 10 to 12 feet deep at low water neap tides and a further outlay has been sanctioned for the prosecution of the work to the depth of 18 feet, so as to enable vessels of 300 tons to pass through in ballast.

Of a place like this, in what may be called a transition state, it is difficult to furnish statistical particulars that will possess more than a temporary approach to accuracy. In 1843, Paumbaum contained about 200 houses. A European officer with a detachment of about 100 men and muzzes, and a gang of 150 convicts were stationed there, the camp-followers amounted to about 300. A considerable influx of money causing a visible improvement in the condition of the inhabitants, was noticeable, and the advancement of trade, and steady increase in the number of shipping visiting the place, afforded indications favourable to its permanent prosperity. Anchorage

and customs are levied by the British government Lat. 9° 17', long. 79° 17'.

**PAUMBEN**—See **PAUMBAUM**.

**PAUMBOOR**.—A town in the British district of Nellore, presidency of Madras 53 miles S.S.E. of Nellore Lat. 15° 7', long. 79° 30'.

**PAUNDORKAUN**.—A town in Nepal, 112 miles W.N.W. from Khatmandoo, and 123 miles N. from Goruckpoor Lat. 28° 27', long. 83° 42'.

**PAUPUGNEE**.—A river rising in the Mysore in lat. 13° 30' long. 77° 50' and flowing north westerly for forty miles through the Mysore territories, and ninety miles through the British collectorate of Ouddapah, falls into the Pennar on the right side, in lat. 14° 38' long. 78° 45'.

**PAUTEPASHACURANELLOOR**.—A town in the British district of Madras, presidency of Madras, 53 miles S.E. of Madras. Lat. 9° 35' long. 78° 31'.

**PAVANASI**.—A town in the British district of Tanjore, presidency of Madras, 12 miles N.E. of Tanjore Lat. 10° 55' long. 79° 19'.

**PAWGUR**.—A town in the Mysore, 123 miles N.N.E. from Seringapatam, and 77 miles S.S.E. from Bellary Lat. 14° 6' long. 77° 20'.

**PAYANG YAY**.—A town of Burmah, situate on the left bank of the Iradway river and 120 miles S.W. from Ava. Lat. 20° 40', long. 94° 38'.

**PAYE ISLAND**.—One of the numerous cluster of islands known as the Mergu Archipelago. It is situate 13 miles W. from the coast of Tenasserim Lat. 11° 27' long. 95° 36'.

**PA YECH**, in Cashmere a very ancient ruin, situate at the northern base of the Karimah, or table land of No Nagur. It is of small dimensions, but in a tasteful and impressive style of architecture. The building appears to be dedicated to Vishnu as Surya or the sun god small sitting figures of whom are inserted in niches on the cornice outside. Pa Yech is in lat. 33° 50' long. 74° 45'.

**PAYNE GUNGA RIVER** rises in lat. 20° 32' long. 76° 4', near the eastern boundary of the British district of Candelah and flowing through the Hyderabad territory in a very circuitous but generally easterly direction, for 320 miles, falls into the Warda river on the right side, in lat. 19° 55' long. 79° 15'.

**PEAK** a river of Berar or Nagpore, rises in lat. 22° 20' long. 78° 47' and flowing south-easterly for fifty miles, falls into the Pench river in lat. 21° 55' long. 79° 18'.

**PEDDAPULLY**.—A town in Hyderabad, or territory of the Nizam 110 miles N.E. by N. from Hyderabad, and 182 miles N.W. from Guntoor Lat. 18° 48', long. 79° 28'.

**PEEDDA WAG**, a river of the Nizam's dominions, rises in lat. 16° 59', long. 78° 33', and flowing south-easterly for seventy miles, falls into the Kistnah river, in lat. 16° 53', long. 79° 18'.

# PEE.

**PEELKUCHLA**, in the British district of Jounpore, lieut.-gov. of the N W Provinces, a town on the route from Jounpore to Fyzabad, 19 miles N W of the former Lat. 25° 53', long 82° 37'

**PEEMING** a pass in the district of Koonaur in Bussahr traverses a lofty ridge of mountains, which, rising from the left bank of the Sutly, holds a southerly course, dividing that rugged region from the table-land of Tartary and at the same time forming the boundary between the British and Chinese empires. At a short distance to the north the vast Fargoul Mountain rises from the right, bank of the Sutly to the height of 13,500 feet or to the total elevation of 22,488 feet above the sea. The elevation of the Peeming Pass above the sea is 13,518 feet. Lat. 31° 49', long 78° 48'

**PEENOO** or **PIM**, a river in the valley of Spiti, rises in lat. 31° 40' long 78° and, flowing northerly for thirty eight miles, falls into the Spiti river in lat. 32° 6', long 78° 12'

**PEEPAR**, in the Rajpoot state of Jodhpore a town on the route from the city of Jodhpore to that of Ajmeer and 37 miles N E. of the former. A mud wall incloses the town and there is a small citadel in the middle of it. There are 3,000 houses supplied with good water from a fine tank immediately opposite the south gate. The population according to Boleau, in 14710 Lat. 26° 24' long 73° 40'

**PEEPCHOO**—A town in the British district of Rangpur lieut. gov. of Bengal, 49 miles N N E of Rangpur Lat. 24° 21' long 86° 47'

**PEEPLEA**.—See **HATH KA PEEPLEA**.

**PEEPLEOD**—A town in the native state of Gwalior or territory of Scindia a family estate on the left bank of the Suktha river and 67 miles N W by W from Ellishpore Lat. 21° 38', long 75° 40'

**PEEPLEY** in the British district of Balasore, lieut.-gov. of Bengal a town on the left bank of the river Soobanreeka, ten miles above its fall into the Bay of Bengal formerly of some commercial importance but now much decayed. It was the first place in which the English were formally permitted to trade, the privilege being in 1634 granted by Shahjehan padshah of Delhi. The Soobanreeka is from this town denominated the river of Peeperley and a shoal opposite the mouth is called Peeperley Sand Peeperley is distant S.W. from Calcutta 90 miles. Lat. 21° 40', long 87° 25'

**PEEPRA**, in the British district of Goruckpore, lieut.-gov. of the N W Provinces, a small town on the south-eastern frontier, towards the British district of Sarun, two miles from the right bank of the river Jharra. Distant S.E. from Goruckpore cantonment 52 miles. Lat. 26° 18', long 84° 9'

**PEEPRAICH (EASTERN)** in the British district of Goruckpore, lieut. gov. of the N W Provinces, a town on the route from Goruck

pore cantonment to Mulya, 10 miles N W of the former Lat. 26° 47' long 85° 36'

**PEEPRAICH (WESTERN)** in the British district of Goruckpore lieut.-gov. of the N W Provinces, a small town 10 miles N of the left bank of the river Ghaghra. It contains 200 houses, and consequently, allowing six persons to each house, a population of 1,200. Distant W from Goruckpore cantonment 38 miles. Lat. 26° 42', long 82° 48'

**PEEPRAON** in the British district of Allahabad lieut.-gov. of the N W Provinces, a village on the route, by the Kutra Pass, from the cantonment of Allahabad to Rewa, and 19 miles S.E. of the former city Lat. 25° 19' long 81° 59'

**PEEPRY**—A town in the peninsula of Kattywar, province of Guzerat, situate 66 miles S by E. from Rajkote, and 159 miles S.W. from Ahmedabad. Lat. 21° 30', long 71° 7'

**PEEPULKHEEREE**, in the territory of Bhurtpore, a town on the N W extremity towards Alwar 40 miles N W of the town of Muttra and Bhurtpore Lat. 27° 38', long 77° 9'

**PEEPULSANA** in the British district of Bynour lieut. gov. of the N W Provinces, a village on the route from Moradabad to Hardwar and 41 miles N W of the former Lat. 29° 20' long 78° 32'

**PEEPULTON**—A town of Malwa, in the native state of Bhopal 26 miles S.W. by S. from Bhopal and 42 miles W N W from Hoosungabad. Lat. 22° 53' long 77° 10'

**PEERAO**—A town in the Rajpoot state of Jodhpore 187 miles W by S. from Jodhpore, and 83 miles S.W. by S. from Jamulmeer Lat. 26° long 70° 11'

**PEERGUNJE**—A town in the British district of Dinagepore lieut.-gov. of Bengal 28 miles N W by W of Dinagepore Lat. 25° 47' long 88° 20'

**PEERGUNJE**—A town in the British district of Rungpore, lieut.-gov. of Bengal, 28 miles S.S.E. of Rungpore. Lat. 25° 18', long 89° 24'

**PEERGUNJE**—A town in the British district of Purneah lieut.-gov. of Bengal 22 miles S.W. of Purneah Lat. 25° 59', long 87° 30'

**PEER POINTIE** in the British district of Bhagulpore lieut.-gov. of Bengal, a small town on the right bank of the Ganges. It is situate at the foot of a detached hill, and on the summit of a cliff impending over the river is the tomb of Peer Pointie, a reputed Mussulman saint whence the place has its name. Distant E. from Bhagulpore by Colgaong 84 miles, by the course of the river 27; from Rajmahal, N.W. by Sikrigall, 40, from Calcutta, by the course of the river, 239 Lat. 25° 17' long. 87° 26'

**PEERPOREE**.—A town in the British district of Nudda, lieut.-gov. of Bengal, 77

# PEE—PEG

miles N N E. of Calcutta. Lat. 23° 39', long 88 48'

**PEESANGUN** in the British district of Ajmer, head-gov. of the N W Provinces, a town, the principal place of a pargannah of the same name, having a population of 15 740 persons. Distance 15 miles W. of Ajmer, N W of Nussurahd 22 miles. Lat. 26 26', long 74 30'

**PEETAR**.—A village of native Gurwal on a feeder of the Tons, and about five miles from the right bank of that river. It is situated near the crest of the woody range dividing the valley of the Tons from that of the Pabar and producing the celebrated *Pinus decodar* the first of that magnificent species observed by Jacquemont in his progress westward through the Himalaya. Peetar is at the elevation of 6 684 feet above the sea. Lat. 31, long. 78 1

**PEETUMPOOR**, in the British district of Cawnpore, head-gov. of the N W Provinces a village on the route from Allahabad to Etawa, and 47 miles S E. of the latter. Lat. 26 24, long 79 40'

**PEETUMPOOR**, in the British district of Boolundshahr, head-gov. of the N W Provinces, a town on the route from Boolundshahr to Allypore 20 miles S.E. of the former. Lat. 28° 11' long 78 10'

**PEGU**—A British province of Eastern India, recently acquired from the Burmese by the result of war. It is bounded on the north by the Burmese territories on the east by the river Sitang separating it from the Tenasserim provinces on the south by the Bay of Bengal and on the west by the Bay of Bengal and by the Youmadoung Mountains, separating it from the province of Arracan. It extends from lat 15 49' to 19 30' and from long 94 11 to 96° 55' It is 240 miles in length from north to south, and 170 m breadth. The area and population of the several districts into which the province is divided are given in the sub-joined table.—

Districts.	Area in Sq Miles	Population.
Rangoon	9 800	137 130
Bassien	6,900	128 169
Prome	4,500	100 000
Henandee	2,200	103 775
Toungoo	3,250	34 257
Tharawaddy	1 950	66 129
	<b>32,300</b>	<b>570 180</b>

The principal river is the Irrawaddy which, reaching the southern frontier of Burmah in the latitude of Mandalay crosses into the province of Pegu, and pursues its course in a southern direction for a further distance of between 200 and 300 miles, reaching the Bay of Bengal by several mouths, which form the delta of the Irrawaddy. Some distance below the city of Prome, the river diverges into two main branches, the more easterly of which

flows by the town of Rangoon, while the western branch passes by the town of Bassein.

The government of India during the late war having determined to annex Pegu to the British empire, it became necessary to make arrangements for the administration of the province. The task was not beset with any extraordinary difficulties. Upon inquiry it became obvious that the whole social and administrative system closely resembled those of Arracan and Tenasserim and it was wisely resolved that the details of the administration for the new province, not less than its general form should be taken from the systems which had long prevailed in the adjacent districts. Accordingly in the departments of civil and criminal judicature, the regulations have been assimilated to those of Tenasserim. As a temporary measure the land revenue is levied on each yoke of cattle, according to the custom of the country but the regulations to be permanently adopted in the revenue department are those of Arracan. The duties upon imports and exports are levied according to the tariff in use at Calcutta.

The earlier history of Pegu would scarcely repay the reader for the labour of tracing it with minuteness. It may suffice to state, that Pegu was formerly an independent state and that Ava was subordinate to it. After a time, however Ava revolted, and succeeded in reducing Pegu to a state of dependency. That country in turn revolted, and reasserted with success its claim of supremacy over Ava. Through the energy of an adventurer named Alompra, this claim was, however questioned the Peguans were expelled from Ava, and war carried into their own dominions. It terminated in rendering Pegu a province of the kingdom of Ava, in which condition it remained until it became British territory. The events which led to the conquest of Pegu and to its final incorporation with the British dominions, will be found noticed in the article **BURMAH**. The result has been to sever from the Burmese empire the richest and most fertile of its provinces, and to deprive the court of Ava of its principal resources for maintaining an army in the field. Under British rule, the country promises decided improvement, and commerce, which never could prosper under such a government as that of Ava, will now find opportunity for developing the full resources of Pegu.

**PEGU**—One of the principal towns in the newly-acquired British province of the same name, situate on the left bank of the river having a similar appellation, and which further south falls into the eastern branch of the Irrawaddy. The old city was destroyed by Alompra in 1757, on his final triumph over the Peguans. The plan of the new town is a quadrangle, the main street running east and west, and being crossed by others at right angles. The streets are for the most part symmetrical, and paved with brick but the houses

are of wood, supported on posts, with roofs lightly covered. The building in the town chiefly attracting attention is the temple of Shoemadod, which, according to Symes, is a pyramidal building, composed of brick and mortar without excavation or aperture of any sort octagonal at the base, and spiral at the top. This author gives a rather particular description of the building but as fifty-four years have elapsed since the publication of his volume as ruin had at that time begun to invade the walls of the lower terrace and as on the British visit in 1824 the edifice was found in a very neglected condition and much injured by the weather it is probable that the account above quoted would require very considerable modifications to adapt it to present circumstances.

Pegu was captured by the British in 1824 and restored upon the termination of the war. During the second war in 1852 the town previously taken and abandoned, was a second time occupied. A determined attempt on the part of the Burmese was made once more to recover it but it was met by the officer in command (Major Hill of the Madras Fusiliers) with a combination of skill and decision which enabled him to maintain it, though under great difficulties, until relief arrived. Distant N from Rangoon 62 miles. Lat. 17° 40', long. 96° 17'.

IKHARI in Bundelkund, a village on the route from Banda to Gwalior 83 miles W of the former 116 S.E. of the latter. It has a bazar and water from wells and a tank but supplies are rather scarce. It is the principal place of a small jaghire or fief, comprising four square miles, containing 800 souls, and yielding a revenue of 800 rupees. The jaghiredar who receives a small tribute from lands appropriated by the neighbouring rajah of Jhansi is stated to maintain fifty infantry. Lat. 25° 38' long. 79°.

PEHONA — A town in the territory of Nagpur or Behar situate on the left bank of the Wurda river and 62 miles S.S.W. from Nagpur. Lat. 20° 20', long. 78° 47'.

PEINULLAH, in the British district of Hoosungabad, territory of Bagur and Nerbedda, head-gov. of the N.W. Provinces, a town on the route from Hoosungabad to Seem, 25 miles E. by R. of the former. Lat. 22° 38' long. 78° 8'.

PEINT with HURSOOL, a petty native state within the presidency of Bombay bounded on the north by the raj of Dhurrumpure and the territory of the Daung rajahs, on the east by the British district of Ahmednuggur on the south by that of Tannah, which also, with Surat bounds it on the west. It lies between lat. 20° 1'—20° 27', long. 72° 53'—73° 40' is forty-six miles in length from east to west, and twenty-eight in breadth, and contains an area of 750 square miles, with a population of 55,000.

On the death of the rajah of Peint, in 1842,

without male heirs, the claim of his daughter to succeed to a Mahomedan chieftainship was deemed untenable, and the estate was taken under the management of the British government. An intimation was, however, made to the Begum, that the estate would be transferred to the husband she might marry, provided he were a fit person to be intrusted with the management. Subsequently the Begum was informed that she was at liberty to marry whom she pleased but that unless her choice was considered by government in all respects unexceptionable, the estate would be continued under British management, in trust for herself and the issue of such marriage but that her husband in virtue of his marriage, would acquire no rights over the principality. Its affairs still continue under the administration of the British, and the last accounts state that it enjoys a high state of prosperity. Peint, the principal place, is situate 73 miles S.E. by S from Surat, and 102 miles N.N.E. from Bombay. Lat. 20° 17', long. 73° 31'.

PEIRGAUM.—A town in the British district of Ahmednuggur, presidency of Bombay 80 miles S of Ahmednuggur. Lat. 18° 33' long. 74° 45'.

PEITAPOOR, in Guzerat, or territory of the Gucowar, a town on the right or western bank of the river Sabarmuttee. Population 7,000. Distance from Ahmedabad N, 15 miles. Lat. 23° 14', long. 72° 40'.

PEITHAN — A town in Nepal 153 miles W from Khatmandoo, and 90 miles N.W. from Goruckpoor. Lat. 27° 58', long. 83° 58'.

PEJUR in Bureahur a river, or rather large torrent in the district of Konasur rises on the south eastern declivity of the Lipi Pass, about lat. 31° 47' long. 78° 18' and holds a south-easterly course of about twenty miles, to the village of Chalan, near which it is joined by the Munglung, a considerable torrent, and below the confluence has the name of Titi described by Jacquemont as a very impetuous and great stream one of the largest feeders of the Satiaj into which after a brief course of about twenty five miles, it falls, in lat. 31° 28' long. 78° 29'.

PELEW GEWEN ISLAND situate at the entrance of the Marthan river. The means by which the British became possessed of this desirable island are curious and interesting. After the treaty of Yandabo was agreed to by the East-India Company and the Burmese, the river Marthan being decided upon as the northern boundary of the former's possessions, a question arose as to whom the island of Pelew should belong. This it was agreed should be decided by the course a guard-ship should take being placed in the river above Marthan, viz. if the ship floated to the west of the island, it should become the property of the Company but if it took the eastern channel, the Burmese should claim it. The ceremony took place, and the

ground above fluted down the stream, entering the sea by the western channel, thereby making it the undisturbed property of the Company. Lat. 15° 20', long. 87° 37'.

**PELLUR.**—A town in the British district of Nellore, presidency of Madras, 72 miles N of Nellore. Lat. 15° 29', long. 80° 6'.

**PEN.**—A town in the British district of Tanjavur, presidency of Bombay, 25 miles S.E. of Bombay. Lat. 15° 45', long. 73° 11'.

**PENANG.**—See **PARANG** OF **WALIS ISLAND**.

**PENCH NUDDEE.**—A river of Berar rising in lat. 22° 11' long. 78° 45', a few miles north of the town of Omrat, and, flowing first easterly for sixty-five miles and south for fifty-three miles, forms a junction with the Kachha river in lat. 22° 15', long. 79° 12' near the town of Kamptee.

**PENGRA BAZAR.**—A town in the British district of Seelampur, in Upper Assam, 13 miles S.W. of Seelampur. Lat. 26° 51', long. 94° 32'.

**PENGUGURRAM.**—A town in the British district of Salem, presidency of Madras, 83 miles N.W. by N. of Salem. Lat. 12° 5' long. 77° 55'.

**PENNAACONDA.**—A town in the British district of Bellary, presidency of Madras, 87 miles S.E. by S. of Bellary. Lat. 14° 5' long. 77° 39'.

**PENNAGUNOHYPOLLE.**—A town in the British district of Masulipatam, presidency of Madras, 81 miles N.W. by W. of Masulipatam. Lat. 16° 55' long. 80° 13'.

**PENNAGUR.**—A town in the British district of Chingleput, presidency of Madras, 53 miles S.W. of Madras. Lat. 12° 39', long. 79° 44'.

**PENNAR (NORTHERN).**—A river having its origin in the territory of Mysore, about lat. 13° 25' long. 77° 45', and deriving its earliest supply from a square stone tank in the centre of the ruined fort of Chandradroog. The tank overflows in the rainy season and the redundant water, falling into a deep cleft in the rock, issues in a stream from the side of the mountain, about 200 yards lower down. This source fails during the dry season. The stream, flowing to the north-west for thirty miles, then crosses the northern boundary of the territory of Mysore and takes a northerly course for ninety-five miles, to Oodjeepey Kroog, where it turns eastward, and, continuing to flow in that direction for 230 miles, passes in its course by Nellore, and falls into the Bay of Bengal in lat. 14° 38' long. 80° 15'. Its total length, being 255 miles. Its principal tributaries on the right side are the Chittiravetty, the Pan pagu, and the Chayair, on the left side, the Koodandur.

**PENNAR (SOUTHERN).**—A river of Mysore, rising north of the Nandydroog hills, and in lat. 13° 32' long. 77° 45'. Receiving the redundant water of a series of tanks in that place, it flows circuitously, but

generally south for fifty-five miles, to Mootan-halli where it crosses the south-eastern frontier of Mysore into the Carnatic through which it holds a south-westerly course of 190 miles, and falls into the Bay of Bengal in lat. 11° 45', long. 79° 51', a mile north of Fort St. David, its total length being 245 miles. Gold is found in its sands, in its passage through the Carnatic. Heyne erroneously states that this river falls into the river Cauvery.

**PENT.**—A town in the British district of Ratnagerah, presidency of Bombay, 40 miles N.N.E. of Ratnagerah. Lat. 17° 30', long. 73° 35'.

**PENY KYOUNG BENTINCK,** or **MIDDLE BOLONGO,** the centre of three islands at the entrance of the Aracan river. It is about twenty-six miles in length and six in breadth, mountainous, woody and rugged, without any appearance of inhabitants or cultivation. The centre of the island is in lat. 20° long. 93° 4'.

**PEORA** in Sirhind a small town on the route from Thanesar to Kythul and 15 miles W. of the former town. It is situated on a small river or torrent access to the water of which is given by several neat ghats or stairs. It rises in a striking manner over the jungle which surrounds it, being situated on a rough mound, formed by the ruins of a more ancient town. The houses are built of good brick but are confusedly intermixed with ruins in every stage of decay. Distance N.W. from Calcutta 1,003 miles. Lat. 29° 50', long. 76° 37'.

**PEORAH** in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village with a public bungalow or reception house, on the route from Almora to Bareilly, and nine miles S. of the former. Elevation above the sea 5,288 feet. Lat. 29° 31', long. 79° 40'.

**PEPERGAON** in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Furruckabad to Mynpooree five miles W.S.W. of the former. Lat. 27° 22' long. 79° 34'.

**PERAI** in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route by Rajapur ferry from the cantonment of Allahabad to Banda and 18 miles W. of the former. Lat. 25° 25' long. 81° 34'.

**PERANTUREI.**—A town in the British district of Coimbatore, presidency of Madras, 46 miles E.N.E. of Coimbatore. Lat. 11° 16', long. 77° 55'.

**PERBOOTPORE,** in the British district of Ghazipur, lieutenant-gov. of the N.W. Provinces, a village on the left bank of the Ganges, 532 miles N.W. of Calcutta by water; E. of Ghazipur cantonment 50. Lat. 25° 43', long. 84° 20'.

**PERI,** in the British district of Gorakhpore, lieutenant-gov. of the N.W. Provinces, a small town of about 100 houses, near the south-eastern frontier, towards the British district of Saran,

distast 50 miles S.E. of Gernakpore cantonment. Lat. 26° 20', long 84 12

**PERIAPATAM**, in the territory of Mysore, a town near the south-western frontier, towards Coorg, in an elevated tract on the eastern declivity of the Western Ghats, and about 4 000 feet above the level of the sea. The surrounding country is well watered, containing many small lakes, besides numerous tanks, the latter however, being in a ruinous state, either from neglect or wilful injury during the frequent wars with which the country has been afflicted. The soil is rich, and the climate rather moist and fertile hence its name, indicating "favoured town." Formerly a flourishing place protected by two forts, the inner of mud surrounded by another of stone it was utterly wasted by the troops of Tipoo Sultan. When visited by Buchanan in 1800 the inner fort was quite ruinous, in consequence of the defences having been blown up and the place had become so infested by tigers, as to be dangerous to enter even at mid-day some families of Brahmans, who had houses in the outer fort were obliged to shut themselves up at nightfall. There are two temples of the Brahminical and one of the Jain persuasion, in the town. The mahal or palace consists of a square area, surmounted by a dome and surrounded by apartments. This place was formerly the capital of a petty rajah who in 1844 being besieged by Kanthu Rao Bano, the kurtar or ruler of Mysore in despair destroyed his family and rushing forward recklessly died sword in hand in the midst of his enemies. In 1791 it was occupied by the British army of Bombay under the command of General Abercromby with the view of co-operating with that of Lord Cornwallis before Seringapatam but the siege of that place being then relinquished Abercromby precipitately retreated leaving behind him part of his battering-train and a large quantity of powder which Tipoo Sultan caused to be exploded, to destroy the great Jain temple in which it had been stored. In the following year Periapatam was again occupied by the army of Bombay and subsequently once more in 1799 by the army of that presidency under General Stuart, marching to join General Harris, then besieging Seringapatam. Just previously to the time of its occupation by General Abercromby it contained 1 604 houses which number according to the usually received ratio of five inmates to each house would indicate a population of 7 500 persons. Tipoo Sultan not only dismantled and rumbled the forts, but destroyed the houses also. After the overthrow of Tipoo Sultan, in 1799, the inhabitants returned, and the place has since been slowly recovering from its disasters. Distance from Seringapatam W 43 miles, Bangalore, S.W. 110, Mangalore, S.E. 90 Madras, W., 290. Lat 12° 21', long 76° 9'

**PERIKHALKE**.—A town in the British district of the Soudumbonds, head-gov of

Bengal, 83 miles E. of Calcutta. Lat. 22° 30', long 89 42

**PERIM**.—An island in the Gulf of Ombay, off the harbour of Gogo, in Gassera, on the west side of the gulf, and in the British district Ahmedabad. The island is about two miles in length and half a mile in breadth and is separated from the mainland of Gassera by a channel, which in parts is seventy five fathoms deep, while its breadth, according to one authority, is 500 yards according to another, two miles. In the island are the remains of a considerable fort, and of an antique temple, containing an image of Buddha. This island has received much attention from geologists, from the great quantity of organic remains found imbedded in the conglomerate. They are those of the elephant, mastodon hippopotamus rhinoceros, hog, deer ox, tortoise, and saurian reptiles. Baron Hügel obtained forty one pieces of fossil bones, the greater part belonging to the Mastodon Indicus, of which the teeth left no doubt. Of these he says, "Some of the bones are of an immense size one fractured piece of the tusk measuring from the centre to the outside of the circle, 54, which gives 104 inches diameter or thirty four inches in circumference." A lighthouse has been erected on this island. Lat 21 38' long 72 18'

**PERIPOLLIAM**.—A town in the British district of Chingleput, presidency of Madras, 22 miles N W of Madras. Lat 13 17, long 80° 7'

**PERMACOIL**.—A town in the British district of South Arcot, presidency of Madras, 33 miles N of Cuddalore. Lat. 12 10', long. 79 46'

**PEROWA**, in the territory of Tonk, or possessions of Amer Khan, a town on the route from Oojan to Kotah 69 miles N of former 72 S of latter. Lat 24 9', long 78 4'

**PERRIMBIRE**.—A town in the British district of Chingleput, presidency of Madras 60 miles S.W. by S. of Madras. Lat 12 23', long 79 50'

**PERTAPPORE**.—A town in the British district of Mulnapore, head-gov of Bengal, 28 miles E. of Midnapore. Lat. 22° 24' long 87 50'

**PERTAUBGHUR**.—See PUNTAUBHUR.

**PESHAWUR**.—A province of the British principality of the Punjab, occupying the extensive north-western corner of the empire, and lying between the Indus above and below Attock and the Khyber Mountains, through which is the great Khyber Pass. It is bounded on three sides by the Khyber, Mohmand, Swat, and Khattak hills in the east it is open to the Indus. It lies between lat. 33 42' and 34 30', and long 71 35' and 72 42'. In the extent here assigned to this territory, it is sixty-five miles long, fifty miles broad, and about 2,324 square miles in extent, with a population

amounting to 450,000. Its climate is very hot in summer, the thermometer frequently reaching 110° in the shade. The heat, however, is occasionally mitigated by the breezes from the neighbouring mountains and as the country, naturally fertile, is well watered by the Indus, the Kabool river and its tributaries, the chief of which are the Swat and the Bara, and is, moreover, well cultivated, it is amazingly productive. The water is applied to the purposes of cultivation by means of canals and innumerable small channels from whence it is drawn up by means of a pole having a fulcrum in the middle and a bucket suspended at one end, which is raised by the hand pressing the other end, or where the depth is too great for this mode of operation, the water is obtained by the use of the Persian wheel, worked by camels or bullocks. Here, water is in general too near the surface to require the use of the draw well. In consequence of this abundant supply, the country continues verdant during the whole year. The principal crops are wheat, barley, maize, millet, and various other crops suitable to warm climates. Peshawur produces the finest rice in the world. It is called Bara rice, because grown on ground irrigated by that river and Runjeet Singh ever watchful to secure to himself the best of everything prized by man, exacted part of his tribute in this valued article. Esculent vegetables are cultivated with much success. Many of them are of the kinds known in England—carrots, turnips, radishes, cabbages, cauliflowers, onions, others are those of common occurrence in India. As a substitute for hay, corn and certain green crops are cut before ripe and dried for fodder. Barley, and sometimes wheat, are cut before they form ears, and used for this purpose and this treatment does not injure the crop. What is called here *paules*, is a very important portion of the crop, and comprises musk melons, water melons, seeded melons, and various kinds of cucumbers, pumpkins, and gourds, produced in the greatest luxuriance, and consumed in the hot season in large quantities. The castor-oil plant is cultivated the oil, however, is not intended for culinary or medicinal purposes, but for any other in which a coarse oil may be required. Sesamum mustard and some other plants, are reared for the sake of their oil. The sugarcane is raised to be consumed as a sweetmeat, sugar itself being obtained from Hindoostan. Ginger, turmeric, tobacco, and cotton, are also extensively cultivated. The ground is moved by the plough, the spade being little employed. Soybeans are unknown, and crops of all kinds are cut with sickles. Oxen are used for ploughing, harrowing, and treading out the corn. Milberry-trees abound, and milk is produced in moderate quantities. The principal fruits are plums, figs, peaches, pomegranates, mulberries, and quinces, but, though large, all except the last have an inferior flavour. The quince of Peshawur is said to surpass those of all other countries.

Elphinstone, who entered the country in March from the great defile through which the route from the south passes, describes the scene formed by the mountains, crowded with eternal snow, surrounding the luxuriant and picturesque plain as at once grand and beautiful in the highest degree, and he found that a nearer survey increased his admiration. At the time of Elphinstone's visit, the population was so dense, that thirty-two villages were counted within a circuit of four miles. It may be doubted whether the impressions of the European visitors on this occasion were not somewhat over sanguine, but it was their belief, "that never was a spot of ground better peopled." Since its annexation to the British dominions the province has been held by a regular military force of 10,000 men in which are comprised two regiments of European infantry and a detail of artillery.

Through this fine province lies the great route from Khorasan and Kabool into India, by the passes of the Khyber Mountains and across the Indus at Attock. It is also traversed by the grand trunk road from Lahore to the city of Peshawur along which is located the army of the Punjab. The former of these routes being open to the wild inhabitants of the mountains, it was found necessary to adopt a comprehensive plan of defence for the security of the valley.

PESHAWUR or PESHAWER, the capital of the province of the same name is situate about eighteen miles east of the eastern extremity of the Khyber Pass. In the early part of the present century, when visited by Elphinstone it was a flourishing town, about five miles in circuit, and reported to contain 100,000 inhabitants. Twenty years later Runjeet Singh, after defeating the Afghans in the decisive battle of Nowshera, took Peshawer demolished the Bala Hissar at once the capital and state residence destroyed the fine houses of the chief Afghans desecrated the mosques, and, cutting down the groves and orchards about the city laid waste the surrounding country. Subsequent exactions and oppressions prevented for a time its revival. The numerous mosques, many built in a splendid style of oriental architecture, were intentionally polluted by the Sikhs, and the commerce of the city languished under their stern rule. The fortress erected by them on the site of the Bala Hissar, is a square of about 220 yards, and is strengthened by round towers at each angle every curtain having in front of it a semicircular ravine. There is a fausse-bras all round, of substantial towers and curtains, with a wet ditch. The height of the inner walls is sixty feet, of the fausse-bras thirty, all constructed of mud. Within, are capacious and well-constructed magazines and storehouses. The only gateway is on the northern face and it is protected by towers. The present population of the city is returned at 55,295 of whom 7,706 are stated to be Hindoos, and the remainder Mussulmans.

# PET-PHE.

**Pushawur** was built by the Mogul emperor Akbar, who affixed the name, signifying 'advanced post' in reference to its being the frontier town of Hindostan towards Afghanistan. Elevation above the sea 1 068 feet. Since its occupation by the British all restrictions have been removed and trade is rapidly expanding. The suburbs and environs are also represented as having improved in appearance. Lat. 34, long 71 38'

**PETHORA GURH** in the British district of Kumaon, lieut. gov. of the N W Provinces, a cantonment for troops stationed to protect the frontier towards Nepal. It is situated about 10 miles W of the right bank of the Kali river and on a low ridge in the middle of Shere valley. There is a bazar attached to the cantonment, and also a large airy hospital, built of stone and roofed with slates. A hundred yards west of the lines is Fort Loudoun, a neat and well-arranged structure, which commands the whole place. The elevation above the sea probably does not exceed 1 600 feet. Distance N W from Calcutta 1,200 miles. Lat. 28° 35', long 80 16'

**PETRABAR**—A town in the British district of Rangpur lieut. gov. of Bengal 21 miles E by S of Rangpur Lat. 23 40' long 85 50'

**PETT**—A town in Guzerat, or dominions of the Guicowar situate 92 miles N N E. from Baroda and 89 miles N E. by E. from Kaira. Lat. 28 30' long 73 46'

**PETTAH**—A town in the British district of Masulipatan, presidency of Madras three miles N W of Masulipatan. Lat 16 11, long 81 10'

**PETTEE**, in the Baree Doab division of the Punjab, a town situated 11 miles from the right bank of the Sutley 46 miles E S E of the town of Lahore. Lat. 31 17', long 74 54

**PETTEL**—A town in the British district of South Arcot presidency of Madras 40 miles N W of Ouddalore. Lat. 12° 7', long 79 26'

**PEYHANNEE**, in the territory of Oude, a small town on the route from Futtelgurh cantonment to that of Seetapoor 48 miles N E. of the former 34 W of the latter. It is situated between the rivers Gomtee and Sone. It has a bazar and abundance of good water. Distance N W from Lucknow 70 miles. Lat. 27 43' long 80° 17'

**PEYNT**—See **PEINT**

**PEYTAHN**—A town in Nepal, situate on the left bank of the Jurna river and 206 miles W by N from Khatmandoo Lat. 28° 34, long 82 6'

**PEYZOO**, in the Damau, a division of the Punjab, situate 18 miles W from the right bank of the Indus, 183 miles S.S.W. of the town of Pushawar Lat. 32 15' long 70° 53'

**PHAGEH**—A town of Burmah, 191 miles

N by W from Ava, and 96 miles E. by S. from Moneepoor Lat. 24° 34', long. 95° 50'

**PHAGGEE**, in the state of Jeypore, in Raypootana, a town, with bazar, on the route from Delhi to Nemooh, 192 miles S.W. of former. 180 N E. of latter. Lat. 26° 34, long 75 28'

**PHAJUDEE**—A town in the native state of Bhotan situate on the right bank of a branch of the Guddada river, and 63 miles N E by E from Darjeeling Lat. 27° 30', long 86° 19'

**PHALGU**, or **PHALGOO**, in the British district of Behar presidency of Bengal, a vast torrent formed by the junction of two great mountain-streams, the Mehanee and Lalajun, which rising in the British district of Ramgurh flow northward, and making their way through the mountains on the south frontier of Behar flow through this latter district in a northerly direction. From the junction near Gayah, and about lat. 24 44 long 85 3, it has an enormous volume of water during the rainy season in the latter part of summer when it rushes down with great violence and rapidly filling its channel from 500 to 800 yards wide bounded on each side by high and rocky banks. It thence proceeds first through Behar and finally through Patna, in a course a little east of north to lat 25 25, long. 85 30' where about 180 miles from its remotest source it takes an easterly direction, which it generally holds to its fall into the Ganges, on the right side, in lat 25 11 long 85 10', having flowed a total distance of about 244 miles. It sends forth a great number of branches right and left, so that during the rainy season its ramifications everywhere intersect the country and partially lay it under water. In the lower parts of its course, it bears the name of Mehanee in the higher parts, Jalwara and Kuthor that of Phulgou being confined to the middle portion, extending about twenty five miles and considered sacred, from its vicinity to Gayah.

**PHALIAH**, in the Jetch Doab division of the Punjab, a town situate six miles N of the right bank of the Chenab 78 miles N W of the town of Lahore. Lat. 28° 27' long. 73 38

**PHAPAMOW** in the British district of Allahabad, lieut. gov. of the N W Provinces, a town on a small eminence on the left bank of the Ganges the bed of which is here a mile and a half wide, the stream during the dry season occupying one-fourth of this space. It is on the route from the cantonment of Allahabad to that of Lucknow and four miles N of the former. Distance by river N from Allahabad seven miles, N W from Calcutta 815. This place is stated to have been selected for the location of the government powder-manufactory Lat. 25 37, long. 81 56'

**PHENA**, in the British district of Bijnour, lieut. gov. of the N W Provinces, a village 706

# PRE-PHU

on the route from the town of Moradabad to that of Meerutnugur, and 84 miles N W of the former place. Distant N W from Calcutta 222 miles. Lat. 29° 5', long 78° 25'.

**PRENCHOOGUNJE.**—A town in the British district of Silhet, lieut. gov. of Bengal, 16 miles S.E. of Silhet. Lat. 24° 41' long 91° 57'.

**PHILLOUR** in the Julinder Doab, a division of the Punjab, a town situated on the right bank of the Sutley eight miles N W of the town of Ludhiana. Lat. 31° 1', long 75° 50'.

**PIRANDEE.**—A town in the native state of Cutch 22 miles S. from Bhooj and 18 miles S.N.E. from Mandava. Lat. 22° 57' long 69° 40'.

**PHITTI**, or **PITTY RIVER.**—One of the largest, deepest, and best-defined of the mouths of the Indus, and generally frequented by the Indus steamers to and from Karachi. On the south side of the entrance two flagstaff beacons have recently been erected, which may be seen in the offing six or seven miles. The mouth of the Phitti is in lat. 24° 42', long 67° 12'.

**PHOAH.**—A town in the British district of Umballa, in the Cis-Sutley territory 31 miles E. by W of Umballa. Lat. 29° 58' long 76° 40'.

**PHOBOOM.**—A town in the British district of Amherst one of the Tenasserim provinces, 22 miles S.E. by E. of Moulmein. Lat. 16° 12', long 93° 6'.

**PHOOKANUH**, in the British district of Musuffnugur lieut. gov. of the N W Provinces a town on the route from Musuffnugur to Rohtuk 22 miles W.S.W. of the former. Lat. 29° 19' long 77° 29'.

**PHOOL**, in Sirhind a town forty-eight miles from the left bank of the Sutley and on the route from Delhi to Ferozepore by Munk. It forms part of the possessions of a Sikh chieftain under British protection and control. Distant N W from Calcutta, by Delhi and Munk 1 045 miles. Lat. 30° 22', long 75° 14'.

**PHOOLGHUR.**—A small raj under the superintendence of the political agent for the south west frontier of Bengal. Its central point is in lat. 21° 15', long 88°, the area is 390 square miles. Great part of the country is flat, but there is a portion considerably elevated, which enjoys the advantage of a cool temperature. The soil throughout is rich, and adapted for successful cultivation, but little is reported to be done to improve its capabilities, and herds of wild buffaloes overrun the neglected territory. The administration of the government was found to be such as might be expected from the idle and lawless character of the people, and security for life or property to be unknown. The country has been computed to produce a revenue of

6,000 rupees, the amount of the tribute is trifling. The post road from Bombay to Rangoon traverses this district for some distance, and in consideration, a deduction of eighty rupees is made from the tribute. The population is estimated at 40 000.

**PHOOLMURRY** in Hyderabad, or territory of the Nizam a town near the north west frontier, towards the British district Ahmednugur. It is situated on the upper part of the river Gurka Poornah a considerable tributary of the Godavery. The situation is pleasant, amidst groves of mango trees, tamarinds, and coconut-trees. It is surrounded by a wall flanked with towers of masonry in stone, and is the residence of a petty nawab, or more properly jaghiredar. Distance from Aurangabad N 20 miles Hyderabad N W 280 Lat. 20° 9' long 75° 28'.

**PHOOLPOOR** in the British district of Allahabad lieut. gov. of the N W Provinces, a town on the route from the city of Allahabad to Jounpour and 19 miles N.E. of the former. It is situated twelve miles from the left bank of the Ganges and on the right bank of the small river of the same name. It has a bazar and is supplied with water from a tank and wells. Lat. 26° 35' long 82° 9'.

**PHOOLREYEE**, in the British district of Etawa, lieut. gov. of the N W Provinces, a village on the route from the cantonment of Agra to that of Etawa, and 14 miles N W of the latter. Lat. 26° 56' long 78° 55'.

**PHOOLTAMBA.**—A town in the British district of Ahmednugur presidency of Bombay, 50 miles N of Ahmednugur. Lat. 19° 48' long 74° 40'.

**PHOOLTCLA.**—A town in the British district of Jessore, lieut. gov. of Bengal, 63 miles E.N.E. of Calcutta. Lat. 23° long 89° 24'.

**PHOOLWAREE.**—A town in the British district of Patna lieut. gov. of Bengal, nine miles W.S.W. of Patna. Lat. 25° 50', long 85° 8'.

**PHOONDA.**—A town and pass in the native state of Kolapoor presidency of Bombay leading to Vindroog in the British district Ratnagerah distant 34 miles S.W. from Kolapoor. Lat. 16° 22', long 73° 57'.

**PHOONDI** or **COONDER RIVER.**—One of the mouths of the Indus, having five feet at low water. This stream communicates with the Baggaar and, during the swell of the Indus, discharges fresh water. People are here employed in pearl fishing. The mouth of the Phoondee is in lat. 24° 35', long 67° 13'.

**PHUGWARA** in the Julinder Doab division of the Punjab a town situated 15 miles N from the right bank of the Sutley, 14 miles S.E. of the town of Julinder. Lat. 31° 14', long 75° 45'.

**PHULGWDEE**, in the Rajpoot state of

# PHU-PIL.

**Jodhpoor** a town on the route from Beekmeer to Balmeer and 147 miles N.E. of the latter. It is built on a rising ground, and appears to have been once surrounded by a wall, of which a ruinous portion remains on the southern side of the town. The number of houses is nearly 3,000. The road in this part of the route is good, lying among scanty cultivation and thin jungle. Distant N.W. from Calcutta, by Agra, Meerabad and Nagor 1,180 miles. Lat. 27° 8' long 72° 28'.

**PHULSOOND** in the Rajpoot state of Jodhpoor a town in the depressed tract near the south west frontier. Lat. 26° 24' long 71° 57'.

**PHULTUN**—A town in the Sattara jaghure of Phulton, 56 miles S.E. from Poona, and 37 miles N.E. from Sattara. Lat. 17° 59' long 74° 31'.

**PHULUNG**—A town in the native state of Bhutan, situated on the left bank of a branch of the Monas river and 87 miles N.W. by N from Durrung. Lat. 27° 28' long 91° 20'.

**PHUMARA**—A town of Bund, within the territory of Ali Moored, situated on the right bank of the Naroo river and 32 miles S.S.E. from Khyrpoor. Lat. 27° 10' long 69° 1'.

**PHURSABANA**—A town in the native state of Jushpoor on the south west frontier of Bengal 78 miles N.W. from Sumbulpoor and 102 miles S. by W from Palamow. Lat. 22° 25' long 83° 32'.

**PHURSOO** in the territory of Bhurtpore, a village on the route from Agra to Ajmeer 45 miles W. of the former 183 E. of the latter. It is situated on the Bangunga, which in the periodical rains, is a brisk stream but when Heber visited the place in the middle of January its course was indicated merely by a dry sandy channel. The village contains a fortified house of the rajahs, now empty and ruinous but built in by no means a bad taste and having its surrounding court ornamented with a range of handsome stone cloisters, lining the inside of the mud rampart. The surrounding country, though naturally of little fertility, is indefatigably irrigated with water drawn from wells, and is richly cultivated under grain crops. Lat. 27° 8' long 77° 23'.

**PHYELA**—A town in Nepal, 37 miles N.E. from Khatmandoo and 184 miles N. by W from Darbanga. Lat. 28° 3' long 85° 45'.

**PICHAOUREE**, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a small town or village on the route by Mubaban from the city of Agra to the cantonment of Muttra, and 17 miles S.E. of the latter. Lat. 27° 23' long 77° 59'.

**PICHORE**, in the territory of Gwalior a town near the S.E. frontier, towards Duttah. According to the description of Tiesenthaler, about a century ago, here was a large fort of masonry, with three gates, battlements, and

towers, and situated on a rocky eminence the town lying below it. The rajah a Jat, formerly possessed territories in the vicinity of Gwalior yielding an annual revenue of from 33,000L. to 40,000L. but they were wrested from the family by Bundia, who left it no more than a jaghire or feudal grant of 1,500L. annually. In consequence of the high lineage of the jaghireedar his daughter was in 1633 married to Bulwant Singh, son and heir of Baldeo Singh, rajah of Bhurtpore. Pichore is 25 miles S.S.E. of Gwalior 85 W. of Calpee. Lat. 25° 57' long 78° 30'.

**PICKALOW**—A town in the British district of Cuttack, lieutenant-gov. of Bengal 18 miles E. by N. of Cuttack. Lat. 20° 50', long 86° 11'.

**PILAKOOND**, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Moradabad to that of Moradnuggur, and 23 miles N.W. of the former place. Distant N.W. from Calcutta 914 miles. Lat. 28° 59' long 78° 30'.

**PILLEEBHEET**—A town, the principal place of the pergunnah of the same name in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces. It is situated on the left bank of the river Gurrah the bed of which is here 200 yards wide but the stream in the dry season from December to June, so shallow as to be fordable though at other times passable only by ferry. The town is of considerable extent and the route from Bareilly to Patungah passes through it. The population was officially returned in 1853 at 26,760. Pilleebheet is the mart of a considerable traffic, by which timber pitch wax honey wool, borax metals of various kinds, and other produce of the Terai or marshy forest of Kumaon, and of Chinese Tartary are exchanged for goods furnished from the plains. The Pilleebheet rice much prized throughout India for its whiteness, firmness and fine flavour is produced in the south of Kumaon, in the fertile valley down which the Kowla flows to the plain and has received the name by which it is generally known in commerce, in consequence of being brought to market here. Elevation above the sea 517 feet, distance N.W. from Calcutta 802 miles. Lat. 28° 38' long 79° 52'. The territorial division of which this town is the principal place formerly constituted a separate district it is now incorporated with the district of Bareilly.

**PILLITCH**—A town in the British district of Patna, lieutenant-gov. of Bengal, 38 miles S.E. of Patna. Lat. 25° 12', long. 85° 27'.

**PILOWDA**, in the Rajpoot territory of Jeypore, a town on the route from Agra to Kotah, 90 miles S.W. of former, 180 N.E. of latter. According to Thore it is a large town, built on the side of a hill. It is stated to have 1,000 houses, an amount which would assign

# PDM—PIP

it about 5,000 inhabitants. Lat. 26° 37', long 76 55'

**PIM RIVER.**—See **PATROR.**

**PIMPULGAUM.**—A town in the British district of Ahmednuggur, presidency of Bombay, 17 miles N.E. of Nasick. Lat. 20 19', long. 73 59'

**PIMPULNEIE.**—A town in the British district of Candesh, presidency of Bombay, 39 miles N.W. of Malhgaum. Lat. 20 55', long 74 4'

**PINAHT** or **PINNAHUT** in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a town which with Bah gives name to the pergunnah of Bah Pinnahut. It is situated two miles from the left bank of the Chumbul, 30 miles S.E. of Agra, and contains a population of 7,047 inhabitants. Lat. 26 51', long 78 28'

**PINAYA.**—A town within the dominions of Chohab Singh, the ruler of Cashmere, 70 miles S.S.W. from Srinagar and 112 miles N by E from Lahore. Lat. 33 11', long 74 25'

**PIND DADUN KHAN,** in the Punjab a town lying near the right or western bank of the Jhelum, from which it is separated by a narrow verdant plain. It consists of three small collections of houses, situated close to each other, and about four miles from the river. The houses are built of mud, with a framework of Isodar or cedar, the materials for which are floated down the river from the mountains to the north. Pind Dadun is a short distance south of the Salt range, and salt is raised in the vicinity for the supply of a great part of the Punjab. Population 12,688. Lat. 32° 36' long 73 5'

**PINDEE PUTHAN** in the Reschna Doab division of the Punjab a town situated six miles from the left bank of the Chenab, 71 miles N.W. by W. of the town of Lahore. Lat. 32 long 73 16'

**PIND MULIK ONLEA** in the Sunde Sagur Doab division of the Punjab a town situated 10 miles S.E. from the left bank of the Indus, 54 miles S.E. by S. of the town of Pashawur. Lat. 33 14 long 73 8'

**PINDRAER,** in the British territory of Sangur and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Jubbulpore to the territory of Nagpore, 45 miles S.E. by S. of the former. Lat. 22 34, long 80 17'

**PINDUR.**—A river rising in the British district of Kumaon, in lat. 30° 19', long 80 6' from three snow beds on the western declivity of a summit of the Himalaya, having an elevation of 23,491 feet. It takes a course generally south-west for forty five miles, to Chirunga, where it turns north-westward, flowing in that direction thirty miles, to Kerpug in lat. 26° 15', long. 79° 15', where it joins the Ahikunda.

**PINGERI,** in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to that of Muttra, and 19 miles N.W. of the former. Lat. 27° 17', long 77 58'

**PINJOR,** on the north-eastern boundary of Surhind, a small ruined town belonging to the rajah of Puttiala, is situated at the confluence of two feeders of the river Gagur. The rajah has here a residence and pleasure-ground, which cannot be better described than in the language of an intelligent visitor — "We next proceeded to a most delightful place. It is a garden which has been laid out on the natural slope of the ground in six separate and successive terraces, one below another." It contains about sixty acres, is well stocked with trees, bearing the mango, orange, pomegranate, apple, and some other fruits. The fort of this place was dismantled by Bourquin, a French adventurer in the service of Doulut Rao Scindia. The inhabitants of Pinjor at present are few, but the care displayed in the construction and embellishment of a large baoli or well, and the numerous fragments of Hindoo sculpture and architecture scattered about bear evidence of former populousness and wealth. Pinjor gives name to a valley or doon teeming with vegetable and animal life. The town is distant N.W. from Calcutta, via Kurnaul and Umballah, 1,033 miles. Lat. 30 48' long 76 59'

**PINYAREE,** in Sunde a great branch of the Indus, parting from the main stream on the eastern or left side, at Bunnia, in lat. 25 2' long 68 22'. A little below this place Burnes found the channel of the Pinyaree during the low season, to be a mile broad, with a large sandbank in the middle. It is navigable downwards as far as Mughrabee, where a bund or dam, forty feet broad was thrown across it by one of the amirs in 1799. At Mughrabee this great watercourse is called the Goongroo. Below this dam it is navigable southwards to the Seer mouth in lat. 23 41' long 78 11', at which it is two miles wide.

**PIPCHA,** or **BARDAN PIPCHA.**—A town within the dominions of Gholab Singh, the ruler of Cashmere, 124 miles E.S.E. from Srinagar, and 105 miles N.N.E. from Kaogra. Lat. 33 25, long 77° 1'

**PIPELI,** in the British district of Bynour, lieutenant-gov. of the N.W. Provinces, a village on the route from Moradabad to Meerutnuggur and 44 miles N.W. of the former. It is situated in an open country partially cultivated, and from which water and considerable supplies can be obtained. Distant N.W. from Calcutta 932 miles. Lat. 29 11, long 78 17'

**PIPERA,** in Bundelcund, a town situated in the petty raj of Bijawur on the right bank of the river Dhamra, 90 miles S.W. of Banda. Lat. 24 46, long 79° 34'

# PIP-PTT

**PIPEREAKH**, in Bundelkhand a ghat or pass by which the route from Banda to Jabulpore ascends from the more depressed tract of Lobanagore to the plateau on the range called by Franklin the Bandur Hills. It is 105 miles S. of Banda, 90 N. E. of Jabulpore, and is steep, but neither long nor very difficult. About two miles from the pass, the Cane rolls over the rocky brow of the mountain and forms the falls of Piperak. 'They are well worthy the notice of the passing stranger on account of the singular forms presented by the rock, which receives the river and conceals its course for many miles.' Lat 24 18' long 80° 23'

**PIPERENDA**, in the British district of Banda, head-gov of the N W Provinces, a small town on the route from Cawnpore by Chilla Tara Ghat, to the town of Banda, 10 miles N of the latter. It has a bazar and abundance of water. Lat. 25 38', long 80 28'

**PIPLAYE**, in the Rajpoot state of Jeypore, a considerable walled town with fort, situate in an extensive sandy plain 55 miles S.E. of the town of Jeypore. Lat. 26 31' long 76 35'

**PIPRAGANOW** in the British district of Mirzapoor head-gov of the N W Provinces, a village on the right bank of the Ganges three miles N of the city of Mirzapoor or lower down the stream 718 N W of Calcutta by the stream. Lat. 25 12', long 82 39'

**PIPRAH**, in the district of Sultanpore territory of Oude, a town 80 miles S.E. of Lucknow. It is situate in a dense jungle. Distant N from Gouda eight miles. Lat. 26 6', long 82 4'

**PIPRA KHAS**—See **PIPRACH**.

**PIPROWL**, in the British district of Bundelkhand, head-gov of the N W Provinces, a ferry over the Ganges, on the route from Agra to Bareilly and 81 miles N W of the former. The stream of the Ganges being in some seasons divided into several branches at the ferry of Kouchla Ghat, four miles below Piprowl the passage is then found preferable at the latter. Piprowl is in lat. 27 57', long 78 55'

**PIPUREAH** in the British district of Shahjehanpore, head-gov of the N W Provinces, a village on the route from Pilibesheet to Oude and 35 miles S.E. of the former. Lat. 28° 20' long 80 14'

**PIRI**—A town in Nepal 53 miles E. by S. from Khatmandoo, and 108 miles N from Durbunga. Lat. 27° 27' long 86° 9'

**PIRKER**, in the British district of Sahajpore, territory of Sagar and Nerbudda, head-gov of the N W Provinces, a town on the route from Sahajpore to Ruttimpore, 44 miles S.E. by S. of the former. Lat. 23 47', long 81 45'

**PIRNAGAR**, in the territory of Oude, a village on the route from Lucknow to Seetapore, 27 miles N of the former 14 S of the latter. It has a small bazar and is well provided with water. Lat 27 23', long 80 45'

**PIR PANJAL**, or the **SAINT'S MOUNTAIN** a lofty range, forming part of the south west boundary of Cashmere, and separating it from the Punjab. Its general direction is from north west to south-east, its length from the Baranula Pass, at the former extremity to the Pir Panjal Pass, or that of Nandan Sar, at the latter, is about forty miles. Its highest point is supposed to be about in lat 33 40' and is estimated to be 15 000 feet above the sea. According to Vigne the highest part is basaltic, consisting of amygdaloidal trap which has upheaved transition rocks appearing on its borders. Quartz slate and other primary formations are observable on the northern or Cashmere side. At the south western extremity is the pass, generally called the Pir Panjal Pass, or that of Nandan Sar from a lake of that name near its northern extremity. It is about 12 000 feet high and though devoid of trees, is below the limit of perpetual congelation. The name of Pir Panjal, or the Pir's Mountain has been given from one of its summits being the residence of a Pir or Mahometan saint, who gives benedictions to those who travel over the pass, and also supplies them with refreshments. This pass, though no elevated must remain open to a late period in the year as Von Hügel traversed it in the middle of November with a numerous train of porters and other attendants from the plain.

**PIR PANJAL**, a river in Gholab Singh's territory rises in lat. 33 30' long 74 43', and, flowing first north westerly for forty five miles and subsequently south-westerly for sixty three miles, falls into the Jhelum, in lat. 33 16' long 73° 38'

**PIRTHULUH** in the jaghirs of Bulabgun, head-gov of the N W Provinces, a village on the route from Delhi to Muttra, and 54 miles S. of the former. Lat. 28 18' long 77 21'

**PISEENY**—A town in Hyderabad or territory of the Nizam 144 miles N N W from Hyderabad, and 128 miles S. by E. from Ellichpore. Lat. 19° 24' long 78 5'

**PITLAUD** or **PITLAUD** in the territory of Indore or possessions of Holkar's family a town in the jaghirs or feudal grant of the chief of Jaboon, on the route from Neemuch to Baroda 117 miles S. of former, 150 N E of latter. Lat. 23 long 74 53'

**PITLAUD**—A town in the British district of Kaira, presidency of Bombay, 45 miles S.E. of Ahmedabad. Lat. 23° 27', long 73 50'

**PITORIA**, in the British district of Sagar territory of Sagar and Nerbudda, head-gov

of the N W Provinces, a town on the route from Sangur to Narwar 21 miles N W of the former Lat. 24° 8' long 78° 37'.

**PITTY RIVER.**—See **PATRIE**.

**PLASSEY**, in the hill state of **Pindeor** a small town on the route from Roopur to Belaspore and 10 miles N E of the former place. It is situated on the right bank of the Surma, a small river discharging the waters of the Pinjor Doon into the Sutlej. Here, at the close of October, 1814, the British army under General Ochterlony took post on the advance against the Goorkha garrison in Malown. Distant N W from Calcutta 1,080 miles. Lat. 31° 2' long 76° 44'.

**PLASSEY**—A town in the British district of **Purneah** lieut gov of Bengal, 89 miles S.E. by E. of Purneah Lat. 25° 27', long 88° 2'.

**PLASSY** in the British district of **Nudda**, lieut-gov of Bengal a town on the left bank of the Hooghly, or rather perhaps the Bhagurutta, and on the route from Calcutta to Barhanpore, 96 miles N of the former 22 S. of the latter. It was here on the 23rd June, 1757 that the memorable battle was fought between Clive and Sooraj co-Dowlah soubahdar of Bengal, which ended in the total defeat of the latter. The day before the battle, a council of war had been held by the English commander, which decided against hazard of a conflict. This decision however Clive, although he had concurred in it, and had been even the first to deliver an opinion in its favour resolved after some deliberation to set at naught, and, acting on this impression he gave orders for crossing the river which interposed between his army and the enemy. The English force consisted of about 650 European infantry, 150 artillerymen (including fifty seamen), 2,100 sepoys and a small number of Portuguese making a total of somewhat more than 3,000 men, with eight six pounders and one or two howitzers. The soubahdar's force consisted of 18,000 cavalry and 50,000 infantry forty or fifty French artillerymen with fifty pieces of cannon of heavy calibre, and four pieces of light artillery. Clive had been in negotiation with Meer Jaffer a distinguished commander in the service of Sooraj co-Dowlah who aspired to supplant his master and a treaty had been concluded with this personage which was to give effect to his wish. The co-operation of Meer Jaffer was consequently to be looked for and warlike operations had been commenced in the anticipation of receiving it. Still the general character of native diplomacy, and the individual character of Meer Jaffer, forbade implicit reliance upon his fidelity to his engagements, and down to a late period in the day on which the battle took place, Clive remained in a state of much doubt and anxiety. At daybreak, the army of Sooraj-co-Dowlah was discovered in motion. The cavalry and infantry were disposed in columns of 4,000 or 5,000 each, and between

them were placed portions of the artillery. They marched as if intending to surround the English force as far as the river would permit; but as soon as their rear was clear of the camp, they halted and the Frenchmen under an officer named Sinfray advanced with some guns. A general cannonading commenced from the soubahdar's artillery. This was felt severely by the English, who had quitted a grove in which they had taken their first position and where they were sheltered by a bank, in front of which they were subsequently drawn up. Clive, on the enemy's guns becoming annoying withdrew his troops to their former position behind the bank. The enemy thereupon advanced their heavy artillery nearer and fired with greater rapidity than before, but they produced little effect, the English troops escaping the shots by sitting down under cover of the bank. About noon a heavy shower so much damaged the enemy's powder that their fire became feeble but the English who throughout the day answered the enemy's guns with their field pieces, continued firing without interruption. The death of Moodeen Khan an able and faithful officer of the soubahdar who fell by a cannon-ball, afforded opportunity for the strain laid by Clive to take effect. Upon the occurrence of this disastrous event, the soubahdar a weak and capricious man, sent for Meer Jaffer with whom he had been on bad terms, and whose fidelity he strongly suspected and in almost abject terms conjured him to forget all past differences, and to devote all his energies to the defence of the throne. Meer Jaffer readily promised all that was required of him, and the first instance given of his sincerity was to recommend a suspension of the conflict till the following morning. The soubahdar after some objection, yielded and consented to the withdrawal of the troops. A letter was addressed by Meer Jaffer to Clive intimating this arrangement, and urging the English commander to push on for the camp but the communication miscarried and Clive was left to act upon his own impression, derived from appearances. These satisfied him that Meer Jaffer meant to adhere to the English and with characteristic energy and promptness he spontaneously took the step which it was the object of the latter to suggest. The result was a general rout of the army of Sooraj-co-Dowlah, whose camp baggage, and artillery fell into the hands of the British. The enemy were pursued for about six miles, and it is supposed lost in the action, and during the pursuit, 500 or 600 men the loss of the English in killed and wounded was about seventy. The immediate effect of this memorable battle was the transfer of the soubahdarship of Bengal from Sooraj-co-Dowlah to Meer Jaffer, but its eventual consequences were much more important, seeing that in this victory was laid the foundation of the magnificent fabric of the British empire in India. Lat. 23° 45', long 85° 15'.

# POD—POK.

**PODANGMEW** — A town of Eastern India, in the British province of Pegu, situate on the right bank of the Irrawady river and nine miles S.W. from Proma. Lat. 18° 41', long. 94° 58'.

**PODYCHAI** — A town in Hyderabad, or territory of the Nizam 51 miles E. from Hyderabad, and 110 miles N.W. from Guntoor. Lat. 17° 23' long. 79° 19'.

**POGULAPULLY** — A town in Hyderabad or territory of the Nizam, six miles from the right bank of the Godavary river and 161 miles E. by N. from Hyderabad. Lat. 17° 33' long. 80° 58'.

**POHONEE**, in the territory of Nagpoor — a town on the right or west bank of the Wein gunga. After the fall of Apa Sihib the rajah of Nagpoor in A.D. 1818 it was occupied by a British force, but subsequently restored to his successor with whom it remained till the lapse of the territory to the British government. Distance from the city of Nagpoor, S.E., 46 miles. Lat. 20° 47' long. 79° 44'.

**POHOJ** — a small river of Bundelcund rises from a small lake near the south-west boundary towards Gwalior 20 miles S.W. of Jhansi and in lat. 25° 18' long. 78° 25'. It holds a course sinuous, but generally north-east, for 125 miles, and falls into the Sindh on the right side, in lat. 26° 25' long. 79° 13'. It is crossed by ford on the route from Calpee to Gwalior ninety-five miles from its source and in lat. 26° 6' long. 79° 5'.

**POHUR** — A town in one of the sequestered districts of Hyderabad or dominions of the Nizam, 72 miles W.S.W. from Ellichpoor. Lat. 20° 46' long. 76° 35'.

**POKHURN** in the Rajpoot state of Jodhpoor — a town on the route from Phulodi to Jessulmere and 66 miles E. of the latter. It is situate close to a deserted town of the same name, and contains 3,000 houses surrounded by a good wall of uncemented stone and about fifteen feet high including a parapet six feet high and two and half feet thick. A very conspicuous temple in an elevated situation marks the site of the old deserted city, and near it are the monuments of the deceased members of the chief's family. Pokhurn being on one of the great commercial tracks between Eastern Rajpootana and Sindh much money is realized by the transit-trade. The country also in its immediate neighbourhood is more fertile than in the generality of Jodhpoor. It is one of the greatest fiefs in Jodhpoor the thakoor or chief having an annual revenue of 10,000/ though it was formerly three times that amount, until reduced by the seizure of the greater part by the maharajah of Jodhpoor. Distant S.W. from Nagore 134 miles W. from Musensal, by Nagore 228. Lat. 26° 54', long. 73°.

**POKREE**, in the British district of Kumaon, lieut. gov. of the N.W. Provinces, a village situate on the western declivity of a mountain covered with forests of oak, rhododendrons,

and pines. Here are copper mines, once so productive that one is represented to have yielded a return valued at 5,000/ per annum, but experiments recently conducted there under European management, afforded a return of 350 rupees, against an expenditure of 8,164 rupees and the undertaking was consequently abandoned in 1841. The richest ore is the vitreous, lying in dolomite or talcose schist and yielding about twenty per cent. The main obstacles met with in the working are the great quantity of water and the rottenness of the ground which requires continual and strong lumbering. The village of Pokree, situate in a ravine furrowing the mountains on the west side, contains about 100 inhabitants, chiefly of the Chowdry or mining caste. Its elevation is 3,800 feet above the river Aluk nunda, from which it is nine miles west, and 6,100 feet above the sea. Lat. 30° 30' long. 79° 15'.

**POKROURA** in the British district of Kumaon, lieut. gov. of the N.W. Provinces, a village on the route from Pethorgurh to Askoth seven miles N. of the former. Lat. 29° 41' long. 80° 16'.

**POKRUN** — See I OKHLEN.

**POKUR**, in the British district of Ajmere, under the lieut. gov. of the N.W. Provinces, a town the principal place of a pergunnah of the same name. It is situate in a low and swampy valley and on the south margin of a lake stated to be in Brahminical eyes the most sacred in India. The surrounding scenery is picturesque and striking. Immediately around the town are numerous sandhills, among which are many abodes and cenotaphs belonging to the families of various rajahs and great men of India in various styles of architecture. By far the most conspicuous is the shrine of Brahma of which Tod says — "This is the sole tabernacle dedicated to the over Cup which I ever saw or have heard of in India." The same writer mentions, that it struck him as not a little curious, and well it might, that the sikra or pinnacle is surmounted by a cross. The edifice was erected a few years ago, by a wealthy Miharatta, Gournal Pauk minister of Suedia, at a cost of about 15,000/ though the materials were at hand, and the labour could be got almost for nothing. Ghats or flights of stairs of stone give access to the sacred water which is frequented every full moon by great numbers of pilgrims, for the purpose of ritual ablution. The full moon in October is regarded to have peculiar sanctity, and then the concourse is much the greatest. A fair for traffic in horses, camels, and kins as well as for various wares, is held there on that occasion. The lake is asserted to be artificial and to have been excavated by a prince of Mandor to receive the water of a natural fountain, by which it is still replenished. The rivers Looni and Saraswati carry off the redundant water. The lake is of an oval shape, and above a mile in

# POL—PON

circuit it is deep, and never dries up many alligators harbour in it, and are protected from any molestation. The town sitsuate on the south margin of the lake, has many good houses. According to Heber this place is renowned for its gardens and vineyards the grapes are said to be by far the best and largest in India, and equal to those of Shiraz. Distance from Ajmer N W, five miles. Lat. 26 30', long 74° 40'.

**POLACHY**—A town in the British district of Combatour presidency of Madras, 26 miles S. of Combatour. Lat. 10 39', long 77° 4'.

**POLAIR**—A town in the hill secondary of Jeypoor presidency of Madras, 61 miles S. from Jeypoor and 74 miles W N W from Vinagapatam. Lat. 18 10' long 82 20'.

**POLAWURUM**—A town in the British district of Rajahmundry presidency of Madras, 28 miles N N W of Rajahmundry. Lat. 17° 18' long 81 41.

**POLE**—A town in Guzerat, or dominions of the Guicowar 81 miles E. by S from Deesa, and 88 miles N E by N from Ahmedabad. Lat. 23 59' long 73 20'.

**POLEKUL**—A town in the British district of Bellary presidency of Madras, 72 miles N E of Bellary. Lat. 15 50' long 77 40'.

**POLKNSHAW**, in Hyderabad, or the territory of the Nizam, a town with a fort, 13 miles from the right bank of the river Godavery. It is situate in a verdant fertile valley about four miles wide, which is surrounded on all sides by lofty ranges of hills. The residence of the rajah is a small house, the top of which is visible above the rampart. He is called not only rajah of Polenshaw, but also the rajah of Kamunummett, from a considerable town of that name within his secondary or feudal grant. Distance from Hyderabad, E., 150 miles. Lat. 17 35 long 80 45'.

**POLLANURRA**—A town in the British district of Ganjam, presidency of Madras, 27 miles N W by N of Ganjam. Lat. 19 41 long. 84 53'.

**POLLIAM**—A town in Hyderabad or territory of the Nizam, situate on the right bank of the Godavery river and 164 miles N W from Hyderabad. Lat. 19 1, long 77 1.

**POLLOOR**—A town in the British district of North Arcot, presidency of Madras, 33 miles S.W. of Arcot. Lat. 12° 31, long 79° 10'.

**POLY**—A town in the British district of Cuddapah presidency of Madras, 31 miles S.E. by E of Cuddapah. Lat. 14 14', long 79° 15'.

**POMOORNA**—A town in the lapsed territory of Nagpoor situate nine miles from the right bank of the Weiin Gunga river and 96 miles S.E. from Nagpoor. Lat. 19° 53', long 79° 40'.

**PONANY** in the British district of Malabar, presidency of Madras, a seaport town situate on the south side of an estuary of a river of the same name, close to its entrance into the Arabian Sea. The river is shoal, and navigable only for small craft, and three or four miles to sea is a shoal with about four fathoms water on it, but inside, and between it and the mainland having anchorage in six fathoms. The town is built in a straggling manner on a sandy plain, and is inhabited principally by Mussulmans who have forty mosques, and are governed by a chief priest called the Tangul. The population is supported by fishing and by trade having numerous pateras or sea-going boats, which ply to Surat, Arabia, Bombay, Madras, and even as far as Bengal, exporting principally pepper betel, rice, coconuts, iron, and very fine timber sent down the river from the Ghats. The imports are wheat, sugarcane molasses, oil seeds, groceries, and spices. Salt is also imported, though in the vicinity there is some made by evaporating sea-water. At the commencement of this century when Buchanan visited this place, it had about 500 good houses, built with stone and two stories high, and 1 000 huts. It had formerly been a much more considerable place until nearly ruined by the oppression of Tippoo Sultan. Besides the pateras, there are matches, large row boats, used for navigating the river and for coasting. They are about fifty feet long ten or twelve wide, and five or six deep and carry sail at sea. They are rudely constructed, and venture to sea only in fine weather. Under the system of railways by which the Madras territories are about to be traversed the eastern and western coasts of this part of the peninsula will be united by means of a line from Ponany to the city of Madras. Distance from Bombay S.E. 600 miles, Mangalore, S.E. 160 Calicut, S E, 34 Bangalore, S.W., 190 Lat. 10 48', long 75 58.

**PONANY**—A river, named from the town situate on the south side of its estuary where it discharges into the Arabian Sea. It rises in the British district Combatour in the vicinity of some tanks near Cootichipattin and in lat. 10 19' long 77 6' and flowing north west, through the great depression separating the Western Ghats from the mountains in the vicinity of Cape Comorin, crosses the east boundary of the British district of Malabar in lat. 10 48' long 76 46' and about fifty five miles from its source Thereabouts turning west, it flows by the fort and town of Palghat, and continuing to hold the same direction for twenty five miles, it in lat. 10° 45' long 76 32', becomes the boundary between the raj or territory of Cochin and the British district of Malabar continuing so for twenty-three miles, to lat. 10 47' long 76 35', where it enters the district, and flows westward through it for twenty five miles, to the fall into the Arabian Sea, in lat. 10° 47', long. 76° 36'; the

# POU

total length of the course being 128 miles. It is navigable for canoes as high up as Kal ghat, sixty three miles from the sea. Buchanan, who crossed it during the dry season five or six miles above its mouth found the channel very wide, but most of it occupied by dry sands, the water clear, the stream gentle, but with difficulty fordable on account of the depth. It can be navigated only by small craft, as well on account of a bar with small depth of water at the mouth as shoal water inside, but is very useful during the monsoons, when it floats down to the coast great quantities of fine timber highly valuable for the largest ships of war.

PONASSA or POMAWA in the Rajpoot state of Jodhpoor a village on the route from Nussabad to Deesa. and 167 miles S W of the former. Lat. 25° 2', long 73° 4'

PONDA.—A town in the Portuguese territory of Goa nine miles S E by E from Goa, and 86 miles W from Dharwar Lat. 15° 25', long 74° 5'

PONDALURIA.—A town in the lapsed territory of Nagpoor or Berar 165 miles N E by E from Nagpoor, and 74 miles S from Solagpoor Lat. 22° 15' long 81° 26'

PONDICHERRY on the Coromandel coast, a French settlement included within the limits of the British district of South Arcot. It is situate at the mouth of a small river capable of admitting only coasting-craft of insignificant burthen. In the fair weather season, from 1st of January to October the common anchorage in the road is abreast the town in seven or eight fathoms about three quarters of a mile from it. Small ships may moor in five and a half or six fathoms, but during the season when stormy weather may be apprehended it is prudent to anchor well out, in twelve or fourteen fathoms, in what is called the outer road. The site of the town is eligible, being to the south-east of a long flat hill and close to the beach and having numerous buildings, and a conspicuous and agreeable aspect, viewed from the sea. Previously to the war in 1758, Pondicherry was perhaps the finest city in India. It extended along the seacoast about a mile and a quarter and was about three-quarters of a mile in breadth, was well built, and contained many public buildings, and a citadel, then the best of its kind in India, but of too contracted dimensions. This fine city was first taken by the English in 1761 and immediately raised to the ground. During the obstinately contested wars between the British and French in India, in the course of the last century Pondicherry, as a military and maritime station had the advantage over Madras of lying to windward of it during the south west monsoon, which was the season for hostile operations. At the commencement of the present century, it was described by Lord Valentia as the handsomest town except Calcutta, that he had seen in India. At present,

it is regularly built, and divided into two parts, the White Town and the Black Town, separated by a canal. The White Town, which is situate to the eastward of the other, and close to the beach, has well-built streets, regularly laid out at right angles to each other with trees along the sides. To the west is the Black Town, inhabited by natives. Boulevards planted with trees are great ornaments to the town. The most remarkable buildings are the church of foreign missions, the government house, and barracks constructed in 1836. In the same year a lighthouse was finished, exhibiting a light eighty nine feet above the sea, and which in clear weather may be seen from a ship a good distant sixteen or seventeen miles. In consequence of the small depth of water on the bar and the violence of the surf landing can be effected only by a sort of rafts or flat bottomed boats, constructed for the purpose. Pondicherry is the capital of the French possessions in India, and the seat of their supreme government. The remaining possessions are Karikal on the coast of Comorandel Yanam and the lodge of Maoulipatan on the Orissa coast, Mahé and the lodge of Calcut, on the Malabar coast Chanderagore, and the five lodges of Cochinbazar Jougida, Pacea, Balesore and Patna. The possession of these lodges is however nominal and they have been abandoned by the French. In each of these settlements there is a government agent, who receives the governor's orders direct and corresponds with him. The territory of Pondicherry consists of—1 The district of Pondicherry properly so called, containing, besides the town, eleven villages. 2 the district of Vallanor containing forty five villages. 3 the district of Bahour containing thirty six villages. The total area is estimated at 107 square miles, and the population in 1840 was returned at 79 748. In 1856 according to an Indian newspaper the *Madras Advertiser*, the number had increased to 119 736. The establishment here comprises—1 Executive and legislative, including governor and council of administration and council-general. 2 judicial, including the Royal Court, the Tribunal in the First Instance, and the Tribunal of Peace and of Police. 3. department of public instruction; 4 marine 5 military. The population of the town is estimated at from 25 000 to 30 000. Distance from Madras S.S.W 86 miles. South of the town is the village of Arasacopan captured by Admiral Boscawen in 1748, prior to the unsuccessful siege of Pondicherry. The town of Pondicherry is in lat. 11° 55', long. 79° 54'

PONDUA.—A town in the British district of Silhet, lieut.-gov of Bengal 16 miles N.N.W of Silhet Lat. 25° 0' long. 91° 47'

PONGA.—A town in the British district of Bangalore, lieut.-gov of Bengal 89 miles N.W of Bangalore Lat 26° 5' long. 85° 57'.

PONPUTTA.—A town in the British district of Malabar presidency of Madras, 71

# PON—POO

miles S.E. of Cumanora. Lat. 11° 12', long. 75° 15'

**PONWAR.**—A town in the British district of Shahabad, lieut.-gov. of Bengal, 51 miles N.E. by E. of Sasseram. Lat. 23° 21', long. 84° 41'

**POOARKE,** in Koonawur, a district of Benasir, is a village on the left bank of the Sutlej, here about 120 feet wide, and flowing with a gentle but deep current. The village, 200 feet above the river consists of about thirty houses, from two to four stories high chiefly built of pine wood, and has adjacent a level, fertile piece of ground well cultivated with vines, corn and esculent vegetables. Here, at one time, was a sanga or wooden bridge which having been allowed to fall, through decay has been replaced with a *jhula* or rude suspension bridge, consisting of a cable made of hair ropes stretched across, and traversed by means of a curved piece of wood sliding on it and bearing the passenger suspended on a seat hanging below and drawn from one side to another by means of a string, as occasion may require. Elevation above the sea 6 008 feet. Lat. 31° 33', long. 75° 20'

**POOBTHUL.**—A town in the British district of Burdwan lieut.-gov. of Bengal, 32 miles N.E. by E. of Burdwan. Lat. 23° 28', long. 85° 21'

**POOCH,** in Bundelcund in territory of Jhansi, a village on the route from Calpee to Ghoona 55 miles S.W. of former 150 N.E. of latter. Supplies and water may both be had. Lat. 25° 50' long. 79° 6'

**POODOOCOTTAH, or RAJAH TONDIMAN'S COUNTRY** is bounded on the north by the British district of Trichinopoly on the east by Tanjore, and on the south and west by Madura. It extends from lat. 10° 6' to 10° 46' and from long. 78° 33' to 79° 16' is forty three miles in length from north to south and the same in breadth and has an area of 1 165 square miles, with a population of 61 745. Upon the death of Rajah Ragoonath Tondiman in 1839 arrangements were made for conducting the administration by the widow during her son's minority. The arrangement, however was not altogether satisfactory, and it was shortly after so far modified as to admit of the judicious interposition of the British resident and much benefit appears to have resulted from the exercise of this temporary authority. The young chief upon his assumption of the government was noted for the excellence of his disposition but the hopes entertained of his successful administration were subsequently disappointed, and disturbances have taken place which were not quelled without much difficulty. Poodoocottah, the principal place, is situated on the left bank of the Velloor river 59 miles N.E. by E. from Madura. Lat. 10° 24' long. 78° 22'

**POOHHY SAWUR.**—A town in the territory designated the Damm, within the pres-

idency of Bombay situated 63 miles W from Mallgaum, and 53 miles S.E. from Surat. Lat. 20° 37' long. 73° 32'

**POOKAREE,** in the British district of Banda lieut.-gov. of the N.W. Provinces, a village on the route from the town of Banda to Ajezur, 20 miles N. of the latter. Lat. 25° 7', long. 80° 29'

**POOKHRAEN,** in the British district of Cawnpore lieut.-gov. of the N.W. Provinces, a small town on the route from the cantonment of Cawnpore to that of Calpee, and 10 miles N.E. of the latter. It has a bazar and water is abundant. Lat. 23° 14' long. 79° 54'

**POOLALCHERROO.**—A town in the British district of Cuddapah, presidency of Madras, 73 miles N. of Cuddapah. Lat. 15° 31', long. 78° 59'

**POOLAVAINDLA.**—A town in the British district of Cuddapah, presidency of Madras, 40 miles W by S. of Cuddapah. Lat. 14° 25', long. 78° 17'

**POOLBADDY.**—A town in the hill seminary of Jeypoor in Orissa, 44 miles S.E. by S. from Jeypoor, and 48 miles N.W. by N. from Vizagapatam. Lat. 18° 33' long. 82° 51'

**POOLP** in the British district of Kumaon lieut.-gov. of the N.W. Provinces, a village half a mile W of the right bank of the Kales (Eastern) 12 miles S.E. of Champawat cantonment. Lat. 29° 17', long. 80° 20'

**POONA.**—A British collectorate of the presidency of Bombay. It is bounded on the north by the Ahmednuggur collectorate on the east by those of Ahmednuggur and Sholapore on the south and south west by the territory of Satara, and on the west by the Tannah collectorate. It lies between lat. 17° 53' and 19° 26' long. 73° 20' and 75° 10', and has an area estimated at 5,298 square miles. The whole is included within the Deccan. The face of the country is intersected by numerous spurs or ridges which part from the eastern side of the culminating range called the Western Ghats, and generally hold a direction south east, diminishing continually in height, until they sink into the plains of the Nizam's territory.

The Moola Moota, the Goor, and the Yell, uniting with some other streams of less magnitude which rise in the vicinity of the city of Poona, form the Beema, which, taking a course south-east, receives, at about 160 miles from the source of the Goor its remotest head, the Neera, a considerable stream, and below the confluence, continuing to flow in the same direction for sixty miles, finally passes into the territory of the Nizam. The Neera, which rises within the territory of Satara, on the eastern declivity of the Ghats, a few miles north of the British sanatorium of Mahabulnagar, flowing south east for about eighty miles, forms the boundary between Satara and this collectorate. These streams must derive most of their contents from the monsoon rains on

the Ghats, as the climate of the low-elevated table-lands of the Deccan, and of the more depressed expanses in its western part, is characterized by aridity. The amount of annual rain fall has been stated at 17.83 in for the year 1880. The easterly winds are characterized by extreme dryness the lips, and the exposed parts of the skin are cut, and become harsh and soaly windows, doors, and joiners work shrink, and present numerous interstices and to sleep exposed to the easterly wind, is to risk the loss of a limb or a whole side. In general, however the climate is not unhealthy and the cantonments at Poona are found to be remarkably suited to the European constitution.

The character of the vegetation is indicative of the aridity of the soil and climate. Jacques found the country in June a parched waste, and water could nowhere be obtained by digging yet in a few days moderate falls of rain covered the surface with verdure. Trees are very rare in this tract, there being only the *Melia azadirachta*, intermingled with cactus and euphorbia. Much attention has been given by government to the culture of the mulberry for feeding silkworms but the experiment, though conducted by a gentleman from the south of Europe well versed in the business, proved entirely abortive. The trees attained no reasonable size, many decayed altogether, and the aspect of the remainder was so sickly stunted, and dwindling as to forbid all probable hope of success. Heber conjectured that the cultivation of the vine would be successful but the average annual temperature would probably be too high.

The common cereal grains of the Deccan form the staple products of the collectorate, the surplus of which finds its way to the city of Poona, the great mart of the country and thence to the coast, where salt and European goods are received in exchange. The potato is grown extensively in the northern parts of the collectorate, and supplies a large portion of the Bombay market, to which easy access is obtained by the excellent road that intersects the Northern Pergunnahs. Cotton is not cultivated to any great extent, Indapoor being the only producing district. Throughout the collectorate, the cultivation of the Mauritius sugarcane has greatly diminished, owing it is stated, to the poverty of the Deccan soil. In some of the districts, but more especially in the pergunnahs intersected by good roads, agricultural stock is on the increase. It is calculated that a pair of oxen are equal to the cultivation of ten acres of land. In some of the districts the proportion of land to stock is greater, and this would seem to indicate a more sparsely settled population in these districts.

The district is traversed by the south-eastern branch of the main line of the Great Indian Peninsula Railway Company. The other principal roads are those from Poona, connecting that city with Bombay Sholapore, Ahmednuggur, Nasik, Sattara, by the

Neera bridge. Metalled roads, with side-drains, have recently been constructed in the Cusba Ghora of the Kher pergunnah, with funds partly raised by assistance received from government, and partly by the voluntary contributions of the inhabitants, a fact showing that the natives are not altogether insensible to the advantages of improved means of communication and that the expectation of interesting them in such matters is not hopeless. The line of road of the greatest commercial importance in this collectorate is that which, intersecting the Indapoor and Bheemthary pergunnahs, leads from Sholapore to Poona. A considerable export from the south-eastern and central provinces of the peninsula, consisting chiefly of cotton-wool, is brought to the coast by this line, much of it in carts, for which description of carriages the metalled road from Poona, by way of the Bhore Ghaut to the coast affords great facilities. In this collectorate there are no manufactures for export. In some of the large towns coarse cotton cloths are produced for consumption in the immediate neighbourhood. Paper is manufactured at Poona.

By far the greater portion of the population is Mahratta. There are, however a considerable number of families deriving their origin from the Concan, some Guzeratians, and not a few Mussulmans the descendants of the ruling race, when the country was held first by the sovereigns of Ahmednuggur and Bejapoor, and subsequently by those of Delhi. There are also some of that class of Mussulmans denominated Borna. The total amount of population is given under the article BOMBA.

At the close of the year 1853, there were in this collectorate sundry government vernacular schools besides the Sanskrit and English colleges in the city of Poona. The Poorbander village schools which were established by way of experiment in 1836 with schoolmasters at very low rates of pay and principally for the purpose of introducing some little instruction among the agricultural classes, were not attended with successful results, and the Board of Education resolved to avail themselves of every opportunity of closing these district schools, and to apply the funds in support of a few schools of a higher class. The principal towns are described under their respective names in the alphabetical arrangement.

Poona at the period of its earliest mention in history, appears to have formed part of the Mussulman state of Ahmednuggur, by the sovereign of which state, a jaghire, of which Poona was the chief place, was conferred, in 1404, on an officer named Maloloe. A son of Maloloe, named Shahjee, after acting a conspicuous part in the closing events of the Kingdom of Ahmednuggur, passed into the service of Bejapoor and was continued in his jaghire, which had fallen to that state in the partition of the Ahmednuggur territories. Shahjee was the father of Surajee, the founder of the Mahratta dominion, which for a time occupied an

important a place in the political system of India. The son of Sevagee, named Sambhaji, possessed few of the qualities which contributed to his father's success; he was made prisoner by Aurangzeb, and put to death while in captivity. His son Sevagee, subsequently known by the name of Sahu, at the time of his father's death was an infant and a captive; circumstances little calculated to benefit his claims to sovereignty, more especially in Asia. Sahu was eventually liberated on the death of Aurangzeb, but found the succession contested by his cousin, as stated in the article on Colapoor, where also an account of the mode in which the contest was terminated will be found. A Brahmin, named Balajee Bishwanat, held under Sahu the office of Peshwa or minister an office which, though it ultimately became the first in the Mahratta confederacy and even absorbed the authority of the nominal chief was originally only the second, the Priti Nidhi, or delegate of the rajah, being superior. By Balajee the affairs of Sahu were managed with much address and by the influence of negotiations conducted by him, a treaty was, in 1717 concluded with Hosen Ali, acting on the part of the emperor by which the claim of Sahu to the whole of the territory formerly possessed by Sevagee with the addition of later conquests was acknowledged the emperor agreeing to restore all the forts in his possession within that tract, to allow the levy of about, or Mahratta demand of a fourth part of the revenue throughout the Deccan, thus giving a legal title to that which was before a mere extortion, and to make a further payment of one-tenth of the remaining revenue under the name of Sirdesmuki. In return, Sahu was to pay a certain amount of tribute, to furnish a specified quota of horse, and to be answerable for any loss occasioned by depredations thus acknowledging himself a vassal of the emperor. On the death of Balajee Bishwanat, his son Bajee Rao succeeded to the office of Peshwa. Bajee Rao was not only a consummate master of artifice but a man of great boldness of spirit and actuated by a restless and insatiable ambition. He had a rival in the Priti Nidhi, by whom the arrangement with the rajah of Colapoor was concluded, but the success of this minister did not enable him to supplant Bajee Rao, whose influence continued to extend in proportion to the numerous territorial and fiscal acquisitions which he succeeded in making, nominally for his master but actually for himself. This course of aggression received a temporary check by the invasion of Nadir Shah, but when the country was relieved by the withdrawal of that invader, he resumed the prosecution of his schemes of aggrandizement with unabated vigour. In 1739 he conquered Salsette and Bassam from the Portuguese. The vicinity of Salsette to Bombay, coupled with the fact of Rajah Sahu having granted all countries conquered from the Portuguese to the Peshwa in his own right, alarmed the Bombay government, who began

to apprehend that the views of this Mahratta leader might not be restricted to the dominions of the Portuguese but might extend to the possessions of other Europeans. The Peshwa, moreover, was endeavouring to create a maritime force. All these circumstances prompted the resort to measures of security, and with the intention of avoiding the dangers which seemed to be impending the Bombay government concluded a treaty of fourteen articles with the brother of Bajee Rao, in which the claims of the contracting parties were defined and confirmed. Not long after the conclusion of this treaty Bajee Rao died, leaving three sons, of whom the eldest, Balajee Rao, succeeded to the office of Peshwa, though not without serious opposition from various powerful Mahratta functionaries and chiefs, the Priti Nidhi, the rajah of Berar and the Guicowar. The rajah Sahu always indolent, fell, towards the close of his reign into a state of imbecility which placed him entirely at the mercy of those around him. His minister Balajee, and the prince's wife Sawatri Bai, contended for the power of controlling him, and the former was so successful as to prevail on the demented rajah to sign a deed transferring all the powers of his government to the Peshwa, on condition of his maintaining the royal title and dignity in the house of Sevagee, though Ban Raj, a posthumous son of the second Sevagee whose existence had long been concealed by his grandmother the Tara Bai and who accordingly succeeded to the nominal chieftainship on the death of Sahu, in 1749. Balajee, now virtually the head of the Mahratta confederacy continued to exercise his power with varied success till his death in 1761, an event said to have been accelerated by the result of the battle of Panseput, so fatal to the interests of the Mahrattas. The power and influence of the Peshwa thenceforth declined. Madhoo Rao, the second son of Balajee succeeded his father but being a minor his uncle Ragoba was appointed regent. A protracted struggle for power succeeded between the uncle and the nephew, which ended in favour of the latter. Ragoba was deprived of authority and subjected to confinement. Madhoo Rao died in 1772. Under the impression that his dissolution was approaching, he sent for Ragoba, and for his brother and successor Narain Rao, and conjured them to adhere to each other. For a time, amicable feelings appeared to exist between them but discord arose, and Ragoba was again placed under restraint. Within a year from his accession, the young rajah was murdered, and the ministerial party and Ragoba mutually charged each other with the crime. Ragoba, however, was proclaimed Peshwa but his security in the possession of that title was shaken by the widow of the murdered Narain Rao giving birth to a son. Ragoba asserted that the child was spurious but his title was maintained by a powerful party and the infant was formally installed as Peshwa. In this state of affairs Ragoba applied to the

government of Bombay for assistance. The importance of obtaining possession of Salsette had long and urgently been impressed on that government, and the disputed succession of Poona seemed to afford a favourable opportunity for the attainment of the desired object. The Bombay government accordingly recognized the title of Ragoba and opened negotiations with him. Pending these negotiations, intelligence arrived that the Portuguese were fitting out an expedition at Goa for the recovery of Salsette and Bassem. To prevent these places falling into the hands of their European rivals, the Bombay government took immediate possession of them informing Ragoba that the measure was merely precautionary and not intended to affect his rights.

In 1775 a treaty was concluded at Surat, by which Ragoba, in consideration of a certain amount of military force to be furnished by the Company's government for the prosecution of his claims, ceded to that government in perpetuity certain territories, including Bassem and Salsette. In accordance with the stipulations of this treaty an English force under Colonel Keating joined the army of Ragoba at Cambay. Advantages though not of a decided nature were gained but the government of Bengal disapproved of the treaty and of the connection with Ragoba, and directed the withdrawal of the British force. The Bengal government also deputed Colonel Upton to Poona, to treat with the party in power there without the intervention of the Bombay government. Colonel Upton concluded a treaty but the conditions were never fulfilled. The Poona ministry was divided into two parties one headed by Moraba, the other by Nanah Farnavere. Moraba and his party were disposed to make Ragoba regent. Nanah professed views nearly similar but as he proposed to carry them out through the assistance of the French the government of Bengal became alarmed and not only authorized that of Bombay to support Ragoba, but despatched a body of about 5000 troops from Hindoestan to Bombay for the same purpose. A new treaty was hereupon concluded by the Bombay government with Ragoba in which it was stipulated that he was to exercise the office of regent with full power during the minority of his rival claimant while the Bombay government engaged to apply for orders from the Company to sanction the following extraordinary arrangement that if Ragoba should be able satisfactorily to prove the child supposititious, he Ragoba, should become Peshwa, but if the child should appear to be really the son of the deceased Peshwa, then, on his attaining the age of seventeen the government and country should be equally divided between him and his uncle Ragoba. Without waiting for the Bengal troops, then on the Nerbudda, the Bombay government despatched a force to conduct Ragoba to Poona, and to invest him with the regency. This force advanced to within a few miles of

Poona, when those under whose orders the expedition was placed suddenly determined on retreat.

The force accordingly fell back on a place called Wargaum, where being surrounded by the Mahrattas, a convention was concluded under which it was agreed that Salsette and all the recent acquisitions from the Mahrattas should be restored and that the Bengal detachment should be ordered back to Calcutta. The terms of the convention which was concluded by a committee of persons called field-deputies, were such however as neither they nor even the Bombay government had power to grant, and it was never ratified. Colonel Goddard, who commanded the Bengal troops, knowing that the convention was of no force disregarded it altogether and though his return had been made one of the conditions, pushed on and arrived at Surat in February 1779. He was vested with the full powers of treating with the Mahrattas, which other parties had prematurely exercised before his arrival. The Poona durbar however declared that no peace could be made unless Salsette were given up. Hostilities were accordingly renewed. Colonel Goddard took Ahmedabad and Bassem but subsequently from the general state of affairs and the want of resources he was compelled to confine himself to the defensive. At length Scindia concluded a separate treaty for himself one at an earlier period had been concluded with the Guikowar and after some delay, a treaty known as the treaty of balhye put an end to the war between the British and those administering the territory of the Peshwa. By the treaty Bassem and some other conquests were restored to the Peshwa, but the possession of Salsette and some other islands to the British stipulated for in Colonel Upton's treaty was confirmed. Various other diplomatic arrangements, calculated to effect particular objects were subsequently concluded between the Peshwa and the British government, but in this brief sketch it would be superfluous to notice them in detail. In 1795 the Mahrattas became involved in war with the Nizam, a war terminated by the convention of Kurlah the conditions of which were highly advantageous to the former. In the same year the Peshwa, Maderow Nurrain died. The next heir was Bajee Rao the son of Ragoba but Nana Farnavere tried to exclude him in order to secure a continuance of his own power. Scindia however arriving at Poona with a large force placed Bajee Rao on the musnud, and was thenceforward lord of the councils of Poona. In 1802 Bajee Rao taking part with Scindia in a contest which had arisen between that chieftain, shared in the defeat of his ally, Holkar having gained a complete victory in a battle fought near Poona, on the 25th October. The Peshwa fled to Bassem having previously sought to avert the ruin he saw impending, by a communication to the British Resident at his court, expressing a desire to enter into a defensive alliance with the British, on the basis

of that which they maintained with the government of Hyderabad. A treaty of defensive alliance, known as the treaty of Bassem, was accordingly concluded a supplementary treaty was concluded in 1803 another treaty for the settlement of territory ceded by the rajah of Berar and Scindia, was entered into in 1804. The Peishwa had readily entered into a close alliance with the British government, to avert the entire extinction of his authority, but, from his restoration to his deposition he systematically pursued a course of policy having for its object the subversion of the British power.

In 1813 and 1815 the British government was called upon to arbitrate an adjustment of the Peishwa's claims upon the chiefs of Colapore and Sawunt Warree and the Southern Mahratta jaghiredars. The decision, which was fatal to his pretensions of sovereignty over Colapore, strengthened the hostile feelings which he previously cherished towards the power to which he was indebted for the retention of his position as a sovereign prince and his escape from the ruin which without British assistance awaited him the condition of a close prisoner, or that of a destitute wanderer being the alternative before him. Trimbackjee Dangle, a man who by pandering to the profligate passions of his master had risen from a very low station to be the most important personage in the court of the Peishwa, shared these feelings, and was ready to take any step for their gratification. The British government was bound by treaty to arbitrate certain long-standing disputes between the Peishwa and the Guicowar, or ruler of Berar. In 1816, the Peishwa became pressing for the settlement of the disputed claims, and suggested that Gangadhar Shastry the Guicowar's minister, should come to Poona, there to assist in the investigation and settlement of them. The Shastry knew that he was hated by Bajee Rao, he knew, moreover the character of that prince, and that of his minion Trimbackjee Dangle. It is not therefore surprising that he should have been reluctant to place himself in any degree in the power of such men. But the British government guaranteed the personal safety of the Guicowar's minister, and thus assured he ceased to be actuated by apprehensions which probably could have been overcome in no other way. The arrival of the Shastry was welcomed by Bajee Rao with the strongest demonstrations of friendship, he proposed to unite the family of his visitor with his own by marriage, and it is not unlikely that the flattering proposal tended to some degree to throw the stranger off his guard and diminish his fears, though it did not altogether remove them. The Peishwa and the Shastry proceeded together on a pilgrimage to Pundarpoor one of those places which Hindoo superstition has invested with sanctity. While there, the Shastry was invited by Trimbackjee to repair to a celebrated temple, on some occasion which was regarded

as of peculiar solemnity. His just appreciation of the villainous character of the man who proposed the visit was still sufficiently strong to induce him to hesitate and it was not until after repeated messages that he yielded. He went performed such devotions as Hindoo delusion prescribed and on his return was assassinated by ruffians hired by Trimbackjee Dangle, acting under the atrocious instructions of the master of whom he thus proved himself so fitting an instrument. The British Resident at the court of the Peishwa of course demanded the instant surrender of the wretch who had contrived the means and superintended the commission of the murder. The Peishwa sought to protect him, but at length the British government obtained possession of his person. He was confined in the fort of Tanna whence however he soon found means of escaping. In the mean time the Peishwa was secretly striving by all the means in his power to induce the Mahrattas to unite in common cause against the English. Trimbackjee after his escape, actively promoted the designs of his master by collecting troops for the meditated contest. These steps compelled the British government to pursue a decisive course by demanding from the Peishwa such terms as a regard for the peace and security of India required though by no means such as his crimes merited. He had no choice but to comply or to be at once involved in war with the most powerful state in India. He was not prepared for the latter, and after a severe struggle, he most unwillingly and ungraciously accepted the terms tendered to him.

On the conclusion of the consequent treaty, the greater portion of the British troops were withdrawn from the Peishwa's territories, preparatory to operations against the Pindarries. Thus appeared to Bajee Rao to afford him an other chance of gratifying his revenge and he availed himself of the opportunity by concentrating a large force at Poona. The small British brigade left at that place was thereupon removed to Kirkee four miles distant, for the sake of occupying a better position. At this place they were attacked by the Mahrattas but though the disparity of numbers was great, the enemy was repulsed at every point with great loss. A tedious course of warfare followed but in all the actions that took place the Peishwa's forces were defeated. Towards the end of May 1818 Bajee Rao, wearied out by constant defeat and hopeless wandering, and perhaps apprehensive of a worse fate than that of falling into the hands of the British, opened a communication with Sir John Malcolm. The result was, the formal renunciation by Bajee Rao of all sovereign power, and his acceptance of a grant of pensionary provision, at the amount of which even he could not fail to be surprised, and which considering the character of the man, together with the facts of his deposal having been formally proclaimed, and his country almost entirely reduced, the Governor-General

ral, the Marquis of Hastings, was justly warranted in considering unnecessarily large. He, however, ratified the terms. Bajee Rao lived many years to enjoy or at least to receive and expend the vast income which had been placed at his disposal. With him ended the dynasty of the Peshwas, begun in usurpation and terminated in treachery. Out of the territories placed at the disposal of the British government by the crimes of Bajee Rao, a dependent principality was assigned to the rajah of Satara, the representative of the founder of the Mahratta rule the remainder were incorporated with the British dominions. Latterly the Satara line of rajahs has run out its course, and this portion of territory has lapsed to the British government.

POONA.—The principal town of the British collectorate of the same name. It is situated on the small river Moota immediately above its confluence with the Moola in a treeless plain, extending eastward from the Ghats, which at the distance of a few miles, rise to the height of 1 000 feet above the town. The south-eastern branch of the main line of the Great Indian Peninsular Railway Company passes by the city. Poona was originally an ill built city, without walls or fort, the bazars were mean and the streets irregular but recent and extensive improvements have changed both its character and appearance. In the period intervening between the years 1841 and 1846 no less than 400 new houses were built, and several more were in the latter year in the course of construction. A stone bridge of excellent masonry across the Nij-jurree Nullah was also in the last-mentioned year completed at the private cost of a wealthy courtier, affording greatly increased facilities to a large class of grain-dealers for the transport of their grain into the heart of the town. The old Mahratta bridge across the Moota Moola river having fallen into decay was taken down and it has been replaced by a bridge of stone, at an outlay of 47 000 rupees, or 4 700*l*. of which the government contributed 3 600*l*. The road over this bridge which is at the west end of the city is on the direct route to Bombay and by it European imported goods, salt, and other articles, are brought from that port, as well as supplies of provisions and fuel from the neighbouring districts. There is another bridge over the same river in the vicinity of Poona, called the Wellesley Bridge, which was built by the government. The streets and thoroughfares of the whole of the eastern portion of the city adjacent to the cantonment have been macadamised. The most remarkable building is the palace, formerly the residence of the Peshwa. It is of considerable extent, and contains a handsome quadrangle, surrounded by cloisters of carved wooden pillars. It now serves the various purposes of a prison, an hospital, and a lunatic asylum. The headquarters of one of the divisions of the Bom-

bay army are at Poona. The cantonments are on an elevated site a mile west of the city, and are perhaps the most extensive and best arranged in India. The church is spacious and convenient, but in bad architectural taste, and disfigured on the outside by gaudy colouring. Poona is represented to have been long in a declining state. During the height of the Mahratta power the population is believed to have amounted to 150 000. At the time of the overthrow of the Peshwa, in 1818 it was estimated at 110 000 it was in 1838 rated at 75 170. It is, however, to be observed that these numbers are but conjectural, and the recent increase of houses, already adverted to, would scarcely seem compatible with any considerable diminution of inhabitants. Measures are in progress for effecting municipal improvements in the city.

An ample supply of water for this city had long been a want of primary importance, as affecting the health and comfort of the inhabitants and endeavours have been made to obtain this desideratum by the repair and enlargement of the adjacent tanks and aqueducts. These measures, however proved ineffectual and it was finally decided to throw a dam across the Moota Moola river, with adequate waterworks for the supply of the city. Sir Jamesjee Jejeebhoy agreed to defray the cost which was estimated at 73 945 rupees, or 7 394*l*. exclusive of the machinery which this distinguished benefactor of his country also undertook to provide. The dam which was to be erected under the superintendence of an officer of the government, was commenced in the year 1844 but twice failed, once in 1845, and again during the floods in the following year. Sir Jamesjee having already expended on this work a sum amounting to 175,000 rupees, or 17 500*l*., the completion of the work was in 1847 authorised at the public expense. The estimated cost was 37 775 rupees, or 3 777*l*. Late in the year last mentioned, further difficulties were encountered in the construction of the dam and a third failure ensued. In the year 1850 the works were brought to a termination but from the want of judgment displayed in the formation of the bund and in the selection also of its site, it was discovered that the work was unsuited to the purpose for which it was designed. It was necessary therefore, to abandon the bund as the main source, and to resort to other measures for securing a full supply of water to the mass of the population.

There was a government English school in this city which, in 1846 contained 118 pupils. Of this number the large majority (eighty-one) consisted of Brahmans the remaining number (thirty-seven) was composed of Parsis, Indo-Britions, Sonars, and nine other castes. A public examination of the school was held in October, 1846 conducted by the Bishop of Bombay. With respect to the highest class, his Lordship expressed himself in terms of high praise. This school has been recently amal-

## POO.

garnished with the Sanskrit College, which was instituted in the year 1831 for the preservation, it is stated, of the ancient literature of the country. It is placed under the special superintendence of a European officer. It consists of three departments, Sanskrit, English and Normal and in 1853 contained 497 pupils, of whom 342 were in the English department. An interesting experiment is now in progress for promoting female education in this town. In July 1851 the first girls school in Poona was established by a few educated native gentlemen. The number of girls under tuition at the end of the first year was fifty; at the close of the second the number of schools had increased to three while the aggregate number of pupils amounted to 237.

With the exception of gram-dealers, and those who trade in the raw products of the country the mercantile classes in Poona are said to be declining in wealth. No market is now found for jewellery and precious stones, which were much sought after when Poona was the seat of native rule. The introduction of European piece-goods has caused the disappearance of native fabrics, which could not compete with them in price, and Poona has now scarcely any manufacture except a very small one of paper. Judging however from the annual increase in the number of houses it is to be presumed that the loss of the trade, consequent on the deprivation of a court and other causes, has been supplied to some extent from new sources.

The first mention of Poona in history seems to have been in 1604 when it was granted by the sultan of Ahmednagar as jaghira to Malloje, the grandfather of Sevajee the Marhatta chief. In 1687 it was confirmed by the sultan to Shahjee father of Sevajee. In 1683 during the operations conducted against Sevajee by order of Aurangzeb, the imperial viceroy Shasta Khan took possession of this open town from which when surprised a few days afterwards by Sevajee, he had great difficulty in making his escape. His son and most of his guard were cut to pieces, and he himself wounded. A powerful force however, immediately reinstated the discomfited commander. In 1687, Aurangzeb restored Poona to Sevajee, but under the sway of his successor Sambhaje it was occupied by Khan Jehan an officer of the Peshwah. On the Peshwa obtaining supremacy in the Marhatta confederacy the seat of government was removed from Baitara to Poona. In 1768, Nizam Ali, of Hyderabad sacked the town, and burned such parts of it as were not ransomed. In the struggle between the successive peshwas and their nominal subordinates Bonda and Holkar Poona suffered many vicissitudes, until, in 1803 by the provisions of the treaty of Bassein the Peshwa admitted a British subsidiary force to be stationed there. After the defeat of the Peshwa Bajee Rao (the particulars of which event are narrated in the article on the Poona collectorate), the city became the locality of

the British civil establishment, as well as of the principal cantonment of the Deccan. Elevation above the sea 1,823 feet. Distance from Bombay 63 E., 74 miles from Baitara, N. 58 from Ahmednagar, S.W., 70 Lat. 18 31', long. 75 58'

**POONAHANAH,** in the British district of George's head-gov. of the N.W. Provinces, a town on the route from Muthra to Rewaree, 40 miles N.W. of the former. Lat. 27 51, long. 77 16'

**POONAKULLU**—A town in Hyderabad, or territory of the Nizam situate on the left bank of the Godavery river and 126 miles N.N.E. from Hyderabad. Lat. 19 6, long. 79 7'

**POONAMALLEE**—A town in the British district of Chingleput, presidency of Madras, 23 miles W.S.W. of Madras. Poonamallee is a military station and accommodation is maintained for two or three companies of European troops. Lat. 13 2' long. 80 14'

**POONASSA**—A town in the native state of Gwalior or territory of Scindia's family 82 miles S.E. by S. from Oojein, and 97 miles W. by N. from Baitool. Lat. 22 10' long. 78 30'

**POONCH**—See PUNJ

**POONDUR**—A district originally subject to the hill state of Joolul of which it forms the northern part. It extends about eight miles in length nearly in a direction from south west to north east, and five in breadth, in a direction at right angles with the former, lying between lat. 30 53—31° 4' long. 77° 35' and 77 42'. This tract consists principally of a main ridge running from south west to north east, forming part of the range connecting the peak of Wurtu with that of Chur and having probably an elevation of from 5,000 to 7,000 feet above the sea. The streams flow across the district in a south-easterly direction towards the Tones. The inhabitants are a hardy fearless race who continued to resist the Goorkhas after the other mountaineers had submitted and until after a bloody conflict at Mistelee where they were overpowered by a force of 8,000 men. On the march of the English troops into this part of the mountains, the inhabitants again rose in arms against the Goorkhas exterminated those occupying their country and, investing the fort of Obepal, farther south, conducted manly to its surrender. On the expulsion of the Goorkhas, and subsequent pacification of the country Poondur devolved to the East-India Company, for want of heirs to the former ruling family and as no advantage appeared likely to result from retaining dominion over its barren soil and rude people, it was, by the advice of Sir David Colclough transferred to the rule of Koonthul, its present sovereign. It is estimated by De Cruz to have an annual revenue of 800,000, and a population of 2,000, of whom 400 bear arms.

# POO.

**POONG**—A town in the British district of Amherst, one of the Tanasserim provinces, 11 miles N of Moumein. Lat. 16 33, long 97° 42'

**POONGUL**, in the Rajpoot state of Beekaneer a village on the route from the town of Beekaneer to that of Bahawalpur, and 48 miles N W of the former. It is described as situated amidst desolation, striking even in that desert region. Lat. 25° 30' long 73° 53'

**POONITU**—A town in the native state of Travancore territory of Madras, 57 miles N by E from Quilon and 91 miles N W from Tinnevely. Lat. 9 40', long 76 50'

**POONOO**—A town in the British district of Shikarpoor territory of Scinde presidency of Bombay 32 miles W of Shikarpoor. Lat. 27 58' long 68 8'

**POONPOON**—A river rising in Ramguth among the mountains on the northern frontier of Behar about lat 24 30' long 84 20'. It holds a course generally north east through Behar and Patna, receiving in its course some considerable torrents. At its mouth it has steep banks, about thirty feet high, and a channel 100 yards wide. Its total length of course is about 130 miles. At the distance of a few miles further east, in the course of the Little Poonpoo holding a direction nearly parallel to that of the larger stream, and ultimately joining it twelve miles above its confluence with the Ganges at Futwa, in lat. 25° 29' long 85 28'

**POONWA** in the British district of Allahabad, head gov of the N W Provinces, a village on the route, by Rajapoor ferry from the cantonment of Allahabad to Banda, and 33 miles W of the former. Lat. 25 27' long 81 23'

**POOPREE**—A town in the British district of Turkoet, head gov of Bengal 36 miles N E of Moosfarpur. Lat. 26 30' long 85 50'

**POOR**, in the British district of Moosfurruggur head gov of the N W Provinces, a town, the principal place of the pergunnah of the same name. Elevation above the level of the sea 963 feet. Lat. 29 40', long 77° 54'

**POORAH** in the British district of Cawnpore head gov of the N W Provinces, a town on the route from the cantonment of Futehgurh to that of Cawnpore and 26 miles N W of the latter. It has a bazar and is well supplied with water. Lat. 26° 45', long 80 9'

**POORAINUH**, in the British district of Goruckpoor head gov of the N W Provinces, a town on the route from Goruckpoor to Oudh, 54 miles W by N of the former. Lat. 26 49' long 81° 31'

**POORALLA**.—A British district in the head gov of Bengal, bounded on the north west by those of Barrackpore and Pachete,

on the east by Bancoorah and Midnapoor, and on the south west by Singbroom and the native state of Mohurbunge. It lies between lat. 23° 9'—23 44', long 86 5—87 12' is seventy miles in length from north-east to south west, and sixty miles in breadth. Pooralla, the principal place as the station of the assistant to the political agent for the south west frontier of Bengal and commissioner for Chota Nagpore. It is situated forty miles west of Bancoorah.

**POORANDA**—A town in the British district of Purneah head gov of Bengal, 22 miles W of Purneah. Lat. 25 46', long 87 10'

**POORANUM** in the Jetch Doonab division of the Punjab a town situated on the left bank of the Jhelum 39 miles N N W of the town of Lahore. Lat. 32 46' long 73° 46'

**POORBOONI** in Koonawur a district of Bussahir is a village on the left bank of the Estly. It is of considerable size with houses built of brown stone banded with beams of dender. Poorbroom is 7 318 feet above the sea. Lat. 31 36' long 73 22'

**POORBUNDEE**, in the peninsula of Kattywar province of Guzerat, a town on the south west coast, in the district of Burda. Though having no shelter for ships of considerable burthen in consequence of a bar obstructing the entrance it is much frequented by craft of from twelve to eighty tons burthen and is the best on the west coast, carrying on brisk trade with the opposite coast of Africa, and with various ports in Sind, Beloochistan, Arabia, the Persian Gulf and the coasts of the Comoros and Malabar and about sixty vessels of various sizes belong to the port. Poorbunder belongs to a rana or chief of the Jaitwa tribe of Rajpoots, who also holds the whole district of Baria or Jaitwar for which he pays an annual tribute of 3 000*l.* to the Guzerat, and also pays annually to the British government the moiety of the duties levied at the seaport of Poorbunder, yielding annually a revenue of from 3,000*l.* to 3 500*l.* Distance from Ahmedabad, S.W., 210 miles. Baroda, W 280 Bombay, N.W., 275. Lat. 21 37' long 69 45'

**POORKE**—See JUGGUBHATH

**POORMAH**.—A town in the recently leased territory of Nagpoor 126 miles E N E. from Nagpoor and 87 miles S. from Ramgur. Lat. 21 43' long 81 8'

**POORNA**, a river of Hyderabad, and a considerable feeder of the Godavery, rises in lat. 20 22' long 75 16', and, flowing south-east for 190 miles, falls into the Godavery river, in lat. 19 6' long 77 5'

**POORNA**.—A river rising in lat. 20 59', long 73 44', on the western slope of the Western Ghats, and flowing through the territory of the Raichur rajahs, Warasse, and the British district of Barst, falls into the North Indian Ocean in lat. 20° 55', long 72° 46'

**POORNAH RIVER**, rises in lat. 21° 38',

long 77° 41', in the British district of Baltoot, and flowing southerly for sixty-five miles through that district, and for twenty-five through one of the recently sequestered districts of the Nizam's dominions, falls into the Tapi, in lat. 21° 4', long. 76° 8'.

**POOROGAON**.—A town of Eastern India, in the British district of Northern Cachar, 60 miles E. by S. of Jyntahpore. Lat. 25° 4' long 93°.

**POORSA**.—A town in the British district of Dinajpore, lieut.-gov of Bengal, 39 miles S.E. of Dinajpore. Lat. 25° 18' long 89° 5'.

**POORUNDHUR**, in the collectorate of Poona, presidency of Bombay, "a hill fort, connected with a neighbouring range." The highest point of the mountain of Poorundhur is upwards of 1,700 feet from the plain immediately below and 4,472 feet above the sea. There are two forts, an upper and a lower situated from 800 to 400 feet below the summit. The works, like most of the hill forts in that part of the country are of perpendicular rock, and frequently weakened rather than strengthened by curtains and bastions of masonry, by which the natural defences are generally surmounted. It was one of the first places which the Mahatta chief Sevajee secured, and he obtained it by preying on the weakness of those by whom it was held. In 1655 it was invested by the forces of Aurungzebe under the command of Dillir Khan and though the defence was obstinate and the success of the undertaking doubtful, Sevajee appears to have been so intimidated at the prospect of its fall that he surrendered the place and himself, and entered the service of Aurungzebe, from whom, however, he soon revolted, and in 1670 recaptured the fort. After the power of the Felahwas had superseded that of the descend ants of Sevajee at Poona, it was the usual stronghold to which the former retreated when unable to remain in safety at the capital. In 1818 it was invested by a British force, and, after a brief resistance, surrendered at discretion. The fort commands a passage through the Ghats, denominated the Poorundhur Ghat. Here, in 1776, was concluded a treaty between the British government and the Mahatta states but its conditions were never fulfilled, the treaty being overruled by a subsequent agreement between the Bombay government and Ragoba.

Poorundhur is one of the martial stations for European officers and soldiers. It is distant 20 miles S.E. of Poona, 40 miles N. of Satara, and 90 S.W. of Bombay. Lat. 18° 16', long 74° 2'.

**POORUNGURH**.—A town in the British district of Ratanagiri, presidency of Bombay, 13 miles S. of Ratanagiri. Lat. 16° 56', long. 73° 25'.

**POORUNPOOR**, in the British district of Shahjehanpore, lieut.-gov of the N.W. Provinces, a town on the route from Bareilly to

the Nepal territory, 48 miles E. by N. of the former. Lat. 28° 30', long 80° 13'.

**POORWA**.—A town in Bundelcund, situated on the left bank of the Pymnnee river, distant four miles N. from Tirhwa. Lat. 25° 16', long 80° 50'. The territory of which this town is the principal place belongs to a native chief under the protection of the British government. It contains an area of twelve square miles, and a population of 1,800.

**POORWAH**.—A town in Oude, 65 miles N.W. from Lucknow, and 37 miles E.N.E. from Furruckabad. Lat. 27° 30' long 80° 18'.

**POORWAH**.—A town in Oude, 20 miles S.W. from Lucknow and 30 miles E. from Cawnpore. Lat. 26° 29', long 80° 51'.

**POORYNHA**, in the British district of Shahjehanpore, lieut.-gov of the N.W. Provinces, a village on the route from Futtighurh to the cantonment of Shahjehanpore and 18 miles S.W. of the latter. Lat. 27° 45', long 79° 46'.

**POORYNEE**, in the British district of Bynour, lieut.-gov of the N.W. Provinces, a village on the route from Moradabad to Hurdwar, and 44 miles N.W. of the former. Lat. 28° 24' long 78° 31'.

**POOSA**, in the British district of Tirhoot, lieut.-gov of Bengal a town on the route from Dinapore to Furruckabad 50 miles N.E. of former 150 W. of latter. It is situated on the banks of the Little Ganduck river has a good bazar and supplies are abundant. Lat. 25° 58', long 85° 41'.

**FOOT**.—A town in the British district of Tavoy one of the Tenasserim provinces, 110 miles S. by E. of Moulmein. Lat. 14° 56', long 98° 5'.

**FOOTH**, in the British district of Meerut, lieut.-gov of the N.W. Provinces, a town on the route from Meerut to Budson 33 miles S.E. by E. of the former. Lat. 28° 40', long 78° 16'.

**FOOTLEE**.—See **KOTFOOTLEE**.

**FOOTLEE**.—A town in the Rajpoot state of Uwar 28 miles W.N.W. from Uwar and 98 miles S.W. from Delhi. Lat. 27° 40', long 76° 13'.

**FOOTORAY**.—A town in the native state of Travancore, presidency of Madras, 20 miles S.E. from Trivandrum and 82 miles W.N.W. from Cape Comorin. Lat. 8° 17', long 77° 11'.

**FOOTTOOR**.—A town in the British district of South Canara, presidency of Madras, 26 miles E. by S. of Mangalore. Lat. 13° 47', long 75° 15'.

**PORAKADY**.—A town in the British district of Malabar presidency of Madras, 55 miles E. by S. of Cannanore. Lat. 11° 41' long 76° 15'.

**PORENAUMLA**.—A town in the British district of Cuddapah, presidency of Madras,

POB—PRI.

39 miles N by E. of Cuddapah. Lat. 15°, long. 78° 4'

**PORIAN POINT**, on the coast of the British province of Pegu, at the mouth of the Ngrais river. It lies low, is formed of white cliffs covered with trees. Distance 69 miles S.S.W. of Bassein. Lat. 15 49', long. 94° 29'

**PORKA**, or **PORKAD** in Travancore, a town on the seacoast, having a trade in timber, coconuts, pepper and coir or coconut-fibre. Distance from the city of Cochin, S.E., 63 miles. Lat. 9° 20' long. 76° 25'

**PORTO NOVO** in the British district of South Arcot, presidency of Madras a town on the Coromandel coast, at the mouth of the river Vellar which rising near the base of the Eastern Ghats, and having a considerable length of course is small at its mouth and admits only existing craft. Ships of superior burthen must anchor two miles off shore where they have six or seven fathoms of water with good holding-ground in mud. This town was formerly of considerable importance and prosperity but having suffered much in the wars between the British and Mysorean governments, sank into decay. Its prosperity is, however rising, in consequence of extensive ironfoundry works having been established here by a joint-stock association, called the East-India Iron Company to whom also belong the works at Beyerport. The ore smelted is in great abundance in the vicinity and can be reduced by the usual processes into the finest steel.

Porto Novo was burned by Hyder Ali in July 1780 upon his first irruption into the Carnatic. In the following year a critical battle was fought at this place, between Hyder and the British, which terminated in the complete discomfiture of the former. Hyder had anticipated a different result. Relying upon his vast superiority of numbers he trusted that the day had arrived when he might completely annihilate the only army that remained to oppose him, and actually issued an order at the commencement of the action that no prisoners should be taken. Distance from Tranquebar N 32 miles Madras, N.E., 155, Tanjore, N.E. 63, Madras, S., 116. Lat. 11 31, long. 79 49'

**PORTUGUESE POSSESSIONS.**—See GOA, DIU and DAMAN

**POTAL**—A town in the British district of Myrmungur, bent. gov. of Bengal 44 miles S.W. by W. of Nussurabad. Lat. 24° 21' long. 89° 50'

**POTALPUTTOO**—A town in the British district of North Arcot, presidency of Madras, 35 miles N.W. by N. of Arcot. Lat. 15° 29' long. 79 9'

**POTHEKE.**—A village in the British district of Bobbili, bent. gov. of the N.W. Provinces. Lat. 29° 8', long. 76° 20'

**POUDELLAH.**—A town in the British district of Nellore, presidency of Madras, 28 miles W.N.W. of Ongole. Lat. 15 36', long. 79° 41'

**POUNA**, or **PONNA.**—See GORZON.

**POUNNALLY**—A town of Burmah, situate on the left bank of the Irrawady river, and 56 miles N. from Ava. Lat. 22° 49' long. 96°

**POWAKEN**, in the British district of Shahjehanpore, bent. gov. of the N.W. Provinces, a town on the route from Shahjehanpore to Jemsh 18 miles N.E. of the former. Powasen is returned as containing a population of 5,071 inhabitants. Lat. 28 4 long. 80 10'

**POWANGURH**—A town in Guzerat, or dominions of the Guicowar 23 miles N.E. from Baroda, and 69 miles S.E. by E. from Ahmedabad. Lat. 22 28' long. 73° 30'

**POWAR.**—A town in the British district of Poonah, presidency of Bombay 17 miles W. of Poonah. Lat. 16° 21', long. 73° 39'

**POWNAR.**—A town in the leased territory of Nagpore or Berar 40 miles S.W. from Nagpore and 79 miles S.E. from Killehpore. Lat. 20 48', long. 78 42'

**POWRFE**, in the territory of Gwalior, a town on the route from Calpee to Kotah, 195 miles S.W. of former 128 E. of latter. Lat. 25 32' long. 77 27'

**POWTI**—A town of the British district Bijnour, bent. gov. of the N.W. Provinces. Lat. 29 12 long. 78 32'

**POWUNGURH**—A town in the native state of Kalapoor, presidency of Bombay 64 miles S. from Bhatara, and 69 miles N.W. from Belgannam. Lat. 16 47', long. 74 12'

**PRAIGPOOR**, in the Rajpoot state of Jeypore a town on the route from Delhi to the town of Jeypore 107 miles S.W. of former 54 N.E. of latter. It has a bazar and water is plentiful. Lat. 27° 38' long. 76 18'

**PRANHTA RIVER.**—See WANGUNGA

**PRINCE OF WALES ISLAND** (called also Penang from its form resembling that of the acre-out, for which Penang is the Malay term) is situate near the northern entrance of the Straits of Malacca, off the western coast of the Malay peninsula, being separated from the dependency Province Wellesley on the mainland by a channel two miles and a half wide. It lies between lat. 5 14—5 29' long. 100° 25', is fifteen miles in length and twelve in its greatest breadth, and contains an area of 160 square miles.

Favoured by nature not less in its highly advantageous mercantile situation than in the rich and varied produce of its soil, this flourishing island is sheltered from the south west by the lofty mountains of Sumatra, and on the east by the chain of the Malay peninsula, so that ships approaching its shores escape the

fury of the storms which prevail in this quarter of the globe, and a safe anchorage is at all seasons easily obtained in this harbour, which formed by the strait separating Penang from the Quedah coast, is deep, with good anchorage, enabling ships of large burden to lie a few hundred yards off the town and so spacious as to be capable of containing almost any number of vessels. A considerable commerce is accordingly carried on, which is represented as being on the increase. The coast is bold, and studded with several islands, and on almost every side the shore is lined with groves of the cocoanut. A chain of mountains, having an elevation of from 2,000 to 2,500 feet above the level of the sea, ran diagonally across the island from north-east to south-west on each side, extending from their base to the coast, are fertile plains, which are entirely cultivated except where interrupted by forests of fine trees and groves of the areca. To the north-east is a level plain three miles in breadth, called the "Valley." This is the most populous part of the island, Georgetown (the capital) with its forts, barracks, &c. being built on its eastern extremity and the houses of the principal European inhabitants scattered over its surface. The northern part is generally mountainous and the summits of many of the hills are studded with residences of European planters. There are no rivers but numerous streams and rivulets, which find their source in these mountains, serve to irrigate and fertilize the soil.

The climate of Penang varies on the hills and in the valley. In the former it is most delightful the medium temperature of the year is 70° the average annual range of the thermometer about 10°. Being exposed at all times to refreshing breezes, the heat in the middle of the day in the hottest weather is never oppressive and from the purity and bracing character of the air, together with the beauty of the scenery, it offers a most agreeable resort for convalescents. At some seasons, morning fogs hang over the summits, which make it cold and render warm clothing necessary. In the valley covered with its rich verdure and luxuriant vegetation the climate is moist. There the temperature in the day rises to 80°, and is seldom lower than 76° but the nights and mornings are always delightfully cool. January and February are the driest months. April May and June are rainy ones but showers are frequent throughout the year. The diseases which are most common are the cholera, fever, diarrhoea, dysentery, rheumatism, and ulcers.

The geological formation of Prince of Wales Island is primitive. The mountains consist almost exclusively of granite, mica occasionally occurs in pretty large quantities, and quartz is sometimes found. The subsoil of the hills consists in some places of decomposed rock, varying from one to eight feet in depth the valley is of alluvial formation, formed by the detritus of the mountain, which has been

accumulating for ages. Dr Ward supposes that the sea at some remote period covered these parts, and washed the base of the mountains, and this opinion is borne out by the appearance of the opposite shore, where Captain Low discovered for some miles inland evidences of the gradual retirement of the ocean, in the ridges which at intervals run parallel with the coast. The only mineral known to exist is tin, and it is said the mountains are rich in this ore though no mines have been worked.

The soil throughout the island is generally light, but varies in quality at the foot of the mountains it becomes rich in the valleys it consists of a vegetable mould, some inches in depth with a substratum of sand. Towards the sea, where it has been covered with man groves, the soil is a rich black mould, mixed with small quantities of sand and gravel.

The whole island is covered with a luxuriant vegetation. When first transferred to the English, dense forests and noxious jungle covered its surface these have been now cleared away and highly-cultivated fields and smiling gardens occupy their place. The eastern side of the island, consisting of low lands, which are well adapted to the growth of rice is almost exclusively appropriated to its cultivation. On the south western side, the soil being of a different character is occupied by beautiful plantations of the spice and pepper plants. The cleared summits of the hills are productive in cloves, which are the finest in the world. Their sides are clothed with forests and plantations of tea, cotton, and tobacco and the plains are rich also in coffee, sugarcane, and all descriptions of fruit trees and vegetables. The nutmeg is a tall tree the island contains several descriptions, varying in the colour of their leaves and the shape of the fruit. The betel vine is extensively planted, the natives have a great partiality for the leaf, and are large consumers of it.

So great a variety of races constitutes the population of Prince of Wales Island, that Sir George Leith remarks, "There is not probably in any part of the world so small a space in which so many different people are assembled together or so great a variety of languages spoken." There are Malays, Chinese, Butias, Bongalese, Europeans, Chulias, Saamees, and Burmese. When first taken possession of by the British, it was very thinly populated a few Malay families, who used to gain their livelihood by fishing, and several bands of pirates, being the only inhabitants. Soon after the settlement of the British however Chinese, and people from various countries congregated here to enjoy the advantages of British protection and in 1797, ten years after the first establishment of the British the number of inhabitants amounted to 6,937. In 1801 it had increased to 9,537 in 1828 the population was 37,715 in 1855 it had risen to 45,618. The total population of the Straits settlements at the same period,

inclusive of military and convicts, was as follows —

Prince of Wales Island	45 518
Province Wellesley	61 509
Singapore	57,421
Malacca	54 021
Total.	208,469

The British inhabitants are either planters, merchants, or gentlemen holding official situations.

Prince of Wales Island is the seat of government for all the British possessions in the Straits. At the latter end of the last century, the East-India Company deemed it necessary to establish a port in the Straits of Malacca, and after several fruitless endeavours to obtain Achien Penang was fixed upon. The Company were at the same time apprised by Captain Light, that the king of Quedah would transfer the island into their hands upon the annual payment of 6,000 Spanish dollars. Terms being drawn up and agreed to, Captain Light was appointed by the government superintendent of their new settlement. Through the indefatigable exertions of Captain Light, forests were cleared, lands distributed, a town built, and port constructed so that in a few years the island was in a most flourishing condition. In 1791 the king of Quedah seeing its prosperous state, demanded an increase of stipend and upon refusal collected a force on the opposite shore for the purpose of attack. This intention, however was frustrated by the timely operations of the superintendent, who, applying for assistance from Bengal, drove him away dispersed his troops, and afterwards entered into a treaty with him. Captain Light, after filling his station to the satisfaction of his country and those over whom he was placed, died in 1794. A few years afterwards, the designation of superintendent was changed to that of lieutenant-governor. In 1802 a strip of land on the opposite coast, now known as Province Wellesley was obtained from the king of Quedah and in 1807 the judicial administration previously in the hands of the local government, was vested in a recorder's court. Before the year 1805 the authorities of Penang were subordinate to the Bengal presidency at that period they were constituted a separate presidency. This new arrangement lasted till 1820 when Malacca and Singapore were incorporated with Penang, and the eastern settlements were again made subordinate to Bengal. A commissioner or governor was appointed to preside over the three settlements, and a deputy resident was placed over each. In 1851, this dependency upon the government of Bengal was removed, and the governor of the united settlements was declared subject only to the government of India.

FROME.—A town in the British territory of Pegu, situate on the left bank of the

Irrawaddy. It is a place of considerable importance, and under British administration will probably advance in commercial consequences, wealth, and prosperity. During the first Burmese war (1825), it was taken possession of by the British without the trouble of firing a gun the enemy having deserted it, after setting it on fire. The conflagration destroyed one quarter of the town. The captors were rewarded by finding among the spoil a hundred pieces of artillery and a large supply of grain. In the second war with Ava (1853), Frome again fell into the hands of the British and with almost as little effort on their part. Some resistance was offered as part of the troops, after landing, advanced to the position meant to be occupied for the night but it was speedily overcome, with very trifling loss, and in the morning the town was found evacuated. Frome is distant from the town of Paga, N W 113 miles. The town was nearly destroyed by fire in the early part of 1864. The district of which this place is the chief town has an area of 5 600 square miles, and a population of 100 000 inhabitants. Lat 18 47' long 95 8'

PROMNA.—A town in the British district of Amherst one of the Tenasserim provinces, 53 miles N of Moulmein. Lat 17 16', long 97 43'

PROVINCE WELLESLEY.—See WELLESLEY PROVINCE.

PRUCHITGURH.—A town in the native state of Sawuntwarree, presidency of Bombay 20 miles N E from Vingula, and 52 miles S.W by S. from Kelapoor. Lat. 16 3' long 75 53'

PRUCHITGURH.—A town in the native state of Kelapoor, presidency of Bombay 50 miles N W from Kelapoor, and 38 miles S W by S. from Battara. Lat 17 15' long 78 47'

PUEB MOUNTAINS, extending southward from the Hala range, and forming a natural boundary between the Belooche provinces of Lus and Sinde. If we consider their northern limit to be 74 lat. 26°, where the Hala range becomes contracted to about thirty miles in breadth and their southern to be Cape Monas, their length will be found to be about ninety miles. In lat. 25° 8' long 65° 50', they are crossed by the route from Karrachee to Sonmasee, at the pass of Ghucloha, described by Hart as "stony, of trifling ascent, and the descent equally gentle. The highest part appears to be about lat. 25 30', where native report represents the elevation as great, though it does not probably exceed that of the mountains of Western Sinde, considered to be about 2 000 feet.

PUBNA.—A British district under the presidency of Bengal, named from its principal place. It is bounded on the north by the British district Bogra or Begura, on the north-east by the British district Mymensingh, on the south-east by the British district Dacca, and on the south by the British district

trict Jansore, on the west, and also on the north-west, by the British districts Nuddea and Rajshahy. It lies between lat. 23° 34'—24° 36', long. 85° 55'—89° 48' and has an area of 2,606 square miles. It is a remarkably watery tract, containing many jills or shallow lakes, and being traversed by the Ganges, and numerous offshoots from that river and from the Brahmapootra. The population of this district is given under the article **BENGAL**.

This tract was acquired by the East-India Company in 1765 by virtue of the firman of Shah Alam, conveying to that authority the dewanny of Bengal, Behar, and Orissa.

**PURNA**—A town the principal place of the British district of the same name, situate about a mile north of the left bank of the Poddá, or great eastern branch of the Ganges, and on the Purna, an offshoot from it. Purna is distant N E from Calcutta 180 miles. Lat. 24° long. 89° 12'.

**PURCOOLE**—A town in the British district of Myinnung, lieut.-gov. of Bengal 49 miles S S W of Numarabad. Lat. 24° 9', long. 90°.

**PUCHAK**, in the Rajpoot state of Jodhpoor, a village on the route from Numarabad to the town of Jodhpoor and 43 miles E of the latter. Lat. 26° 10' long. 78° 47'.

**PUCHARI**—A village in the district of Shikawntee, territory of Jeypore, lieut. gov. of the N W Provinces. Lat. 25° 8' long. 76° 1'.

**PUCHEBUDRA**, in the Rajpoot state of Jodhpoor, a town 60 miles S W of the city of Jodhpoor and eight miles N of the right bank of the Sonae. It is situate in a fertile but recently cultivated country and three miles south of salt marishes, the brine of which is so strong in the dry season that the salt spontaneously crystallizes into large masses about houses thrown into the pools for that purpose. The town and the salt-works belong to the khalsa, or royal estate of the maharaja of Jodhpoor and the revenue from them is allocated to the maintenance of his senana. Lat. 26° 57', long. 72° 21'.

**PUCHESUE**, in the British district of Kumaon, lieut.-gov. of the N W Provinces, a village at the confluence of the rivers Surjon and Kalee (Eastern), on the left bank of the former, right of the latter, 10 miles S of the cantonment of Potoragurh. Lat. 29° 27', long. 80° 13'.

**PUCHEWOR**, in the Rajpoot state of Jeypore, a town on the route from Agra to Numarabad, 183 miles S W of former 40 N E. of latter. It is of considerable size, has a bazar and supplies and water are abundant. Lat. 26° 30' long. 75° 36'.

**PUGHAIN**, in the British district of Boondshuhar, lieut.-gov. of the N W Provinces, a village on the route from Allygurh cantonment to that of Delhi and 35 miles N W of the former. Lat. 28° 19', long. 77° 52'.

**PUCHOWREA**, in the British district of Bareilly lieut.-gov. of the N W Provinces a village on the route from the town of Pilibheet to Potoragurh cantonment, 25 miles N E. of the former. Lat. 26° 57', long. 80° 4'.

**PUCHPERA**, in the British district of Allygurh, lieut.-gov. of the N W Provinces, a village on the route from the city of Agra to Bareilly and 52 miles N E. of the former. Lat. 27° 41', long. 78° 37'.

**PUCHPERA**, in the British district of Bareilly lieut.-gov. of the N W Provinces, a village on the route from the town of Pilibheet to Nagina, and 16 miles N W of the former. Lat. 28° 48' long. 79° 40'.

**PUCHPERA**, in the British district of Mynpore, lieut.-gov. of the N W Provinces, a village on the route from the city of Agra to Etawa, and 20 miles N W of the latter. Lat. 27° 5' long. 78° 41'.

**PUCHROLI** in the Rajpoot state of Jodhpoor, a village on the route from the town of Jodhpoor to that of Ajmeer and 37 miles N W of the latter. Lat. 26° 35', long. 74° 11'.

**PUCHUM SUREORA** in the British district of Allahabad, lieut.-gov. of the N W Provinces, a village on the route by the Rajpoot ferry from the cantonment of Allahabad to Banda, and 89 miles W of the former. Lat. 26° 26' long. 81° 22'.

**PUDKA BHOOTA**—A town in the native state of Bhawalpore situate on the left bank of the Indus river, and 131 miles S W by W from Bhawalpore. Lat. 23° 26', long. 69° 59'.

**PUCKERPOOR**—A town in Oude, 51 miles N E. from Lucknow and 106 miles E S E. from Shahjehanpore. Lat. 27° 22' long. 81° 35'.

**PUDAPADDY**—A town in the British district of Malabar, presidency of Madras, 49 miles S E. by E. of Cannanore. Lat. 11° 29', long. 76° 2'.

**PUDDOW**—A town in the British district of Travre, one of the Tenasserim provinces, 131 miles N N W of Tenasserim. Lat. 15° 55', long. 98° 23'.

**PUDHOR**—See **BRUNDUR**.

**PUDORA** in the British district of Allygurh, lieut.-gov. of the N W Provinces, a village on the route from the city of Agra to Bareilly and 53 miles N E. of the former. Lat. 27° 42' long. 78° 37'.

**PUDREE**—A town in Seinde situate in the territory of Ah Moorad, 73 miles S S E. from Bukkur and 106 miles N E. by N from Hyderabad. Lat. 26° 40' long. 69° 19'.

**PUDREE**—A town in the British district of Tirhoot, lieut.-gov. of Bengal, 44 miles S E. of Durbanga. Lat. 26° 38', long. 86° 27'.

**PUDROWNAN**—A town on the route from Gorakhpore cantonment to Mulliy, and 36 miles E of the former. It is situate in a beautiful well-wooded country, and when Buchanan

# PUG—PUL

surveyed it, about fifty years ago, "contained 700 houses. A few had two stories, and a few were tiled but by far the greater part consisted of miserable thatched huts. The rajah's castle occupied one corner and the whole had been surrounded by a ditch and bamboo hedge." He adds, "The town had considerable manufactures of sugar, nitre, and cloth and advances were made from the Company's factory at Ghasepore for the two latter." Supplies are abundant here and the road in this part of the route is good. Distant N W from Dinapoor 105 miles Lat. 26 50', long 84 1

**PUGGUR**—A town in the British district of Ramgur, lieut. gov. of Bengal 23 miles W by S. of Hazareebagh Lat. 23 54 long 85 8

**PUGEROOKHEE**—A town in the British district of Behar, lieut. gov. of Bengal 33 miles S of Behar Lat. 24 44 long 85 37

**PUHAREE**, or **PAHAREE** a native state of Bundelcund, with an area of four square miles containing a population of 800. The rajah maintains a military force of fifty infantry. Puharee, the capital, is in lat 25 14 long 80 50

**PUHAREE**, in the territory of Bhurtpore, a village on the route from Mathura to Feroz poor by Deeg 54 miles N W of former 15 S.E. of latter Lat. 27 43' long 77 9

**PUHAOO** in the British district of Boolundshahr, lieut. gov. of the N W Provinces, a town on the route from Boolundshahr to Allypurb 19 miles S.E. of the former Lat. 28 11, long 78 8

**PUHPOOND** in the British district of Etawa, the principal place of the pergunnah of the same name, is situate near the river Seengur 32 miles S.E. of Etawa, 56 miles W of Cawnpore. Puhpoond contains a population of 6 068 inhabitants. Lat. 26 36' long 78 32

**PUHRAH** or **PAHRAH** one of the native states of Bundelcund, containing an area of ten square miles, with a population of 1 600. The rajah maintains a force consisting of four horse and ninety nine infantry. Puhrah the principal place is in lat. 25 24, long. 80 18

**PUJOUL**, in the hill state of Kothharan a village on the right bank of the Giree Elevation above the sea 4 980 feet. Lat. 31 6 long 77 31

**PUKEROLA**, in the British district of Moradabad, lieut. gov. of the N W Provinces, a village on the route from the town of Meerut to that of Moradabad, and 37 miles S.E. of the former place. Distant N W from Calcutta, via Moradabad, 234 miles. Lat. 28 51, long. 78 15

**PUKHURA**—A town in Nepal, situate on the right bank of the Nalin river, and 102 miles W N W from Khatmandoo Lat. 28 15' long 83 47

**PUKKA SERAI**, in the British district of Boolundshahr, lieut. gov. of the N W Provinces, a village on the route from Allypurb cantonment to that of Delhi and 14 miles S.E. of the latter Lat. 28 32', long 77 30

**PUKLI** in the north of the Punjab, a small tract east of the Indus. It is very fertile. Runjeet Singh obtained possession of it about twenty years ago, by expelling the Mahometan chief Poyndu Khan who took refuge in the island of Chuttooptye in the Indus. It is generally supposed to be the Pucolale of Arrian, but erroneously as that (lib iv 22) was on the west side of the river, and Pukh is on the east. Lat. 34 15'—34 30' long 72 50'—73 15'

**PUKREE**, in the British district of Allahabad, lieut. gov. of the N W Provinces, a village on the right bank of the Ganges 781 miles N W of Calcutta by the river route, and 27 4 F of the city of Allahabad by the same. Lat. 25 18', long 82 12

**PULANA** or **ILANA** in the hill state of Coond, tributary to Keonthul a village on the right bank of the Giree near the confluence of a feeder from the north. Elevation above the sea 6 135 feet. Lat. 31 6' long 77 29

**PULANA**—A town in the Rajpoot state of Oodeypoor 15 miles N N E. from Oodeypoor and 66 miles W N W from Neemuch Lat. 24 48 long 73 55

**PULANTI**—A town in Nepal situate on the right bank of the San Coov river, and 38 miles E from Khatmandoo. Lat. 27 42', long 85 44

**PULICAT** in the British district Chingleput, presidency of Madras, a town on an island in an extensive inlet of the sea or salt-water lake of the same name. The lake of Pulicat is thirty three miles in length from north to south and eleven in breadth where widest, and contains some large islands besides that on which the town is situate. It seems to have been produced by the sea's breaking through a low sandy beach and overrowing the lands within, for its communication with the sea are extremely narrow like the embouchures of small rivers. From one to two miles off shore is the road called Pulicat Anchorage, where there are six or seven fathoms water. The lake, throughout its whole length, forms the north eastern limit of the British district of Arcot, south division. An extensive line of water-communication has been established between the city of Madras and the town of Doogorauzeptam, principally by means of this lake. The town of Pulicat is distant from Arcot, N.E. 76 miles. Nellore, S. 75, Madras, N., 23. Lat. 13 25 long 80 23

**PULLA** in the British district of Allypurb, lieut. gov. of the N W Provinces, a village on the route from the cantonment of Allypurb to that of Delhi, and nine miles N W of the former Lat. 27 58', long. 78 8

**PULLA CHAND**, in the British district 757

# PUL-PUN

of Alhygurh, lieut.-gov. of the N W Provinces, a village on the route from Meerut to Muttra, and 34 miles N.E. of the latter Lat. 27° 58', long. 77° 58'

**PULLADUM**.—A town in the British district of Coimbatore, presidency of Madras 31 miles E. of Coimbatore Lat. 11, long. 77° 19'

**PULLAGOO**.—A town in the British district of Tavoy, one of the Tenasserim provinces, 145 miles S.S.E. of Moulmein. Lat. 14 24', long. 98 18'

**PULLAMPOTTI**.—A town in the British district of Trichinopoly, presidency of Madras, 23 miles N by E. of Madura. Lat. 10 23, long. 78 16'

**PULLANAMAREE**.—A town in the British district of North Arcot, presidency of Madras, 38 miles W N W of Arcot. Lat. 13 18', long. 78° 48'

**PULLEA**.—A town in Oude, situate on the left bank of the Chowka river and 113 miles N by W from Lucknow Lat. 28 26', long. 80 37'

**PULLEAPOORAM**.—A town in the native state of Travancore 11 miles N W from Trivandrum and 69 miles W from Tinnevely Lat. 8 36' long. 76 54'

**PULLEE**.—A town in the Rajpoot state of Jodhpore, 49 miles N N W from Jodhpore and 122 miles W by N from Ajmeer Lat. 26 57' long. 72 50'

**PULLEHRA**.—A town in the Boondela state of Tehree, 32 miles N E from Tehree, and 88 miles N N E. from Saugur Lat. 25 1 long. 79° 15'

**PULLOK**.—A town in the British district of Tavoy, one of the Tenasserim provinces, 88 miles N N W of Tenasserim. Lat. 15 20', long. 98 41'

**PULLOW**.—A town in the British district of Margul one of the Tenasserim provinces, 66 miles N N W of Tenasserim. Lat. 13 long. 98 44'

**PULLUGHUR**.—A town in the recently lapsed territory of Nagpore, 85 miles E.S.E. from Nagpore, and 105 miles S.S.E. from Secund. Lat. 20 49' long. 80 20'

**PULLYCOOT**.—A town in the British district of Malabar, presidency of Madras, 72 miles S.E. by E. of Cannanore Lat. 11 20', long. 76° 20'

**PULLYPATTL**.—A town in the British district of Salem, presidency of Madras, 28 miles N E. of Salem. Lat. 11 56', long. 78 28'

**PULNEY**.—A town in the British district of Madras, presidency of Madras, 40 miles N W of Madura. Lat. 10 30' long. 77° 43'

**PULNA**.—A village in the British district of Meerut, lieut.-gov. of the N W Provinces. Lat. 29° 32', long. 77° 35'

**PULUSGAON**.—A town in the recently lapsed territory of Nagpore or Berar, 29 miles

S.W. by S. from Nagpore, and 92 miles E.S.E. from Kitchpore Lat. 20° 48' long. 78 55'

**PULWUL**, in the British district of Georagon, lieut.-gov. of the N W Provinces, a small town giving name to the pergunnah so called, on the route from Delhi to Muttra, and 41 miles S. of the former It has a population of 13,010 inhabitants Lat. 28° 9' long. 77° 23'

**PUNAKHA**.—A town in the native state of Bhotan, situate on the left bank of the Bagnee river and 98 miles E.N.E. from Darjeeling Lat. 27 34, long. 89 45'

**PUNAMURTHCOTAH**.—A town in the British district of Malabar, presidency of Madras, 49 miles E by S. of Cannanore. Lat. 11 44 long. 76 8

**PUNAPOOR**, in the British district of Bareilly lieut. gov. of the N W Provinces, a village on the route from the town of Bareilly to Seetapore, and six miles S.E. of the former Lat. 28 21 long. 79 35'

**PUNAR**.—A river of the British district of Kumaon, lieut. gov. of the N W Provinces, rising on the northern declivity of the Sub-Himalaya, or southern and inferior range of the Himalaya, in lat. 29 23, long. 79 48' and 11 miles S.E. of Fort Almora. It flows circuitously, but generally in an easterly direction and receiving many rivulets right and left, falls into the Surjoa a great tributary of the Gogra, on the right side in lat. 29 32' long. 80° 7', having a total length of course of twenty five miles Buchanan on hearsay evidence states that gold is found in its channel, but neither Traill, in his Statistical Account of Kumaon, nor Webb, appears to mention this circumstance

**PUNASSA**, in the British district of Allahabad lieut.-gov. of the N W Provinces, a small town on the route by the Kutra Pass, from the cantonment of Allahabad to Rewah, 21 miles S.E. of the former It is situate on the left bank of the Tons, close to its confluence with the Ganges. The Tons, here crossed by ferry has a bed 400 yards wide its left bank steep, its right sloping. Lat. 25 16' long. 82° 7'

**PUNOH** in the Northern Punjab, a small town on the southern slope of the mountains bounding Cashmere on the south It is situate at the foot of the Punch Pass, and on the banks of a river of the same name, discharging itself into the Chenab At Punch, two much-frequented routes from the Punjab to Cashmere, that by Koteli and that by Ragsawr meet and proceed thence northward, through the Baranula Pass. Elevation of the Punch Pass 8,560 feet of the town, 3,280 Punch is in lat. 33 51, long. 74° 10'

**PUNOH RIVER**, in the Punjab, rises on the south western declivity of the Pir Panjal Pass, about lat. 33° 33' long. 74 43' and takes a direction generally north westerly down the valley dividing the Pir Panjal from the Ratan Panjal. After continuing in that direction for about fifty miles, it, close to the town

# PUN

of PUNCH, receives a feeder from the north, and below the confluence turns to the south-west. Here it is styled by Moorcroft a rivulet, but Jacquemont, who mentions it under the name of Tshomok, describes it as a torrent so rapid and powerful, that there is much danger in fording it, mentioning that a horse which loses its footing is swept down the stream and irretrievably perishes. Holding a south westerly course of about forty miles, it near Koteli receives a considerable feeder called the river of Rajour and after a course of about thirty miles further falls into the Ghanaub, in lat. 33 12', long 73 41.

**PUNDERPOOR.**—A town within the presidency of Bombay on the north-eastern frontier of Sattara, towards the collectorate of Sholapur. It is situate on the Beema, a tributary to the Kistna, and is highly revered by the Brahmans, as containing a celebrated temple dedicated to an incarnation of Vishnu. Here in 1816 Trimbuckjee Danglia, the profligate minion of the Peshwa, perpetrated the murder of Gangadhar Shastri the Guicowar's minister and envoy who had repaired to Poona under the sanction and protection of the British government. The circumstances under which this atrocious crime was committed are thus related.—As he (Gangadhar Shastri) passed along one of his attendants heard a man in the crowd say: Which is the Shastri? and another reply: He who wears the necklace; but not thinking the inquiry of any importance he paid no attention either to the person asking the question or to him who made the answer. The Shastri entered the temple, performed his devotions and after remaining a few minutes in conversation with Trimbuckjee Danglia, returned towards the house which he occupied. He advanced but a short distance from the temple, when three men came running behind him and as if clearing the road for some person of distinction calling out, 'Make way make way.' Their left hands were folded up in cloths, and each of them in his right hand bore what seemed to be a twisted cloth such as appears to be commonly used for striking persons in a crowd, to make them stand aside. One of them struck the Shastri a violent blow with the cloth and it was then discovered that he had a sword in his hand another seized him by the hair and threw him down and whilst in the act of falling a third rushed out him on the head. Three of the Shastri's attendants remained with their master but two more assassins rushing from the front, the whole of them were wounded and disabled. The rest of the Shastri's friends and followers, who do not appear to have been blent with any large share of personal intrepidity, ran away, leaving him in the hands of his murderers. Being thus at liberty to complete their bloody work, they mangled the unhappy man in a dreadful manner, and then departed, one of them exclaiming in the Marhatta language, "We have now finished him."

Three of the Shastri's people had remained at the temple in attendance upon one of his sons. As they approached the spot where the murder had been committed, they saw five men with naked swords running towards the temple. This alarmed them, but not being aware of what had happened, they made their way as quietly as possible to the Shastri's house not finding him there, they returned to the road, where they discovered his body cut to pieces. The population of Punderpoor is believed not to exceed 20 000 persons. Distance S.E. from Poona 112 miles and 185 S.E. from Bombay Lat 17 40 long 75 34.

**PUNDOOA or PURROOAH**, in the British district of Hooghly, lieut. gov. of Bengal, a small town with dak or relay-station for bearers, on the route from Calcutta to Bardwan 32 miles N.W. of former, 80 S.E. of latter Lat. 23 3 long 85 18.

**PUNDOOKESUR**, in the British district of Gurkwal, lieut. gov. of the N.W. Provinces, a town on the route from Sitwaggar to Thibet, 54 miles N.E. by E. of the former Lat. 30 37', long 79 30.

**PUNDRAWUL** in the British district of Boolundshuhar, lieut. gov. of the N.W. Provinces, a village on the route from Khargua; to Meerut and 36 miles N.W. of the former Lat. 28 7 long 73 15.

**PUNANORE**—A town in the British district of Cuddapah, presidency of Madras, 79 miles S. by W. of Cuddapah. Lat. 13 20', long 78 37.

**PUNGI** in Bussahir, a collection of hamlets in the district of Koonawur, on the right bank of the Sutlej and at the south-eastern base of a range dividing the valley of the Kishang from that of the Mulgum. Elevation above the sea 9 187 feet. Lat. 31 35 long 78 20.

**PUNGURA** in the British district of Banda, lieut. gov. of the N.W. Provinces, a village on the route from the town of Banda to Jabbalpoor, 20 miles S. of the former. It has water from a tank and wells. Lat. 25 13' long 80 31.

**PUNHETTI** in the British district of Allypore, lieut. gov. of the N.W. Provinces, a village on the route from the station of Allypore to that of Myspore and eight miles S.E. of the former Lat. 27 51, long 78 14.

**PUNJAB**, in the territory of Gwalior, or possessions of Scindia's family, a town 12 miles S.W. of the fort of that name, the scene of an engagement which took place on the 25th December 1843 (the date of the victory of Maharajpore) between the British and Maharatta forces. Major-General Gray leading from Bandelkund a British detachment to co-operate with that marching from Agra under the conduct of Sir Hugh Gough, commander-in-chief, crossed the river Sindhi at Chanderpur and proceeding north-west, on the 25th, after a march of sixteen miles, was attacked by the Maharatta army, strongly posted near the village of Mangar. The British army took post at

## PUNJ

Punjab, and by a series of attacks drove the enemy from all points of his position and captured all his artillery, amounting to twenty-four pieces, and all his ammunition. The Maharatta army is represented to have been about 12,000 strong, and to have suffered most severely. The British loss amounted to thirty-five killed and 183 wounded. Lat. 26° 6', long 75° 0'.

**PUNJAB (THE)**, an extensive territory on the north-west of India, so called from two Persian words, signifying five waters, the name having reference to five great rivers which flow through it. With respect to the propriety of the designation, it is, however, to be observed that there are in fact six rivers, the Indus, the Jhelum, the Chenab, the Ravee, the Beas, and the Sutlej, but as the Beas has a much shorter course than the others, it seems to have been disregarded when the name of the country was bestowed. In semi-civilized states, and especially in those of Asia, the boundaries, at all times ill-defined, are subject to frequent changes, and thus holds true in regard to the territory lately acquired from the Sikhs, in consequence of their incessant wars with their neighbours to the north and west. In the present case the province now designated the Punjab will be regarded as co-extensive with the recent empire of the Sikhs, with the exception of the provinces allotted by the British to Gholab Singh and which are now comprehended within the newly-constituted kingdom of Cashmere. Regarded in this view the Punjab will be found to possess natural limits remarkably well defined. They are as follows:—On the north the lower boundaries of Gholab Singh's dominions, on the west, the Suliman range of mountains, on the east and south-east, the river Sutlej and its continuation the Ghara. The shape in outline approaches that of the sector of a circle, the centre of which is at the confluence of the Punjab and the Indus, in lat 28° 55', long 70° 51'. The extreme radius the Suliman range holding in general a direction not greatly varying from north to south, the Sutlej and its continuation the Ghara, holding a direction from north-east to south-west, the arc in its highest latitude touching the 35th parallel. The most western point is just below the confluence of the Punjab and Indus, the most eastern is between the 78th and 79th meridians. The length from east to west is about 550 miles, the breadth, measured at right angles to this, about 420, the superficial extent, 72,535 square miles. No two regions can differ more in physical character than the northern and southern part of this territory. Within the north-east angle is comprehended the Alpine region of Kanger. The north-west angle comprises the Emulkye country, Peshawar, Kohat, Hazara, and the country thence extending southward to the Salt range, the entire tract being intersected by mountain-ranges, and consisting of a series

of valleys, enclosed by hills. The remainder includes the plain country of the Punjab distributed into the five doabs, and stretching south-west with a regularly rarely broken by any eminence of importance. The declivity of the surface from north-east to south-west is proved beyond question by the course of the rivers, which all descend in that direction. Jacquemont considers that the courses of the Sooranmy and Guggur, which, flowing from the Himalaya, are lost in the desert of Bikanur, he along an elevated tract dividing the basin of the Jumna from that of the Sutlej and that barometric and other observations prove the plain of the Punjab to be below that of Eastern Hindostan. He thence concludes the bed of the Sutlej in its course through the plain to be lower than that of the Jumna, that of the Beas lower than that of the Sutlej, and so in succession westward with regard to the beds of the Ravee, the Chenab, and the Jhelum, to the Indus, flowing through the lowest part of this extensive basin.

About the town of Mundi, near the north-eastern frontier and on the upper course of the Beas, in the most southern and lower ranges of the Himalaya, is an extensive tract of rocks and deposits of recent formation of limestone, sandstone, gypsum, argillaceous slate, amidst which veins of quartz occasionally occur. This formation is important, in consequence of containing inexhaustible beds of fossil salt, very compact and heavy and of a reddish colour. On the west of the Punjab, and crossing the Doab, between the Jhelum and the Indus, is the Salt range, which is crossed by the channel of the Indus, and which, to the north of the Daman on the western side of that river, joins the Suliman and Khyber ranges. The Salt range, sometimes (on the west of the Indus) called the Kalabagh range, holds a direction a little south of east, between lat 32° 30'—35°, and terminates rather abruptly on the right bank of the river Jhelum. The elevation is not great, probably in few places exceeding 2,000 feet above the sea. The formations composing it are granitic, limestone, sandstone, gypsum, and red tenacious clay investing enormous deposits of common salt, or chloride of sodium.

Altogether the ascertained mineral wealth of the Punjab and its dependencies appears scanty in proportion to the great extent of its mountains. Gold is found in the sands of the streams of the Chenab, the Euro, and the Swan, graphite or plumbago abounds in the Pir Panjal bounding Cashmere on the south-west, iron is also raised in Mundi, as well as common salt. The Salt range, besides the mineral from which it is named, produces antimony, alum, and sulphur. Nitro is obtained in abundance from the alluvial plains. Coal exists about the Salt range at Mukhrud, on the left bank of the Indus, and in the localities of Jee, Mooslee, and Nummal. Scientific inquiries into the mineral resources of the Salt range, and the Alpine portion of

the Hindh Sagar Doab, have been authorized by the government.

No country of the same extent probably enjoys more largely than the Punjab the means of irrigation and of inland navigation, by means of its six noble rivers. The most eastern, the Sutlej, has its source in Tibet, in lat 30° 8', long 81° 53'. Holding a south-westerly course of about 550 miles, it receives the Beas, below the confluence of which taking place near Haroke, and in lat. 31° 13' long 75° 2' the united stream is called the Ghara for about 300 miles, to the confluence of the Chenab, thenceforward the aggregate body of water bears the name of the Punjab for a further distance of about sixty miles, to its confluence with the Indus. Next to the Sutlej westward, is the Beas, rising in lat. 32° 34' long 77° 12', and holding a sinuous course of about 290 miles, in general to the south west, to its confluence with the Sutlej. Farther to the west flows the Ravee, the least in the volume of its water though not in the length of its course. Issuing from a lake embosomed in the Himalaya, in lat 32° 30' long 77° 1', it holds a very tortuous course but generally in a south westerly direction for about 420 miles, to its confluence with the Chenab. This last-mentioned river usually regarded as the largest of the Punjab flows in general west of that of the Ravee though its source is more eastward as it sweeps in a wide flexure round the upper part of the smaller rivers. Rising in Lahoul in lat. 32° 48' long 77° 27', the Chenab pursues a circuitous course but for the most part south west, and at the distance of about 600 miles from its source, unites with the Jhelum near Trimu ferry. The united stream proceeding in the same direction for about fifty miles, receives the water of the Ravee below the confluence it loses the name of Chenab, and is called the Trimu for a further distance of 110 miles to the junction of the Ghara. From that point the river flows about sixty miles as before mentioned, to its confluence with the Indus being called the Punjab a name derived from its conveying the accumulated water of the Beas, the Sutlej, the Ravee, the Chenab and the Jhelum. This last river rises in Cashmere, the whole valley of which it drains. Soon after its issue therefrom it receives a large tributary the Kishenganga, or river of Marafabad, and after a course of about 490 miles, generally in a south westerly direction, it unites with the Chenab near Trimu ferry. The Indus, the most westerly of the Punjab rivers, traverses the country in a direction from north to south for about 500 miles, from Derband to the confluence of the Punjab and. These noble streams, besides affording means of inland navigation, scarcely equalled are of inestimable value for the purposes of irrigation. Several of the old canals have been improved and enlarged. A new canal, intended to traverse the entire length of the Ravee Doab, is under construction. The

central line is to be 247 miles in length. It will commence from that point where the river Ravee debouches from the lowest of the Himalayan ranges, thence, entering through a high bank it will cross two mountain-torrents, till it gains the table-lands then it will traverse the heart of the Manjha, passing near the great cities of Deenanagpur Butiala, and Umritsar, thence striking into the depths of the wildest wastes of the lower Doab, and running past the ruined cities, tanks, temples, and canals, all of which it is to vivify and regenerate it will rejoin the Ravee fifty six miles above Mooltan. At the thirtieth mile of its course a branch diverges to fertilize the most arid lands of the Doab and reach the ancient city of Kuseoor. From this branch again a smaller channel is diverted to the eastward and carried on till it nearly meets the Sutlej opposite the battle-field of Hokersan. At the fifty fifth mile of the grand line another channel branches off to spread fertility down to the capital of Lahore. In addition to the main 247 miles the Kuseoor Sohran and Lahore branches, of eighty four sixty one and seventy-four miles respectively, will make up an aggregate of 468 miles.

The plain of the Punjab is divided by its rivers into five extensive natural sections, described by the native term *doab* signifying a great tongue of land lying in the bifurcation above the confluence of two rivers. First, the doab of Julinder between the Sutlej and the Beas second, the doab of Barce between the Beas and Ghara on the east, and the Ravee on the west third the doab of Rechna, between the Ravee on the east, and the Chenab on the west fourth, the doab of Jetch between the Chenab on the east, and the Jhelum on the west fifth, the doab of Sindh Sagur between the Jhelum, Trimu or Chenab, and Punjab on the east and the Indus on the west. Of these that of Mande Sagur is the most extensive, but that of Barce by far the most populous, as well as the most important, containing the three great cities Lahore, Amritsar and Mooltan. The regular and gradual slope of the great plain of the Punjab has been mentioned even the upper part is but of moderate elevation. Thus, Amritsar and Lahore are each 900 feet above the level of the sea, the town of Jhelum about 1600 and the surface slopes regularly to the south western extremity, where close to Multanoke, the elevation is about 250 feet. In consequence of the nearly unbroken flatness of the surface the great rivers frequently change their courses in an extraordinary degree.

Bands of sand traverse the country in a north and south direction, which point out the old beds of rivers, and prove that all of them have been changed. The Sutlej which formerly ran close to the town of Ludianah, is now seven miles to the northward the Ravee, which twenty years ago washed the walls of the city of Lahore, runs in a channel three miles off to the northward the Chenab,

which ten or twelve years ago ran close to the town of Ramnagar is now four miles distant, and the same applies to the Jhelum. So the Ghara, at no great distance of time, held, for above 200 miles, a course considerably westward of the present, and parallel to it.

The climate of the plain of the Punjab is in general characterized by dryness and warmth. Little rain falls, except in those parts extend along the southern base of the Himalaya, and where the south west monsoon is partially felt, diminishing in its effect in proportion as it proceeds westward. According to the statement of Elphinstone, the rain in the north of the Punjab exceeds that of Delhi but in the south of the Punjab, distant both from the sea and the hills, very little rain falls. Still the rains of the monsoon extend as far as Lahore, and fall heavily there in midsummer. In the more southern part of the plain the soil, where productive, is rendered so by irrigation. In addition to the facilities offered by the rivers and canals, the Persian wheel is employed to draw to the surface the water of numerous wells. The winters are cool, even to the feelings of a European. Elphinstone observes, in regard to his residence in Mooltan at the end of December "The weather was delightful during our stay the thermometer when at the lowest, was at 28 at sunrise there were slight frosts in the night." During the march of the English army through this country in 1838, thin ice was formed on the water at the end of December, whilst in the day the thermometer rose to 70. At the end of December, Elphinstone, marching through the doab between the Chenab and the Indus found a very cold wind but it does not appear that snow falls in this part of the Punjab. Burnes describes the weather in the beginning of February as cold and bleak frequently rainy and always cloudy. In January, 1839 the lowest state of the thermometer was found, on different nights of the month, to be respectively 34, 37, 38, 44. In the day the thermometer even in midwinter, is seldom below 70 and in January generally reaches 80° so that vegetation rapidly proceeds, and the wheat harvest is gathered by the end of April. Such, during winter, is the general temperature of the Punjab south of the Salt range. North of that, and even outside the limits of the mountains, the cold is greater an effect attributable to a slight increase of elevation rather than to change of latitude. The British in marching through that tract in December 1839 found the cold severe, the thermometer during the night sinking to 2° below the freezing-point. The heat in summer is excessive, in the plains of Mooltan it is so great as to be proverbial. At Lahore it was found, in the beginning of June, to raise the thermometer to 112° in a tent artificially cooled. A traveller, who experienced the heat of this season, describes it as "perfectly intolerable we are unable, he adds, 'to eat, drink, or sleep, and support existence by action alone.'" Bernier, who

had endured the heat of the most sultry part of Arabia, found that of the country between Lahore and Cashmere much more disagreeable, and each morning entertained a dread of being unable to survive till the evening. He describes his body as having become as it were a dry sponge, and he no sooner took a draught of water than it oozed from all parts of his skin, from which the cuticle had peeled, leaving the surface covered with pustules. Some of his companions died of heat even in the shade.

The indigenous vegetation of the plain of the Punjab closely resembles that of the drier tracts of Eastern Hindostan trees are scarce, and there occur extensive tracts containing only a few bushes, principally bahoofs of the mimosa species. Even the date-palm is, according to Burnes, an exotic, introduced by the Mahometan invaders. The wild palm a species which produces no fruit, is in many places abundant as are the peloo (*Salvadora persea*) various species of willows the peepul (*Ficus religiosa*) divers species of acacias and tamarisk the by-apple or jujube (*Zxyphus ju juba*), and caspary, called here kureel jurwaa, or camel thorn, the talae, a tree called asao in Eastern Hindostan and sometimes of twelve feet girth useful for boat-building the neem (*Melia azadirachta*), the mudar (*Tropae*), the toolee (*Ocymum sanctum*) kurnul or wild rue Fuel is scarce, in consequence of the general absence of trees and cow-dung is extensively used for the purpose. The towns and villages of the Punjab are, however generally surrounded by groves, but these are usually of forced fruit-trees artificially cultivated,—date orange, pomegranate mulberry apple, fig peach, apricot, plum quince almond, and a few others of less importance. The mango is cultivated, but does not attain high perfection except about Mooltan, and deteriorates in proportion to the advance northward. Since the occupation of the province by the British, endeavours have not been wanting on the part of the government to encourage the growth of timber Arrangements have been made for the preservation of the tracts of forest and brushwood which already exist for the planting of copses near the cantonments of groves round public buildings, and at intervals along the main roads, and of avenues on the banks of canals.

The zoology of the Punjab is more rich and varied than its botany. No accounts afford authority for concluding that elephants exist there in a state of nature for though Arrian mentions the hunting of elephants on the banks of the Indus, the animals in question clearly appear to have been some tamed loose by the natives in their hasty flight. Tigers lurk in the jungle and forests, and sometimes attain the enormous length of ten feet. Lions are not uncommon. The other beasts of prey are panthers, leopards, hyenas, lynxes, wolves, bears, jackals, foxes, otters, martens, stoats, and divers other small зверь there are also yakgas, wild hogs, porcupines, various animals

# PUN

of the deer, goat, and antelope species, mon keys and bats, including the large and hideous vampire, deemed sacred by the natives. Among the feathered tribes there are parrot, parrot, jungle-fowl (the wild stock of our common domestic fowl), pheasants, various kinds of partridges, quails, water-fowl in great number and variety herons, cranes, pelicans, eagles, vultures, hawks, magpies, hoopoes, and doves of various kinds. The bulbul, or night-ingale of Cashmere, is inferior in note to that of Europe, but very beautiful. A small species of alligator swarms in the rivers, especially the Jhelum. The porpoise ascends the Indus to a great distance. Among serpents the more remarkable are the cobra de capello and a small snake, the bite of which is almost immediately fatal. The rivers abound with fish, the pulka, a delicious species of carp swarming in the Indus forms an important article of subsistence. Of insects, the silkworm thrives remarkably and produces an article of admirable quality bees also produce wax and honey in great abundance and of the finest kind and thus department of husbandry receives great attention. The more important domestic animals are the camel (especially in the south) and the buffalo of which great herds are kept in the neighbourhood of rivers these animals being almost of an amphibious nature. Horses are bred extensively especially in the plain country in the north-east, and receive great attention, the Sikhs being an equestrian people. Much additional light on the ornithology and botany of the Punjab is about to be afforded by an elaborate report on those subjects by Dr Jameson.

The more important crops in the low level, and fertile tracts are indigo, cotton, sugar tobacco, opium, wheat which is abundant and in quality excellent buck wheat, rice barley millet, jowarree (*Holcus sorghum*) bajra (*Holcus spicatus*) moong (*Phaseolus mungo*) maize, various sorts of vetches, oil-seeds, such as sunflower and mustard peas and beans, carrots, turnips, onions, melons, cucumbers, and sundry kinds of escurbitaceous plants. So plentiful is wheat, that it sells at Mooltan at from half a rupee to a rupee per maund. Bang, or hemp, is produced for the purpose of inducing intoxication, saffron, safflower for dyes, and a great number of less important products. Milk butter and wool are very important objects of rural economy the former being almost the only produce of the numerous herds of kine, as the slaughtering of these animals for food is not allowed by the Sikhs.

The manufacturing industry of the Punjab is considerable. It is exercised principally in the silk and cotton productions of Amritsar Lahore, Mooltan, Shoujahbad, Lala, and some other places in the south, and in the fabrication of arms in Lahore. Much of the commerce of the Punjab consists in the transit of the goods of Hindostan to the countries west of the Indus. The chief marts are Amritsar, Lala, and Mooltan, Lahore being in this respect of

inferior importance. The imports from British India are principally sugar, spices, and other groceries dye-stuffs, cotton, woollen, and silk cloths metals, and utensils of various kinds of metal ivory precious stones, glass, porcelain, and cutlery. From the west, the imports are gold, turquoises, silver silk, madder cochineal, safflower, safflower fruits (fresh and dried), wool, horses, and a few of the more portable manufactures of Russia. The exports, whether in the way of transit or the produce of the country, are grain ghee or clarified butter, hides, wool, silk and cotton fabrics, carpets, shawls, milk, cotton, indigo tobacco, salt, and horses.

The population consists of various races, being composed of Jats, Gujars, Rajpoots, and Patans. A small portion of the country is included between the Kusbunganga and the Indus, north of the Salt range, it held by the Eusufzye Afghans. Of the races above mentioned, the most prominent are the Jats, who are represented as having formed the core and nucleus of the Sikh commonwealth and armies. They occupy the centre portion of the Barce Doab and the vicinity of Amritsar but they have also extensive colonies in various parts of the Punjab. In the south west angle of the province about Mooltan, they are held in in different reputs, their importance there being merely agricultural. The Gujars, supposed to be the aborigines of Humara, are described as an industrious class, devoting much attention to agriculture, and differing in this respect from the Rajpoots. The principal localities of the Patans are Mooltan and Kusaor in the Barce Doab. From the Beas to the Chenab the Hindoo race predominates but, in all parts of this region, the Mahomedans are numerous interspersed, and in the south they actually form the majority but of the Mahomedans a large portion are of Hindoo origin. From the Chenab to the Indus, the population chiefly consists of Hindoo converts to Mahomedanism. Beyond the Indus the pure Mahomedan race prevails. Of the whole population, two-thirds are Mussulmans (both spurious and genuine), the remaining one third are chiefly Hindoos and of these half are Sikhs.

For administrative purposes, the province has been distributed into a limited number of territorial divisions, each division comprising several districts. The names of the principal divisions, with their respective areas and amount of population, are stated below

Divisions.	Area in Sq. Miles.	Population.
Lahore	11 628	3 453 694
Jhelum	16 761	1,762,488
Mooltan	15 494	971 175
Lala	15 271	1,122,631
Feshawar	7 593	847 695
Jallunder	6 792	2,278,087
Hoehyapoor		
Kangra		
	73,524	10 425,719

The Sikhs are for the most part concentrated about the capitals Amritsar and Lahore. The belief of this sect was originally, according to Malcolm, a pure deism, but has so far degenerated that they now consider their founder entitled to divine honours, and regard him as a saviour and mediator with God. Their faith admits the doctrine of the transmigration of souls, either as a punishment, or a remedial process for moral deficiency, and of a future state of bliss for the good. To kill kine is considered by them a horrible impiety. Tobacco is prohibited, but fermented liquors are allowed, and no kind of food is forbidden except beef. Malcolm lays down the following as the great points by which they are separated from the strict Hindoos: the renunciation of the distinctions of castes, the admission of proselytes, and the rendering the pursuit of arms not only allowable, but the religious duty of all. The sect, though it has but recently become powerful, was founded by Nanak, who was born in 1469, at Raypur sixty miles west of Lahore, and received the name of Guru, or "spiritual pastor," from his votaries who themselves assumed the appellation of Sikhs, or "disciples." His followers were at first peaceable and humble, and remained so until the murder by the Mahometans of their fourth Guru in succession from Nanak, on which event his successor Har Govind, in revenge drew the sword which has never since been sheathed. Guru Govind the fifth in succession from Har Govind, and the tenth from Nanak, is regarded as the founder of the temporal power of the Sikhs. His votaries were instructed by him always to bear arms, or at least steel in some form or other about them, and to assume the name of Singh or lion previously affected only by the Rajpoots. By this name they are distinguished from the other Sikhs, or followers of Baba Nanak. They ceased to have any spiritual leader after the death of Govind, who was killed in 1708 and from that period, until the power of Runjeet Singh became paramount, they constituted a turbulent and irregular republic, holding, in cases of great emergency, a Guru mata, or general diet, as Amritsar but at other times engaged incessantly in petty warfare with each other. Runjeet viewed the congregated meetings at Amritsar with great jealousy and built at that place the great fortress of Govindpur ostensibly to protect, but actually to overawe and control, the excited followers of Govind who resorted there. Those Sikhs who adhere to the original doctrines of Nanak are called Khandaes; they are less fanatical and warlike than the Singhs, or followers of Guru Govind. Of these latter a peculiar class is called Akaalis, or immortals, and sometimes Nihangs. Their fastidiousness, Burnes observes, borders on insanity, and they seem to be at war with all mankind. They go about heavily armed, frequently bearing a drawn sword in each hand, two other swords in their belts, a match lock on their back, and on their turbans iron

quarts six or eight inches in diameter, with their outer edges sharpened, and these, it is asserted, they throw with such force, as well as precision of aim, as to lop off the leg of a horse or even of an elephant. Osborne, however, who has frequently seen them try their skill, found them to be very bungling, and the missiles in their hands to be very inefficient. They are a lawless and sanguinary class, and would have rendered the country desolate, had they not been vigorously coerced by Runjeet Singh.

The sacred books of the Sikhs are called *Granth* (scripture). The principal of them are the *Adi-Granth*, composed by Nanak, their first Guru, and the *Das Padshah ka Granth*, composed by Guru Govind, their last spiritual guide. They charge in battle to the war-cry *Was! Gargi ka Path*, "O Victory to our master the Guru!"

The Sikhs as soldiers appear in a respectable light. Their repeated and signal successes against the formidable Afghans are conclusive evidence of their valour; they are patient of fatigue and privation, and, in cases of reverse, readily rally. Malcolm gives rather a favourable view of their character. The Sikh soldier," he says, "is, generally speaking, brave, active and cheerful, without polish, but neither destitute of decency nor attachment. But for the occurrence of some recent events the present race of Sikhs might have claimed exemption from the charge of cruelty. Their celebrated maharaja, Runjeet Singh, rarely shed the blood either of animals or of his personal enemies, and he appears to have aspired to the praise of clemency."

In person the Sikhs bear a general resemblance to other people of Hindoo origin but they are more robust; the result of a more varied and liberal diet; they especially excel others of the Hindoo race in having the lower extremities full muscular and symmetrical. Their women are esteemed beautiful.

The general dress of the male portion of the Sikh population consists of a jacket and trousers reaching to the knee of late the chiefs have lengthened the trousers to the ankles. They also wear shawls and scarfs, and wrap their heads in thin narrow cloths, so as to form a rude turban. The Sikhs are in general remarkably illiterate. Runjeet Singh was unable to read or write, and most of his courtiers were alike destitute of these elementary attainments. This may, perhaps be accounted for from the fact of most of the sect, including Runjeet himself, tracing their origin to the Jats, a Rajpoot tribe of very low order.

The language of the Punjab is called by Malcolm a jargon, compounded of various tongues. As spoken in large towns, it is a dialect of the Urdu or Hindustani; in the villages, the dialect in use is Jashky sprung from a cognate root, and originally the language of the country on the southern frontier. Punjab contains a large admixture of Sindhi. There are two characters used,—

*Lords*, that of common translation, and *Gurmukhi*, or the character of the Granth. Measures have been taken by the government for the promotion of popular education. The indigenous schools are of three descriptions, resorted to by Hindus, Mussulmans, and Sikhs respectively. A government educational institution, partaking of a collegiate character has been founded at Amritsar. It is remarkable that female education is to be met with in all parts of the Punjab. The girls and the teachers (also females) belong to all of the three races above enumerated.

In facilities of communication, this province enjoys great advantages. Besides those afforded by its noble rivers, it possesses others in a number of roads constructed since its occupation by the British. Of these the principal is the main road from south-east to north-west, from Lahore to Peshawur passing the towns of Wuzerabad, Jhelum, Rawul Pindie and Attock. From Lahore this road is continued in a south-easterly direction across the Jullunder Doab to Ludiana, where it communicates with the grand trunk road from Calcutta. 2 From north to south from Lahore to Ferozpoore. 3 From north-east to south-west, from Lahore to Multan. 4 From east to west from Lahore to Dera Ismael Khan. 5, from north-west to south-east from Dera Ismael Khan passing the town of Jhung in the Rechna Doab, and traversing the Barot Doab to Ulohur where it joins the road from Delhi, 6 from south to north from Amritsar to Sealkote. There are, besides, several routes connecting the great northern cities with the chief southern outlet at Multan.

The Sikh realm has many considerable towns of these, the most worthy of notice are—Lahore, Amritsar, Pind Dadun Khan, Multan, Peshawur, Dera Ghazee Khan, Dera Ismael Khan, Jullunder, Vascerabad, Leis Nurpur, Le Jelum, Jelaipoor, Shoorabad and several others, especially noticed under their names in the alphabetical arrangement.

The Punjab was, in remote antiquity the scene of some of Alexander's most arduous exploits. At the beginning of the eleventh century of the Christian era, it was ravaged, widely and sweepingly by Mahmood of Ghaznee the Destroyer. Lahore for about a century remained in possession of the successors of Mahmood, and was frequently the seat of their government, until 1186 when the Ghaznevide dynasty was uprooted by Mahmood, Sultan of Ghore. Subsequently to this event, the Punjab became the prey of a succession of weak, licentious, and turbulent rulers, among whom the Afghans generally predominated until, in 1526 Baber gained the victory of Paniput, and, ascending the throne, established the sovereignty of the Timurian family. In 1748 Ahmed Shah Durrani finding the power of the Moguls broken by the invasion of Nadir Shah overran the Punjab with an Afghan army and made himself master of Lahore, and in 1756

the Mogul emperor of India, ceded to him these conquests. Soon after this, the power of the Sikhs began to assume a formidable aspect, and in 1765 they overran the country east of the Jhelum, and, crossing that river took the celebrated fortress Rotes. In 1787, Shah Zeman Durani invaded the Punjab and took Lahore, but being immediately recalled by an insurrection at home, left the country in greater confusion than he found it. The expulsion of Shah Shooja in 1800 and consequent subversion of the Afghan monarchy, facilitated the rise of Runjeet Singh a Sikh of the caste of Jats, one of the humblest but most numerous among the Rajpoots. In 1799, this adventurer had obtained from Zeman Shah Durani a grant of Lahore, and in the same year succeeded in expelling three rival Sikh chieftains who had maintained themselves there. In 1809 having extended his power over the greater part of the Punjab and some of the petty hill states, he carried his arms across the Sutlej and attacked the Sikh chieftains under British protection. Negotiations ensued and were brought to an amicable conclusion by a treaty providing 'that the British government will have no concern with the territories and subjects of the raja to the northward of the river Sutlej' and that Runjeet Singh would not commit or suffer any encroachment on the possessions or rights of the chiefs on the left bank of that river. In 1818, Runjeet Singh stormed Multan, and extended his power over the whole southern part of the Punjab and in the same year marched a force across the Indus and made himself master of Peshawur. In 1819 the Maharaja of the Sikhs, as Runjeet styled himself conquered the Derajat, on the west side of the Indus, and Cashmere. In 1831 at Rupper on the Sutlej an interview took place amidst great pomp and display between Runjeet Singh and Lord Auckland, the Governor General of British India, and a paper was placed in the hands of the Sikh ruler promising him the perpetual anarchy of the British government. In 1835 (Gholab Singh a vassal of the Maharaja, reduced to subjection the extensive hill state of Ladakh, or Middle Tibet and five or six years later the same chieftain subdued Baluch, or Little Tibet. In 1838 Runjeet Singh became a party in the tripartite treaty with the British government and Shah Shooja, and succeeded in obtaining a stipulation securing to him the right to all the territories which he then possessed on both sides of the Indus. Runjeet Singh died in July 1839 and was succeeded by his son Kurruck Singh. The latter died in 1840 and as was generally believed, from the effects of poison. Before the funeral ceremonies for this prince were fully ended, his son and successor was killed by the falling of a beam—a catastrophe not accidental, though intended to have the appearance of being so. A competition for the vacant throne then ensued between the widow of

Kuruk Singh and a reputed son of Ranjeet Singh, named Sher Singh, but who, though born in wedlock, had been subjected by his alleged father to the stigma of illegitimacy. Sher Singh finally succeeded, but his triumph was of short duration near the close of the year 1848 he was assassinated, and this was followed by a widely spread, frantic, and sanguinary anarchy, which, after raging with a fury that overtopped the Punjab with desolation and misery, eventuated in an aggressive movement upon the British dominions. The British government, ever reluctant to interfere in the internal dissensions of neighbouring states, had of course no choice but to resort to arms when its own territories were invaded. The appeal was crowned with success to the righteous cause, although the conflicts of Moodkee, Ferozshah, Aliwal, and Sobraon attest the obstinacy of those who, having thrown their own country into confusion, proceeded to extend that confusion, if possible, to the territories of a neighbour anxious only to preserve the relations of peace, but whose power was as great as his disposition was pacific. The insolent foe was driven back and it was in the Sikh capital Lahore, then occupied by the British, that the treaty which was designed to regulate the future position of each government towards the other was concluded. But it was not destined long to command even a nominal acquiescence. Treachery and perfidy almost unparalleled in the annals of even oriental affairs, provoked a further manifestation of British power and the Governor-General came to the conclusion that, to use his own language, "no other course is open to us than to prosecute a general Punjab war with vigour and ultimately to occupy the country with our own troops." It would occupy far greater space than can here be spared to detail the events which followed. The battle of Chillian wallah which at the time excited much discussion, and the victory of Gujarat, were among the most noticeable. The result was not less triumphant, and was far more decisive than that of the former war.

On the 29th of March 1849 Lahore was again the scene of a most imposing spectacle, the actors in which were assembled for the same object as on a previous occasion—the settlement of the affairs of the Punjab. In the contest between good faith and treachery victory had decided for the former. The British, now masters of the Punjab held the determination of its fate and that determination was the most happy for the people of the conquered territory that could have taken place. On the day and at the place above named, it was solemnly proclaimed that the family of Ranjeet Singh had ceased to reign, and that the country of the Five Rivers was incorporated with the British empire. The effects which have followed the incorporation, so different from the usual results of conquest, may be seen in the remarks addressed by the

Court of Directors of the East India Company to the government of India, on receiving a report of the first two or three years only of British administration.

'In the short period which has elapsed since the Punjab became a part of the British dominions, results have been achieved such as could scarcely have been hoped for as the reward of many years of well-directed exertions. The formidable army which it had required so many battles to subdue, has been quietly disbanded, and the turbulent soldiery have settled to industrious pursuits. Peace and security reign throughout the country and the amount of crime is as small as in our best-administered territories. Justice has been made accessible without costly formalities, to the whole population. Industry and commerce have been set free. A great mass of oppressive and burthensome taxation has been abolished. Money rents have been substituted for payments in kind, and a settlement of the land revenue has been completed in nearly the whole country, at a considerable reduction on the former amount. In the settlement, the best lights of recent experience have been turned to the strict account, and the various errors committed in a more imperfect state of our knowledge of India have been carefully avoided. Cultivation has already largely increased. Notwithstanding the great sacrifices of revenue there was a surplus, after defraying the civil and the local military expenses, of fifty-two lacs in the first, and sixty-four and a half lacs in the second year, after annexation. During the next ten years, the construction of the Barce Doab Canal, and its branches, and of the great network of roads already in rapid progress, will absorb the greater part of the surplus but even during this interval according to the Board's estimate, a balance will be left of more than double the amount of the cost of two corps, at which the Governor-General computes the augmentation of the general military expenses of India due to the acquisition of the Punjab. After the important works in question are completed the Board of Administration, apparently on sound data, calculates on a permanent surplus of fifty lacs per annum applicable to general purposes.

Results like these reflect the highest honour on the administration of your Lordship in Council, and on the system of Indian government generally. It is a source of just pride to us that our services, civil and military should have afforded men capable, in so short a time, of carrying into full effect such a series of enlightened and beneficent measures. The executive functionaries in the subordinate ranks have proved themselves worthy of the honourable career which awaits them. The members of the Board of Administration, Sir Henry Lawrence, Mr John Lawrence, Mr Mansell, and Mr Montgomery have entitled themselves to be placed in the foremost rank of Indian administrators.'

## PUN

**PUNJNOD** a great stream of the Punjab, discharges into the Indus the collected water of the Ghara and Trimab and consequently of the Sutlej, Beas, Ravee, Chenab, and Jhelum. The great channel bearing the name of Panj nund commences at the confluence of the Ghara and Trimab in lat. 29° 21' long 71° S, and, taking a south westerly course of about sixty miles, joins the Indus nearly opposite Mittun kote, and in lat. 28° 57', long 70° 30'.

**PUNKERMATH**, in the British district of Gurhwal, hant-gov of the N W Provinces, a town on the route from Siroenaggar to Thibet, 4½ miles E.N.E. of the former. Lat. 30° 27', long 79° 30'.

**PUNNAGHUR** in the British district of Sagar and Nerbudda, a town on the route from Allahabad to Jabulpoor 261 miles S.W. of former and 10° N.E. of latter. To the south-east of the town is a very fine tank. Elevation above the sea 1 477 feet. Lat. 23° 16' long 80° S.

**PUNNAH**, in Bundelcund, a town, the principal place of the territory of the same name, lies on the route from Banda to Jabulpoor, 62 miles S. of the former 169 N. of the latter. It is situated on the north-eastern slope of a barren range, or rather plateau, rising about 800 feet above the Bundachal plateau, stretching towards the north-east, and from this town styled by Franklin the Punnah Hills. The site, which is picturesque is close to an extensive jhil or tank, formed by embanking the extremity of a deep valley. A palace formerly the occasional residence of Chutur Saul noted as the founder of the short-lived independence of Bundelcund is situated on the bank of the jhil and around are many mansions of elaborate and tasteful architecture. In the jhil are alligators, considered by the Hindoos sacred. Though now quite in ruins, Punnah was once a fine well-built town the houses being generally constructed of squared sandstone, and covered with tiles. A pathway of large flags extends down the middle of the streets, which have an air of solidity cleanliness, and convenience. Whole streets, however are now desolate, being tenanted only by large troops of monkeys, which posted on the roofs or at the windows, view passengers without alarm. The palace of the rajah is a spacious beautiful building surmounted by high, elegant kiosks, and having its exterior crowded with numerous ornamental carvings but it is in many places ruinous. The town is crowded with Hindoo temples, in a mixed style of architecture, partaking of the Sarcenic, and partly derived probably from the Mussulmans. There does not appear to be any mosque in the town, it being almost exclusively inhabited by Hindoos. There are here, however some followers of Pran Nath a Khetrya, who, being versed in Mahomedan learning, as well as in his own, attempted to reconcile the two religions. There is a building consecrated to the use of this sect, in one

apartment of which, on a table covered with gold cloth, lies the volume of the founder.

The former prosperity of this place resulted from the diamond mines in the vicinity. The diamonds are found in several localities, of which one is situated a short distance to the north-east of the town, and hence the mines there are called the Punnah mines. The ground at the surface, and a few feet below consists of ferruginous gravel, mixed with reddish clay and this loose mass, when carefully washed and searched, affords diamonds, but few in number and of small size. The matrix containing in greater quantity the more valuable diamonds, lies considerably lower, at a depth varying generally from twelve to thirty feet and is a conglomerate of pebbles of quartz, jasper, hornstone, Lydian stone and some others. The fragments of this conglomerate quarried and brought to the surface are carefully pounded, and after several washings, to remove the softer and more clayey parts, the residue is repeatedly searched for the gem. As is common in such seductive pursuits, the return often falls below the outlay and the adventurers are ruined. The business is now much less prosperous than formerly but Jacquemont does not consider that there are any symptoms of exhaustion in the adamantiferous deposits, and attributes the unfavourable change to the diminished value of the gem everywhere. The rejected rubbish if examined after a lapse of some years has been frequently found to contain valuable diamonds, which some suppose have in the interval been produced in the conglomerate matrix but experienced and skilful miners are generally of opinion that diamonds which escaped a former search in consequence of incrustation by some opaque coat, have been rendered obvious to the sight from its removal by fracture, friction, or some other accidental cause. More extensive and important is the adamantiferous tract extending from twelve to twenty miles north-east of the town of Punnah and worked in the localities of Kanariya, Bagpur, Bargari Myra, and Etwa. Diamonds of the first water or completely colourless are however very rare, most of those found being either pearly greenish yellowish rose-coloured black, or brown. Franklin conjectures the ferruginous conglomerate to have been of igneous origin but Brewster's authority is against this opinion. While admitting the possibility of the diamond having been in a state of igneous fusion that writer considers it highly improbable that it ever was so. The conglomerate matrix of the diamond rests on sandstone, which Franklin, from observations on the hill-side and in the deep ravines in the neighbourhood, conjectures to be at least 400 feet thick, and remarks, "that there are strong indications of coal underlying the whole mass." During the prosperity of the mines, a tax of twenty-five per cent, was levied on their produce but the tax now imposed is stated to exceed this rate. The

revenue is divided in proportions between the rajahs of Punnah, Banda, and Churaoora. Franklin, calculating the share of the Punnah state at 36,000 rupees, and the aggregate of the other shares at a fourth of that sum, estimates the value of the diamonds found in three mines at 120,000 rupees per annum. Poggson, who worked one of the mines on his own account, considers "that inexhaustible strata producing diamonds exist here," and Jacquemont imagines that if the mines were properly worked, their productiveness would be found not to have diminished. None of the great diamonds now known appear to be traceable to the mines in the vicinity of Punnah, and Tienfenthaler mentions it as a general opinion that those of Golconda are far superior.

The territory of which Punnah is the principal place is bounded on the north by the British district of Banda, and by one of the outlying divisions of the native state of Churaoora on the east by the Sangor and Nerbudda estates of Sohawal, Oocheyra, and Myhoer on the south by the British territory of Sangor and Nerbudda and on the west by several of the petty states of Bundelound. It lies between lat. 23° 52'—25° 3' long 79° 50'—80° 45' and "in 1833 was stated to comprise 688 square miles, to contain 1,062 villages, with a population of 87,000 souls and to yield a revenue of eight lacs (80,000)" but the income was supposed in 1848 to be only one-half of the above amount. The state pays a tribute of 10,000 rupees (1,000) and maintains a force of 250 cavalry and 3,000 infantry.

Early in the eighteenth century, Chutter Baul threw off subjection to the sovereign of Delhi and assumed the title of rajah of Punnah, but being hard pressed by the Musulman chief of Burreckabad, had recourse to the assistance of the Peshwa, by whose aid he was, in 1738 rescued from his perilous position. After his death the succession became disputed, and the country fell into a distracted state, until the Peshwa ceded a portion of his rights in the province of Bundelound to the East-India Company by the treaty of Bassein in 1802, the cession being confirmed and extended by the subsequent treaty in 1817. In 1807, the British authorities granted the raj or territory of Punnah to Kishor Singh, a descendant and representative of the house of Chutter Baul.

The rajah of Punnah was one of the few Bundelound chiefs who had not consented to abolish suttee, and upon the occurrence of his death, in 1849 the sacrifice took place. Instructions were thereupon given to the British agent to defer the recognition of the late chief's brother as his successor, in order to make use of the opportunity for inducing him to enter into an engagement for its future prevention.

The elevation of the town of Punnah is 1,800 feet above the sea, distant 120 miles S. of Calpee, by Banda, 173 S.W. of Allah-

abad 688 N.W. of Calcutta, by Allahabad. Lat. 24° 44', long 80° 15'.

**PUNNAIR.**—See PUNJAR.

**PUNNECOIL**, in the British district of Tinnevely presidency of Madras, a small town, with roadside, on the north west coast of the Gulf of Manar. The approach from the south is dangerous, in consequence of an extensive reef stretching in that direction, but a ship having safely made its way past that danger may anchor securely in seven or eight fathoms, with bottom soft mud, and two miles from the beach. Vegetables are scarce but water, swine, sheep, and fish abundant. Lat. 8° 39' long. 78° 11'.

**PUNNEBALA**, in the Deman division of the Punjab, a town situated on the right bank of the Indus 122 miles S.S.W. of the town of Peshawar. Lat. 32° 15', long 70° 57'.

**PUNNOH**, in the territory of Bhurtpore, a small town on the route from Agra to Ajmer 48 miles W. of former 185 E. of latter. Supplies may be had, and water is obtainable from wells. Lat. 27° 4', long 77° 24'.

**PUNTA DEYRA.**—A town in the British district of Shikarpoor, province of Souda presidency of Bombay 27 miles S.W. by W. of Shikarpoor. Lat. 27° 49', long 68° 18'.

**PUNTI** in the British district of Bareilly division of Pilibhoet, head. gov. of the N.W. Provinces, a village on the route from Bareilly to Pataoguri, and 70 miles N.E. of the former. Lat. 28° 2' long 80° 8'.

**PUNWAR.**—A town in the Rajpoot state of Jeypoor 81 miles S. by W. from Jeypoor, and 72 miles S.E. from Ajmer. Lat. 25° 46', long 75° 36'.

**PUNWAREE** in the British district of Humeerpoor the principal place of the pergunnah of the same name, a town on the route from Goena to Calpee, 126 miles S.W. of the latter. It has water from a lake. Lat. 25° 28', long 79° 32'.

**PURAI**, in the territory of Oude, a town on the route from Asingurh to Faizabad, 76 miles N.W. of the former, 10 S.E. of the latter two S.W. of the right bank of the Ghaghra. Lat. 26° 48', long 82° 10'.

**PURANEETPOOR**, in the British district of Allahabad head. gov. of the N.W. Provinces, a village on the right bank of the Ganges, 779 miles N.W. of Calcutta by the river route, 20 miles S.E. of Allahabad by the same. Lat. 25° 18' long 82° 14'.

**PURBANKE.**—A town in Hyderabad, or territory of the Nizam, situate on the right bank of the Doodna river and 174 miles N.W. from Hyderabad. Lat. 19° 17', long 76° 50'.

**PURGAI**, in the British district of Cawnpore, head. gov. of the N.W. Provinces, a village on the route from the cantonment of Cawnpore to that of Futtehgurh, and 10 miles N.W. of the former. Lat. 26° 33', long 80° 17'.

**PURGY**—A town in Hyderabad, or territory of the Nizam, 41 miles W.S.W. from Hyderabad, and 133 miles E. by S. from Sholapur. Lat. 17° 10' long 77° 59'.

**PURKUNDEE**, in the British district of Gurhal, lieut.-gov. of the N.W. Provinces, a town on the route from Shimoga to the native state of Tibet, 28 miles N.E. of the former. Lat. 30° 30', long 79° 10'.

**PURKYAL**, or **TUZHEGUNG** in Bussahir, a peak of the ridge in the district of Koonawar, separating the Sati from the Satley and rising six or seven miles north-east of the confluence of those rivers. A point on a peak two miles west of the highest summit was reached by Gerard, who on this height, 19,411 feet above the level of the sea, found the thermometer, on the 18th of October, only 10° below the freezing point, and the ground free from snow. The elevation of the highest peak was ascertained to be 22,438 feet above the sea. Vegetation was observed to reach the height of 17,000 feet, and it is intimated that its further progress was checked by want of soil. At the highest point reached, the peak was found to be formed of enormous disintegrated blocks of granite, between which were large lumps of ice clear as crystal. Lat. 31° 54' long 77° 46'.

**PURIAHKEMEDY**—A tract inhabited by one of the independent hill tribes of Orissa, bordering on the western frontier of the British district of Ganjam. Its centre is in lat. 19° 20', long 84° 10'.

**PURLAH KEMEDY**—A town in the British district of Ganjam, presidency of Madras, 78 miles S.W. by W. of Ganjam. Lat. 18° 47' long 84° 10'.

**PURLEY**—A town in Hyderabad, or territory of the Nizam, 165 miles N.W. by W. from Hyderabad, and 123 miles E. by S. from Ahmednagar. Lat. 18° 51' long 76° 38'.

**PURMUTTY**—A town in the British district of Salem, presidency of Madras, 87 miles S. by W. of Salem. Lat. 11° 9' long 78° 6'.

**PURNABADA RIVER**—A large offset of the Atree, from which it separates in lat. 25° 50' long 86° 41', in the British district of Dussapore. After a course of sixty miles, it passes into the district of Malda, which it traverses for twenty-five miles, and then falls into the Mahananda, in lat. 24° 47', long 88° 20'.

**PURNEAH**—A British district under the lieut.-gov. of Bengal, named from its principal place. It is bounded on the north by the kingdom of Nepal and by Sikkim on the east by the British district of Dussapore, on the south by Malda and Bhagulpore, and on the west by Bhagulpore. It lies between lat. 25° 9'–26° 37' long 86° 48'–88° 23'. It is 117 miles in length from north-east to south-west, and 105 in breadth; the area is 5,378 square miles. Though remote from the sea, it is a level and rather depressed tract, tra-

versed by numerous streams, generally descending from the Himalaya Mountains, lying to the north. There are no mountains or hills within Purneah, the chief eminence throughout this extensive tract being a conical peak, about 100 feet high at Munneer. The principal rivers which skirt or intersect the district are the Ganges, the Kooee, the Gogarae, and the Mahananda. Besides these rivers, there are numerous smaller streams, connected with the larger and with each other and in general admitting craft of considerable burthen, so that few tracts have equal advantages of irrigation and water-carriage. The lowest part of the surface is that contiguous to the bank of the Ganges, at the south-east corner of the district, and it may be estimated to have an elevation of 123 feet above Calcutta. Titalya, on the north-east frontier and probably the highest point in the district, has an elevation estimated at 275 feet above the sea. There are no lakes of any magnitude in Purneah but many hills or extensive shallow ponds, which according to all appearance, were formerly the deeper parts of the channels of rivers which have changed their courses.

In the latter part of spring, and the commencement of summer, the westerly winds in the south of the district bring very hot, dry weather. During the periodical rains, from the early part of summer to the middle of autumn, westerly winds prevail. In spring violent squalls are common which setting in sometimes from the north at others from the north-west and north-east are accompanied by uncommon quantities of hail. In one storm by far the greater part of the stores were as large as walnuts, and vast numbers were like small apples while several were like ordinary-sized oranges. The cold of winter is in every part of the district sufficient to produce hoar frosts, and, at times, seriously to damage the more tender crops. Earthquakes are not unfrequent, several shocks usually occurring every year but so slight as to cause no material injury.

The staple produce of the district is rice, which is cultivated with considerable care. The summer rice (bhalal) is a very important crop, and is usually followed in the cool season by crops of wheat, barley, pulse or oil-seeds or sometimes intermixed with other articles. The varieties of winter rice are very numerous. Besides maize or Indian corn various kinds of millet are raised. The principal esculent vegetables are baygon or egg plant, spinach, various kinds of amaranthus and of cucurbitaceous plants, sweet potatoes, common potatoes, peas, cabbage, and yams. The condiments, ginger, napoum, turmeric. The cultivation of the sugarcane was found by Buchanan to be very limited and unskilful, and that of cotton subject to the same remarks. Tobacco, a great favourite with the population is extensively cultivated, as is hemp, for supplying the powerful stimulant called bang. Betel is also one of the productions of the district. The opium-

poppy was believed by Buchanan to be secretly raised to some extent. Indigo is the principal commercial crop. Safflower is represented as an object of some importance towards the eastern part. The mulberry tree was, in the time of Buchanan confined to three small divisions of the south-east corner of the district, but there the number was very great. It was, however found to be a precarious branch of industry, as in some years the crop of leaves totally failed and in others, the worms, without any ascertained cause perished, without producing silk. The cultivation appears to have been in many instances slovenly.

Cotton is imported from Mirzapore and other places lying to the west sugar is imported from the British districts Dinajpur Tirhoot, and Patna. The only external commerce from the district is to Nepal. The chief exports are cattle, coarse cotton fabrics, silk, indigo and grain. Banking is carried on to some extent, especially at the town of Purneah where there are some considerable capitalists but so scanty is the circulating medium, that, according to Buchanan, a rupee in this country is a large sum, for being a ploughman's money wages for two months it may be considered of as much importance in the circulation of the country as three or four pounds sterling may be considered in England. The amount of the population is given under the article BHOGAL.

Purneah the capital, and the other towns of importance within the district are described under their respective names in the alphabetical arrangement. The principal routes are—1 From south west to north east, from Bhaugulpore, through the town of Purneah to Titalee, and thence to Darjeeling. 2 from south east to north-west, from Maldah, through the town of Purneah to Nathpur, 3 from east to west, from Dinajpur to the town of Purneah and thence to Moufferpore in Tirhoot, 4 from south to north, from Rajmahal to Purneah and Nathpore.

The fabulous history of this tract represents that at a remote period of antiquity it formed part of the primeval realm of Mithila, and was governed by a rajah, whose daughter was Sita, the renowned spouse of Rama and whose abduction by Ravana, the demon-tyrant of Ceylon, gave rise to the war which is the subject of the Ramayana. The district appears to have been subjugated by the Mussulmans about the year 1541, and was acquired by the East-India Company in 1765, under the firm of Shah Alum, of Delhi.

**PURNEAH.**—The principal place of the British district of the same name, under the Bent. gov of Bengal. It is situated on the banks of the Little Kool, occupying both sides of the river and lying on the route from Bhaugulpore to Titalee, 78 miles N E. of the former, and 72 S.W. of latter. It includes a space of about three miles square, but much of it is occupied by plantations, gardens, and open places. The best part of the town is on the left side of the

river and consists of one wide and tolerably straight street, half a mile long the houses in which are pretty well built and tiled. Two inferior streets, parallel to the principal one, run on each side of it. It is surrounded by straggling suburbs, in one of which, called Maharaigang, are situated the buildings for the accommodation of the civil establishment of the district, which consists of a civil and sessions judge, a sudder ameen a mooniff a collector a magistrate, an assistant to collector, two deputy magistrates an assistant-surgeon, and an uncommissioned deputy collector. The above are Europeans and there are besides, a principal sudder ameen and several mooniffs, who are natives. With respect to the population Buchanan observes, 'This town which occupies a space equal to more than half of London most assuredly does not contain 50 000 people, though it is one of the best country towns in Bengal. Purneah is distant N W from Calcutta by Berhampoor 233 miles, S E from Katmandoo by Nathpore 200 miles S.W. from Darjeeling 98 Lat 25 46, long 87 30

**PUROKH** in the British district of Mynpoore, Bent. gov of the N W Provinces, a village on the route from the cantonment of Allypore to that of Mynpoore, and eight miles N W of the latter Lat 27 17, long 78 1

**PUROWLEE**, in the British district of Furruckabad, Bent. gov of the N W Provinces, a village on the route from the cantonment of Allypore to that of Putehpore and 44 miles N E. of the latter Lat 27 31, long 78 2

**PURRAINDER.**—A town in one of the recently sequestered districts of Hyderabad, 211 miles N W from Hyderabad. Lat. 18 19, long 75 30'

**PURRAUNTAJE**—A town in the British district of Kara, presidency of Bombay 50 miles N of Kara, Lat. 23° 26', long 72 53'

**PURRAUR**—A town in the native state of Travancore, territory of Madras, 126 miles N N W from Trivandrum, and 82 miles S.S.E. from Calcutt. Lat. 10° 5' long. 76 16'

**PUREBOA, or PAREUA**, in the British district of Maldah Bent. gov of Bengal, a town on the route from Maldah to Purneah, six miles N of former. It is now much ruined, but contains many monuments of antique greatness, especially the Adinah mosque, a vast structure nearly 500 feet in breadth from north to south, and 800 feet from east to west. The style of architecture is, however, rather complex than grand, consisting of a great number of pillars and domes, diminutive in proportion to the vast dimensions of the ground plan of the building. Within the precincts are the tombs of Sikander Shah and some other Mussulmans of rank. Besides this vast struc-

# PUR.

ture, there are many others, but all very ruinous. The true appellation of the city is said to be Pandura, or Pandoriya, derived from its having been founded by a rajah of the Panda family renowned in the lore of Hindu mythology and romance. It has repeatedly been the seat of the government of Bengal though Gaur more frequently had that distinction. Distant N from Calcutta by Burhampoor 107 miles. Lat. 25° 4', long. 88° 9'.

**PURSA.**—A town in the British district of Sarun, lieutenant-gov. of Bengal, 25 miles N W of Chupra. Lat. 25° 57', long. 84° 27'.

**PURSOBE.**—A town in the British district of Mirzapoor, lieutenant-gov. of Bengal, 53 miles S E of Mirzapoor. Lat. 24° 27', long. 82° 58'.

**PURSOOD** in the British district of Muttra, lieutenant-gov. of the N W Provinces, a village on the route from the cantonment of Allypore to that of Muttra, and 11 miles N E of the latter. Lat. 27° 34', long. 77° 54'.

**PURSOR.**—A town in Guzerat, or dominions of the Guicowar 41 miles N N W from Rajkote and 60 miles E S E from Bhuj. Lat. 22° 51', long. 70° 36'.

**PURTABGHUR.**—A town on the route from Neemuch to Baroda, 33 miles S of the former and 206 N E of the latter. It is the principal place of a raj or small state of the same name, under the political superintendence of the Governor-General comprising part of the tract called Bagur and the whole of that denominated Kantal. The raj is bounded on the north west and north by the state of Meerwar or Odeypore, on the east by Mundewore Jowna, and Ratlam, and on the south west by Banawarra and lies between lat. 23° 14'—24° 14' long. 74° 27'—75°. The area is estimated at 1,457 square miles, and the population at 145,700. It is a hilly and ill cultivated tract, rather elevated, and hence frost is not unknown. The annual revenue of the rajah was, in 1848, estimated at 175,000 rupees, or 17,500 £. The armed force consists of 250 cavalry and 300 infantry with a police establishment of 200 men. The ruling family is of a junior branch of that of Odeypore. Before the raj became tributary to Holcar it formed a dependency of the Mogul empire, and one of its former rulers, Salim Shah, having obtained from Mahomed Shah the privilege of coinage money in his own name struck in the name of Purtabghur the Salim Shah rupee. The privilege thus conceded has been grossly abused by the more recent rajahs, who have permitted the fraudulent alteration of the standard, and the debased coin issued from this mint has frequently been made the subject of remonstrance on the part of the British government. In 1818 the rajah concluded a treaty with the East-India Company under which he became entitled to protection, he binding himself to subordinate co-operation and to pay annually to the other contracting party a tribute of

72,700 Salim Shah rupees, which sum is transferred to Holcar the feudal superior of Purtabghur. A detail of the circumstances under which Dulpat Singh the regent of Doongerpoor succeeded to the raj of Purtabghur and relinquished his claim of succession to that of Doongerpoor will be found in the article upon the latter state. The town of the same name as the district, and the chief place within it, though of considerable size, presents nothing particularly worth notice. Elevation above the sea 1,698 feet. Distance of the town direct from Mhow N W 118 miles from Oyeen, N W 30. Lat. 24° 5' long. 74° 53'.

**PURTABURH.**—A town in the largest territory of Berar or Nagpoor 70 miles N N W from Nagpoor and 92 miles S E from Seoni. Lat. 20° 49' long. 80° 10'.

**PURTABURH.**—A district of the territory of Oude, named from its principal place. It is bounded on the north east by the district of Sultanpoor, on the east by the British district of Jounpoor, on the south by the British district of Allahabad, and on the west by the districts of Allahabad and Saloon. It lies between lat. 25° 40'—26° 15' long. 81° 40'—82° 5', is forty five miles in length from south-east to north-west and twenty in breadth. It contains the following subdivisions: 1. Purtabghur, 2. Amethi, 3. Dalpur Patdi.

**PURTABURH** or **BIHAGHAT** in the territory of Oude, a town two miles south of the right bank of the river Sase. It is surrounded by a decayed rampart of mud, and on its west side is a fort of the same material in a ruinous state but still inhabited by a gajdar or officer of police. The site is rather elevated, sandy yet not unproductive and water is found at from thirty to thirty five feet below the surface. Butler states the population at 10,000, of whom half are Mussulmans, and almost all cultivators, there being no manufactures. Previously to 1834 one of the Company's native infantry regiments, with two guns, was cantoned three miles north-east of the town on a very healthy spot on the right bank of the Sase. Tuffenhaler gives a brief notice of Purtabghur which he concludes by observing, in this district much salt and saline earth are obtained. Purtabghur is distant N from Allahabad 32 miles, N W from Calcutta 534, S E from Lucknow 40. Lat. 25° 54' long. 81° 58'.

**PURTABPOOR**, in the British district of Meerut, lieutenant-gov. of the N W Provinces, a village on the route from Delhi to the town of Meerut, and eight miles S W of the latter. Lat. 28° 55', long. 77° 45'.

**PURTABPOOR**, in the British district of Mynpoorie, lieutenant-gov. of the N W Provinces, a village on the route from the cantonment of Allypore to that of Euzab and 41 miles N W of the latter. Lat. 27° 13' long. 78° 55'.

**PURTOOR.**—A town in Hyderabad, or territory of the Nizam, situate on the right

PUR-PUT

bank of the Doodna river and 140 miles S.W. by S. from Elhahpore Lat. 19 36' long 76 18'

**PURTYALL**.—A town in the British district of Guntoor presidency of Madras, 69 miles N.W. by W. of Masulipatam. Lat. 16 40' long 80 30'

**PURULEA**.—See POORALLA.

**PURUSGAON**.—A town in the escheated territory of Berar or Nagpore 71 miles E. by N. from Nagpore and 180 miles S. from Jubbulpore Lat. 21 18, long 80 14

**PURUSPUTI** in the territory of Oude a village on the route from Azimgurh to Sultan pore cantonment, 66 miles W. of the former 12 S.E. of the latter Lat. 26 17, long 88 10'

**PURWAN NUDDEE**.—A river rising in lat. 27 31, long 87 2' in the British district of Tirhoot, and, flowing in a southerly direction for seventy miles, generally through the district of Bhagulpore, falls into the Dhanora, in lat. 26 38, long 86 49'

**PUSGAW**.—A town in Oude 83 miles N.W. by N. from Lucknow and 16 miles E. by S. from Shahjehanpore Lat. 27 50', long 80 18'

**PUTAOO** in the Rajpoot state of Jodhpore a village on the route from Balotra to the city of Jodhpore and 14 miles N.E. of the former Lat. 26 57 long 72 30

**PUTCHPAHAR**.—A town in the Rajpoot state of Jhalawar, 32 miles W.S.W. from Jhalra Patan and 53 miles E. from Neemuch. Lat. 24 21 long 76 45

**PUTEANUGLA**, in the British district of Moradabad lieut.-gov. of the N.W. Provinces, a village on the route from the town of Moradabad to Almora, and 30 miles N. of the former It is situate in an open, low level country, partially cultivated. Lat. 29 4, long 78 57

**PUTEHUR**, in the British district of Suharanpore, lieut.-gov. of the N.W. Provinces, a town on the route from Suharanpore to Simla, 13 miles N.N.W. of the former Lat. 30 8, long 77 32

**PUTENER**, in the British district of Mo-suiffurngur lieut.-gov. of the N.W. Provinces, a village on the route from Kurnal to Meerut, and 19 miles S.E. of the former Lat. 29 32, long 77 14

**PUTERA**, in the British district of Banda, lieut.-gov. of the N.W. Provinces, a village on the route by Chila Tara Ghat from Cawnpore to town of Banda, 17 miles N. of latter Lat. 25 42, long 80 32

**PUTHIA** in the British district of Mynpore, lieut.-gov. of the N.W. Provinces, a village on the route from Allypore cantonment to that of Mynpore, and 37 miles S.E. of the former Lat. 27 37, long 78 37

**PUTHONA**, in the British district of Al-

lahabad, lieut.-gov. of the N.W. Provinces, a town on the route from Allahabad to Futtahpore 21 miles W.N.W. of the former Lat. 25 32, long 81 38

**PUTHURRIA**, in the British district of Sangor and Nerbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Allahabad to Sangor 236 miles S.W. of former and 28 N.E. of latter It is situate at the east extremity of a range of trap hills, at an elevation of 1395 feet above the sea. Lat. 23 53, long 79 11

**PUTJIRWA**.—A town in the British district of Sarun lieut. gov. of Bengal eight miles W.N.W. of Bethah Lat. 26 48' long 84 28'

**PUTNEETOLA**.—A town in the British district of Dinajepore, lieut. gov. of Bengal 40 miles S. of Dinajepore Lat. 25 2, long 88 42'

**PUTNI**.—A small river rising in the Sangor and Nerbudda territory in lat. 23 40' long 80 1 and taking a northerly course of eighteen miles, it crosses the northern frontier into Bundelcund through which it flows first north easterly and then north westerly and falls into the Cane on the left side in lat. 24 20', long 80 8, having a total course of about seventy miles

**PUTPURGUNJ** in the British district of Boolandshuhur, lieut. gov. of the N.W. Provinces, a small town near the left bank of the Jumna, on the route from Allypore to Delhi cantonment, and eight miles S.E. of the latter It has a bazar and is supplied with water from wells Close to it was fought, in 1803 the engagement more generally styled the battle of Delhi, in which the British army under General Lake totally defeated the Marhattas commanded by Bourquien a French adventurer Lat. 28 37 long 77 21

**PUTRA**.—A town in the recently lapsed territory of Berar or Nagpore seven miles N.N.W. from the hill seminary of Jeypore and 182 miles W. by S. from Ganjam Lat. 19 17' long 82 28'

**PUTRUHUT** in the district of Sahawal territory of Sangor and Nerbudda, a small town with bazar on route from Sangor by Rowah, to Allahabad, 168 miles S.W. of the latter It is situate on the right bank of the river Tons (South-eastern) here a great torrent with channel 200 yards wide, and stream about sixty yards wide in the dry season and crossed by ford A ruinous fortress of fine and picturesque aspect, built on a limestone rock, formerly commanded the passage but is now merely the residence of some humble relatives and domestics of the rajah. Lat. 24 34 long 80 34'

**PUTSEEN**.—A town in the British district of Rajeshaye, lieut. gov. of Bengal 32 miles N.E. by E. of Rampore. Lat. 24 37, long 89 5'

**PUTTACOTTE**.—A town in the British

# PUT

district of Tanjore, presidency of Madras 29 miles S.S.E. of Tanjore. Lat. 10 25, long 79 21

**PUTTA HAT**—A town in the British district of Bulloah lieut-gov of Bengal 14 miles N.W. of Bulloah Lat. 23°, long 90 46

**PUTTANAPARAM**—A town in the native state of Travancore presidency of Madras 43 miles N by W from Trivandrum, and 62 miles S.W. from Tinnevely Lat 9 5, long 76 55

**PUTTARY** in the territory of Rewah province of Baghelund a small town on the old route from Mirzapoor to the town of Rewah and 35 miles S.W. of the former Lat 24 45 long 82 6

**PUTTEALA**—A native state in Sirhind and within the jurisdiction of the commissioner and superintendent of the Cis-Sutlej states. It is the most important of those known as the Sikh protected states, and the chief is regarded by his neighbours as the head of the Pholkean tribe. The original dimensions of the territory were extended by purchases made of additional dominions on the dismemberment of the states of Baghat and Keyonthal subsequently to the expulsion of the Ghorokas and further extension more recently accrued from grants made by the British government, in reward of the fidelity displayed by the rajah during the war with Lahore. The area exclusive of the hill district, is returned at 4 68 square miles and the population at 1 310 960 persons. The territory is among the most fertile in Sirhind, and exports great quantities of grain across the Sutlej to Lahore and Amritsar. By the manifesto issued by the British government on taking possession of Sirhind in 1849 the rajah is guaranteed the sovereignty within his own possessions and is bound to furnish a quota of troops in case of war. On one occasion in 1812, an interference with the independence of the rajah became indispensable in consequence of his frantic and ruinous extravagance he having so misapplied his resources that when called upon to supply troops for the public service he could furnish no more than 200 horsemen of the worst description. At length his misconduct was considered to amount to insanity and he was deposed, and placed under restraint.

In conferring the additional territory lately bestowed by the British government on the rajah of Putteala, in reward of his fidelity during the Lahore war it was stipulated that the rajah should renounce the right of levying transit-duties should make and maintain to repair a military road and abolish ~~distilleries~~, inebriates, and slave-dealing within his dominions.

**PUTTEALA**, in Sirhind the chief place in a native state of the same name. It is situated on the river or rather torrent, Beas. This stream, known also by the name of the

Putteala river runs past the town in a very deep channel yet has in time of inundation so large a volume of water that a great embankment has been found necessary to preserve the walls from its destructive influence. It is a compact town built of brick masonry and more cleanly than the generality in this part of India, and densely peopled. The citadel is small and of no great strength. It is the residence of the rajah. Putteala is distant 3 W from Calcutta 1023 miles, Lat. 30 20', long 76 25

**PUTTEALEE** in the British district of Furruckabad the principal place of the pergunnah of the same name a small town near the north western frontier towards the districts of Mynpoorie and Budarn and 44 miles N.W. of Fettebgnrh. Here, in 1749, an engagement took place between Ahmed Khan the Afghan nawab of Furruckabad and Nafier Jang nawab of Oude and vizier of the empire of Delhi. During the hottest part of the engagement says Hamilton there suddenly arose a sandstorm (common in those parts of India) which blew with violence directly in the faces of the Mughals, and the Afghans, improving this advantage, rushed in the bosom of a thick cloud of dust and charged their enemies with irresistible impetuosity. The vizier's troops being blinded by the sand, could neither judge of the number nor direction the attacks of their assailants their panic was increased by the whirlwind and darkness which surrounded them and in a few minutes they gave way and fled with the utmost precipitation. All the vizier's artillery was taken and his infantry cut off to a man. He himself escaped with difficulty. It is mentioned in the Ayen Akbery under the name of Puttyaly and its assessment stated at 46 940 rupees. Lat. 27 41 long 76 4

**PUTTEERAM**—A town in the British district of Dinajepoor lieut gov of Bengal 21 miles S.W. of Dinajepoor Lat. 26 18 long 89 47

**PUTTHRI** in the British district of Baharunpoor lieut gov of the N.W. Province, a river or large torrent having its origin on the south-western declivity of the Kinnorow Ghat or Pass through the Kewahk range and in lat. 30 8° long 73 5. It has a course of about thirty miles in a direction generally southerly and falls into the Banganga Nuddee an offset of the Ganges in lat. 29 42° long. 73 9°. In the upper part of its course it flows down a bed of shingle and sand but for the greater part is a shallow expanse of water with little current. This torrent is crossed by the Ganges Canal by means of a dam thrown across the river constructed with ten openings of ten feet each and flank overfalls.

**PUTTUN** or **ANHULWAR PATTAN**, in Gooerat, or the territory of the Gascowar, a town situate on the small river Banarwah, a tributary of the Ranaa. Here are extensive traces of the ancient city of Anbulwar. Lat. 26 38

# PUT-QUE

"The eye," says Tod, "can trace the course of the walls which formed an irregular trapezium of perhaps five miles circuit, around which extended, chiefly to the east and south, the suburbs, to which there may have been an external circumvallation." The wall inclosing the present city of Puttun is built half way up with stones from the ancient city whether from palaces, temples, or fountains, and these more solid foundations are surmounted by a comparatively sunny rampart of brick. Here are some manufactures of importance, as of swords, spears, pottery of a very light fine kind, and weaving in silk and cotton. The population is estimated at 30 000. Distance from Ahmedabad N W 68 miles. Lat. 23 46, long 72 8.

**PUTTUNCHERROO**—A town in Hyderabad, or territory of the Nizam 21 miles N W by W from Hyderabad and 168 miles E. from Sholapur. Lat. 17 31, long. 78 10.

**PUTTUN SOMNAUT**—See **SOMNATH**.

**PUWYE**—A town in the Boondela state of Punnah 32 miles S by W from Punnah and 55 miles N E. by E from Dumoh. Lat. 24 16 long 80 14.

**PYARU**—A village in the parghna of Bulughur, lieutenant-gov. of the N W Provinces distant S. from Delhi 30 miles. Lat. 28 16, long 77 22.

**PYENA**, in the British district of Gorakhpore, lieutenant-gov. of the N W Provinces, a small market town on the left bank of the river Ghoghra. Buchanan states that it has 500 houses, which would assign it a population of about 3 000 persons. Distant S E from Gorakhpore cantonment 45 miles. Lat. 26 15, long 83 50.

**PYGA**—A town in the British district of Moradabad, lieutenant-gov. of the N W Provinces. Lat. 29 8 long 78 59.

**PYKHIA**—A town in the British district of Mergui, one of the Tenasserim provinces 80 miles N by W of Tenasserim. Lat. 13 14, long 95 50.

**PYKOWLEE**, in the British district of Gorakhpore, lieutenant-gov. of the N W Provinces, a small town on the route from Dusa-pore to Gorakhpore cantonment, 125 miles N W of the former. Lat. 26 52, long 83 38.

**PYLADY**—A town in the British district of North Arcot, presidency of Madras, 88 miles N by W of Madras. Lat. 13 33, long 80 17.

**PYLANEE**, in the British district of Bandah, lieutenant-gov. of the N W Provinces, a town on the route from Bandah to Lucknow, 28 miles N by E. of the former. Lat. 33 45, long 80 30.

**PYNG**—A town of Burmah, 19 miles W from the right bank of the Irrawaddy river, and 149 miles S W from Ava. Lat. 20 18, long 94 24.

**PYNGAWA**, in the British district of Georgeon, lieutenant-gov. of the N W Provinces, a village on the route from the cantonment of Muttra to Ferozpoor and 13 miles N E of the latter. It is situate a mile east of the Khanpoor Ghat, a pass through a range of low hills. The village has water from wells, and supplies are procurable. The road in this part of the route is good. Lat. 27 54, long 77 10.

**PYSUNNEE**—A small river rising in Bundelcund, on the table-land surmounting the Purna range and in lat. 24 52 long 80 48. It first flows north east, and at Jorax is precipitated over the brow of the ridge by a cascade, the height of which is estimated by Jacquemont to exceed 300 feet. A few miles further on, it passes into the British district of Banda, through which it flows first north subsequently north east, and falls into the Jumna on the right side, in lat. 25 26, long 81 14, its total length of course being eighty miles. It is sacred among the Hindoos and its cataraet near Jorax as well as its romantic course to the plains below, is exceedingly interesting.

**PYTHEEA**, in the district of Aldemau territory of Oude, a village four miles S. W of the right bank of the river Tons (North eastern) 55 miles S E. of the city of Oude. Better estimates its population at 400 of whom 100 are Mussulmans. Lat. 26 10, long 82 48.

**PYTIANI RIVER**—One of the mouths of the river Indus. It communicates with the Buggaur the western branch of the Indus in lat. 24 36 long 67 21 and flows into the sea in lat. 24 24 long 67 13. Little difficulty would be experienced in entering the creek it being better defined than most of the mouths of the Indus.

**PYTUN**—A town in Hyderabad, or territory of the Nizam situate on the left bank of the Godavery river, and 53 miles N E by E from Ahmednuggur. Lat. 19 29, long 75 28.

## Q.

**QABUR SHAKWALA**, in the British district of Bhuttesau, lieutenant-gov. of the N W Provinces a town on the route from Mundate to Beekaneer 71 miles S. by W of the former. Lat. 29 50 long 74 8.

**QUEDAH**—A native state on the Malay peninsula, occupying that portion of the main land which lies opposite the British possession of Prince of Wales Island. Province Wellesley forms its western boundary. Quedah, the principal place, is in lat. 6 long. 100° 30'. In 1786 an agreement was entered into with the rajah of Quedah, under which Prince of Wales Island was ceded to the British in consideration of an annual stipend of 6,000 Spanish dollars. In 1800 a further treaty was concluded with the rajah, under which

# QUI—RAD

Province Wellesley was transferred to the British and the annual payment to the rajah increased to 10 000 dollars. In 1821 the king of Siam invaded Quedah, and expelled the rajah but was induced in 1842, upon the submission of the latter to renounce him in the most valuable portion of his former territory. At a subsequent date, the rajah of Quedah placed himself in a position of hostility towards the British, who visited his misconduct by withholding payment of his stipend. Upon its restoration the arrears which had accumulated during the period of suspension were declared forfeited.

**QUILON** in the native state of Travancore, presidency of Madras, a town on the seacoast, in a bight where ships may anchor under shelter at about two and a half or three miles from the fort. A small British force is usually stationed here. The ground on which the cantonment stands, rises by a gentle ascent from the sea, and includes an area of nearly five miles in circumference.

There is no natural boundary between the military cantonment and the Travancore territory but a broad road round the cantonment points out the line of demarcation. There is in the cantonment a barrack for European troops, formerly occupied by a company of foot-artillery but for many years past untenanted and now fast falling to decay there is also a European hospital. The site of the cantonment is healthy, being in the highest part about forty feet above the sea. The soil is for the most part sandy but within its limits is a considerable piece of swampy ground. Water is abundant and good. There is a jail here, under the charge of the Travancore authorities. The roads about the cantonment are of laterite, broken small and are in excellent condition. With Trivandrum, the capital of Travancore, the communication is carried on almost entirely by means of canals, dug parallel to the low sandy shore, and connecting the different lakes formed by the backwater. There is also a military road, adapted for wheeled carriages, which however is but little frequented, owing to the great facility of water communication, and which, in 1843 was represented as out of repair. Northwards, towards Allepi and Cochin there are similar opportunities for communication by water but horses and cattle can travel by an ill formed sandy road along the beach. In a direction north easterly there is a line of communication with Tinnivelly by a pass through the mountains but it is only an indifferent route, and is rather a footpath than a road. The vegetable productions of Quilon are timber, coconuts, cor or coconut-flare, pepper, cardamoms, ginger betelnuts, and coffee. The population is stated to be about 26,000. An Episcopal church was some years ago erected at this place. Distance from Trivandrum, N W, 33 miles, Cannanore, S.E., 125; Man-

galore, S.E., 308, Bombay, S.E., 740, Bangalore S.W., 290 Madras, S.W., 885. Lat. 8° 55' long 76° 39'

**QUOMOROODENUGGUR**, in the British district of Delhi, lieutenant-gov of the N W Provinces, a village on the route from Rohuk to the city of Delhi and 11 miles W of the latter. Lat. 28° 40' long 77° 6'

## R.

**RAAT**, in the British district of Humsere, the principal place of the pergunnah of the same name a small town on the route from Jubulpore by Kitha to Calpee 46 miles S of the latter. It has a bazar and supplies and water are abundant. Davidson styles it a populous and busy village though a short time before his arrival the corpses of seventy of the inhabitants had been burned, in consequence of dreadful mortality caused by malaria, resulting from the numerous swamps, tanks and the rank vegetation with which the place is surrounded. Raat contains a population of 8 616 inhabitants. Lat. 25° 36', long 79° 38'

**RACHERY**—A town in Hyderabad, or territory of the Nizam 19 miles from the left bank of the Godavery river and 183 miles N.E. from Hyderabad. Lat. 18° 59', long 80° 13'

**RACHOL**—A town in the Portuguese state of Goa, situate 14 miles S.E. from Goa. Lat. 15° 19' long. 74° 4'

**RACHOOTEE**, in the British district of Cuddapah presidency of Madras, a town situate on the Mundaveer or Chittur, a small stream tributary to the river Northern Pennar or Pennaur. It is the principal place of a subdivision of the same name. Distance from the town of Cuddapah S 36 miles, Nellore S.W. 86 Madras, N.W. 123. Lat. 14° 3' long 78° 49'

**RACHUL**—A town in the British district of Guntoor, presidency of Madras, 29 miles S.E. by E. of Guntoor. Lat. 16° 8' long 80° 56'

**RACKEE**, in the Swade Sagur Doosh division of the Punjab a town situated on the left bank of the Swan river, 54 miles S.S.E. of the town of Attock. Lat. 33° 15', long 73° 45'

**RACKLING**—A town in the native state of Sikhim, 19 miles N from Darjeeling and 115 miles N.N.E. from Paruah. Lat. 27° 18', long 88° 25'

**RADEHUNPOOR**, a petty state in the north-western quarter of Guzerat, including the pergunnahs of Moorpoor and Sumner. It lies between lat. 23° 20' and 23° 55' and long. 71° 28' and 72° 3', and is bounded on the north by Tharwarra, on the south by Mandell and Durjowarra on the east by the Patitan district and on the west by that of

## RAD—RAE.

**Warys** Its dimensions are about forty miles by twenty

During the months of April May, June, and July the heat is excessive in August and September if rain falls, the weather is agreeable, October and November are again hot but from December until the return of the heat in April the climate is delightful. There are three descriptions of soil—sandy black, and saline. The chief products are wheat cotton, and all the common grains. Salt is both manufactured and self produced. The British government rent the Unwerpoora salt-pans of the nawab at the annual sum of 11 048 rupees.

The district is traversed by the Bunnas river and by the minor streams of the Surrunwutti and Roopan. One of the great roads from Hindostan and Palee to the Mundavie Bunder, in Cutch passes through Radhunpoor. The population principally Hindoo consists of about 45 000 souls. Radhunpoor is not tributary either to the British or any other government but pays black mail to the surrounding Coohie districts. A police force, consisting of 285 sowars and 320 foot-men, is kept up by the state, and detachments are spread about in the different villages for their protection. In case of foreign invasion the state is entirely dependent on the British government. The first connection of that government with Radhunpoor was in 1813 in which year Captain Carnar, then Resident at Baroda, concluded an engagement between the nawab and the Guicowar by which the Guicowar state was empowered, under the advice and mediation of the British government, to control the external relations of Radhunpoor and to assist the nawab with forces in defending it from foreign invasion but excluded from any interference in the internal affairs of the country. During the five following years, the Kossas and other marauders having greatly infested the north west part of Guzerat, and more particularly this petty state, the nawab voluntarily solicited the aid of the British government to expel them and offered to pay a share of the expenses of the war. The required aid was afforded. In 1819 Colonel Barclay marched with a force and expelled the freebooters from all parts of Guzerat and an agreement was negotiated with the nawab of Radhunpoor by which he consented to pay a yearly tribute to the British government, leaving the actual amount to be subsequently decided. In 1822 the tribute was fixed at 17 000 rupees per annum for five years after which it was to be left to the British government to increase the amount or not. The engagement continued in force until the year 1824, when the home authorities, considering the state unable to bear the amount of tribute imposed, it was, by the order of the Bombay government, remitted in full in the month of July of that year.

The Radhunpoor state is under the ma-

nagement of the British agent at Pahnunpoor who controls its relations with the neighbouring states, but avoids all interference in its internal affairs. It has enjoyed perfect tranquillity since its connection with the British government in 1819.

The first person of the reigning family of which there is any record is Sheer Khan Babee, who was thannadar of Chowal in 1663. His grandson, Mahomed Khan Jehan, was the first of the family appointed as foydar of Radhunpoor in 1715. He left two sons, Kurnaboodun and Mahomed Unwar. A few days after their father's death Mochangul Moolk then sonbahdar of Guzerat, gave the pergunnahs of Summee and Moorpoor to the eldest, with the title of Jowan Mird Khan, and appointed the second foydar of Radhunpoor. In 1765 Jowan Mird Khan died and was succeeded by his eldest son Gazeeddeen, in the pergunnahs of Summee and Moorpoor, his second son succeeding to that of Radhunpoor. In 1787 the latter died childless. In 1818 Gazeeddeen died leaving two sons, Sheer Khan and Kurnalodeen Khan. The former succeeded to the Radhunpoor pergunnah, and the latter to those of Summee and Moorpoor. In 1814 the latter dying without issue, Sheer Khan succeeded to the nawabship of the three pergunnahs. Sheer Khan died in 1825 and with the unanimous consent of the people was succeeded by the present chief, Zoorawar Khan, an only son by a slave-girl. But Zoorawar being at this time only three years of age Siriah Bebee the second wife of the late chief, was appointed regent during his minority. In 1837 he was intrusted with the management of his own affairs. He is now about thirty two years of age and has a son heir-apparent to the chieftainship.

**RADHUNPOOR**, in Guzerat, or territory of the Guicowar a town on the route from Ahmedabad to Hyderabad in Scinde 85 miles direct N.W. of former, 270 S.E. of latter. Though a considerable and fortified town, and not devoid of trade and manufactures, the majority of its population are cultivators, principally Rajpoots and Coohes. Its principal exports are butter, hides, and grain, and coarse cotton cloths, the local manufacture. The chief styled nawab of Radhunpoor is a Muselman, of the influential family of Babee and has an annual income of 1 50 000 rupees. He acknowledges fealty to the Guicowar by annually presenting to him a horse and clothes. His military establishment consists of sixty horse and 550 infantry. Population 15 000. Lat. 23° 50' long. 71° 30'.

**RAKERAG**—A town in the British district of Belgaum, presidency of Bombay 43 miles N.N.E. of Belgaum. Lat. 16° 29' long. 74° 50'.

**RAEGURH** in the British collectorate Tannah, presidency of Bombay, a fort situated amidst the Northern Ghats. During the last

# RAE--RAH.

campaign against the Peishwa, it was regarded as one of the strongest fortresses in India, and, in fact, as impregnable as Gibraltar. It was invested by a British force under Colonel Prother in April, 1818, and surrendered after a bombardment of fourteen days, by which every building except one granary was reduced to ashes. Raesgurb originally denominated Rauri in 1643 fell into the hands of Servajee who changed its name to Raesgurb and made it his capital. In 1690 it was taken by the forces of Aurung zebe and having reverted to the Maharrattas during the decadence of the Mahometan empire, was finally taken by the British forces as already stated. Rauri, as this fort was originally called must not be confounded with another place of the same name in Sawunt-warree, on the coast of the South Concan. Raesgurb is distant S E. from Bombay 65 miles, S.W. from Poona 32 N.W. from Sat-tara 52 Lat. 18 14 long 73 30'

**RAEEN**—One of the Cis-Sutlej hill states. It is bounded on the north, east and south by the native state of Bussahir and on the west by Turroch and Bussahir. It extends from lat 31 2'—31 12' and from long 77 47'—77 57' and is twelve miles in length from north to south, and five in breadth.

**RAEPOOR** in the British district of Minspooree, lieut. gov. of the N.W. Provinces, a village on the route from the cantonment of Allypore to that of Minspooree, and 5 miles S.E. of the former. Lat. 27 30' long 78 54'

**RAEPOOR**, in the British district of Cawnpore, lieut. gov. of the N.W. Provinces, a village on the route from the cantonment of Cawnpore to that of Calpee, and 16 miles S.W. of the former. Lat. 26 25' long 80 12'

**RAEGANJ** in the British district of Dinajepore, lieut. gov. of Bengal, a town on the west boundary towards the British district of Furruckabad, on the left or east bank of the river Kooluk. It is the principal mart in the district, and nearly engrosses the traffic of an extent of rich country about seventy miles in length and twenty in breadth. Rich merchants have numerous stores here consisting of large yards, inclosed by fences of straw hurdles or mats, and containing many butts and sheds filled with wares. The streets of the town are narrow, irregular and filthy, but it is a place of great stir and crowded with boatmen and drivers of cattle. It contains about 1000 houses, a number which according to the usually received ratio of inmates to dwellings, would assign it a population of about 5000. Distant W. from the town of Dinajepore 32 miles N.W. from Calcutta by Dinajepore 292 Lat. 25 40' long 88 8'

**RAEKOTE** in Sirhind, a town situated thirty miles from the left bank of the Sutlej, having a population of 8,704. It belongs to the petty chief of the surrounding territory.

It is under the protection and control of the British. The town is distant N.W. of Calcutta, by Delhi and Hannoo 1130 miles. Lat. 30 40', long 75 30'

**RAEPOOR**—A town in the Rajpoot state of Oodeypoor, 61 miles N.E. from Oodeypoor and 82 miles S.S.W. from Ajmeer. Lat. 25 26 long 74 9'

**RAEPOOR**, in the British district of Allypore, lieut. gov. of the N.W. Provinces, a village on the route from Fattalgurh to Meerut, and 106 miles N.W. of the former, is situated near the left bank of the lake Nuddie (East) in an open country but partially cultivated. Lat. 28 5 long 75 17'

**RAGAVAPOORAM**—A town in the British district of Masulipatnam, presidency of Madras, 68 miles N.W. of Masulipatnam. Lat. 17 8 long 80 59'

**RAGOOGHUR** in the territory of Gwalior or possession of Scindia, a town on the route from Canna to Mow. It is 11 miles S.W. of former, 180 N.E. of latter. This, which is represented to be a considerable place, is situated on a feeder of the river Tarnata. It has a bazar and a fort, which though now much dilapidated was in the early part of the present century so strong as for a considerable time to baffie the disciplined army of Doolat Rao Scindia. It was founded in the time of Shahjehan, who reigned from 1628 to 1657, by Lal Singh a Rajpoot chief, and after the rest of Malwa had been subjugated by the Maharrattas his successors long retained until Diokul Singh was, in A.D. 1821, finally defeated by the contingent force of Gwalior commanded by British officers. By the mediation of the British authorities, he was allowed to retain Ragoo-gurh with an estate of 5,000 rupees on condition that some retainers of the family should be always in the service of the maharajah of Gwalior. Distant N.E. of Oojein 180 miles, S. of Agra 200 Lat. 24 30 long 77 11'

**RAGOOHAUTHPOOR** in the territory of Gwalior or possession of Scindia, a family a town 77 miles W. of Gwalior near the south or right bank of the river Chambul. Lat. 26 4' long 76 56'

**RAHA**—A town in the British district of Nowgong in Upper Assam, 20 miles S.W. by W. of Nowgong. Lat. 26 12' long 92 31'

**RAHAHATAH**—A town in the British district of Ahmednuggur, presidency of Bombay, 47 miles N.N.W. of Ahmednuggur. Lat. 19 47 long 74 30'

**RAHDINPOOR**.—See RADUNPOOR.

**RAHINFUR**, in the British district of Allahabad, lieut. gov. of the N.W. Provinces, a village on the route from the cantonment of Allahabad to Jounpore, and eight miles N.E. of the former. The road in this part of the route is good, the country fertile, well cultivated, and studded with villages. Lat. 26 25', long 82'

**RAHLAI**, in the British district of Agra, lieut.-gov. of the N W Provinces, a town on the southern frontier, towards the territory of Dholpur 17 miles S of the city of Agra. Lat.  $26^{\circ} 56'$ , long  $78^{\circ} 8'$ .

**RAHM GHUR**, in the Rajpoot state of Jeypoor a village, with fort, on the route from Agra to Ajmeer 72 miles W of former, 156 E. of latter. The fort is built of stone with six round towers, perched on a steep eminence, with a double embattled wall stretching down one side to a wall at its foot. Lat.  $27^{\circ} 8'$ , long  $76^{\circ} 58'$ .

**RAHOOREE**—A town in the British district of Ahmednuggur, presidency of Bombay 21 miles N N W of Ahmednuggur. Lat.  $19^{\circ} 28'$ , long  $74^{\circ} 40'$ .

**RAHUN** in the Rajpoot state of Jodhpoor a town on the route from Nussarabad to Nagor, and 54 miles N W of the former. It has a large bazar water is obtained from a tank and fifty wells. The road in this part of the route is good, and passes over an immense plain, covered with scanty bush-jungle. Lat.  $26^{\circ} 46'$ , long  $74^{\circ} 8'$ .

**RAHYGAUW**—A town in Nepal, situate on the right bank of the Bhyroose river and 21 miles S. by W from Jemlah. Lat.  $29^{\circ}$ , long  $81^{\circ} 37'$ .

**RAIOHAO**—A town in the Rajpoot state of Jhalawar eight miles S E. from Jhalra Patan and 89 miles E from Neemuch. Lat.  $24^{\circ} 27'$ , long  $76^{\circ} 20'$ .

**RAIOHOOR**—A town in one of the sequestered districts of the native state of Hyderabad, 111 miles S.W. by S from Hyderabad. Lat.  $16^{\circ} 10'$ , long  $77^{\circ} 34'$ .

**RAIDEE**—A town in the British district of Odisha Nagpore lieut.-gov. of Bengal 41 miles S.W. by S. of Lohadugga. Lat.  $22^{\circ} 55'$ , long  $84^{\circ} 28'$ .

**RAIDROOG**—A town in the British district of Bellary presidency of Madras 31 miles S of Bellary. Lat.  $14^{\circ} 41'$ , long  $76^{\circ} 55'$ .

**RAINGURH**—A fort surrounded by a small district, inclosed by the territory of Busmahr. It is situate on the left bank of the Pabur, and at the time of the expulsion of the Goorkhas, in 1815, consisted of a rampart surrounding a small peak, and having rude houses for the accommodation of the garrison. Jacquemont describes it, at the time of his visit, in 1820, as forty yards long and twenty broad, with a weak rampart about twenty feet high, along the inside of which were ranged the lodgings of the garrison, no better than dog-holes. It is commanded from various points even by musketry, and has no regular supply of water, as the Pabur runs below at the perpendicular depth of 476 feet. The Goorkha garrison, which surrendered to the British, was supplied from tanks, sufficing for about a month's consumption. The Pabur at about a musket-shot below the fort, is crossed by a

saga or wooden bridge, forty yards long. The river in that part deep meanders through a level tract about 200 yards wide, fertile and bearing fine crops of rice, wheat, and opium poppies. It is one of the most delightful spots amidst the Himalayas, and is held by a small community of Brahmans, who have charge of two temples built in the Chinese style. His distance is spoken in considerable puny, and the inhabitants in easy circumstances resemble in make, complexion, and countenance the Hindoos of the plains while the labouring classes differ nothing from the ordinary mountaineers.

Raingurh belonged to Busmahr previously to the invasion of the Goorkhas, by whose garrison, on the 10th June 1815 it was surrendered to the British. In the subsequent settlement of the hill states it was reserved with a small surrounding district about five miles long and three miles wide, but at a later period was transferred to the chief of Koonthal in exchange for territory now forming part of Simla. Distant N W from Calcutta by Kurnaul 1,075 miles. Elevation of the fort above the level of the sea, 5,408 feet of the bed of the Pabur below the fort, 4,982 feet. Lat.  $31^{\circ} 7'$ , long  $77^{\circ} 48'$ .

**RAIPOOR**, in the British district of Calpee, lieut. gov. of the N W Provinces, a town on the route from Calpee to Etawah, 16 miles N W of Calpee. Lat.  $26^{\circ} 17'$ , long  $79^{\circ} 36'$ .

**RAIPOOR**, in the British district of Suharunpoor lieut. gov. of the N W Provinces a town on the route from Suharunpoor to Surmoor 20 miles N of the former. Lat.  $30^{\circ} 15'$ , long  $77^{\circ} 40'$ .

**RAIPORE**—See RAJAPORE.

**RAIREE**—A river of Jodhpoor rising on the confines of Mairwar, in lat.  $25^{\circ} 55'$ , long  $74^{\circ} 4'$  and flowing in a westerly direction for eighty eight miles, falls into the Leenase river, in lat.  $25^{\circ} 54'$ , long  $72^{\circ} 51'$ .

**RAIREE** on the coast of Ratanagerry in the South Concan, presidency of Bombay a fort, on a rocky eminence at the mouth of a small river navigable for boats of considerable size. It was built in 1662, by Sevajee subsequently passed into the hands of the rulers of Sawuntwarree and, becoming a stronghold of the pirates sent out by that state, was in A.D. 1766 taken by a British force, but restored in the following year. By virtue of a treaty concluded in 1819, it passed back to the English, and their possession was confirmed by another treaty concluded in 1820. This place is also called Yawuntgarh. Distant S. from Bombay 225 miles. Lat.  $15^{\circ} 45'$ , long.  $73^{\circ} 44'$ .

**RAISEEN** in Malwa, a strong fort in territory of Bhopal, 23 miles N E. of the town of Bhopal, in an elevated tract, a peak in its vicinity rising to the height of 2,500 feet. The fort is on the route from Hoshangabad to Sanger, 50 miles N of former.  $87^{\circ}$  S.W. of

latter. It is built at the eastern extremity of a sandstone hill and on the most elevated part of it. "It is very conspicuous for many miles around and said to have been built by the celebrated king (Rama) of Ayodha, as a place of refuge from the temporary anger of his brother (Bharata), and that the hill arose at his desire." According to this tradition probably conveying some truth mixed with fable the era of its foundation was about 775 years before Christ. Though little noticed of late years, it was formerly of importance and when in 1548, it was besieged by Shir Shah padshah of Delhi and one of the most powerful and martial princes who ever ruled Hindoostan the siege was protracted for a length of time. When the place at length capitulated on condition that the Hindoo garrison should be allowed to march out unmolested with their arms and property Shir Shah commanded his troops to attack them and after a desperate resistance they were slaughtered to a man. On the dismemberment of the empire towards the middle of the eighteenth century the fort was with the adjacent country seized by the Mah ratta, from whom it was wrested about A.D. 1748 by the nawab of Bhopal. At this place, in 1818 was negotiated the treaty between the British government and the nawab. Distance from Oogeln 125 miles, S from Calicut 202 S from Agra 260 S.W. from Allahabad 290 N.W. from Nagpore 170 Lat. 28 22' long 77 58'

**RAITPOOR**, in the British district of Alighur, head. gov. of the N.W. Provinces a village on the route from the cantonment of Alighur to that of Muttra, and 20 miles S.W. of the former. Lat. 27 38 long 78 1

**RAJABETA**—A town in the British district of Beerbhoom head gov. of Bengal, 159 miles N.W. of Calcutta. Lat. 24 8 long 86 40'

**RAJAHAT**—A town in the British district of Twenty four Pergunnahs, head gov. of Bengal 19 miles S.S.W. of Calcutta. Lat. 22 20' long 88 20'

**RAJAH BELL** in the Daman division of the Ponnab a town situated on the right bank of the Indus, 123 miles S.W. of the town of Peshawar. Lat. 32 14 long 71 11

**RAJAHMUNDROOG**—A town in the British district of North Canara, presidency of Madras, 15 miles N.N.W. of Honahwar. Lat. 14 31 long 74 28'

**RAJAHMUNDRI**—A British district named from its principal place, and forming part of the territories subject to the presidency of Madras. It is bounded on the north by Orissa on the north-east by the district of Vizagapatnam, on the south-east by the Bay of Bengal on the west by the British district of Masulipatnam and on the north west by the territory of the Nizam. It lies between lat. 16 18'—17 28', long 81° 7'—82° 40', and has

an area of 6 050 square miles. The seacoast commencing at the outlet from the Lake of Colar proceeds eastwards for ten miles to Point Narasipore, at the mouth of the Narasipore river or southern branch of the Godavary. In this estuary ships of small draught may find shelter as there are eight or nine feet of water on the bar and three four or five fathoms inside but ships of considerable burthen cannot be brought nearer to the shore than four or five miles, in consequence of shoals extending out to sea. From Narasipore Point the coast of this district extends in a direction north east, along the seaward face of the delta of the Godavary a distance of fifty seven miles to Point Gurdware a low narrow mud bank extending north and south several miles, on the west side of which is the estuary of the great northern branch of the Godavary. Opposite to this are several shoals and low islands, caused probably by the accumulation of salt, swept down by that vast torrent. About seven miles north west of Point Gurdware is the estuary of another and smaller branch of the same river generally called Coringa river from the town of Coringa, situate on its bank. This admits vessels of moderate burthen having twelve or fourteen feet of water on the bar at spring tides. On Hipe Island, a small sand bank above water about five miles eastward of the mouth of the Coringa river is a lighthouse for the guidance of shipping on this intricate and shoaly coast, which is so low that the sea has in violent storms extensively overflowed and devastated the land. A little north of Hipe Island, and the shoals lying about it the coast becomes bolder and more free from dangers, so that large ships can approach within two or three miles of it and it continues to be of the same nature for thirty seven miles, to Yamawaram at the northern extremity of the district its direction during that distance being nearly north-east. The northern and north western part of the district is hilly the ground there participating of the character of the Eastern Ghats, situated farther west. The geological formation of those hills is granite, intermixed with gneiss and amygdaloidal trap and kunkur or calcareous tuff, with a scanty admixture of fine porcelain clay. East of those hills of primitive formation are others less elevated, and of alluvial formation principally sandstone, containing valuable deposits of iron ore. In the bed of the Godavary are abundance of fragments of obolodony cornelians, agates, quartz, and crystals.

Towards the coast the country for the most part is alluvial fertile level, and low and in the rainy season extensively inundated. The only considerable river is the Godavary which enters the district at the northern frontier, in lat. 17 28' long 81° 34' and holds a course, generally southerly through the jungles of the Eastern Ghats for twenty-five miles, to Poorootpatnam, where it passes into the plain through which it continues to hold a southerly

course, slightly inclining to east, for twenty miles, to the town of Rajahmundry, about four miles below which it diversifies into two branches, the right flowing first southerly for thirty-two miles, subsequently south-westerly for thirteen miles, to Point Narasipore, where it falls into the Bay of Bengal, the other or left branch taking a course south-east and subsequently east for fifty-two miles, falls into the same bay three or four miles south-east of Coringa. The total length of the river's course through this district, measured along the main line and continued by either branch to the sea is about 100 miles, but if the two branches be included in the measurement (and each during a considerable portion of the year has a large volume of water) the total length of fertilising stream must be nearly 160 miles. During the greater part of the year it is navigable for boats in all parts within this district, and large quantities of teak timber are floated down it to the sea. The deltas between the two branches are "known to be the richest and most fertile landscapes in the peninsula." Formerly this enormous torrent during the dry season dwindled to a small stream, generally fordable, but since the construction of a dam or annicut across the river at the head of the delta, a never failing supply of water previously allowed to flow in useless abundance to the sea is retained for purposes of irrigation. Numerous small islands or *lunkas*, as they are vernacularly called, are formed in its course by the deposits of silt and as they are very fertile, and consequently valuable, their formation is assisted by the proprietors of adjacent lands, who plant in the bed of the river a species of long grass, which shooting up with great strength and luxuriance, obstructs the sand and mud in their progress downwards until in successive years they form islands of considerable area, and especially desirable in consequence of being suitable for producing tobacco (the most lucrative crop) in the highest perfection. During spring and the early part of summer the climate is very hot, but it does not appear that any exact register of the temperature has been made public. The wind during that period is either westerly or south westerly and sweeps along great quantities of very fine white sand rendering the season very disagreeable and oppressive. The south-west monsoon succeeds, and the river becomes swollen from the rains which fall in the more elevated region west of the Eastern Ghats. In October the north-east monsoon sets in and from that time until March, the climate is peculiarly healthy in the plains, but throughout the year a deadly malaria broods in the jungly valleys and gorges in the hills in the northern and north western part of the district.

Of the zoology of the country little has been made public, but it comprehends hyenas, jackals, foxes, antelopes, and hares. The deep jungly valleys of the mountains in the west and north of the district must harbour great

numbers of wild beasts, but the pestilential air of these secluded tracts renders it impracticable to explore them. Of domestic animals, sheep, which are numerous, are of small use, but the mutton is good. Hens are abundant, but their flesh is indifferent, poultry of all kinds are very plentiful.

The soil in the plain is generally a rich alluvial deposit, and along the banks of the river is the fertile dark coloured earth known by the name of the black cotton ground. The principal alimentary crops are rice, maize, millet, pulses of various kinds, oil-seeds, and sugarcane. Many European vegetables succeed during the cool season. Of commercial crops, the principal are tobacco, indigo, and cotton. The coconut-palm and palmyra-palm grow well in the sandy soil along the seashore. The quantity of cotton produced in one year according to official return was 4,150,000 pounds. The population is given under the article MADRAS.

Serious disturbances have occurred from time to time in the hill districts of this collectorate, but by the adoption of conciliatory measures, peace and good order appear to have been re-established. Rajahmundry the principal place, Samulikotta, and Coringa, the only towns of importance are described under their respective names in the alphabetical arrangement. The principal routes are—1. From north-east to south-west, from Calcutta through Visagapatam and Rajahmundry to Ellore, 2. from east to west, from Samulikotta, through Rajahmundry to Hyderabad 3. from south to north, from Rajahmundry to Nagpore. Rajahmundry is one of the five Northern Circars which were obtained by the French in 1763 and transferred in 1765 by the results of war to the British, to whom their possession was confirmed in 1765, by the emperor of Delhi.

**RAJAHMUNDY**—The principal place of the British district of the same name, presidency of Madras. It is situated on ground slightly elevated on the left or north bank of the river Godavary here a mile broad, and during inundations having a vast body of water which fills the channel from bank to bank and sweeps along in its course from the upper country rafts of wood, trees, and herds of cattle. The town consists of one principal street, about half a mile in length from north to south, and containing the chief bazar. The houses on each side are generally of one story, built of mud and tiled. From the principal street are several narrow lanes, running east and west. Those to the west proceed to the bank of the river in an oblique direction, and consist of mean houses, built of mud and tiled, and containing in some few places a larger description of dwelling with upper stories and in those reside the zamindars or land holders of the vicinity, and some are inhabited by wealthy traders, principally Brahmans. The streets on the east side of the bazar are

# RAJ

narrow and very irregular, and inhabited by people of various denominations, but principally Gentoos. The fort, situate north of the town, has a square ground plan, with high walls of mud, and a ditch now partially filled up. It contains the barracks, hospital, jail, magazine and the lines of the garrison. The jail is very substantially built, and fire-proof, there being no wood in its construction except for the doors and windows, and is capable of containing 400 persons. Within the fort are also the court-house and lodges for European officers. The inhabitants are supplied from the river with water for drinking and for ordinary purposes, as that of the wells is brackish and the tanks are an imperfect resource as they sometimes become dry. The population is estimated at from 16 000 to 20 000 of whom the Mussulmans form but a small and indigent class, though numerous mosques, still to be seen indicate them to have been formerly numerous and wealthy. Distance from Ellore, N. E. 50 miles. Madras N. E. 285 Calcutta, S. W., 580. Lat. 17 long 81 50'

**RAJAHPOLLIAM**—A town in the British district of Tinnevely presidency of Madras 51 miles N. W. of Tinnevely. Lat. 8° 27' long 77 31

**RAJAHPOOR**—A town in Oude situate on the right bank of the Ghogra river and 50 miles N. E. from Lucknow. Lat. 27 30' long 81 20'

**RAJAKHAIRA** in the territory of Dhol poor a town the principal place of a small district of the same name. The rana or prince of Gohud, having by treaty in 1804 ceded the fort of Gohud, with the districts dependent on it, to the East-India Company was granted the small district of Rajakhaira, with that of Baros and Dholpoor and these now form the raj or territory held by the rana of Dholpoor. Rajakhaira is 23 miles N. E. of the town of Dholpoor, 20 S. E. of Agra. Lat. 26 5. long 78 15

**RAJAM**—A town in the British district of Vizagapatam, presidency of Madras, 58 miles N. E. of Vizagapatam. Lat. 18 27' long 83° 44'

**RAJAORI or RAJAWUR**, in the north of the Punjab, a town situate on the banks of a stream which rises in the Pir Panjal, or mountain bounding Cashmere on the south, falls into the Chenab. The houses are generally built of mud, strengthened with frames of timber, but a few of those of the wealthier classes are of brick. Elevation above the sea 2 800 feet. Lat. 33° 19' long. 74 21

**RAJAPPOOR**—A town on the coast of Bombay in the district of Jijgaera, or territory of the Hubma, situate on the northern point of land forming the entrance of the harbour of Rajapoor. Lat. 18 15', long. 73 8'—See also **JIJGAERA**.

**RAJAPPOOR**—A town in the British

district of Ratnagerah, presidency of Bombay 30 miles S. E. by S of Ratnagerah. Lat. 18° 39' long 78 35'

**RAJAPPOOR**, in the British district of Banda, lieut. gov. of the N. W. Provinces, a small town with bazar on the route from Allahabad cantonment to that of Banda, 15 miles W. of the former 60 E. of the latter. Here is a ferry across the Jumna, the bed of which is sandy, and about 800 yards wide, with the left bank sloping the right steep. In the dry season the stream occupies about half the bed. Lat. 25 24 long 81 14

**RAJAPPORE**, in the British district of Goruckpore, lieut. gov. of the N. W. Provinces, a small town on the left bank of the Ghogra, at the confluence of the Rajtee. It contains, according to Buchanan, 150 houses, or rather huts. Distance 4 E. from Goruckpore cantonment 35 miles. Lat. 26 14 long 83 48

**RAJARAMPORE**—A town in the British district of Dinajpore lieut. gov. of Bengal five miles N. E. of Dinajpore. Lat. 25 36, long 88° 41'

**RAJAURA**, in the British district of Agra, lieut. gov. of the N. W. Provinces, a town on the right bank of the Jumna, immediately below the embouchure of the Banu Outughan, and 33 miles S. E. of the city of Agra. Lat. 26 58' long 78 32'

**RAJBAREE**—A town in the British district of Cuttack lieut. gov. of Bengal, 55 miles E. N. E. of Cuttack. Lat. 20° 42', long 86 44

**RAJEAKA**, in the British district of Goorgon lieut. gov. of the N. W. Provinces, a village on the route from Narnul to Rewaree, and six miles S. W. of the latter. Lat. 28 8', long 76 35

**RAJEHPPOOR**, in the British district of Furruckabad, lieut. gov. of the N. W. Provinces, a village on the route from Calpee to Futtehgurh and nine miles S. of the latter. Lat. 27 14 long 79 42'

**RAJEPOOLAH** in Sirhind, a town on the route from Umballa to Ludiana and 13 miles N. W. of the former place. It has grown up about a palace built by one of the Mogul emperors and hence its name. There is a bazar in the town, which is well supplied with water and the surrounding country level and fertile, affords abundant supplies. Hajepoorah is distant N. W. from Calcutta 1,633 miles. Lat. 30 39, long 76 41

**RAJESHAYE**, a British district within the lieut. gov. of Bengal is bounded on the north by the British district of Dinajpore, on the north-east by the British district of Bagura or Bogra on the east and south-east by the British district of Pabna on the south by the Podda or Ganges, dividing it from the British district of Nadia, on the south west by the same stream, dividing it from the British district of Moorshedabad, and on the west by

## RAJ

the British district Malda. It lies between lat.  $24^{\circ} 0' - 24^{\circ} 58'$ , long  $86^{\circ} 18' - 89^{\circ} 20'$  is sixty-two miles in length from east to west, and fifty in breadth. The area, according to official statement, is 2,084 square miles. It is a very moist tract, having numerous rivers streaming from the Himalaya, attains north of it. The principal are the Ganges and the Mahananda. The other rivers traversing the district are the Attre, the Jubbna, the Nagar, the Burrui, and the Naryud receiving the united drainage of the jhils or swampy lakes of Maunda, Dulahari and Chilm. During the periodical inundations the district is intersected by numerous other watercourses the channels of which are dry for the greater part of the year. Many of these watercourses stagnating give rise to swamps or jhils, of which that of Chilm is the largest extending during the rains, in a direction from south east to north west, about twenty five miles with an average breadth of about five one half being comprised within this district the other half within the neighbouring district of Pubna. Two others, the jhil of Dulahari and that of Maunda, are each about eight miles in length and three in breadth and others of inferior dimensions are numerous and there are also some tanks, or artificial pieces of water of considerable dimensions.

Of wild animals there are the tiger leopard deer, wild buffalo wild swine, which two last cause great havoc in cultivated grounds. The principal domestic animals are the buffalo, cow, goat, and sheep. Rice is the staple crop but there is considerable cultivation of wheat, oats, barley pulse of various kinds oil-seeds, cucurbitaceous plants, sweet potatoes hemp yarn, onion garlic, capscum turmeric, ginger, sugarcane, pine apple. Of fruit-trees, there are the mango jak (*Artocarpus integrifolia*) tamarind pomegranate, lemon and citron. The coconut and betelnut are cultivated, but they are neither common nor produced to great perfection. Of articles of commerce, the most important are indigo and silk of which there are large annual exports. The population is given under the article BENGAL. Ballia, the locality of the civil establishment of the district, and Nator the only places which can be called towns, are described under their respective names in the alphabetical arrangement. The principal routes are 1 that from south to north from Calcutta to Dargaeeling, 2 from south west to north east, from Berhampoor to Jumalpoor. The district was ceded to the East-India Company by the grant of the dewanny made by the emperor of Delhi in 1765.

**RAJSEER**, or **RAJAGRHA**, in the British district of Behar, lieut.-gov. of Bengal, a small town denominated from its containing the Rajagria, or royal palace of the ancient sovereigns of Magadha or Behar. It is situated amidst the summits of the Rajagria hills, and near the north-western extremity of the range,

and on the huge and many rampart of an old fortress. Within the enclosure of the fort are numerous large mounds, probably the ruins of the residences of Jaraasandha and his court as that monarch the paramount sovereign of India, is considered to have here had his seat of government. Around the enclosure are several great mounds, probably also the ruins of buildings. In the vicinity of this place is a mound four miles long 150 feet broad at the base and twelve feet high. It now serves to dam up the inundation from the periodical rains and thus form an artificial lake but, according to Buchanan its main purpose originally was to serve as a causeway to the royal residence. At a short distance south of the town are numerous hot springs the water of which has a temperature of about 108°. The number of houses has been computed at 800 which according to the usually assumed average of inmates to each would assign it a population of 4,000 persons. **Rajagria** is 40 miles S. of Patna Lat.  $25^{\circ} 2'$  long  $85^{\circ} 20'$ .

**RAJGHAT**, in the south western corner of the Debra Doon, a village with a ferry over the Jumna, there, when crossed by Moorcroft in the middle of February, about 100 feet broad. The ferry is a short distance below the confluence of the Guree and Jumna. Elevation above the sea 1,516 feet. Lat.  $30^{\circ} 26'$  long  $77^{\circ} 45'$ .

**RAJ GHAT** in the British district of Boondelshuhut lieut. gov. of the N.W. Provinces, a village on the right bank of the Ganges, 73 miles S.E. of Delhi Lat.  $28^{\circ} 14'$  long  $78^{\circ} 25'$ .

**RAJGHUR**.—A town in Guzerat, or dominions of the Guicowar 30 miles N.E. from Darda, and 72 miles E.S.E. from Ahmedabad Lat.  $22^{\circ} 31'$  long  $73^{\circ} 38'$ .

**RAJGHUR**.—A town in the lapsed territory of Nagpoor situate on the right bank of the Wen Gunga river and 88 miles S.S.E. from Nagpoor Lat.  $20^{\circ} 8'$ , long  $79^{\circ} 49'$ .

**RAJGHUR**.—A town in the Rajpoot state of Oodeypoor or Meywar situate on the right bank of the Banas river and 77 miles S.S.E. from Ajmeer Lat.  $25^{\circ} 29'$  long  $75^{\circ} 11'$ .

**RAJGUR** in the territory of the rajah of Puttuala, a fort two miles from the right bank of the river Guree, a quadrangle built of un cemented stone, and sixty-six feet long and fifty-five wide. Elevation above the sea 7175 feet. Lat.  $20^{\circ} 53'$  long  $77^{\circ} 14'$ .

**RAJGUR**.—A town of Baghelond in the native state of Rewah situate on the left bank of the Bone river and 54 miles E. by N from Rewah Lat.  $24^{\circ} 35'$  long  $83^{\circ} 18'$ .

**RAJGURH**.—A town in the native state of Gwalior or territory of Scindia, 75 miles S.W. by S. from Gwalior and 68 miles W. by S. from Jhannag Lat.  $23^{\circ} 20'$ , long  $77^{\circ} 38'$ .

**RAJGURH**, in Sirmoor, a ruined fort below

## RAJ

longing to the rajah of that state. It is situated on a natural terrace or flat projection from the side of a mountain and is of a square outline with a tower at each corner about forty feet high and twenty square. Inside along the inclosing wall, are the remains of buildings to accommodate the inmates, the area in the middle being about forty feet square. The whole structure is of slate rock very neatly cut and bonded throughout with large beams, put together in a substantial and workmanlike manner. It was fired and nearly demolished by the Goorkhas in 1814. Elevation above the sea 7116 feet. Lat. 30 52 long 77 23

**RAJGURE** in the Rajpoot state of Alwar under the management of the Governor General's agent for Rajpootana, a town on the route from Nussarabad to Muttra, and 76 miles S.W. of the latter. It is situated on an eminence surmounted by a large fort, and rising abruptly from the bottom of a valley inclosed by steep hills. Troops can obtain water and supplies here in abundance. The road to the north east, or towards Muttra, is sandy and stony to the south west, or towards Nussarabad, good. Lat 27 14, long 76 42

**RAJGURE**, in the British district of Ajmer, lieut. gov. of the N.W. Provinces, a village, the principal place of a pergunnah of the same name, according to official return having a population of 12,840 persons. According to Jacquemont, here are the ruins of a fortress, the history of which is altogether unknown. The edifice itself is insignificant but the inclosing rampart is lofty and massive constructed of great masses of rough stone, and environing an extensive area. Contiguous is a small lake apparently artificial and altogether the site is delightful. Distances S. from Ajmer 10 miles, from Nussarabad W. max. Lat 26 19, long 74 44

**RAJGUREH**—A town in the Rajpoot state of Bikaner 140 miles E.N.E. from Bikaner and 40 miles S.S.W. from Hissar. Lat. 28 33 long. 75 31

**RAJGUREH**—A town of Malwa meriting notice only as the residence of the rawul or chief inheriting a share of the tract called Omurwarra. An account of the mode of territorial division and such other particulars as deserve mention will be found under the article OMURWARA. Recently the affairs of the rawul fell into that state of confusion not unusual in the East, and after the failure of some milder expedients for restoring them it became necessary for the British government temporarily to assume the management, and assign a stipend for the support of the chief. Lat. 23 59' long 76 49'

**RAJHLER**, in Sirhind, a village on the route from Hansi to Ludhiana, and 56 miles N. of the former town. It is situated on a branch of the river Guggur in a low, level

country. Distant N.W. from Calcutta 1,032 miles. Lat. 29° 52', long 76° 8'

**RAJHPUR**, in the territory of Alwar, under the political management of the Governor-General's agent for Rajpootana, a small town on the route from the town of Alwar to Jeypore, and 55 miles N.E. of the latter. It has a fort situated on an eminence rising abruptly from the plain. Lat. 27 10' long 76 38'

**RAJKOTE**, in the peninsula of Kattywar, province of Guzerat, a town in the prant or district of Hallar. The territory annexed to it contains fifty-five villages, and a population of 20,000. It belongs to a Rajpoot thakoor or chief, who has an annual income of \$4,600 rupees, out of which he pays an annual tribute of 17,000 rupees to the British government. A church has been erected in the town for the accommodation of the Christian community. Distance from Ahmedabad, S.W. 125 miles, Baroda, W., 160. Lat. 22 16, long 70 50'

**RAJMAHAL**, in the British district of Bhawalpore, lieut. gov. of Bengal a town situated on the right bank of the Ganges and on the main line of railway now under construction from Calcutta and the valley of the Ganges to Delhi and the north west frontier. The site of the town is a bank of considerable elevation and steepness, round which the Ganges, here at its greatest magnitude, sweeps with great violence, and sometimes runs away large portions of the land. The place is principally remarkable for the ruins of a palace built by Shahjehan's son Shuja, viceroy of Bengal. The Jamana Masjid, or principal mosque, built by Man Singh, viceroy of Akbar is a spacious building of imposing aspect, but of rude execution. It is 188 feet in length, and sixty wide. Another mosque of inferior size was built by Fatahsing Khan, a rival of Man Singh. Here, also are the ruins of a palace built by Cosim Ali, the scotchbar of Bengal raised and subsequently expelled by the East-India Company. The general aspect of the town is ruinous and dismal as it is now a collection of wretched houses or huts, dispersed amongst twelve market-places, situated at considerable and inconvenient distances from each other. The permanent population is estimated at about 30,000 persons and the transitory population is considerable the number of travellers by land and water being great. The supply of provisions to such passengers is the chief support to the town.

Rajmahal is considered by Wilford as a place of great antiquity and identical with Rajagriha built by Mahavama, brother of Krishna, who according to Hindoo chronology, is conjectured to have lived 3101 years B.C. Buchanan on the other hand, mentions that the natives consider the place as of very recent date owing its origin to Man Singh, the Rajpoot viceroy of Akbar, and hence the name of Akhambad given to it in honour of

## RAJ

the Padabah, and generally used by the Mussulmans to designate it. In the reign of Shahjahan, his son Shuja held the same high trust, until defeated and expelled by his brother Aurangzebe. It was occupied by the British troops after they had, at Oodwa Nuliah, forced the lines of Coesim Ali, in 1763 and was formally ceded to the East-India Company by the firman of Shah Alum in 1765, granting them the dewanny of Bengal. Distant N W from Calcutta, by Barhampoor 196 miles by water, by the course of the Ganges, 249. Lat.  $25^{\circ} 1'$ , long.  $87^{\circ} 50'$ . In June, 1855, during a period of profound tranquillity, a fearful insurrection broke out among the tribes of the Rajmahal hills, who suddenly descended into the plains and carried devastation in every direction. In this outbreak the Sonthals appear to have been the prime movers. These people are described as frank and indomitable, but at the same time as simple and unlettered. They are stated to have been greatly oppressed by the exactions of the Mahajans or money lenders of the plains and as they are represented as incapable of appreciating the adjustment of a disputed demand except by the most simple mode, they were generally overreached in the local law courts in endeavouring to obtain redress for their wrongs. To such grievances has been ascribed the origin of the insurrection. It was not suppressed until martial law had been proclaimed, and a considerable military force had been called out. Measures have been taken for the better administration of the disturbed districts.

**RAJNUGGUR**—A town in the Rajpoot state of Oodeypoor 39 miles N N E from Oodeypoor, and 107 miles S S W from Ajmeer. Lat.  $25^{\circ} 4'$ , long.  $74^{\circ} 2'$ .

**RAJNUGUR**, in Bundelkund a town in the raj of Chutterpore, hence often called the raj of Rajnugur. It is situate 85 miles S. Calpee. Lat.  $24^{\circ} 52'$ , long.  $80^{\circ}$ .

**RAJNUGUR**—A town in the British district of Silhet, lieut.-gov. of Bengal 26 miles S. of Silhet. Lat.  $24^{\circ} 32'$ , long.  $91^{\circ} 52'$ .

**RAJOOONDUR**—A town in Hyderabad or dominions of the Nizam, 23 miles E.S.E. from Hyderabad, and 108 miles N N E. from Kurnool. Lat.  $17^{\circ} 12'$ , long.  $78^{\circ} 51'$ .

**RAJOORA**—A town in Hyderabad, or dominions of the Nizam, situate on the right bank of the Wain Gunge river, and 180 miles N by E from Hyderabad. Lat.  $19^{\circ} 49'$ , long.  $79^{\circ} 36'$ .

**RAJOORY**—A town in Hyderabad or territory of the Nizam 138 miles N W by W from Hyderabad, and 100 miles N E from Sholapoor. Lat.  $18^{\circ} 40'$ , long.  $77^{\circ}$ .

**RAJPEEPLEA**—A petty Rajpoot state in the Rawa Canute division of Guzerat. It is bounded on the north by the Nerbudda river on the east by the district of Akzamee, on

the west by the British collectorate of Broach on the south by the Guicowar's district of Wunsrae, and the district of Mandavee, now incorporated with the collectorate of Surat. It lies between lat.  $21^{\circ} 25'$  and  $21^{\circ} 59'$  and long.  $73^{\circ} 8'$  and  $74^{\circ}$ . The area is 1 650 square miles, inhabited by a population of 122,100. In 1855 the prime minister of the rajah having been detected in certain fraudulent practices, was dismissed by the British government, and the rajah refusing to nominate a successor for their approval, his possessions were placed in sequestration.

Many parts of the state are inhabited by a wild race composed of Rajpoots and Bheels, but the lowlands contain a large population of Koonbees, belonging to the industrious portion of the agricultural peasantry whose villages indicate, from their flourishing condition the industry peculiar to that class. It is watered by the river Kurgun on which is situated the capital, Nandode. The sovereigns of Delhi endeavoured at an early period to impose a tribute upon Rajpeepia. The attempt was made without success, but its rulers agreed to keep up a body of horse and foot, whose services should be available when required. Akbar first established a tribute in lieu of this force but it was paid only so long as authority was retained in the country by the Mahometan rulers. Subsequently Darnages Row Guicowar, with the consent of the Peshwa, revived the claim and the rajah consented to pay annually the sum of 40 000 rupees to the Guicowar state. Thus Rajpeepia was constituted one of the original tributary possessions obtained by the Guicowar family on the establishment of its power in Guzerat and from the year 1764 to 1780 the Guicowar continued to receive tribute to the amount above stated. From the last-named period the successive rulers of Guzerat availed themselves of various favourable opportunities for increasing the amount, until it finally reached a lac of rupees, a sum altogether disproportionate to the ability of the Rajpeepia state to pay. In 1822 the amount of tribute was fixed at 60 000 rupees. An agreement was also entered into for discharging the arrears, and to secure the fulfilment of the revised engagement, a receiver of all the revenues was appointed under British guarantee, which arrangement still prevails. For many years the state was a prey to internal dissensions, owing to the claims set up by rival candidates to the gaddie. Ram Sing, whom his father, Ajeeb Sing had intended to set aside was placed on the gaddie by the aid of his Arab troops, but becoming unfit to conduct the business of the state, the sanction of the British government was given to an arrangement by which Pertaub assumed the management of affairs in the name of his disqualified parent. The legitimacy of Pertaub was disputed by his uncle Nhar Sing, who established his allegation, and laid claim to succeed as rightful heir, but being blind, his eldest son, Vasee-

15 251, Joudpore, 85 673 Jhallawar, 2 200, Kotah 4 339 Rhoondia, 2,291 Alwar 3 578, Bikanoor 17 676 Jaisalmer, 12,252 Kumbhar garh, 734 Banawarra, 1 440, Pertaiburg, 1 457 Doongerpore, 1 000 Kerowlee 1 878 Serches 3,024, giving a total of 114,891 square miles.

The widely-spread sept of Raypoots are considered offshoots from the Kshatriyas one of the four great castes into which the Hindoos were originally divided. In the dim and uncertain light in which Hindoo history lies previously to the Mahomedan invasion in the tenth century it is not safe to form any judgment as to the period when the Raypoots appeared as a distinct race. Their origin is by Hindoo tradition placed in Mount Aboc, bordering on Gueserat. Their power and renown appear to have been at their acme about the close of the twelfth century when Ajmere and Delhi were held in union by one of their princes, Kunnou by another, Gueserat by a third but their power soon fell before the enthusiasm ferocity and military qualities of the Mussulmans. Pirthi Raj the sovereign of Ajmere and Delhi in 1191 defeated at Tirout Shhabuddin Muhammed sultan of Ghor but was in 1193 defeated by that monarch in a great battle and being taken prisoner, was put to death. Following out his success, Shhabuddin in 1194 defeated Jain Chandra, the Raypoot rajah of Kunnou, and by these shocks, the sway of the Raypoots was restricted within limits nearly corresponding to those which form their present boundaries. Besides the tract denominated Raypootana, the race is dispersed over many parts of India as in Bundelcund where many of the chiefs are Raypoots, and in Baghelkhand or Rewa, the rajah of which is a Baghel Raypoot also in Gurhwal, and several others of the hill states, and in the territory of Cutch. The able compiler of the Sanscrit Dictionary adverts with much felicity to the peculiar character of the Raypoots, arising from their situation as the military class of the original Hindoo system. "The other classes," he continues "though kept together as castes by community of religious rites, were mixed up in civil society and were under no chiefs except the ordinary magistrates of the country. But the Raypoots were born soldiers, each division had its hereditary leader and each formed a separate community like clans in other countries, the members of which were bound by many ties to their chiefs and to each other. The rules of caste still subsisted, and tended to render more powerful the cohesion just described. As the chiefs of these clans stood in the same relation to the rajah as their own relations did to them, the king nobility and soldiery all made one body united by the strongest feelings of kindred and military devotion. The sort of feudal system that prevailed among the Raypoots, gave additional stability to this attachment, and altogether produced the pride of birth the high spirit, and the romantic notions so striking in the military class of that period. Their enthusiasm

was kept up by the songs of their bards, and inflamed by frequent contests for glory or for love. They treated women with a respect unusual in the East, and were guided even towards their enemies by rules of honour, which it was disgraceful to violate. But although they had so many characteristics of chivalry, they had not the high strained sentiments and artificial refinements of our knights and were more in the spirit of Homer's heroes than of Spenser's or Ariosto's. If to these qualities we add a strong disposition to indolence (which may have existed formerly though not likely to figure in history) and make allowances for the effects of a long period of depression we have the character of the Raypoots of the present day who bear much the same resemblance to their ancestors that those did to the warriors of the Maha Bharat. With all the noble qualities of the early Raypoots was mixed a simplicity derived from the want of intercourse with other nations which rendered them inferior in practical ability and even in military efficiency to men actuated by much less elevated sentiments than theirs." Another intelligent writer who spent much time among the Raypoots, gives a less favourable account of them. He says, "The warlike character of the Raypoot has been very much overrated. There appears to be very little chivalrous feeling in his breast. By nature, Raypoots are generally powerful, muscular men active by habit and practising gymnastics (though, when not excited, inclined to indolence to a high degree) those who possess horses are generally good horsemen. Some are by constant practice, dexterous in the use of lance or sword, and individually, must be often superior to an enemy trained to act in combination, according to a rigid system of discipline. But amongst a large body of Raypoot horse, only a few would be found such superior men at arms, or so to venture. The Raypoots do not possess the cool determinate courage ready to dare any danger and requiring no artificial excitement. According to their own accounts even in their former attacks on caravans and towns surprise was their object and if successful they were equally oral and rapacious, showing no mercy to their captives and if they met with much resistance became as cowardly as they had before been violent and resorted to flight fighting was not their object. In all their single combats, and all assaults, they resorted to the excitement of opium before commencing battle. Their own bards describe the eyes of their heroes as being red from opium. Among their rajahs the treacherous murders of each other on record were numerous and long premeditated. There is probably much truth in this latter view. Many gloomy shadows darken the portrait of the Raypoot character and contrast painfully with the bright hues depicted in the earlier notices. Among them may be reckoned the practice of suttee under its most atrocious forms, the horrible holocaust being increased in cases where

## RAJ-RAK.

the rank and wealth of the deceased were thought to demand the addition by forcibly throwing numbers of females, either attendant slaves or retainers, into the flames, together with the chief victim.

As another fearful stain on Rajput manners, may be mentioned the once universally prevalent crime of female infanticide. To such an extent was it carried among some tribes, that, in 1813 when Macmurdo wrote it is stated that among the offspring of 8 000 married Jhara Rajputs not more than sixty females were living and it was considered probable that the number did not exceed thirty. To such an extent was this cruelty to daughters carried that they were sometimes destroyed after attaining adolescence the instinct of affection, even when strengthened by time and habit, being insufficient to overcome the suggestions of pride or imaginary expediency. In 1810 when the rajahs of Joudpore and Jeypore became suitors for a princess of Oodeypore and supported their pretensions by waging war against each other the family of the unhappy girl terminated the contest by putting her to death. Some years ago the marriageable daughter of the rajah of Bikaner was put to death under similar circumstances and from similar motives. A practice less hideously criminal, but most dangerous to themselves and others, is their addiction to the use of opium already adverted to, in which they indulge to a degree which first inflames their passions, then impairs their intellects leading in the last stage to permanent and hopeless fatuity. Before the debilitating drug has effected this dire result, it is to the Rajput the source of false courage and insensate desperation. Furious from its influence, Rajput armies have in many instances recklessly rushed on certain death and neither giving nor receiving quarter have perished to a man. The most appalling manifestation of this madness is denominated *joker*. It consists in an army or garrison reduced to despair and inflamed by opium, butchering their families in the first place, and then rushing on the enemy and fighting till destroyed. Notwithstanding however their deficiency in steady courage and their inferiority in discipline and tactics, it is certain that the Rajputs have succeeded in rendering themselves formidable to some of the greatest military characters of India. Baber exercised from boyhood in the most varied and fierce scenes of warfare, honestly relates the dumsy into which himself and his veterans were thrown by the approach of Rana Sanka, of Mewar the champion of Brahminism on whose overthrow the Mussulman sultan aspired, for the first time, the much-desired title of Ghazi or champion victorious in defence of the faith." Subsequently Sher Shah, the Afghan who defeated and dethroned Humayun the son of Baber and the padshah of Delhi, having invaded Rajputana at the head of 80 000 men, was fiercely encountered, and nearly repulsed by Kumbha, a Rajput chief, at the head of 10 000 of his clans. The Afghan

observed, after his deadly won victory, that he had almost lost the empire of India for a handful of fear alluding to a coarse grain forming the staple crop in the barren country which he found so obstinately defended. In more recent times, the Rajputs have scarcely sustained their former reputation.

Notwithstanding their many strongholds, their numerous forces, and boasted military prowess, they offered little resistance to the Mahrattas who at will desolated their lands, until shielded by the British power. Some of the Rajput states were brought into connection with the British government early in the present century by the Marquis of Wellesley. His successor Sir George Barlow adopted a different policy but experience having manifested the wisdom of that of the previous Governor-General it was resumed by the Marquis of Hastings and these states became generally subject to British influence, and entitled to the benefit of British protection. The required powers are exercised through an officer called the Governor-General's agent for the states of Rajputana. The connection appears to have been greatly beneficial to the country. European principles of justice and policy are gradually making way. Arrangements have been introduced for the decision of international questions as well as for the general administration of justice, and are said to be working well.

**RAJULA**—A town in the peninsula of Kattywar province of Guzerat, in the prant or district of Babriwar. Distance from Ahmedabad S W 155 miles, Baroda 145. Lat. 21° 2', long 71° 28'.

**RAJULDESIR**, in the Rajput state of Beekanser a town on the route from Rajnagarh to the town of Beekanser and 75 miles E. of the latter. It has four towers for its defence and contains 283 houses, and six wells 100 feet deep. Lat. 28° 1' long 74° 34'.

**RAJUMPEIT**—A town in Hyderabad, or territory of the Nizam, 65 miles N by W from Hyderabad, and 166 miles E. by N from Shulapoor. Lat. 18° 17', long 78° 21'.

**RAJUNPOOR**—A town in the native state of Bhowalpoor situate on the left bank of the Indus river and 114 miles S.W. by W from Bhowalpoor. Lat. 28° 31' long 70° 10'.

**RAJUR**—A town in the territory belonging to Ali Moored, 27 miles S.E. from the left bank of the Indus, and 27 miles S.E. by E. from Bukkar. Lat. 27° 20' long 69° 18'.

**RAKCHAN**, in Buzahr a village situate in the valley of the Buzma, on the right bank of the river of that name, and near the confluence of a stream called the Gor. The site of the village is striking and not unpleasant, at the western extremity of a glen and at the base of a huge mass of bare rocks, which rises abruptly in numerous black spires above the village. Elevation above the sea 10,456 feet. Lat. 31° 22' long 78° 27'.

# RAK—RAM

**RAKHA**.—A town in Nepal, situate on the right bank of the Gunduck or Salagra river and 145 miles W N W from Khatmandoo Lat. 28 37, long 83 13

**RAKISHBOON**.—A town in Hyderabad, or dominions of the Nizam, situate on the right bank of the Godavary river and 37 miles S. by W from Jaulnah Lat. 19° 20' long 75° 46'

**RAKRI**, in the British district of Alighurh, lieut. gov. of the N W Provinces, a village 12 miles S.E. of the cantonment of Alighurh Lat. 27 46', long 78 15

**RALA**.—A town in the British district of Arracan 22 miles N W by W of Arracan Lat. 20 51 long 93 8

**RAIDANG or WEST KAILAS**, in Bussahr a lofty mountain of Koonawar separating the valley of the Bupsa from that of the Tidung Gerard, who viewed it from the left bank of the Sutley gives the following description.—“Some idea of it may be formed by imagining an assemblage of pointed peaks, presenting a vast surface of snow viewed under an angle of twenty seven degrees, and at a distance of not more than five miles in a direct line The highest peak has an elevation of 21 103 feet. Lat 31° 29' long 78 21

**RALEIGAOON**.—A town in one of the sequestered districts of the native state of Hyderabad 85 miles S.E. from Ellohoopoor Lat. 20 27 long 78 36

**RAHOOPPOOR**, in the British district of Benares, lieut. gov. of the N W Provinces, a town on the route from Benares to Samseram five miles S.E. of the former Lat. 25 14, long 83 7

**RAMA**.—A town in the Rajpoot state of Jodhpoor 46 miles S S W from Jodhpoor and 128 miles W.S.W. from Ajmeer Lat. 25 41 long 72° 54

**RAMAGIRI** in the Mysore a town with a fort the principal place of a tallook or sub division of the same name. It is situate on the right or west side of the river Arkavati The fort is situate on a high rocky hill of granite and is capable of defence, yet it surrendered promptly A.D. 1791 to the British force which advanced against it Distant from Seringapatam, N.E. 48 miles, Bangalore, S.W. 25 Lat. 12 45' long 77 30'

**RAMAREE** in the British district of Kumaon, lieut. gov. of the N W Provinces, a village on the route from Almora to the frontier of South western Tibet, by the Juvahar Pass, 67 miles N.E. of the former 89 S.W. of the latter Lat. 29° 58' long 80° 9'

**RAMAS**.—A high bluff headland on the coast of Goa, 'forming in two level points when seen either from the northward or southward that called Faleo Cape is highest and first discernible, the other, less elevated, forms the extremity of the true cape, on which is a small fort belonging to the Portuguese.' Lat. 15° 5', long 75° 58'

**RAMA SERAI** in Gurhwal, a valley extending in a direction from north west to south-east, between lat. 30 46—30° 55, and long. 78 —78 12 It is about a mile wide, fertile, and well watered, and formerly was well cultivated and contained several good villages but of late years, in consequence of Goorkha devastation is nearly desolate, overrun with jungle, and full of wild beasts The Camalda river which flows down the valley falls into the Jumna on the right side

**RAMBUDRAPOOR**.—A town in Hyderabad or dominions of the Nizam situate on the left bank of the Godavary river and 168 miles E by N from Hyderabad. Lat 17 48 long 81 2'

**RAMDOORG**.—A town within the territories of Bombay, situate 54 miles E by N from Belgaum and 66 miles S S W from Besejapoor Lat. 15 58 long 75 22'

**RAMESUR**, in the British district of Kumaon, lieut. gov. of the N W Provinces, a village with a Hindoo temple at the confluence of the rivers Sarjoo and Eastern Ram gunga. Elevation above the sea 1,500 feet. Lat 29 32' long 80 8'

**RAMESWARAM**.—An island at the western extremity of Adam's Bridge, forming the northern boundary of the Gulf of Manoor and extending in a direction nearly east and west, between Ceylon and the south-eastern coast of the peninsula of India. It is represented to be about fourteen miles in length from south east to north west and five in breadth. It is unsullivated and principally inhabited by Brahmans and their followers, who are supported by the profits derived from the great pagoda and other temples The entrance to the principal temple is through a fine gateway about 100 feet high and elaborately carved, its form being trapezoid. The workmanship is massive and regular and in a style of architecture resembling the Egyptian Within is a cloister having a passage between a triple row of pillars, to a square of about 600 feet, clustered all round, and into which the sacred temples open The whole is well built, and is one of the finest structures in India. It appears to be dedicated to the divinity Shiva, of whom according to Brahminical legend, Rameswara or Rama is an avatar or incarnation According to the Ramayana and other Puranic legends, Ravana, the demon tyrant of Lanka, having abducted Sita, the consort of Rama, the injured monarch pursued the ravisher, who carried off his prize to Lanka so that pursuit was stayed by the intervening sea, until “Nala, the son of fire, then commenced to make a bridge over the sea, and prayed his father that all the great stones, and other heavy articles necessary for the work, might be deprived of their weight and float on the sea. This prayer being granted, he soon completed the bridge, over which the troops marched to Lanka.” Such is the fabled origin of the long bank forming

## RAM.

the northern boundary of the Gulf of Manasar and called by the Brahmists *Ramas Bridge*, by the Mussulmans and Christians, *"Adam's Bridge."*

Near the town of Ramswaram is a fresh water lake, about three miles in circumference. The great pagoda is a celebrated place of pilgrimage, frequented by crowds from all parts of India. It is under the guardianship and management of a chief, styled Pandaram, who must observe celibacy through life, and on his death is succeeded by his master's son or should there not be any such by the next eldest collateral male relative. The image of the deity is every morning drenched with water brought on the shoulders of lakhs from the Ganges, and poured over it, and which having received additional sanctity by this rite is sold to devotees at a high price. A splendid view of this pagoda is given by Daniell.

At the western extremity of the island is the small town of Paumbaum and between it and the mainland of India is a passage, formerly so beset with rocks and shoals as to be nearly unavailable for navigation. Measures for its improvement have recently been taken with success, of which some notice will be found under the article *LACKEADWEE*. According to local tradition this island was connected with the mainland of India until the early part of the fifteenth century when the connecting neck of land was partially swept away by the sea during a dreadful hurricane, and the breakers were brought to their present extent by a succession of similar eruptions. (Geological observation lends some support to this. The bottom consists in general of sandstone of the same kind as that on Ramswaram and the neighbouring part of the continent of India. The number of pilgrims visiting annually the pagoda is estimated at 30,000 the fixed population at 4,288 of whom 811 are Brahmins, 820 Mussulmans, 372 native Christians, other classes 2,485. The population would appear to be well lodged as the number of houses is considerable in proportion to its amount but these being constructed in a great measure to meet the resort of pilgrims a judgment framed with reference only to the accommodation thus provided would probably be fallacious. The town of Ramswaram is in lat. 9° 15' long 79° 21'.

**RAMGHAT** in the British district of Bolundshahur, least-gov of the N.W. Provinces, a town on the route from Allypore to Bareilly and 35 miles N.E. of the former situated on the right bank of the Ganges here crossed by ferry. The bed of the river is about a mile and a half wide, and the stream in the dry season usually occupies one-third of that space, and is sometimes divided into two or more channels. Ramghat is 80 miles S.E. of Delhi. Lat. 28° 9', long 78° 30'.

**RAMGHERRY** in Hyderabad, or territory of the Nizam, a town 110 miles N.E. of the city of Hyderabad. Lat. 18° 38' long 79° 39'.

**RAMGUNGA (EASTERN)** — A river rising in the British district of Kumaon, on the southern declivity of the main chain of the Himalaya, at an elevation of about 9,000 feet, and in lat. 30° 11' long 80° 8'. It holds a course generally southerly for about fifty-five miles, to Rametar where it falls into the Surjee on the left side. Its descent must be very rapid as the point of its confluence with the Surjee is estimated to be only 1,500 feet above the sea. The name of Ramgunga is often given to the united stream as far as its confluence with the Kalas. Webb who crossed it by a spar bridge, in lat. 29° 48' long 80° 12', about thirty miles from its source found it to be there unfordable during the rainy season, but ascertained that it could be forded at other times, when it had a depth of four feet. Twelve miles higher up the stream, it is crossed by the route from Almora to the Juhawar Pass into Tibet, and is there 'forded' except in the rains, when a rope bridge is thrown across it.

**RAMGUNGA (WESTERN)** — A river rising in the British district of Kumaon amidst the outer or lower group of the Himalaya, and in lat. 30° 6' long 79° 20'. The stream is formed by a junction of several small rills, flowing from various directions. The elevation of its remotest source above the sea does not appear to be ascertained but that of Dewales Khal, a temple situated on a summit two or three miles from it, is 7,144 feet. At the confluence with the Kalas the stream about five miles lower down the elevation is 3,388 feet. Its course for the first twenty miles is in a south-easterly direction, it then becomes south-westerly and as it continues to its exit from the hills, in lat. 29° 30' long 78° 49' at the distance of about ninety miles from its source. In this upper part of its course it receives numerous mountain streams on both the right and left sides. A short distance below its entrance into the plain and about 100 miles from its source it takes a westerly direction which it holds for fifteen miles, and in lat. 29° 17' long 78° 42' receives the Koh, a considerable feeder on the right side. At the town of Muradnagar, forty miles below the confluence, the Ramgunga, in the early part of December, when it is probably lowest, is described by Heber as a sluggish river as wide nearly as this place as the Ganges at Shrawabery but shallow and fordable. (Caden states that the bed is a mile wide here and that the stream in the dry season is usually divided into two or three channels, from one to three feet deep with uneven sandy bottom and that the passage in the wet season is made by ferry. Fifteen miles below this, it, in lat. 28° 41', long 79° 1' receives on the left side the Koma, a considerable stream but continues even after this accession fordable from the month of December to that of June sixty miles lower. Besides some feeders of less size, it receives on the left side the Sanku, and is not usually

## RAM

fordable below Jalalabad, seventy three miles further in lat. 27° 44', long 79° 40'. Sixty miles still lower, it on the left side receives the Deoha or Gurrah, a considerable stream. Ten miles below this last confluence, the Ramgunga falls into the Ganges on the left side, nearly opposite the ancient city of Kanouj, and in lat. 27° 7', long 80° 3'. Its total length of course is about 373 miles.

**RAMGUNGE**, in the territory of Oude, a village on the route from Cawnpore to Luck now, 16 miles N.E. of the former S.W. of the latter. Lat. 26° 37', long 80° 27'.

**RAMGUNJE**.—A town in the British district of Bulloah, lieutenant-governor of Bengal, 12 miles N. of Bulloah. Lat. 23° 3', long 90° 57'.

**RAMGUR**.—A town in the lapsed territory of Nagpore, 80 miles S. from Bustur, and 76 miles N. by E. from Rajahmundry. Lat. 18° 5' long 82°.

**RAMGURH**, otherwise called **HAZAREEBAGH**, formerly part of a collectorate of wider dimensions. In 1832 a general insurrection broke out on the south-west frontier of Bengal and extending to this locality the disturbed tracts comprised within the present district of Ramgurh were withdrawn from the operation of the ordinary regulations and annexed to the territory under the administration of the political agent for the south-western frontier of Bengal. Both the names by which the district is designated are derived from towns situate within its limits. It is bounded on the north by the British district Behar on the north-east by the British district Mungher, on the east by the British district Beerbhoom, on the south-east by the British district Pabna, on the south by the British district Chota Nagpore and on the south-west and west by the British district Palamow. It lies between lat. 23° 20'—24° 50', long 83° 50'—86° 35' is 175 miles in length from east to west, and ninety in breadth; the area is 8,524 square miles. Many groups of hills are dispersed over the district; there is also much undulating ground, consisting of plateaus of moderate extent, separated by gentle depressions. Of these plateaus one of the most extensive and elevated is that of Hazareebagh, nearly in the middle of the district and having it is stated, an elevation of 1,800 feet above the sea. Many of the mountains are of primitive formation—granite, quartz, or gneiss, but others, of later formation abound in coal and iron; the latter though melted to a great extent, is reputed not to be of the best quality. Lead-ore is said to have been discovered in the vicinity of Hazareebagh and it is conjectured that silver-ore may be obtained in the same place. In the vicinity of Hazareebagh are beds of very fine mica, from which large transparent laminae are obtained.

The whole country is very thinly peopled, inasmuch that Jacquemont, on one occasion

at least, scarcely observed a house in a day's journey, though travelling along the direct road from Calcutta to Benares. As far as the eye could reach nothing could be seen but thick forests the hairs of lions, tigers, leopards, bears, hyenas, foxes, jackals, wild dogs, wild buffaloes, wild kine, wild swine, hog deer and other kinds monkeys, porcupines, and some other quadrupeds of less importance. Tigers are particularly numerous and the dread of their ravages so great as sometimes to have impelled the inhabitants to desert their homes. Everywhere in these forests lurk the monstrous boa, and several venomous species of serpents, as the cobra de capello and karait. The timber is fine and together with the sal (*Shorea robusta*) are found a great variety of trees and plants unknown to Europeans. In many parts the forests are totally impenetrable and where of practicable access, the air during a portion of the year is so pestiferous as to cause almost certain death to those exposed to its influence. The winter and beginning of spring are the healthiest times, and are in consequence of the elevation, so cool that ice is formed on stagnant water.

The rivers are numerous but none of them of great volume. The principal drainage is to the south-east, towards the estuary of the Ganges, by the Damoada and its tributary the Barrackur the torrent flowing by Hazareebagh. Other streams flow northward as the Mohana and Leelajan, passing into Behar, others again westward discharging themselves into the river Koel and a few small tributaries find their way southward through the channel of the Soobunreeka river into the Bay of Bengal. This great diversity in the directions of the watercourses indicates that the general elevation of the district is greater than that of the tracts surrounding it.

The inhabitants are in a low state of civilization, and live, thinly scattered over this spacious country in small villages, consisting of wretched huts of hurdles, mud, and matting, covered with a thin roof of thatch.

The natives of these districts are principally agriculturists; many are occupied in trades of different kinds, and some are engaged as soldiers. They are in general temperate, industrious, and tolerably cleanly in their houses and persons.

There are scarcely any places in this district which can properly be denominated towns. Ramgurh and Hazareebagh which are the principal collections of dwellings, are described under their respective names in the alphabetical arrangement. The population will be found under the article **BENGAL**. The main course of communication from south-east to north-west, between Calcutta and the North Western Provinces, lies through this district, in two distinct lines nearly parallel, and at an average distance from each other of about twenty miles. That more to the south-west passes through Deoghar, Hazareebagh, Kumaumdar, and Kanachuttee the other line,

# RAM.

more to the north-east, is the grand trunk road, and passes through Doonars, Dhaurars, and Churparan, shortening the route about three miles. The district of Ramgurb is within the limits of the dewanny granted to the East-India Company in 1765 by Shah Alau, emperor of Delhi.

**RAMGURH**—A town within the district of the same name. As it communicates its name to the surrounding tract of country, it may be presumed to have been formerly a place of some importance but it is now utterly inconsiderable. Lat 23 42, long 85 30'

**RAMGURH** in the British district of Ramgurb, territory of Saugor and Nerbudda, lieut. gov. of the N W Provinces a town on the route from Sahagpur to Nagpur 45 miles S W by S. of the former Lat. 23° 49' long 81 1 The territory of which this town is the chief place forms a subdivision under the jurisdiction of the political agent for the Saugor and Nerbudda provinces. Its population is returned at 41766 The district was ceded to the British by the rajah of Nagpore, in communication of subsidy

**RAMGURH**—A town of Malwa, in the native state of Burhanpur, 21 miles S W from Burhanpur and 67 miles N from Dholia. Lat. 21 50 long 74 49'

**RAMGURH**, in the British district of Ajmer lieut gov of the N W Provinces, a town on the route from Ajmer to Ondkeypoor 39 miles S.S.W of the former Lat. 26° 59' long 74 32'

**RAMGURH**, in the Rajpoot territory of Shekhawatee, a town on the west frontier towards Beekaneer It is a thriving place neatly fortified, and contains the residences of several wealthy bankers Distance W from Delhi 140 miles, N W from Jeypore 100 E from Beekaneer 108. Lat. 28 9' long 75 5

**RAMGURH**—A town in the Rajpoot state of Jeypore 41 miles N W by W from Jeypore and 68 miles N E. by N from Ajmer Lat. 27 16' long 75 21

**RAMGURH**, in the Rajpoot territory of Alwar under the political management of the Governor General's agent for Rajpootana a town on the route from Alwar by way of Ferropore to Delhi and 95 miles S. of the latter Lat. 27 35, long 76 52'

**RAMGURH**, in the British district of Barot, territory of Sangar and Nerbudda, lieut. gov. of the N W Provinces, a town on the route from Barot to Kurgoon 54 miles W of the former Lat. 21 49' long 77 8'

**RAMGURH**—A town in the native state of Gwalior or territory of Scindia a family 36 miles N from Gwalior and 34 miles S.E. from Agra. Lat. 26 44, long 78 12'

**RAMGURH**—A town in the British district of Chittagong lieut. gov. of Bengal, 48 miles N by W of Chittagong Lat. 23, long 91 45'

**RAMGURH**, in the hill state of Hindoor, a fortress on the steep and high ridge which, rising from the left bank of the Sutlej has a south-easterly direction and ultimately joins the Himalaya. In the beginning of November 1814 at the commencement of the Gorkha war it was invested by the British army under General Ochterlony who by a course of tedious yet wonderfully energetic and laborious operations, succeeded in conveying battering guns up the precipitous and previously trackless declivity The defenses were in consequence speedily demolished and the garrison capitulated. Elevation above the sea 4084 feet. Distant N W from Calcutta 1,094 miles Lat. 31 5, long 78 51

**RAMGURH** in the Rajpoot state of Jaenmeer a fort and village 35 miles N W of the town of Jaenmeer is situate at the termination of a low rocky ridge of recent formation extending from Cutch in various ramifications, but generally in a northerly direction Ramgurb is in lat. 27 16' long 70 43'

**RAMGURH** in the British district of Kumaon, lieut gov of the N W Provinces, a village with a bungalow or public reception-house on the route from Almora to Bareilly and 19 miles S W of the former Water is scarce here supplies, however are abundant, though Heber was struck by the general indigence of the population This place had formerly a fort, as the name indicates but it has been allowed to fall to decay Elevation above the sea 4872 feet Lat. 29 27, long 79 37'

**RAMGURRAH**—A town of Bundelcund in the native state of Punnah situate 48 miles S by E. from the town of that name, and 69 miles N N.E. from Jubbulpore Lat 24 3, long 80 28'

**RAMGURTAL**, in the British district of Goruckpore lieut. gov of the N W Provinces, a pool or shallow lake close to the cantonment of Goruckpore At the close of the rainy season it is about six miles long and three broad, but even at that time is shallow and overgrown with weeds and in the shoaler parts with aquatic trees. As the hot, dry season advances the vegetation increases, and the water diminishes, and becomes dirty and crowded with reptiles and insects the decaying remains of which and of the vegetation, produce malaria. During the rainy season, when the pool and the contiguous river Rapties swell so as to communicate, this malaria is either mitigated or totally suspended Lat. 26 46' long 83° 34'

**RAMJUNDAH**—A town in the British district of Palamow lieut gov of Bengal, 24 miles W by S. of Palamow Lat. 23 46', long 83 40'

**RAMKOLA**, in the British district of Goruckpore, lieut. gov of the N W Provinces, a small town on the route from the cantonment of Goruckpore to Betija, 26 miles E. of

# RAM

the former, 54 W of the latter Buchanan styles it a market-town, yet elsewhere states that it does not deserve the name of town It has, however, a bazar Distant N W from Dinapore 119 miles Lat 26 50, long 83 50'

**RAMMAGHERRY**—A town in the British district of Madras, presidency of Madras, 53 miles N of Madras Lat 10 41, long 78 12'

**RAMMESSWUR**—A town in the British district of Pooree, lieut. gov of Bengal 28 miles N W by W of Juggurnaut Lat 20 1, long 85 38'

**RAMNAD** in the British district of Madras, presidency of Madras, a town the principal place of an extensive seminary or feudal estate of the same name, is situated five or six miles from the seacoast of Palk's Bay and about a mile and a half from the right bank of the river Vagai or Vigauru It is about two miles and a half in circumference, surrounded by a wall and a ditch, and defended by numerous small bastions but the works are now in a ruinous condition and the ditch nearly filled up Though the streets are narrow and ill contrived the houses are moderately well built There are a few mosques, which though not conspicuous, are by no means insignificant The fort is contiguous to the town on the west of it, and between them runs a wide street, with two rows of bazzars regularly built The ground plan of the fort is an equilateral quadrangle the sides of which respectively facing the cardinal points, are each half a mile in length and consist of a single wall twenty-seven feet high and five feet thick without rampart, but with loopholes, and surrounded by a ditch There are thirty two bastions and one gateway which is on the east side In the centre stands the palace or residence of the zamindar This fort was built about two hundred years ago, by Moghul Raja Ragunatha Setupathi, who at the same time constructed the large reservoir or tank on the north side Contiguous to the palace is a handsome residence, built by Colonel Martineau, who for nearly forty years commanded here, and near it a small but neat Protestant church kept in good repair The few principal streets, which are within the fort, are wide and airy There are, however, several mean streets, with mud built houses The number of inhabitants within the fort is about 5 000, principally dependent on the zamindar The only manufacturing industry worth notice in the town, is that of coarse cloths for native wear any other business is trade in provisions and wares for the supply of the population This place is garrisoned by a company of native troops It is a hot station, but the evenings are usually cool, from the influence of the sea-breeze, and altogether it is a very healthy place Distance from Palamkotta, N E 87 miles, Madras, S E, 60 Tanjore, S, 100 Madras, S W, 275 Lat 9 24, long 78 50'

**RAMNAGAR**, in the district of Aildeman, territory of Oude, a village on the route from Purbagurh to Fyranbad, 45 miles N of the former 18 S of the latter Butler estimates its population at 400, all Hindoos Lat 26 24 long 82 56'

**RAMNAGAR**, in the British district of Cawnpore, lieut. gov of the N W Provinces, a village on the route from the cantonment of Cawnpore to that of Futehgurh, and 12 miles N W of the former Lat 26 25, long 80 17

**RAMNAGHUR**—A town in Oude, situated on the right bank of the Gogra river, and 32 miles E N E from Lucknow Lat 27 3, long 81 28

**RAMNAGUR**—A town in the British district of Naddea, lieut. gov of Bengal, 96 miles N of Calcutta Lat 23 57' long 88 30'

**RAMNEGHR, or RAMNUGGUR**, in the Punjab a walled town close to the left or east bank of the Chenab stands on a spacious plain where during the reign of Runjeet Singh the Sikh troops frequently mustered for campaigns to the westward There is a ferry here across the Chenab which at its lowest season was found to be 300 yards wide, and for the most part nine feet deep running at the rate of a mile and a half an hour Two miles below the town there is, however a ford where the depth does not exceed three feet when the water is low This place was called Rasulnuggur or Prophet's Town, until stormed in 1778 by Maha Singh the father of Runjeet, when it received the present name, signifying the ' town of God. Lat 32 20' long 73 50'

**RAMNUGGUR**—A town in the dominions of Ghola Singh the ruler of Cashmere 95 miles S S E. from Srinagar and 100 miles N E from Lahore Lat 32 45', long 75 25'

**RAMNUGGUR**, in the British district of Goruckpore lieut. gov of the N W Provinces, a small town near the south-eastern frontier towards the British district of Sarun Distant S E from Goruckpore cantonment 50 miles Lat 26 10 long 84 2'

**RAMNUGGUR** in the British district of Minporee, lieut. gov of the N W Provinces a village on the route from the city of Agra to the cantonment of Minporee, and 25 miles W of the latter Lat 27 8, long 78 45'

**RAMNUGGER**—A town in the British district of Sarun lieut. gov of Bengal, 50 miles N N W of Bettiah Lat 27 9', long 84 25'

**RAMNUGGUR**—A town in the native state of Rewah situated on the left bank of the Sone river, and 23 miles S. from Rewah Lat 24 10', long 81 20'

**RAMNUGUR**, in the British district of Futehpore, lieut. gov of the N W Provinces, 822

# RAM.

a town on the right bank of the Ganges, 879 miles from Calcutta by way of the river and 71 miles by water above Allahabad. 24 miles by land E. of the town of Fatehpore. Lat. 25° 55' long. 81° 15'

**RAMNUGUR** in the British district of Allahabad, lieut. gov. of the N W Provinces, a small town on the route, by the Kutra Pass, from the cantonment of Allahabad to Bawa, and 26 miles S.E. of the former. Lat. 25° 15' long. 83° 11'

**RAMNUGUR**.—A town in Oude, situate on the right bank of the Gogra river and 55 miles E. from Lucknow. Lat. 26° 47' long. 81° 53'

**RAMNUGUR**, in the British district of Benares, lieut. gov. of the N W Provinces, a town on the right bank of the Ganges, and at present the residence of the titular rajah of Benares. The fort in which the rajah resides is a huge pile of building rising directly from fine ghats or flights of stairs giving access to the sacred stream. Ramnugur contains a population of 9 490 inhabitants, and is distant N W of Calcutta 678 miles by water or 850 taking the Sunderbund passage four miles S of the city of Benares, 425 from Calcutta by the new line of road. Lat. 25° 16' long. 83° 5'

**RAMNUGUR** in the British district of Bareilly lieut. gov. of the N W Provinces, a town on the route from Shahjehanpur to Pilibesheet, 40 miles N of the former. Lat. 28° 23' long. 79° 53'

**RAMOO**.—A town in the British district of Chittagong lieut. gov. of Bengal 68 miles S.S.E. of Chittagong. Lat. 21° 24' long. 92° 13'

**RAMOO SERAI**.—A town within the dominions of Gholab Singh, the ruler of Cashmere, 17 miles S. from Srinagar and 15 miles N from Jammu. Lat. 33° 50' long. 74° 56'

**RAMPOOR** in the British district of Saharunpoor lieut. gov. of Agra, a town the principal place of the pargannah of the same name, is in lat. 29° 43' long. 77° 31'

**RAMPOOR**.—A town in the British district of Malabar, presidency of Madras 71 miles E. by S of Cannanore. Lat. 11° 42' long. 76° 29'

**RAMPOOR**.—A town in Cusarat, or dominions of the Guicowar 64 miles E. by N from Baroda, and 112 miles E.S.E. from Ahmedabad. Lat. 22° 26' long. 74° 12'

**RAMPOOR**.—A town in the British district of Bellary, presidency of Madras 63 miles N.E. by N of Bellary. Lat. 13° 56' long. 77° 24'

**RAMPOOR**, in the British district of Bareilly lieut. gov. of the N W Provinces, a village on the route from the town of Bareilly to Seetapore, and 32 miles S.W. of the former. Lat. 28° 15' long. 79° 57'

**RAMPOOR**, in the British district of Muttra, lieut. gov. of the N W Provinces, a

town on the right bank of the river Jumna, 23 miles N of Muttra. Lat. 27° 50' long. 77° 38'

**RAMPOOR**, in the British district of Mirzapoor lieut. gov. of the N W Provinces, a village on the left bank of the Ganges, 12 miles N W of Mirzapoor 733 N W of Calcutta by water. Lat. 25° 14' long. 83° 30'

**RAMPOOR** in the British district of Allypore lieut. gov. of the N W Provinces a village on the route from the city of Agra to Bareilly and 45 miles N E of the former. Lat. 27° 43' long. 78° 38'

**RAMPOOR** in the British district of Sahebpur lieut. gov. of the N W Provinces, a town the principal place of the pargannah of the same name, is in lat. 29° 43' long. 77° 31'

**RAMPOOR**, in the district of Saloon territory of Oude a town on the route from Cawnpore to Portaburgh 26 miles N W of the latter. Butler estimates the population at 4 000 principally cultivators, 1 000 of the number being Mussulmans. Lat. 25° 53' long. 81° 47'

**RAMPOOR** in the district of Ahmudan, territory of Oude a town near the north-east frontier towards the British district of Goruckpore. A considerable quantity of sugar is made there. Butler estimates the population at 1 000 including 300 Mussulmans. Lat. 26° 36' long. 82° 12'

**RAMPOOR**.—A town of Bussahir in the division of Koonawar situate on the left bank of the Buthji river and 36 miles N E. from Samla. Lat. 31° 27' long. 77° 41'

**RAMPOOR**.—A town of Baghelkund in the native state of Rewah, situate on the left bank of the Sone river and 20 miles S E from Rewah. Lat. 24° 19' long. 81° 33'

**RAMPOOR**.—A town in Oude situate on the left bank of the Gogra river and 133 miles N N W from Lucknow. Lat. 28° 46' long. 80° 23'

**RAMPOOR**.—A town in the lapsed territory of Nagpore 98 miles N W from Nagpore and 47 miles N E from Housengabad. Lat. 22° 18' long. 78° 17'

**RAMPOOR**.—A town in Oude, situate on the left bank of the Chuwika river and 40 miles N E. by N from Lucknow. Lat. 27° 20' long. 81° 22'

**RAMPOOR**.—A town in Nepal, situate on the right bank of the Gunduck or Salagra river and 23 miles W from Khatmandoo. Lat. 27° 45' long. 83° 45'

**RAMPOOR**.—A town in the British district of Rajshaye, presidency of Bengal, 125 miles N of Calcutta. Lat. 24° 25' long. 88° 35'

**RAMPOOR**, within the British division of Rohilkhand, an extensive Bel or Jaghira, is bounded on the west and north by the British district of Moradabad on the north-east and south-east by the British district of Bareilly.

## RAM

It lies between lat 28° 30'—29° 11', long 78° 55'—79° 30', and has an area of 720 square miles. It is a level, fertile country abundantly supplied with water in its northern division by the rivers Koila and Nahel, both of which hold a course generally southerly and nearly parallel to each other the latter on an average about ten miles east of the former. The southern division is irrigated by the Rangunga which, after receiving the waters of the Koila, traverses this quarter of the territory in a south-easterly direction. The northern part of the district adjoins the Terai, or tract of marshy forest which extends along the base of the mountains, and is much overrun with jungle, wood, and grass of such luxuriant growth as to be sufficient to conceal a man on horseback. The air in consequence is dreadfully pestilential, except in the coldest part of winter and the time of the heaviest rains. The malaria acts very unfavourably on the population, who are described by Heber as "a very ugly and miserable race of human beings, with large heads and particularly prominent ears, flat noses, tumid bellies slender limbs, and sallow complexions and have scarcely any garments but a blanket of black wool." The general slope of the country is from north to south, as indicated by the descent of the rivers in that direction as well as from actual measurement, Raddurpoor on the northern frontier in lat 28° 58', having an elevation of 630 feet above the sea, whilst at the town of Rampoor a few miles farther south, in lat. 28° 48' the elevation is but 546 feet. David son describes the country in the vicinity of the town of Rampoor as exceedingly 'rich and beautiful. The eye wanders with delight over one continuous sheet of ripening corn, interspersed with groves of mango, clumps of bamboos, and little villages. The general thriving cultivation of the country bears favourable testimony to the industry and intelligence of the Patana, the principal occupants of the soil. The population has been computed at upwards of 320 000. The annual revenue is at present estimated at 100 000*l*. The nawab maintains a military force of 500 cavalry and 1,447 infantry.

This territory was possessed by Fyzoola Khan, a chieftain who gave considerable trouble both to the Vizier and the British government, during the administration of the latter by Warren Hastings. On the death of that personage in 1794 the pretensions of his eldest son and lawful successor were opposed by a younger brother, who raised a rebellion made prisoner the rightful heir and subsequently murdered him. A British force under Sir Robert Abercrombie defeated that of the usurper, an event followed by the depoual of the latter and the grant of a jaghire to the infant son of the murdered chieftain. On the death of the late chief, in 1840 without direct male heir, the right of a daughter to the succession was discussed and rejected in favour of the next male claimant, Mahomed Saeed Khan,

who had served the British government in the important office of deputy-collector of Budson. Some disturbances took place previously to the final arrangement of the succession, in which the minister of the deceased chieftain and some of his dependants and followers were murdered. Their families were provided for by the new ruler who according to report, exercised his authority mildly and judiciously until the year 1854, when he was succeeded by his heir.

**RAMPOOR**—The principal place of the jaghire of the same name. It is situate on the left bank of the Koila, here 450 yards wide, and from two to two and a half feet deep from December to June, for which time it is fordable, but must during the rainy season be crossed by ferry. It is a large town, densely peopled irregularly built of mud and surrounded by a thin belt of bamboos, trees, and brushwood at the back of which there is a low ruined parapet, the only entrances being by narrow ways, defended by strong wooden barriers. The upper order of inhabitants are for the most part Rohilla Patana, a handsome indolent race. The chowk or market-place is decorated by a lofty mosque. A little north of the town is the tomb of Fyzoola Khan, raised on a terrace of masonry, and shaded by trees. Rampoor is 546 feet above the sea. Distant N W from Calcutta 789 miles. Lat. 28° 48', long 79° 5'

**RAMPOOR**, the capital of Buzahir, is situate on the left bank of the Sutlej, over the bed of which its site is elevated 138 feet. Fraser who approached it from the south east, by ascending along the left bank of the Sutlej describes the way as very rugged. The town is situate at the western base of a lofty and nearly perpendicular mountain which on the east, stretches to the outer range of the Himalaya. The cliff surrounds the town in the form of a funnel, which confines the air and in the hot season the rocks radiate the heat in such a manner as then to render the climate nearly insupportable. The climate in winter on the contrary is represented as cold and damp so that the thermometer is frequently lower than at Kotgerh which is 3 560 feet more elevated. The expanse on which the town is built is rugged, so that the streets and houses rise in tiers one above another. Some of the houses are well built of stone, commonly two stories high and covered with slate which is thick of a blue colour and laid on with considerable neatness. The palace of the rajah, situate at the north-east corner of the town is a collection of buildings, some of three, some of four stories high, covered with very large oblong slates, laid on curved roofs, having the concavity outwards, in the Chinese style. They have wooden balconies, ornamented with neat carvings. The Dewan Khana, or hall of audience, has the remains of grader, being spacious and ornamented with carving and fresco, much defaced by the Gorkhas when they held this town. There is another res-

# RAM.

dence usually occupied by the inferior branches of the ruling family. Both the palaces are built of stone uncut, but banded by means of numerous beams of larch. The town, previously to the havoc made by the Gorkhas, was larger than at present, having from 300 to 400 houses, and a large bazar filled with the wares of Hindostan, the Himalayan regions, and of Tartary. It has begun to recover since it has been taken under British protection. The rajah of Bussahir resides here during winter retiring from the heat in the summer months to the more elevated station of Saharan. The elevation of Rampoor above the sea is 8 800 feet. Lat. 31 27 long 77 46'

**RAMPOOR SHAHPOOR**, in the British district of Allypore, lieut. gov. of the N W Provinces, a village on the route from Meerut to Muttra, and 44 miles N.E. of the latter. Lat. 28 3, long 77 55'

**RAMPOORA**.—A town in the native state of Indore, or territory of Holkar, 84 miles E. from Neemuch, and 124 miles N by W from Indore. Lat. 24 28' long 75 28'

**RAMPOORA**, in the British district of Cawnpore, lieut. gov. of the N W Provinces, a village on the route from the cantonment of Etawa to that of Cawnpore and 45 miles W of the latter. Lat. 26 21, long 79 46'

**RAMPOORA** in Rajpootana, a town the principal place of a pergunnah, part of the possessions held by the noted Patan freebooter Muhammad Amer Khan. It is surrounded by a rampart of great strength, being in some places forty feet in thickness, and where weakest twenty feet. It was on the 15th May, 1804 taken by storm by a British force commanded by Colonel Don. The storming party rushed forward provided with a twelve pounder and with it blew open three gates, which in succession lay on the way into the fort. Of the enemy's garrison above 1 000 strong forty or fifty were killed the number of wounded was very great, and about 400 attempting to fly were cut up by the British cavalry in the adjoining plain. It was subsequently by the declaratory article of the treaty of 1805 restored by the British government to Holkar and in 1818, when the battle of Mahudpore had placed Holkar's dominions at the disposal of the British government, Rampore was added as a free gift to the possessions which had been guaranteed in the previous year to Amer Khan. The area of the territory is 152 square miles. Its separate revenue is not known but with that of Tonk it amounts to 2,00 000 rupees. The estimate of its population is included in that of the whole of the possessions of Amer Khan for which see **TONK**. The town is distant E. from Joypore 79 miles, S.E. from Namerabad 90 W from Agra 142. Lat. 26° 58', long 76° 14'

**RAMPOORA**, in the territory of Indore, or possessions of Holkar's family, a town on

the route from Neemuch to Kota, formerly the capital and residence of the court, before the selection of the town of Indore. It is situate a mile from the north bank of the river Taloy, at the base of a ridge of hills. It is of considerable size surrounded by a wall and has a good bazar. North-east of the town is a Hindoo temple, a place of pilgrimage in the month of April. Here, in January, 1818 Roshun Beg in command of a body of infantry with sixteen guns, the ruler of the force defeated at Mehidpore, attempted to make head against the British arms, but was immediately defeated and his troops dispersed. Rampore has annexed to it several pergunnahs, containing 500 villages, and yielding an annual revenue of 3,75,000 rupees. Elevation above the sea 1 360 feet. Distance N from Indore 120 miles, from Oojein 96. Lat. 24 28' long 75 25'

**RAMPOORA**.—A town in the native state of Gwalior or territory of Scandia's family, 128 miles S W by S from Gwalior and 120 miles N W by W from Sangar. Lat. 24 45' long 77 11

**RAMPOOREA** in the British district of Bareilly division of Pilibut, lieut. gov. of the N W Provinces, a village on the route from Bareilly to Petoargurh and 37 miles N E. of the former. Lat. 23 41 long 79 52'

**RAMPOOREE**, in the British district of Bijnour, lieut. gov. of the N W Provinces, a town five miles S.E. from Nujeebabad. Lat. 29 34 long 78 25'

**RAMPORE**, in the territory of Gwalior a town five miles south of the confluence of the Sindh with the Jumna. Lat. 26 22, long 79 6'

**RAMPORE**, in the British district of Jounpore a town on the route from Jounpore cantonment to that of Mirzapore 21 miles N. of the former 22 N of the latter. Supplies and water are abundant and good here, and the road in this part of the route is good. Lat. 25 29, long 82 38

**RAMPORE**.—A town in the British district of Tipperah lieut. gov. of Bengal, 52 miles N of Tipperah. Lat. 24 13' long 91 10'

**RAMREE**.—A town of Eastern India, in the British district of Arracan. It is situate on the island of Ramree, 31 miles S.E. of Kyauk Phyon. The island is separated from the mainland of Arracan by a narrow but deep channel. Its length is about fifty miles from north to south and its extreme breadth twenty. After the occupation of Arracan in 1825, a British detachment was sent against Ramree, which, upon approaching they found to be evacuated possession of it was accordingly taken on the 22nd April and since that period it has continued under the government of the East-India Company. Lat. of town 19° 8', long 93 54

**RAMRYE**, one of the Coosa hill states, bounded on the north by the British States of

# RAN—RAO

British district of Dbarwar, presidency of Bombay, 72 miles S.E. by S. of Dbarwar Lat. 14° 37', long 75° 41'

**RANGAMUTTER**—A town in the British district of Chittagong, lieut.-gov. of Bengal. It is situated on the right bank of the Kurum-fucose river 44 miles E.N.E. from Chittagong Lat. 22° 40', long 92° 30'

**RANGNA**—A town in the native state of Sawantwarree, presidency of Bombay, situated 12 miles N.W. from Sawantwarree and 49 miles W.N.W. from Belgaum Lat. 16° 8' long 73° 53'

**RANGOON**—A town in the recently acquired British province of Pegu, situated on the great eastern branch of the Irrawaddy known as the Rangoon river. The town was originally built in 1753 by Alompra, the founder of the Burmese monarchy who named it Rangoon or the "City of Victory" in reference to his conquest of Pegu. When occupied by the British during the first Burmese war in 1824 it was built in the form of a parallelogram extending along the river's bank, about twenty-five miles from the sea, the houses, with the exception of some public buildings, being of wood and bamboo raised on piles, and thatched. It was entirely destroyed by fire in 1850 when upwards of 2,000 houses were reduced to ashes. The site of the new town by which it was succeeded was thrown back from the original position on the river bank to a distance of about a mile, its ground plan was that of a square of about three-quarters of a mile, having at its northern side a pagoda as a citadel, which was an artificial mound ascending in ledges, with terraces, and tapering towards the top. This strong hold was stormed by General Godwin during the second Burmese war in April, 1852, and the capture of the pagoda was the fall of Rangoon. The town suffered severely by fire from the shipping. In 1853, and again in December, 1855 it was visited by fearful conflagrations, many of the public buildings were destroyed, and the houses, being constructed of hollow bamboo and thatched, offered little resistance to the progress of the fire. In the arrangements for rebuilding the town, consideration has been prescribed by the British government not only for insuring its protection against conflagration, but also for securing its cleanliness by proper drainage and other sanitary precautions. Distant from Pegu, S., 63 miles. The district of which this place is the chief town has an area of 9,800 square miles, and a population of 137,130 Lat. 16° 45', long 96° 17'

**RANGOUTER**—A town of Bengal, situated in the native state of Tipperah, 46 miles S. by E. from Silhet, and 80 miles N.E. by N. from Tipperah. Lat. 24° 20' long 92°

**RANIGAT**, in the Peshawar division of the Punjab, a town situated 15 miles from the right bank of the Indus, 59 miles N.E. by E.

of the town of Peshawar Lat. 34° 20', long 73° 34'

**RANIGHAT** in the British district of Nudda, lieut.-gov. of Bengal, a town 44 miles N. by E. from Calcutta. It is said to be the abode of many rich zemindars. Lat. 23° 11', long 88° 33'

**RANIWALA**, in the British district of Moradabad, lieut.-gov. of the N.W. Provinces, a village on the route from Allypore to Moradabad, and 50 miles N.E. of the former Lat. 28° 30' long 78° 29'

**RANJITPURA**, in the district of Bannu, territory of Oude, a town 23 miles E. of Cawnpore 30 S.W. of Lucknow. It may be considered the capital of the district, and formerly was scarcely inferior to Lucknow Lat. 26° 30', long 80° 40'

**RANJUNGAUM**—A town in the British district of Ahmednuggur, presidency of Bombay 17 miles S.W. by S. of Ahmednuggur Lat. 18° 53' long 74° 57'

**RANKA**—A town in the British district of Palamow, lieut.-gov. of Bengal, 36 miles N.W. by W. of Palamow Lat. 24° 2', long 83° 42'

**RANMUTSH**—A town in Nepal, situated on the right bank of a branch of the Kurnali river, and 16 miles E.N.E. from Jumla. Lat. 29° 22', long 81° 55'

**RANNEE CHOKEE**—See **BURRUM CHOKEE**

**RANOD** in the territory of Gwalior, or possessions of Holadia's family, a town 34 miles to the right or N. of the route from Calpee to Gooma cantonment, 155 miles S.W. of former 50 N.E. of latter. It is represented to be a large town, with a great trade in grain. Measures were taken by the British government in 1847 for exploring the antiquities of the town Lat. 25°, long 77° 55'

**RANSEE**, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a secluded village two or three miles to the right of the route from Shreenuggur to the Temple of Kedarnath and 15 miles S. of the latter. It is situated about a mile from the right bank of the river Madheswar Lat. 30° 34' long 79° 16'

**RANSKANDY**—A town of Eastern India, in the British district of Southern Cachar, 10 miles E. of Sitchar Lat. 24° 47', long 93°

**RAOLDEE**—A village in the jaghure of Jujhar district of Dadra, lieut.-gov. of the N.W. Provinces. Lat. 23° 35', long 76° 21'

**RAOMAKA BAZAR**—A town in the British district of Hyderabad province of Scinde, presidency of Bombay 85 miles S.E. by S. of Hyderabad. Lat. 24° 20', long 69° 14'

**RAOTSIR**—A town in the Rajpoot state of Boekanser 115 miles N. E. from Boekanser, and 61 miles W. by N. from Hasser Lat. 29° 18', long 74° 36'

## RAP—RAT

**RAPTEE**, called also **AIRAWATI**, after the white elephant of the god Indra, a considerable river rising in Nepal. It does not issue from the main range of the Himalaya covered with perpetual snow but takes its rise in the Sub-Himalaya, in lat. 28° 10', long. 82° 45' whence flowing first in a southerly direction for forty miles, and then north-westerly for fifty-five miles, it enters the plains of Oude, in lat. 28° 8', long. 81° 58' which it traverses in a south-easterly direction for ninety miles, and in lat. 27° 17' long. 82° 32', forms for about twenty miles the western boundary of the British district of Goruckpoor, which it then enters, and continuing a south easterly and tortuous course for seventy miles, it receives, on the left side, the Dhumela or Burha Rapti draining an extensive tract extending southwards from the Sub-Himalaya. Below this junction, the Rapti turns southward for the distance of thirty miles, communicating in this part of its course with the Moti jhil, called also the Lake of Bakura, and thence turns westward for ten miles, to the town of Goruckpoor. From this place it continues its course in a circuitous but generally south-easterly direction, for eighty-five miles, to its junction with the Ghoghra, on the left side of the latter in lat. 26° 18', long. 88° 46'. Its total length of course being from its remotest source, 400 miles, for eighty-five of which downward from the town of Goruckpoor it is navigable for large boats, and for those of smaller size a considerable distance higher. In its course through the district of Goruckpoor it receives numerous streams right and left, and by internal channels communicates with several of the numerous watercourses and lakes or marshes found in this level alluvial country. At the town of Goruckpoor it is crossed by the route from that place to Lucknow the passage being made by ferry. The channel is there 200 yards wide, and at all seasons contains deep water. About ten miles below the town, it is crossed at the Bhowapoor ghat, by the route from Ghaseepoor to Goruckpoor containing the passage being made by ferry during the dry season, but the route being scarcely practicable during the rains, in consequence of the extent to which the country is overflowed.

**RAPTEE (BURHA)**.—A considerable feeder of the Raptee. Its sources are in the Sub-Himalaya, in the territory of Oude, and about lat. 27° 34' long. 82° 10'. Flowing for fifty-five miles through the territory of Oude, it touches the frontier of the British district of Goruckpoor in lat. 27° 22', long. 82° 38' and holding an easterly direction for nineteen miles, forms the boundary between the two territories. At the point of its entrance into the British territory it receives on the left side the Arva, a stream descending from the Sub-Himalaya. Eighteen miles below this confluence, at the ruined town of Sannali

the Burha Raptee becomes navigable in the rainy season and a good deal of timber is then sent down it. Fifteen miles below this place, and in lat. 27° 12', long. 83° 1', it receives on the left side the Bangunga and from the confluence downwards is often known by the name of that stream, which is considered to have the larger volume of water. Twenty-two miles farther the Burha Raptee receives on the left side the Dhumela, which thenceforward gives its name to the united stream. Buchanan observes, "The channel immediately below the junction is about 100 yards wide and in January (dry season) contains a pretty considerable stream, although it is fordable but oxen cannot pass with loads, and a ferry is therefore employed to transport the goods. Timber comes down both the Burha Raptee and Bangunga." Twelve miles below the last-named junction, the united stream is joined on the left side by the Ghongee, and three miles lower down is discharged into the Raptee, on its left side, in lat. 26° 58' long. 83° 17'. The length of course to this point is about 134 miles, in a direction generally from north west to south-east.

**RARUNG** in Buzahir a village of the district of Koonawar is situated near the right bank of the Sutly on the southern side of a mountain of mica-slate, characterized by dreary barrenness, and producing little but a few stunted pines. Elevation above the sea 2,519 feet. Lat. 31° 26', long. 73° 24'.

**RASSEN**.—A town in the British district of Ahmednuggur presidency of Bombay, 46 miles S.E. of Ahmednuggur. Lat. 18° 23' long. 74° 58'.

**RASHMEE**.—A town in the Rajpoot state of Oodeypoor 52 miles N.E. from Oodeypoor and 103 miles S. by W. from Ajmeer. Lat. 25° 3' long. 74° 27'.

**RASOORY**.—A town in Hyderabad, or territory of the Nizam situated eight miles from the left bank of the Payne Gunga river and 108 miles S.E. by S. from Ellichpoor. Lat. 19° 59', long. 78° 35'.

**RASULPOOR**, in the British district of Cawnpore, head-gov. of the N.W. Provinces, a village on the route from the cantonment of Futtisgarh to that of Cawnpore, and 30 miles N.W. of the latter. Lat. 26° 47' long. 80° 9'.

**RASUNWAS**.—A village in the jagheer of Jujhur district of Dadree, head-gov. of the N.W. Provinces. Lat. 28° 36' long. 76° 13'.

**RATGURH**, in the British district of Saugur territory of Saugur and Nerbudda, head-gov. of the N.W. Provinces, a town on the route from Saugur to Bhopal, 21 miles W. by S. of the former. Lat. 22° 47', long. 78° 29'.

**RATTEE**, in the district of Bamsware, territory of Oude, a village on the route from Allahabad to Lucknow, 59 miles N.E. of the former, 29 S.W. of the latter. It has a small

# RAU—RAW

basin, and water and supplies may be obtained. Lat. 26 33' long 80° 53'

**RAUCHERLA**—A town of Madras, in the Mysore 188 miles N N E from Seringapatam, and 73 miles S E. by S. from Ballary Lat. 14 16' long 77° 30'

**RAUGURH**—A town in the Rajpoot state of Kotah situate on the right bank of the Neerwy river and 30 miles E by S. from Kotah Lat. 25° 5' long 76° 20'

**RAUNPOOR**—A town in the British district of Ahmedabad presidency of Bombay 78 miles S.W. of Ahmedabad. Lat. 22 20', long 71 40'

**RAUNPOOR**—A town in Guzerat, or dominions of the Guicowar 75 miles W S.W. from Rajkote, and 16 miles N by E from Poorbunder Lat. 21 50', long 69° 49'

**RAURAH**—A town in Nepal, situate on the left bank of a branch of the Kurnali river and 18 miles N N E. from Jamlah Lat. 29 30' long 81 45'

**RAUS**, or **RASS**, in the Rajpoot state of Jodhpoor a town on the north west declivity of the Aravalli range on the route from Nusserabad to Deesa, and 38 miles W of the former. It contains 600 houses supplied with water from twenty wells Lat. 26 17' long 74 16'

**RAUSHPOORAM**—A town in the British district of Salem, presidency of Madras 15 miles S of Salem Lat. 11 28' long 78 16'

**RAVER**, or **RAVI**, a river of the Punjab, rises in Kulu, on the declivity of a mountain called Bungal, and a short distance west of the Rotang Pass. The source is situate about lat. 32 28' long 77 At the distance of about forty miles from the source, in a south westerly direction the Ravee is joined by two feeders, the Nye and the Bondhill the latter taking its rise in a lake called Munee Munees, regarded as sacred by the superstitious Hindoos. Where surveyed by Cunningham, four or five miles from Burmawur at an elevation of about 7000 feet, it was found 116 feet wide. At Chamba, about twenty miles below and south-west of this place or 100 miles from its source according to the statement of Vigne, the Ravee is crossed by a bridge. Forster states that it is there 'forty or fifty yards broad and fordable at most seasons of the year. At Bisul, to which the downward course is about twenty five miles due west, Forster found it, early in April about 180 yards wide, very rapid and unfordable. The statement of Vigne is less explicit—'I have been twice ferried over the Ravi at Bisul once during the rainy season, when it was swelled to a roaring torrent, and once again in winter when its stream was far more tranquil. On both occasions the natives made the passage upon buffalo hides. Its width is about eighty yards.' From Bisul in lat. 32° 34' long 75 45' the Ravee takes a south westerly direction, which it generally holds for

the rest of its course. Macartney found it, at Manece ferry on the route from Amritsar to Vazeerabad, and about 135 miles from its source, to have at the beginning of August and at the time of fullest water a breadth of 513 yards, and a depth of twelve feet, where greatest. The deep channel was between thirty and forty feet in breadth the rest of the waterway having a depth of from three to five feet. In the cold season when lowest, the water is in no part more than four feet deep. Moorcroft describes it at Lahore, about twenty miles lower down as divided into three different streams or branches. These he states, are 'separated, in the dry weather, by intervals of half a mile but in the rainy season the two most easterly branches are united, and form an expansive and rapid stream.' The two first branches are fordable, but the third which is the principal one has a ferry. He remarks that the boats on the Ravee were the largest and best-built that he has seen in India. Burnes who navigated the Ravee from its confluence with the Chenab to Lahore, says it 'is very small and resembles a canal rarely exceeding 150 yards in breadth in any part of its course. Its banks are precipitous, so that it deepens before it expands. Nothing can exceed the crookedness of its course, which is a great impediment to navigation for we often found ourselves, after half a day's sail, within two miles of the spot from which we started. The water of the Ravee is redder than that of the Chenab. It is fordable in most places for eight months in the year.' From Lahore, its course south-west, measured according to the main direction of the stream to its confluence with the Chenab, is about 200 miles, but along all the sinuities, 380. This point is in lat 30 36' long 71 50' The Ravee joins the Chenab by three mouths close to each other. Its total length measured along the main direction of its course is about 450 miles. It is considered to be the Hydrasote mentioned by Arrian and the Iralvi of Sanscrit authorities. It is still known by the name of the Iralvot, which might easily be corrupted by the Greeks into that which they appear to have given it.

**RAVER**—A town in the British district of Cuddesh presidency of Bombay 121 miles E N E of Malligam Lat. 21 14, long 75° 11'

**RAVOOR**—A town in the British district of Nellore, presidency of Madras, 33 miles W N W of Nellore. Lat. 14 36' long 79° 34'

**RAVYPAUD**—A town in the British district of Cuddesh, presidency of Madras, 80 miles N N E. of Cuddesh. Lat. 15 34, long 79 15

**RAWAH**—A town in the native state of Gwalior, or territory of Sounda a family 24 miles S.S.E. from Neemuch and 83 miles N W from Oojein Lat. 24 8' long 75° 1'

**RAWALHEIR**, in the British district of

# RAW—REH.

Rijnour, lieut.-gov. of the N W Provinces, a village on the route from Moradabad to Haridwar, and 40 miles S.E. of the latter. Lat. 29° 30', long 78° 28'

**RAVUDUCOONDA.**—A town in one of the sequestered districts of Hyderabad, 81 miles S.E. from Moodgal. Lat. 15° 41', long 76° 59'

**RAWUL**, in the British district of Goorgun, lieut. gov. of the N W Provinces, a village on the route from Bewaree to Alwar and eight miles S. of the former. Lat. 28° 4', long 76° 38'

**RAWUL PINDE**, in the Punjab, between the Indus and the Jhelum. It is a large populous town, consisting of mud houses with flat roofs. It contains what is called a palace, a wretched building of brick constructed by Shah Sojah, on his expulsion from Kabul. There is a large bazar and a considerable business in the transit-trade between Hindostan and Afghanistan. The town is surrounded by a wall with bastions, and has an old fort, on which a few cannon are mounted. Population 15,818. The district of which this town is the chief place has an area of 5,995 square miles, with a population of 568,750. The town is in lat. 33° 37', long 73° 6'

**RAWUNHEREE**, in the Rajpoot state of Beekaneer, a village on the southern frontier and on the route from the town of Beekaneer to that of Jeemleer, being 45 miles S.W. of the former. It is situated in an open country, scarcely cultivated. The road in this part of the route is hard and good. Lat. 27° 40', long 73° 49'

**RAWUTSIR.**—A town in the British district of Hyderabad province of Scinde, presidency of Bombay, 147 miles E. by S. of Hyderabad. Lat. 25° 2', long 70° 46'

**RAYUH**, or **RAI**, in the British district of Muttra, a town, the principal place of the pergunnah of the same name, is situated on the route from the cantonment of Allypore to that of Muttra, and nine miles N.E. of the latter. It is supplied with water from wells, and has a small bazar with market. Lat. 27° 33', long 77° 52'

**REDANOH.**—A town in the Rajpoot state of Jodhpore, 185 miles W. by S. from Jodhpore and 74 miles S. from Jeemleer. Lat. 25° 51', long 71° 8'

**REEAN** in the Rajpoot state of Jodhpore, a town on the route from the city of Jodhpore to that of Ajmeer, and 37 miles N.W. of the latter. It is surrounded by a ruinous mud wall, and has a fort, the stronghold of the thakoor or chief of the Mertee tribe of Rahrhor Rajpoots. The fort, commanding the whole town, is built of stone, and sitsuate on the top of an insulated rocky hill about 200 feet above the plain, and is fifty yards long from north to south, and thirty yards broad. The gateway is at a corner pointing westward and is defended by a screen of masonry. The town is situate

at the western base of the rocky hill. It contains 700 houses, abundantly supplied with water from numerous wells of the depth of twenty feet. There is besides a fine baoli or large well, forty feet deep, pleasantly shaded by large trees and having abundance of fine water to which access is obtained by flights of steps. The population, according to Boileau is 6,650. The road in this part of the route is bad. Lat. 28° 32', long 74° 30'

**REECHNA DOOAB.**—A natural division of the Punjab, situated between the rivers Chenab and Ravee, and extending from lat. 30° 38' to 32° 36', and from long 71° 49' to 75° 36'

**REEGA.**—A town in the territory occupied by the Abor tribe on the northern boundary of Upper Assam. It is situate on the right bank of the Dihong river 51 miles N.W. from Sudiya. Lat. 28° 20', long 95° 7'

**REERWEE** in the Rajpoot state of Beekaneer, a village on the route from Batangurh to the town of Beekaneer, and 50 miles E. of the latter. It is of considerable size and is supplied with water from three wells. Lat. 27° 55', long 74° 11'

**REGOWLEE**, in the British district of Goruckpore, lieut. gov. of the N W Provinces, a town on the route from Goruckpore to Khachi, 21 miles N.W. of the former. Lat. 26° 59', long 83° 17'

**REGOWLI.**—See **ADITYGURH**

**REGULAVALASA.**—A town in the British district of Visnagapatam, presidency of Madras, 28 miles N. by W. of Visnagaram. Lat. 18° 27', long 83° 27'

**REH** in the British district of Futtehpore, lieut.-gov. of the N W Provinces, a village on the left bank of the Jumna, at the mouth of the small river Bind. Lat. 25° 52', long 80° 37'

**REHELU**, in the Baree Doob division of the Punjab, a town situated on the left bank of one of the branches of the Beas, 11 miles N. of the town of Kangra. Lat. 32° 14', long 76° 18'

**REHLI** in the British district of Sangor and Nerbudda, lieut. gov. of the N W Provinces, a town on the route from Gurrawara to Sangor, 60 miles N.W. of former, 26 S.E. of latter. It has a bazar and water and supplies are abundant. Here is a prison capable of containing from forty to fifty persons. Elevation above the sea, 1,350 feet. Lat. 23° 44', long 79° 5'

**REHLY**, in the territory of Onda, a town on the route from the cantonment of Goruckpore to that of Sekrova, 78 miles N.W. of the former, 39 S.E. of the latter. Lat. 26° 52', long 82° 4'

**REHUND.**—A river rising in lat. 22° 46', long 88° 17' in the British district of Odjipore, on the south west frontier of Bengal. It first takes the name of the Rhora and flowing in

# REI-REW

a northerly direction through Oddepur Sir godjah, Rewa, and the British district of Mirzapoor, it falls into the Bone on the right side, near the town of Agoroe Khaz, in lat. 24 32' long 83 3'

**REINWAL**, in the Rajpoot state of Jey poor, a town on the route from Delhi to Mow 181 miles S.W. of former, 826 N.E. of latter. It has a bazar, and is supplied with water from wells. Lat 26 41, long 75 45'

**REITAL**, in native Gurwhal a village close to the right bank of the Bhagserotie, as the Ganges is called in the upper part of its course. Its situation is very pleasant, on the eastern side of a mountain, the river flowing at the base below it. The village contains about thirty five houses. Reital was a secondary station in the trigonometrical survey of the Himalaya. Elevation above the sea 7,082 feet. Lat 30 49' long 78 89'

**RELLI**—A town in the British district of Vizagapatam presidency of Madras, 14 miles N by W of Vizagapatam. Lat 17 53 long 83 18'

**REMRAL**—A town in the native state of Phoolpur on the south west frontier of Bengal, 75 miles W by S from Sarabulpur and 82 miles S.E. by S. from Ruttunpur. Lat 21 18, long 82° 52'

**RENEE**, in the Rajpoot state of Beekaneer a walled town near the north-eastern frontier towards Shekawuttee. The surrounding country is less barren than most other parts of Beekaneer in consequence of the moisture produced by the Katur, a small stream which flows from Shekawuttee, and is lost in the sands of Beekaneer. Rod states the number of houses at 1500. Renee is in lat. 28 41, long 75 6'

**RENTICHOTA**—A town in the British district of Ganjam presidency of Madras, 61 miles S.W. of Ganjam. Lat. 18 49, long 84 27'

**REOTREE** in the British district of Ghazee poor, lieutenant-gov. of the N.W. Provinces, a town situated on the stream which discharges the water of the lake Sooraha into the river Ghagra, and four miles S.W. of the right bank of the latter. It is represented as a place of some trade. Distance N.E. of Ghazee poor cantonment 55 miles. Lat. 25 50' long 84 25'

**REOTREEPOOR**, in the British district of Ghazee poor, lieutenant-gov. of the N.W. Provinces, a town two miles S.W. of the right bank of the Ganges, 10 S.E. of Ghazee poor cantonment. Reotreepoor contains a population of 10,055 inhabitants. Lat. 25 30, long. 83 48'

**REPALLE**—A town in the British district of Guntur, presidency of Madras, 22 miles S.E. by E. of Guntur. Lat. 16° 8', long. 80° 58'

**REIRGHAT**—A town in Nepal situated on the right bank of the Gunduck or Salagra river, and 116 miles W by N from Khatmandou. Lat. 27 58' long. 83° 27'

**RESSOOLPOOR NARAINPOOR** in the British district of Bolundshuhur lieutenant-gov. of the N.W. Provinces, a village on the route from Allygurh cantonment to that of Moradabad, and 20 miles N of the former. Lat. 28 10' long 73 16'

**REVELGUNJE**, in the British district of Sarun lieutenant-gov. of Bengal, a town on the left bank of the Ganges, five miles below the confluence of the Gogra. Here is annually held a fair, much frequented, especially by Hindoos, who throng in great numbers for ritual ablution at the neighbouring confluence. Distance N.E. from Benares, by land, 113 miles by the course of the river 165, N.W. from Dunaipoor 24. Lat. 25 44, long. 84 50'

**REWA CAUNTA**—A division of Guzerat, under the political superintendence of the government of Bombay. It is bounded on the north by the Myhee Caunta, on the south by the British collectorate of Candahar, from which it is separated by the river Taptes and by the Bheel territory of Wusrawee on the east by the petty states of Banswarra, Dobud, Jabooah, Alles and Akranza and on the west by the possessions of the Gulcoowar and the British collectorates of Kara and Surat. It lies between lat. 21 23 and 23 35' and long 73 3' and 74 18'. The Rewa Caunta comprises the states of Rajpootia and Oodepoor tributary to the Gulcoowar. South tributary to Semdia Loonawarra, tributary both to Semdia and the Gulcoowar and Deoghur Barreah tributary to the British. An account of each of these tributary states will be found in its proper place. A court of justice styled the Rewa Caunta Criminal Court, exists in this province. It was established in 1839 and the result has fully realized all the advantages anticipated from its institution. Originally the British Resident presided in this court and three or four chiefs sat as assessors. A slight alteration has recently been made in its constitution the first assistant political commissioner instead of the Resident, now presiding, but his proceedings are forwarded to government through the latter an arrangement by which the supervision of that officer is increased. Though not intended to supersede the authority of the chiefs in the internal administration of their territories, yet when they are too weak to punish their subjects, as sometimes happens, criminals are tried before this court, a representative from the state being invited to assist at the trial. On the other hand when the head of a village is competent to take cognizance of the case he is allowed to dispose of it so that no undue interference takes place with their authority. Some account of the chiefs residing on the banks of the Nerbudda, styled the Meehwassee chiefs, who are

subject to the jurisdiction of the Rewa Courts agency will be found under the head "Mah-wases," and under that of the Naikras, some particulars of that wild tribe. The practice of suttee has been interdicted within the Rewa Cantons.

REWAH, called also BAGHELOUND, or country of the Baghels, an independent raj or principality bounded on the north by the British districts Allahabad and Mirzapore on the east by the British district Mirzapore on the south-east by the native state of Koraon on the south by the British district Sangor and Nerbudda, and on the west by Sangor and Nerbudda, and by Bundelcund. It lies between lat. 23° 20'—25° 10' long 80° 40'—82° 52', is about 140 miles in length from east to west, and 120 in breadth. The area is 9 827 square miles. The western and north western parts comprising a considerable proportion of the whole raj are covered by mountains, rising in three successive plateaus, or vast terraces, from the valley of the Ganges. Of these, that most to the north-east, and styled by Franklin the Bindasol or First Range, is the lowest, having an average elevation of from 500 to 530 feet above the sea. It is formed of horizontal strata of sandstone the upper surface presents an expanse of very great sterility. Little of this plateau however is included within the limits of Rewah, the boundary of which on this side lies nearly along the base of the mountain styled by Franklin "the Pannah Hills, or Second Range." The elevation of these averages from 900 to 1 200 feet above the sea. Their formation is sandstone, intermixed with schist and quartz, and to the west overlaid with limestone. Above this plateau nearly parallel to the brow, but more to the south east rises the Kaimur range, of which nothing appears to have been ascertained either as to elevation or formation. The brows of these ranges especially of the second are steep, in some parts nearly mural, and the Tons (South-eastern) and its tributaries, which drain the second plateau, descend to the lower grounds in cascades of various degrees of fall, from that of Balohi, of 400 feet, to that of Chasah, of 200. About a third of the country lying south-east of the Kaimur hills is part of the valley of the Son, a tract as yet nearly unexplored. That great river flowing north from the British district of Sangor and Nerbudda, crosses the south boundary of this raj in lat. 23° 21', long 81° 30', and flowing through it circuitously, but generally in a direction north and north-easterly, for 180 miles, crosses, in lat. 24° 37', long 82° 50' over the north eastern frontier into the British district Mirzapore. Its principal tributary is the Mahanuddy, flowing into it on the left side, in lat. 24° 5' long 81° 6', and it besides receives numerous torrents and small streams right and left. The Tons, flowing north-east from Bundelcund first touches the raj in lat. 24° 25', long. 80° 55', and, draining the highlands,

receives the Behar, the Bindu, and several minor torrents, and holding a course generally north-easterly passes, in lat. 25° 1', long 81° 51', into the British district of Allahabad, its course through Rewah being eighty miles. None of the rivers are navigable in this raj. According to Hamilton, there are few parts of the British provinces more highly cultivated than the higher regions of Rewah; and Iron side, describing the country sixty years ago, states, that it is "well cultivated, and produces tolerably good crops of grain." The villages are in good order, full of inhabitants, who appear to be industrious. The produce of this country is wheat, barley and different kinds of peas and they have also large herds of cattle, and flocks of sheep. Jaquemont's report, however rather tends to discredit these statements, though he mentions that he saw considerable cultivation on the second plateau, north of the town of Rewah. Much of the surface being rock, is unfit for culture and produces a scanty growth of stunted wood. This is now in many places yielding to the axe, to supply the demand for timber in the British districts in the valley of the Ganges.

The principal places—Rewah, Simerca Mow gany Bandogurh—are noticed in their places in the alphabetical arrangement.

The military routes are 1 From north-east to south west, from Mirzapore to Sangor through the town of Rewah. 2 from north east to south west from Allahabad by the Kutra Pass, to Jubbulpore, through the town of Rewah. 3. from north-east to south west from Allahabad by the Sohag Pass, through the town of Rewah to Jubbulpore. 4 from north-east to south west, from Allahabad to Sangor. 5 from north west to south east, from Banda to Rewah.

The revenues of Rewah have been estimated at twenty lacs (200 000). There formerly existed numerous jaghires, of the value of four or five lacs per annum held by younger descendants of former sovereigns. About twenty years since, resumption to some extent took place, yielding to the state a considerable accession of revenue.

As the rajah and his subjects are Rajpoots, their religion is Brahminism, and the horrible Rajpoot atrocity of female infanticide prevails, or did prevail, to a great extent. The rajah, however, it is stated, on his own authority some time since issued a proclamation, in which he not only forbade the practice, but promised pecuniary aid when necessary, for the marriage expenses of daughters and this proclamation was subsequently repeated. Suttee does not appear to be mentioned by any writer as practised in this territory. The population is stated to be 1 200 000. The military force amounts to upwards of 8 000 men.

The earliest mention of the Baghels is probably that adverted to by Elliot, who says, "The Baghel chief of Rewa is the descendant of the famous Sid Rase Jya Singh, the ruler

of Anulwara Fort from 1064 to 1145. His court was visited by the Nubian geographer Edrisi, who distinctly states that at the time of his visit the chief adhered to the tenets of Buddha." The existence of the raj of Rewah seems scarcely ascertainable in the general history of India, until the early part of the present century when the Pindarries, in 1812 passing through the territory of Rewah, made an incursion into the British district of Mirzapore. The rajah of Rewah was considered to have abetted this enterprise, and he was required to accede to a treaty by which the British government acknowledged his sovereign title and bound itself to amity and protection towards him on condition that all differences between him and foreign powers should be referred to the arbitration of the British authorities, that British troops might be marched through or cantoned within his raj for the purpose of guarding against the advance or intercepting the retreat of an enemy and that on such occasions the rajah should dispose his troops in the manner which might be pointed out by the British commanding officer. As the rajah ill followed out his engagements, the British government in 1813 had recourse to military operations, which enforced the conclusion of a second treaty confirmatory of the former and binding the rajah further to receive a permanent agent, and to maintain a vakool on his own part, with the British agent in Bundelkund and with the commanding officer of any British detachment stationed in the Rewah territory. He likewise bound himself to concur in the chastisement of certain offenders, and to pay the expenses of the armament sent against him to the amount of 45 178 rupees. In 1814 a third treaty was concluded confirmatory of the two preceding ones. In the English copies of the treaties, the chief is styled rajah of Rewah and Mookundpore, the latter appellation being probably from Mookunpore a place of some note eight miles S. of the town of Rewah. The rajah has been recently prevailed upon to abolish the levy of transit-duties on the chief staples of commerce. He succeeded his father in 1854, under the title of Baba Ragho Raj Singh.

**REWAH**—The principal place of the raj or territory of the same name, a town on the route by the Kutra Pass, from Allahabad to Sagar, 121 miles S.W. of the former and 182 N.E. of the latter. It is situated on the banks of the small river Behar a tributary of the Tams (South-eastern), on a formation of dark coloured limestone. Around it runs a high and thick rampart, still nearly entire and continuous, flanked by towers and which in a state of repair, must have been a strong defence. Within this, a similar rampart immediately environs the town and still further inward, a third surrounds the residence of the rajah, consisting of a few habitable buildings amidst the ruins of a great decayed structure.

The town has an aspect of poverty and barbarism, yet the population is estimated by Jacquemont at about 7 000 principally supported by the expenditure of the rajah, who maintains some degree of barbaric state. Elevation above the sea about 1 200 feet. Lat. 24° 31' long 81° 21'.

**REWARREE**, in the British district of Georgeon, lieut. gov. of the N.W. Provinces, a town on the route from Delhi to Jeypoor 50 miles S.W. of the former. Rewaree contains a population of 26,844 inhabitants. Lat. 28° 11', long 76° 41'.

**REWASON** in the British district of Georgeon, lieut. gov. of the N.W. Provinces, a village on the route by Ferozpoor from Alwar to Delhi 66 miles N.E. of former 44 miles S.W. of the latter. Lat. 28° 10', long 77° 8'.

**REWDUNDA**—A fort in the British district of Tannah, presidency of Bombay situated on the coast, 29 miles S. of Bombay. Lat. 18° 33' long 73°.

**REYJWA** in the British district of Muttra, lieut. gov. of the N.W. Provinces, a village on the route from the city of Agra to Bareilly, and 34 miles N.E. of the former. Lat. 27° 36', long 78° 26'.

**REAMUTGANJ** in the territory of Oude, a village on the route from Oawnpore to Lucknow 22 miles N.E. of the former 31 S.W. of the latter. Lat. 30° 46', long 80° 41'.

**RHOTASGURH** in the British district of Shahabad, presidency of Bengal, a celebrated hill fort on the left or north west bank of the river Son. It is situated in the hilly tract in the south of the district, on a table-land five miles in length from north to south and four in breadth. The outline is much indented and irregular and the circuit, including all its sinuosities, is computed at twenty eight miles. The surface of the table land is very uneven, and much of it consists of bare rock but there is likewise a considerable extent of fertile red soil on which grow many fine trees. It is very difficult of access on every side except the south, in which direction a rocky neck or ridge once connected it with the contiguous table-land but it has been traversed by a deep trench quarried in the rock with great cost and toil. East of the spot where this ditch is excavated in the rock are some most stupendous works and access into the fortress is gained through two fine gateways, one thirty yards within the other and these, as well as the ditch, are protected by a great number of complicated works. These are pierced with embrasures for archery and matchlocks, but there are none suited for regular artillery, and all the defences in this quarter are completely commanded from a height 200 yards distant, so that a passage could readily be laid open for a storming force to occupy the works, and there is no citadel within. On the verge of the mountain all round is a massive battlement, formed of great stones laid together without

# RHO--RIL.

ment. When Tienhsuhaler's account was written a century ago, there were fourteen gateways, but ten of them had been walled up. Notwithstanding the general steepness and elevation of the sides of the mountain, there are, besides the principal passage traversed by the trench, eighty three others in various places much difficult would consequently be experienced in guarding so many points against surprise. Within the inclosure are several small pieces of water and perennial springs. Sher Shah, on obtaining possession of this place in 1559, set about strengthening it but the works which he commenced were abandoned, owing to his having discovered a situation which he considered more favourable, and where he erected Shergar.

The most ancient structures herein were built by the Hindoos the place, according to their tradition was founded by Oush the son of Rama, king of Ayodha, long previously to the Christian era. Feroz Shah, however attributes the foundation to Rohut, viceroy of Afra-Shah, the legendary king of Turkestan. Sher Shah took the place from the Hindoo rajah by a stratagem frequently recurring in Indian history. Having asked the rajah to give refuge to the females of his family, taking with them a large amount of treasure, a great number of dolas or covered litters arrived, the foremost of which being examined and found to contain only women all were admitted without suspicion. The greater number of the dolas, however were filled with armed men and weapons for the bearers, also soldiers, and the force thus introduced forthwith attacked and slaughtered the garrison and seized the fort. When the Rajpoot Maun Singh was appointed viceroy of Behar and Bengal, a trust for which he was probably indebted to the alliance of his house with that of Akbar, his cousin being married to Prince Salim, son of that monarch he selected Rhotagurh as a place of security for his family and treasure. After his death, the fortress was annexed to the office of viceroy of the empire, and at a later period it came into the hands of Comin Ali, nawab or subahdar of Bengal, who, after his defeat at Oondwa Nulla, imitated the example of Maun Singh, by selecting this place for the residence of his family and the depository of his treasure. It was surrendered a short time after the battle of Buxar, in 1764, to the British army under Goddard.

The air of Rhotagurh, as many of the hill forts of India, is dreadfully unwholesome, especially for European constitutions. Limestone has been discovered in the vicinity, which will be of great service in bridging the Sone. The elevation above the sea is probably about 700 feet, and above the plain 200. Distance S from Buxar 22 miles, S.E. from Benares 75, N.W. from Calcutta 373. Lat. 24 38', long 84°

**RHOTUK.**—See **ROHTUK**.

**RHUNOO**, in the British district of Jounpore, lieut.-gov. of the N.W. Province, a village on the route from Jounpore cantonment to that of Sultanpore, in Ouda, 12 miles N.W. of the former 48 S.E. of the latter Lat. 25° 50' long 82° 38'

**RIASI** within the dominions of Ghelab Singh, the ruler of Oushmire, a town situate near the left or east bank of the Chenab, and on the southern slope of the most southern of the Himalaya ranges. Here is a fort considered by Vigne 'one of the strongest, perhaps the strongest, and best constructed in the country. It is situated on a conical and rocky eminence south of the town and is nearly square. The walls are built of stone they are very lofty and are rendered still more difficult to be scaled by their rising immediately from the precipitous sides of the hill, which are steeply scarpes. There is a tower at each angle, and no pains have been spared to render these, as well as most of the buildings of the interior, bomb-proof. The garrison is supplied with water by means of two large tanks within the walls. The fort is separated by a deep ravine, from an eminence of sandstone of the same height, about a mile distant. The town itself is an inconsiderable place having about 1 000 inhabitants. Lat. 33 5, long 74 52'

**RICHAH**, in the British district of Pilleebheet, lieut.-gov. of the N.W. Province, a town on the route from Pilleebheet to Ram poor 18 miles W.N.W. of the former Lat. 28 43' long 79 37'

**RICHEL RIVER.**—The name of one of the mouths of the Indus river flowing into the sea in lat 24 3, long 67 26

**RICHOLA** in the British district of Bareilly, lieut.-gov. of the N.W. Province, a village on the route from the town of Bareilly to Pilleebheet, and 20 miles N.E. of the former. The country is level, open, and cultivated Lat. 28 32', long 79° 41'

**RICNAR.**—A river rising amidst the mountains of the British district of Jansar, in lat. 30 55' long 77 59'. It holds a south-easterly course of about twenty miles, and falls into the Jumna on the right side, in lat. 30 44, long 78 8'

**RIKHESUR**, in the British district of Kumaon lieut. gov. of the N.W. Province, a halting-place and small military station on the left bank of the Lohngat river on the route from Champawut to Potoragurh, and 16 miles S.W. of the latter Lat. 29 24' long 80 8'

**RIKKEE KASHEE**, in the Dhera Doon a Hindoo temple at the north-east angle, where the Ganges, leaving the mountains, enters the plains of Bengal. The temple is 1,427 feet above the level of the sea, the bed of the river below it, 1,377 feet. Lat. 30 5, long 78 23'

**RILAKOT** in the British district of Kumaon, lieut.-gov. of the N.W. Province, a

# RIN—BOG

village in the subdivision of Jowahr, on the route to Hindun or Chinese Tartary by the Jowahr Pass, from which it is 20 miles south. It is situate on the left bank of the river Gores, which runs 250 feet below. The roofs of the houses have a slight pitch, and are firmly coated with compact clay as a protection against the inclemency of the climate. From the end of October to the beginning of June, the inhabitants totally desert the vicinity, residing in the more southern and lower part of Kumaon. During the summer months they return to this barren and dreary tract, less with a view to the scanty crops and pasturage obtainable here, than to the management of the active and lucrative traffic with Hindun. Elevation 10 680 feet above the sea. Lat 30 19', long 80 15'.

**RINGNOD**—A town of Malwa, in the native state of Jowra, situate on the left bank of a branch of the Chambul river and eight miles N N.E. from Jowra. Lat. 23 43', long 75 10'.

**RINJAKHAR**—A town in the ceded territory of Nagpur 153 miles E.N.E. from Nagpur, and 53 miles S.S.E. from Raingurh. Lat. 22° 6' long 81 20'.

**RINTIMBORE, or RANTAMBOOR**, in the Rajpoot state of Jeypore, a fortress of great strength, near the southern frontier, towards Boondoe. It is situate on a rock, on all sides isolated by deep and nearly impassable ravines, and access to the summit is had only by a narrow pathway inclosed on each side by high and overhanging cliffs and in the upper part the steepness so increases, that the ascent is made by flights of stairs passing through four gateways in succession. The summit of the rock, a mile in length, and of nearly equal breadth is surrounded by a massive stone rampart, conforming to the irregular verge, and strengthened by towers and bastions. Within the inclosure are an antique palace, the residence of the governor, a mosque, the tomb of a reputed Mahomedan saint, and buildings for the accommodation of the garrison. Water is supplied from a perennial spring and tanks within the walls. To the east of the fort is a town communicating with it by means of a long flight of narrow stone steps. The fort, regarded as impregnable before the introduction of artillery is indefensible against the attacks of modern warfare, being completely commanded by the rocky summits on all sides. According to Tieffenthaler it was at a remote period founded by Rauhaur, a Rajpoot chief. In A.D. 1291 it was in vain besieged by Jalal-ood-deen the Patan king of Delhi, and in the reign of his successor Alla-ood-deen, it is mentioned as being held by Rajah Bhim Deo, who, A.D. 1297 gave refuge to one of the nobles flying from the wrath of his sovereign. In 1299 Nasr-ut Khan, the viceroy of Alla-ood-deen, besieged the fort, but being killed by a stone thrown from an engine, the rajah

marched out and defeated the Patan army with great slaughter. Alla-ood-deen shortly after in person renewed the siege and having formed a mound from a neighbouring height to the top of the rampart, stormed the place, and put to the sword the rajah, his family and garrison. It was subsequently wrested from the sovereign of Delhi probably during the distractions consequent on the invasion of Tamerlane at the close of the fourteenth century and in 1516 it is mentioned as belonging to the king of Malwa. In 1528 it was surrendered by Bikermajet, its Rajpoot possessor, to Baber who assigned him Shammabad and its territory as a remuneration. After the expulsion, in 1553 of Mohammad Shah Sur Adil the Patan king of Delhi by Humayun the governor of Rintimbore surrendered it to the rajah of Boondoe who shortly after transferred it to Akbar receiving in return extensive districts and high immunities. It probably fell into the hands of the rajah of Jeypore on the dissolution of the empire, consequent on the invasion of Ahmed Shah Durrane in 1761. It is at present held, partly by the rajah of Jeypore partly by the thakoor or feudal nobility of the state, each having the honour of defending a particular gate, or portion of the work. Distant 4 E from Jeypore 75 miles, 8 from Delhi 195, S.E. from Ajmere 115. Lat. 25 56', long 76 26.

**RISPE** in Koonawar, a district of the hill state of Buzsahir is a village situate on the left bank of the Setluj, a short distance below the confluence of the river Tiding. Here Lamaic Buddhism is found to be the general religion, the traveller proceeding northwards perceiving here for the first time the lamas or priests of that belief. The vicinity abounds with manes or tumuli formed of stones, and from ten to forty feet in length, four in height, and two in breadth, and covered at top with large slates, inscribed with various holy texts in the Tibetan language. Elevation above the sea 8 046 feet. Lat 31 34', long 78 28.

**RITHOURA**, in the British district of Barahilly, Bent.-gov. of the N.W. Provinces, a village on the route from the town of Barahilly to Petoogurh, and 11 miles N.E. of the former place. It is situate in an open and cultivated country and supplies and water are abundant. Lat. 28 28' long 79 34.

**RIXI**—A town in the British district of Palamow, Bent.-gov. of Bengal, 24 miles S.S.E. of Palamow. Lat. 23 30' long 84 11'.

**ROBKRIE** in the Sindh Sagor Doab Division of the Punjab, a town situated 10 miles from the left bank of the Indus, 95 miles S. of the town of Peshawar. Lat. 33° 40', long. 71° 33'.

**ROGI** in Buzsahir, a village of the district of Koonawar, situate about 5 miles from the right bank of the Setluj which rolls 8,000 feet below it. The fine orchards surrounding it

# ROG--ROH.

produce peaches, apricots, and apples, of which the last are remarkable for size and excellent taste, though grafting is never practised to improve the stock. The road from this place to Pang, lying north of it, proceeds along the precipitous side of a mountain overhanging the Sutlej. Rogri is 3,100 feet above the level of the sea. Lat. 31 30', long. 73 17'

**ROGONATHPORE**, in the British district of Pachete, a small town or village on the route from Bankoora to Hazareebagh, 35 miles N W of former 103 S E of latter. Jacquemont describes it as a small place, situated at the foot of a group of small wooded hills of granite, about 800 feet high. Lat. 23 31', long. 86 44

**ROH**—A town in the British district of Behar. Lieut. gov. of Bengal, 60 miles E N E of Sherghotty. Lat. 24 53', long. 85 46'

**ROHA**—A town in the native state of Cutch, presidency of Bombay, 80 miles W from Bhooj, and 50 miles S E from Luckput. Lat. 23 13', long. 69 17'

**ROHANA**, in the British district of Saharunpore, lieut. gov. of the N W Provinces, a village on the route from Meerut to Saharunpore and 42 miles N of the former. Lat. 29 35', long. 77 46'

**ROHENO**, in the British district of Allypore, lieut. gov. of the N W Provinces, a village on the route from the cantonment of Allypore to that of Mynpooree, and 12 miles S E of the former. Lat. 27 49', long. 73 17'

**ROHERA**—A town in the Rajpoot state of Oodeypore 42 miles W by N from Oodeypore, and 76 miles N E by E. from Deesa. Lat. 24 42', long. 73 10'

**ROHEYREE**, in the British district of Allypore, lieut. gov. of the N W Provinces, a village on the route from the city of Agra to Allypore cantonment, and 20 miles S of the latter. Lat. 27 39', long. 73 7'

**ROHILCUND**, an extensive tract so called lying to the east of the Ganges, and bounded on the north-east by British Gurwal and Kumaon, on the east by the territory of Oude and on the south west and west by the Ganges separating it from the Doab. It comprises the British districts of Bijnour, Moradabad, Bareilly including the subdivision of Pilibhoet, Budon, Shahjehanpore and the native jaghirs of Rampore. Its limits are from lat. 27 15'—29 51', and from long. 73 3'—80 30'

**ROHTUK**, one of the districts of the great British territorial division of Delhi, under the lieut.-gov. of the N W Provinces, derives its name from its principal town. It is bounded on the north-east by the British district of Panesput on the east by the Delhi district and the native state of Bahadoorgarh on the south by Jhujur, on the south-west by Dadra and on the west by the British district Humannah and by Sirhind. It lies between lat. 28 33'—

29 16', long. 76 10'—77 4', is fifty miles in length in a direction from east to west, and forty four in breadth, and comprises an area of 1 840 square miles

The Rohtuk branch of Feroze's canal traverses this district from north to south. The line of the old Delhi Canal lay also through this district to Gohana, where it diverged south-east to Jatola, and thenceforward took a course identical or nearly so with the line of the present canal. At Gohana, there is an extensive depression, the scene of a great calamity which occurred in the course of the original construction of the Delhi Canal by Ali Murdan Khan, when the water escaping from the channel intended to confine it overspread the country and destroyed the town of Lalpur. Rohtuk is divided into seven pergunahs, named severally Rohtuk, Barce, Gohana, Kerthowda, Mundowthee, Mehlin, and Bownance. By the latest returns (1852-53) the amount of population is stated as follows—Hindoes, agricultural, 219 443 Hindoes, non-agricultural, 112 880 Mahomedans and others, not being Hindoes, agricultural, 23 949 of the like classes, non agricultural 21 341 making a total of 377 018. A classification of the towns and villages drawn from official records of the same date, shows the following results—

Number containing less than 1,000 inhabitants	204
Doitto more than 1 000 and less than 5,000	76
Doitto 5,000 10 000	4
Doitto 10,000	2
Total	286

The land revenue has been fixed for a term of thirty years, which will expire on the 1st of July 1879

**ROHTUK**—The chief place in the British district of the same name. It lies on the route from the city of Delhi to Hansie, and 42 miles N W of the former place. It is situated on a watercourse forty five miles long, formed by order of the British government in 1825 to convey a supply from the canal of Ferozshah. The population amounts to 13 237 and there is a good bazar. The road in this part of the route is generally good though in some places sandy and heavy. Lat. 28 54', long. 76 33'

**ROHUD** in the British district of Rohtuk, division of Delhi, lieut. gov. of Agra, a village on the route from Delhi to Hansie, and 27 miles N W of the former. The road in this part of the route is good in dry weather. Lat. 28 44', long. 76 53'

**ROHUNPORE**, in the British district of Rajeshaye lieut. gov. of Bengal, a town on the western frontier towards the British district of Malda, on the left side of the river Mahananda, a short distance below the confluence of the Furnabada. Distant S.E. from town of Malda 20 miles, N from Calcutta, by Burhampore, 168. Lat. 24 43', long. 83 20'

**ROHUT**, in the Rajpoot state of Jodhpore, a village on the route from Neemuch, and

False, to the city of Jodhpoor, and 34 miles E. of the latter Lat. 25 59', long 73° 14'

**ROIE BAZAAR**.—A town in the British district of Pooree, heut. gov. of Bengal, 23 miles N N E. of Juggernaut. Lat. 20° 7', long 85

**ROJAN**.—A town in the British district of Shikarpoor province of Souda, presidency of Bombay 29 miles N W of Shikarpoor Lat. 28 18' long 68 18'

**ROLAGAON**.—A town of Malwa, in the native state of Bhopal, 49 miles S. W. by W from Bhopal, and 81 miles E. by N from Indpur Lat. 22 51, long 76° 48'

**ROLEE**, in the British district of Budaon heut. gov. of the N W Provinces, a village on the route from Agra to Bareilly and 41 miles S W of the latter Lat. 28 2' long 79 5'

**ROLPAH**.—A town in Nepal, 40 miles S from Jumla, and 121 miles E. from Pilschheet. Lat. 28 45 long 81 51

**RONCHI** in the British district of Muttra, heut. gov. of the N W Provinces, a village on the route from the city of Agra to that of Muttra, and five miles S. of the latter It is situate near the right bank of the Jumna, in a country cut up by ravines, and partially cultivated Lat. 27 25 long 77° 47'

**RONTAN** a considerable village in Raen, a small hill district occupied by the East-India Company among the mountains between the Himalayas and the plains, is situate near the left bank of the Pabur It was a secondary station in the trigonometrical survey of the Himalayas. Elevation above the sea 7,898 feet Lat. 31 0' long 77 50'

**ROODHAMOW**.—A town in Oude situate 10 miles from the left bank of the Ganges, and 51 miles W by N from Lucknow Lat. 27 7' long 80 13'

**ROODRAR**.—A town in the British district of Ouddapah presidency of Madras, 53 miles N N W of Ouddapah. Lat. 15 16' long 78 40'

**ROODURPOOR**.—A town in the British district of Chota Nagpore, heut. gov. of Bengal 61 miles S W by S. of Lohadugga. Lat. 22 45', long 84 9'

**ROODURPOOR**, in the British district of Gorakhpore, heut. gov. of the N W Provinces, a small town, containing 300 mud-built dwellings, with a population of 5 535 inhabitants, is situate on the Mayhane, a small stream a feeder of the river Raptree Roodurpoor is distant S E from Gorakhpore cantonment 26 miles. Lat. 26° 24', long. 83 40

**ROODURPOOR**, in the British district of Bareilly the principal place of the pergunnah of the same name on the route from Bareilly to Almorah, and 53 miles N of the former It is situate on the bank of a bright rippling stream, a feeder of the Ramganga, amongst some very fine mango-groves, from which the tops of temples and other buildings appearing.

give the place, when viewed at some distance, an appearance of beauty and importance, that quickly vanish on a nearer approach Heber found all the usual marks of a diminished and sickly population, a pestilential climate and an over-luxuriant soil. The tombs and temples were all ruins, the houses of the present inhabitants, some two or three scores of wretched huts, such as even the gipsies of the open country would hardly shelter in. The people sat huddled together at their doors, wrapped in their black blankets, and cowering round little fires, with pale faces and emaciated limbs while the groves, which looked so beautiful at a distance instead of offering so many groves do in well-peopled and cultivated spots, a fine open shade, with a dry turf and fresh breeze beneath it, were all choked up with jungle and nightshade. The road is good on the north, or Almorah side, but bad on the south, towards Bareilly Elevation above the sea 629 feet. Lat. 28 58, long 79 23

**ROOKUNPUR**, in the British district of Boudahpur, heut. gov. of the N W Provinces, a village on the route from Allypore cantonment to that of Delhi and 23 miles N W of the former Lat. 28 9', long 77° 58'

**ROOL**, in Buzahir a village near the southern base of the Sibatal Pass, gives name to a small district in the pergunnah of Chocora The road rises rapidly to the Buchhal Ghat, through a beautiful wood of oak, yew pine, rhododendron berries-chestnut and juniper Rool village is 9 350 feet above the sea Lat. 31 19' long 77 57'

**ROOMAH**, in the British district of Cawnpore, heut. gov. of the N W Provinces, a village on the route from the cantonment of Cawnpore to Futtehpore and 10 miles S E. of the former Lat. 26 21 long. 80 30'

**ROONUNG** in Buzahir, a pass in the district of Koonawar over a range dividing the valley of Rookulung from that of Pejor The ridge consists of slate and the crest of the pass is below the limits of perpetual congelation as the juniper grows there, and even on the heights above. The pass is closed for four of the coldest months of the year and the communication is then effected by a circuitous and very dangerous route along the bank of the Sutlej Elevation of Roounung Pass above the level of the sea 14,500 feet. Lat. 31 45', long 78 28'

**ROONGUNGE**.—A town in the British district of Dacca, heut. gov. of Bengal, eight miles N E. of Dacca. Lat. 23° 47', long 90 31

**ROONGURH**.—A town in the Rajpoot state of Jeypoor 45 miles N W from Jeypoor, and 76 miles N E. by N from Ajmeer Lat. 27 21 long 75 23'

**ROOPNARAIN**.—A large estuary extending twelve miles between the British districts Hooghly and Hadyjeea, from Tumblok, to lat. 22 18' long 88°, to Fort Mornington, in lat.

# ROO-BOR.

25° 15' long 65° 6'. This expanse is formed by the Dalkhore meeting the tide at its entrance into the estuary of the Hooghly.

**ROOPNUGUR.**—A town in the Rajpoot state of Kishengurh, 26 miles N E by N from Ajmer and 61 miles W by S. from Jeypoor. Lat. 26° 47', long. 74° 55'.

**ROOPHEE RIVER.**—A considerable watercourse formed by the Brahmapootra river. It leaves that stream in lat. 26° 54', long. 93° 51', and rejoins it again in lat. 26° 17', long. 92° 1', after a course of seventy miles, through the district of Nowgong, in Lower Assam.

**ROOPSEE,** in the Rajpoot state of Jesulmeer, a small town and fort 10 miles N W of the city of Jesulmeer. Lat. 26° 58', long. 70° 50'.

**ROOPYN.**—A river of Guzerat, rising in lat. 23° 31', long. 72° 2' and flowing west for forty-two miles, falls into the Runn of Cutch in lat. 23° 28', long. 71° 28'.

**ROORGAON** in the British district of Cawnpore, hont. gov. of the N W Provinces, a village on the route from Allahabad to Etawa, and 63 miles S E of the latter. Lat. 26° 15' long. 79° 40'.

**ROORKEE,** in the British district of Saharanpore, hont. gov. of the N W Provinces, a town on one of the most elevated sites in the doab between the Jumna and the Ganges. It is on this account that the great Ganges Canal has been made to pass by this place, whence channels of irrigation can be directed to most parts of the Doab. With the view of effecting this project, the river Solani has been traversed by an aqueduct of 920 feet in length. The clear waterway is 750 feet, by fifteen arches of fifty feet span each, the cost of the aqueduct was 153,000*l*. The selection of this place as the head-quarters of the canal operations, and the establishment of the necessary workshops, model rooms, and offices, have tended to convert a small village into a considerable European station. A college has been established here, for the purpose of affording instruction in civil engineering to Europeans and natives, and which, as a mark of respect to the memory of its founder has been designated the "Thomason College." Sanction has been given to the erection of a church. Lat. 29° 58', long. 77° 57'.

**ROOBOO** in Buzahur, a village on the right bank of the Fabur near the confluence of a small feeder called the Supul. Elevation of the village above the sea 5,100 feet. Lat. 31° 12', long. 77° 48'.

**ROOSHAKATONG.**—See DARBUNG.

**ROOSTUMPOOR,** in the British district of Moradabad, hont. gov. of the N W Provinces, a village on the route from Hurdwar to the town of Moradabad, and 13 miles N W of the latter. Lat. 29° 1' long. 78° 45'.

**ROPA,** in Buzahur, a village of the district of Koonwar, is situate in the valley of Rooku-

lung, and near the left bank of the river Darbung. Three or four miles from this village are numerous extensive and rich veins of copper-ore, situate 13,000 feet above the level of the sea. Access to this locality is obtained with excessive difficulty by climbing up the precipitous side of a lofty mountain, near the summit of which the principal veins have been discovered. These lie in white quartz, running between grauwacke and red sandstones, which are here the chief formations. Elevation of Ropa above the sea 9,800 feet. Lat. 31° 47' long. 78° 28'.

**ROPUR,** in Sirhind, a town situate a mile from the left bank of the Sutley a short distance below its efflux from the Himalaya. The river is here crossed by a ferry affording an important communication between the Punjab and Sirhind. It is described to be "a noble stream thirty feet deep, and more than 500 yards in breadth." Its bed consists of large smooth pebbles, mixed with mud. The low range of the Sub-Himalaya, bounding Sirhind on the north east does not reach to the Sutley along the left bank of which a narrow plain extends for several miles, and in this the town is situate, on a slight eminence. It was the residence of the raja of the adjacent territory which yielded an annual revenue of 6,000*l*. but he, being one of the protected Sikh chiefs who failed in fidelity to the British government on the breaking out of the war with Lahore subsequently to the death of Runjeet Singh was compelled to retire on a pensionary provision, and his territory ceded to the British authority. Here, in 1831 an interview took place between Lord William Bentinck, Governor-General of India, and Runjeet Singh, the Sikh ruler first crossing on a bridge of boats, and subsequently receiving in turn the visit of the Governor-General, on the right bank of the Sutley. On the 1st of November 1831 both camps broke ground, and commenced their march in opposite directions, after a week of magnificence and mutual display surrounding one of the days of the field of cloth of gold. On this occasion Runjeet requested and received from the British authorities a paper containing a promise of perpetual friendship. Ropur is about 1,100 feet above the level of the sea. The population of the town is returned at 7,110. Distant N W from Calcutta 1,120 miles. Lat. 30° 58', long. 76° 37'.

**ROREE,** or **LOHURKE** (the ancient Lohurkot), in Hindia, a town situate on the eastern bank of the Indus, on a rocky eminence of limestone, interspersed with flint. This rocky site is terminated abruptly on the western side by a precipice of forty feet high rising from the beach of the Indus, which, in inundation, attains a height of about sixteen feet above its lowest level. Westwood is of opinion that it formerly must have risen to fifty feet, washing the brow of the eminence on which Roree stands, and that then the

neighbouring rocky mts as the Indus were spoken rocks. According to the unanimous testimony of the natives, the level of the river during inundation continually decreases, and this is probably owing more to the wearing down of the rocky bed, than to any diminution of the supply of water in the upper part of the river's course.

Roore, when seen from without, has a striking and pleasing appearance, as the houses are four or five stories high, and of corresponding extent but when surveyed more closely, they are found to be ramshackle, in many instances rudely constructed with a slight timber frame filled up with wicker work, and plastered with mud and as whitewash though very easily obtainable is not used, they have a dingy and neglected appearance. The few more costly houses of burned brick were erected by wealthy merchants before the establishment of the dynasty of the late amirs. The streets are so narrow that a camel in passing occupies the entire breadth from side to side. The air in consequence, is very close and unwholesome. There are forty mosques in which prayers are still recited, and twice that number in a state of ruin and desertion. The great mosque stands on an elevated site in the north-west part of the town, and was built at the commencement of the seventeenth century by the lieutenant of the Emperor Akbar. It is a massive, gloomy pile of red brick, covered with three domes, and coated with glazed porcelain tiles. In an adjacent shrine is kept a hair of amber in a gold case set with rubies and emeralds, and inclosed in another of wood enriched with silver. This the pious Mahometan undoubtedly believes to be a hair of the beard of his prophet and a number of guardians of this precious relic are supported at the public expense.

Roore has a spacious and well built bazar, or lodging place for travellers, but it has been allowed to fall into great decay. There are two bazars, one for grain the other for miscellaneous articles, and both are tolerably well supplied but they are ill-built and ruinous. Manufactures are few and unimportant. They embrace the fabrication of paper of indifferent quality leather silks, and cottons, and the dyeing and printing of the last-named article. The population is mixed consisting of Hindoos, indigenous Sindians, Beloochees, Afghans, and Megals. All trades and handicrafts, with the exception of works in gold, silver and jewellery are in the hands exclusively of Mahometans, the Hindoos devote themselves chiefly to banking money broking, and similar traffic. The population is estimated at about 8,000. Lat. 27° 38' long 68° 55'.

**ROORE MEER SHAH**, in the Daman division of the Punjab, a town situated on the right bank of the Indus, 75 miles N W by N of the town of Multan. Lat. 31° long. 70° 46'.

**ROSHUNABAD**, in the British district of Furruckabad, head-gov of the N W Pro-

vinces, a town near the right bank of the Ganges, 10 miles N W of the city of Furruckabad. Lat. 27° 30', long 79° 32'.

**ROSS ISLAND**.—A considerable island, forming one of the group known as the Margal Archipelago. Its centre is about lat. 12° 14' long. 98° 18'.

**ROTANGA PASS**, leading through the mountains that separate the British district of Lahoul from Kulu, 32 miles N of Saltanpoor. Lat. 32° 25', long 77° 12'.

**ROTAS**, in the Punjab, an extensive fort six miles west of the right or western bank of the river Jhelum. The interior is two miles and a half long and is of an oblong narrow form having its two sides and eastern end resting upon the edge of ravines, which divide it from a table-land of elevation equal to that of the hill on which the fort stands. The western face of the plateau is washed by the small river Ghaz, running at its base. Its works are of immense strength, consisting of massive walls of stone thirty feet thick cemented with mortar and strengthened with bastions, all crenated throughout, and provided with a double row of loopholes. Connected with the fortress is an immense well, lined with masonry, and having passages down to the water so numerous that from fifty to a hundred persons may draw water at once.

The present fortress was built about the year 1540 by 4th Shah the Patan emperor of Delhi who had driven Humayoon into exile, and he is said to have expended a million and a half sterling in its construction. When Humayoon returned, at the head of an army to reclaim his empire, the fortress was given up to him without resistance. He demolished the palace raised within the fort by his rival and enemy but found the massive defences too strong for the limited time and means which he could allow for their destruction. The fortress is at present in a ruinous state, and in one place a huge mass of the wall has tumbled down the precipice, and rendered the interior accessible. It is considered by military men indefensible against modern modes of attack. Lat. 32° 58' long 73° 35'.

**ROTAS**.—See ROKHABURH.

**ROTHINGI**, in Bunnahr a pass in the district of Koonawar over a ridge rising abruptly from the left or south-eastern bank of the Taglakhar torrent. The ascent of the pass from the south west is a mile in length, at an angle from top to bottom of 43°. The elevation of the crest of the pass is 14,636 feet above the sea, yet the rays of the sun, reverberated from the bare rocks produced a heat quite oppressive. Above rise heavy summits of incredible height and grandeur, with extensive valleys between them, loaded by prodigious bodies of undissolving snow. Lat. 31° 36', long. 78° 42'.

**ROTUK**.—See ROTUK.

**ROTUNDA GHAT**.—See RUMFORDA.

**ROUDPUR**, in the British district of Cawnpore, lieut. gov. of the N W Provinces, a village on the route from Calpee to the cantonment of Cawnpore and seven miles S.W. of the latter. Lat. 26° 29' long 80° 20'

**ROUNAPOOR**, in the British district of Azimgurh, lieut. gov. of the N W Provinces, a village on the route from the town of Azimgurh to that of Goruckpoor and 18 miles N. of the former, 43 S. of the latter. It has a few shops, water is plentiful, and supplies may be had from the surrounding country which is low level and partially cultivated. Distant N. from Benares 70 miles. Lat. 26° 15', long 83° 20'

**ROWLI GHAT** in the British district of Bhoovar, lieut. gov. of the N W Provinces, a ferry over the Ganges, on the route from Moradabad to Mouffurnugger and 25 miles E. of the latter town. The village of Rowli is situated on the left bank of the Ganges. Distant N.W. from Calcutta 970 miles. Lat. 29° 25', long 78° 8'

**ROWRAH**—A town in the British district of Ahmednugger presidency of Bombay, 118 miles N.W. by N. of Ahmednugger. Lat. 20° 29' long 75° 42'

**BOWSURA**.—A town in the British district of Tirhoot, lieut. gov. of Bengal, 81 miles S.E. of Durbunga. Lat. 25° 43' long 86° 7'

**BOXAKANDEE**.—A town in the British district of Jessore, lieut. gov. of Bengal, 80 miles N.E. of Jessore. Lat. 23° 40', long 89° 25'

**ROYACOTTAH**.—A town in the British district of Salem presidency of Madras, 61 miles N. by W. of Salem. Lat. 12° 31' long 78° 5'

**ROY BAREILLY** in the district of Benares, in the territory of Oude, a town on the route from Allahabad to Lucknow and 72 miles N.W. of the former 50 S.E. of the latter. It is situated on the river Sai which is crossed by a brick built bridge, and is navigable so far up and can bear craft of twelve tons, though there are none except a few ferry boats at the place, in consequence of the intolerable exactions of the proprietors of lands along the lower course of the river. It is mentioned in the Ayeen Akbery in the sirkar or subdivision Manikpoor, soobah or province Allahabad. Roybareh has a brick fort and is assessed at 91,274 rupees. Lat. 26° 14', long 81° 19'

**ROYBUGGA**.—A town on the S.W. frontier of Bengal, in the native state of Gangpoor situated on the left bank of the Sunk river and 81 miles N.E. by N. from Sambalpoor. Lat. 22° 17' long 84° 42'

**ROYCHANGA**.—A town in the British district of Gooch Behar presidency of Bengal, 18 miles N.W. of Behar. Lat. 26° 27' long 89° 16'

**ROYMUNGUL RIVER**—One of the

mouths of the Ganges, falling into the sea in lat. 21° 42', long 89° 5'

**RUBOOPORA**, in the British district of Bolandshahr, lieut. gov. of the N W Provinces, a town on the route from Muttra to Delhi, by the left bank of the Jumna, 85 miles S.E. of Delhi. Lat. 28° 15' long 77° 40'

**RUDAUILL**, in the kingdom of Oude, a town 40 miles E. of Lucknow. It is surrounded by swamp except on the west side, and is superior to many other places of this country in having brick-built houses, and there is also a Mussulman mausoleum of the same material. Lat. 26° 54', long 81° 27'

**RUDAWAL**, in the territory of Bhurtpore, a village on the route from Agra to Mow 41 miles S.W. of the former, 374 N.E. of the latter. Close to it is an encamping-ground, and supplies and water are obtainable. Lat. 26° 59', long 77° 29'

**RUDLEGUNJ**—A town in the British district of Rungpoor, lieut. gov. of Bengal, 14 miles W. by S. of Rungpoor. Lat. 25° 57', long 89° 2'

**RUDOWLEE**, in the British district of Goruckpoor, lieut. gov. of the N W Provinces, a small town on the river Am, 40 miles N.W. of Goruckpoor cantonment. Buchanan, describing it fifty years ago, states the number of houses to be 100 and assigning six to each house, the population consequently may be estimated at 600. Lat. 27° 3', long 82° 48'

**RUDRA HIMALEH** a lofty summit of the Himalaya, rises on the eastern frontier of Gurwal towards Chinese Tartary. Fraser who viewed it from Gangotri at a distance of eight or ten miles, describes it under that aspect as having five huge lofty snowy peaks, rising behind a mass of bare rocky spires. The highest summit, as ascertained in the trigonometrical survey has an elevation of 22,590 feet above the sea. Lat. 30° 58' long 79° 9'

**RUDRAPRAYAG** in the British district of Kumaon, lieut. gov. of Agra, a village at the confluence of the rivers Alaknanda and Mandakini. At an inconsiderable height above the water is a small math or temple, and adjacent a few houses of Brahmans. There is also a rock thirty feet high and fifteen in diameter, called Bhim ka Chulha or the Kitchen of Bhim—a giant famous in Hindoo lore. It is completely excavated, somewhat in the form of a dome, with apertures at top, in which Bhim is supposed to have placed his cooking utensils. It is one of the five principal prayags or confluences mentioned as holy in the sacred books of the Hindoos. Its elevation above the sea is about 2,200 feet. Distance N.W. from Calcutta, by Lucknow, Bareilly, Almora, and Sinagar 1,020 miles. Lat. 30° 17', long 79° 2'

**RUGONATHGURH**—A town in the Rajpoot state of Jeypoor, 57 miles N.N.W. 840

# RUG--RUN

from Jeypoor and 104 miles S. by W from Hissar. Lat. 27° 40', long. 75° 31'

**RUGOWLEE**, in the British district of Banda, *lieut.-gov.* of the N W Province, a lofty rocky eminence, very steep and difficult of ascent, 10 miles N of the hill fort of Ajeergh. In 1809, when the British government commenced military operations against Luckman Singh rajah of Ajeergh, his uncle, Parsaud Singh took post with about 500 picked men on the hill of Rugowlee the fortified summit of which was accessible only by narrow zigzag pathways, commanded every twenty yards by strong posts behind large rocks, and manned with matchlockmen. All the lower defenses were, however, successively stormed by the British forces, who for want of scaling ladders, being unable to make good an entrance within the upper inclosure, were withdrawn. In the course of the night the inclosure was, however, evacuated by the enemy, leaving their chief and between sixty and seventy of their number killed 150 or 160 being wounded. The British loss amounted to twenty eight killed and 115 wounded. The summit of the hill is probably about 800 feet above the base or 1300 above the sea. Lat. 26° 1' long. 80° 22'

**RUHEEMPOOR**, in the British district of Goorgaon *lieut. gov.* of the N W Province, a town on the right bank of the Jumna, distant S.E. from Delhi 43 miles. Lat. 28° 6', long. 77° 31'

**RUHOLEE** in the British district of Moradabad *lieut. gov.* of the N W Province, a village on the route from Bareilly to Delhi, 40 miles W of the former. Lat. 25° 27' long. 78° 54'

**RUJGAWA**, in the British district of Allahabad, *lieut. gov.* of the N W Province, a village on the route by the Rajapur ferry from the cantonment of Allahabad to Banda, and 41 miles W of the former. Lat. 25° 25' long. 81° 21'

**RUJLA**.—A town of Malwa, in the native state of Jabboah 10 miles S. by E. from Jabboah, and 96 miles E.N.E. from Baroda. Lat. 22° 39' long. 74° 39'

**RUJORA**, in the territory of Dholpoor a town on the route from Agra to Baree, 80 miles S.W. of former 14 N.W. of the town of Dholpoor. Lat. 28° 50', long. 77° 45'

**RUJOU**, in the British district of Bareilly, *lieut.-gov.* of the N W Province, a village on the route from the town of Bareilly to Shah jehanpoor and seven miles S.E. of the former. Lat. 25° 17' long. 79° 35'

**RUMALUH** in the British district of Meerut, *lieut. gov.* of the N W Province, a town on the route from Dghil to Saharaspore 88 miles N of the former. Rumaluh has a population of 5,234 inhabitants. Lat. 29° 13' long. 77° 29'

**RUMYKEPOOR**, in the British district of

Cawnpore, *lieut.-gov.* of the N W Province, a town 10 miles W of the right bank of the Ganges. Lat. 26° 31', long. 80° 24'

**RUNDALA**.—See **KHUNDALI**.

**RUNEEA**, in the British district of Cawnpore, *lieut.-gov.* of the N W Province, a small town on the route from the cantonment of Cawnpore to that of Calpee, and 31 miles N.E. of the latter. Lat. 26° 24', long. 80° 8'

**RUNGAGOORA**.—A town in the British district of Mutrack *lieut.-gov.* of Bengal, 55 miles N.E. of Seabpoor. Lat. 27° 32', long. 95° 20'

**RUNGAMUTTEE**.—A town in the British district of Goalpara, *lieut.-gov.* of Bengal, 40 miles W of Goalpara. Lat. 26° 7', long. 90° 1'

**RUNGAPPOOR**.—A town in Hyderabad, or territory of the Nizam, 102 miles N.E. from Hyderabad and 145 miles N.N.W. from Guntoor. Lat. 18° 17', long. 79° 44'

**RUNGASAMOODRA**.—A town in the British district of Cuddapah, presidency of Madras, 65 miles S.W. by S. of Cuddapah. Lat. 13° 42' long. 78° 19'

**RUNGELPOOR**, in the Baree Doab division of the Punjab, a town situated on the left bank of the Ravee river 25 miles S.W. of the town of Lahore. Lat. 31° 20', long. 74°

**RUNGPOOR**.—See **BELASPUR**.

**RUNGPOOR**.—A British district under the presidency of Bengal named from its principal place. It is bounded on the north-east by Cooch Behar on the east by the Brahmapootra, dividing it from the British districts Goalpara and Mymensing on the south by the British district Bograh and on the south west by the British district Dinapore. It lies between lat. 25° 16'—26° 21' long. 88° 26'—89° 59' is 105 miles in length from south east to north west, and sixty in breadth the area is 4180 square miles. A great part of the district is low and it is estimated that in a considerable portion thirty six parts out of 100 are inundated during the rains. The general slope of the surface is from north-west to south east, as indicated by the flow of the rivers in that direction the principal of which are the Kuritten, Teesta, Dhorla, and Brahmapootra. In addition to these, there are many other streams of less note, the whole country being permeated by watercourses, forming communications between the great rivers. During the rains, the surface having everywhere great equality of elevation, an accidental depression in the waterway of either the Brahmapootra or the Ganges will immediately cause the general drainage of the country to set towards the lower of these great rivers. From some unexplained cause, more permanent alterations have taken place in the direction of the drainage the great volume of the water of the Teesta, which formerly was, by the Atiree, or south western channel of

that stream, thrown into the Ganges, is now, by the south-east channel, still denominated the *Tista*, thrown into the *Brahmapootra*. Though there is no lake of any considerable extent, there are numerous jills or small stagnant sheets of water, formed either in the deserted channels of streams or by the over flowing of springs. Their numbers and positions vary very much the old ones becoming obliterated either by silt or the accumulation of decayed vegetation, and new ones being formed by the alterations in the courses of rivers and other causes. Buchanan was of opinion that between the time of Major Rennell and that at which he wrote these minute lakes had diminished both in number and in size.

The climate of Bungalow differs considerably from that of places in India farther south and west. The hot winds of spring are but little felt anywhere within it, in the eastern part they are unknown, and even in the western they blow for not more than eight or ten days in the whole year. During May the temperature is rather high, but its effects are modified by the easterly winds which are comparatively cool. From the beginning of June to the end of October the heat is more felt, but this, in the judgment of Buchanan, is owing to the calmness of the weather as he never found the temperature exceed 84. In the northern part hoar-frosts are said occasionally to occur in midwinter.

On the zoology of this district Buchanan is almost the sole guide. Apes and monkeys of various kinds are numerous, leopards are some times, though rarely, to be met with, tigers and leopards are neither very numerous nor very mischievous, as they seldom destroy human beings, and the number of cattle falling a prey to them is not great. There are black bears in the district, but not in large numbers, of otters, foxes, and jackals, there are many two other animals, seemingly of the canine tribe,—the *hungra* and the *kubok* are spoken of, but Buchanan was unable to procure a sight of either. Wild elephants infest the eastern part, and also portions of the north-west they are very destructive to grain crops, especially rice. The woods harbour the rhinoceros, which is killed for its horn, to which imaginary virtues are attributed, and for its skin out of which excellent targets are made the hunters use the flesh as an article of food. The wild hog exists in different parts, in greater or less numbers the flesh is eaten, and is considered pure. There are wild buffaloes, as well as various kinds of deer and of antelope. The porcupine is less numerous than in some other parts, and is less sought after for food. The pangolin is found though a rare animal, and its flesh is greatly valued. Hares are very abundant. Porpoises are numerous in the *Brahmapootra*, and are killed for the sake of their oil. River turtles are numerous, and attain great size, some, Buchanan was informed, measuring between seven and eight

feet in length. These animals furnish an abundance of food to the inhabitants, though Buchanan found it distasteful.

The principal crops are rice, wheat, barley, pulse oil-seeds, garden vegetables, sugarcane, tobacco and indigo the mulberry tree thrives. Cotton indeed seems unquestionably to be a failure in the district. There are about fifty large indigo-factories. These are either managed by Europeans, or after the European method. Much of that made by natives is of inferior quality, but some is said to equal that of the Europeans. The number of factories of all sizes and descriptions is about 400.

Commerce appears in the time of Buchanan to have been by no means active. He gives a list of exports, which however, may be regarded as superseded by a more recent one in another publication, and which comprises both exports and imports. From this, indigo appears to be by far the largest among the exports, silk, gunny bags, tobacco, sugar, carpets, and paddy are next in order the remainder are less considerable. Among the imports, piece-goods occupy the first place cotton, salt, woollens, manufactured silks, and metals, are next in importance, and a number of miscellaneous articles are imported to a small extent. The population of the district is given under the article *BUREAU*.

The tract comprised within the British district of Bungalow was formerly the western part of the ancient Hindoo country called *Camroop*. The realm appears to have attained its greatest power and prosperity under *Rajah Nilambar* who was conquered about the close of the fifteenth century by *Huassan Shah*, of Bengal. On the overthrow of the kingdom of Bengal, about 1542, by *Shir Shah* the renowned Afghan subsequently *padshah* of Delhi, the district appears to have become part of that great empire. During the turbulent period subsequent to the death of *Shir Shah*, it was severed from the empire, to which it was again annexed by *Akbar*, about 1584. It passed to the East-India Company in 1765 under the firm of *Shah Alim*.

**BUNGPORE.**—The capital of the British district of the same name, under the presidency of Bengal, a town situate on the route from *Purneah* to *Goalpara*, 128 miles E. of the former 306 S.W. of the latter. Though the locality of the civil establishment of the district and the head station of the police, it is represented as a wretched place, consisting of scattered huts with a few brick-built houses. A mosque of considerable size, and two monuments much revered by *Musulmans*, having been erected in honour of reputed saints, constitute its principal attractions. The Hindoo places of worship are quite unworthy of notice. Bungalow is 150 miles N.E. of *Berhampur* by *Duagpur*, and 263 N.E. of *Calcutta* by the same route. Lat. 25° 40', long. 89° 16'.

**BUNKUTTA**, in the British district of *Agra*, head-gov. of the N.W. Provinces, a

# EUN—RUS.

village a mile from the right bank of the Jamna, on the route from the city of Agra to that of Muttra, and 12 miles N W of the former. It has a few shops, and is supplied with water from five brick lined wells, from forty to forty five feet deep. Lat. 27° 14', long 77° 58'.

**RUNN OF CATCH**—See **CATCH**.

**RUNPOOR**.—A tract of Orissa, inhabited by one of the independent hill tribes situate on the western boundary of the British district of Pooree. Its centre is about lat. 20, long 85° 30'.

**RUNJAN**.—A town in the British district of Chittagong, lieut.-gov. of Bengal, 19 miles N E of Chittagong. Lat. 22° 33' long 92° 6'.

**RUPRAN**, in the territory of Bhurtpore, a small town 16 miles S.E. of the city of Bhurtpore. The hills here consist, in inexhaustible quantities, of rock of compact durable sandstone, of various hues much in request for fine building purposes, and hence quarried to great extent. The tasteful and highly finished buildings of Deeg, in the northern part of the territory, are constructed of this stone. Lat. 27, long 77 39.

**RUPIN** in Bomahur a pass over the range of the Himalaya bounding Koonawar on the south. The formation of the rocks is partly gneiss, partly granite but the former is most abundant. Elevation above the sea 15,480 feet. Lat. 31 21 long 76 12.

**RUPSHU**, in Ladakh, among the Western Himalayas in a very elevated and barren plain, or extensive valley bearing a scanty vegetation of grass and stunted furze subject, even in the height of summer to frost and snow and being swept over by the most impetuous whirlwinds. Its mean elevation is 16 000 feet. The climate is characterized by great aridity, and from this cause, and the intense cold is peculiarly suited to the constitution of the yak and shawl-goat, which thrive here, notwithstanding the scantiness of pasture. Its centre is about lat. 33, long 78 15.

**RURTONDA GHAT**.—A pass by which the road from Nagotna to Saktara is carried over the Western Ghats. Distant 34 miles W N W of Saktara. Lat. 17° 54, long 73 38.

**RUSAREH**, or **RUSRA**, in the British district of Ghazepore, lieut.-gov. of the N W Provinces, a town on the route from Balliah to Ammurgah, 20 miles N W of the former. Rusareh contains a population of 7 228 inhabitants. Lat. 25 50' long 83 58'.

**RUSHDUN** in the British district of Cawnpore, lieut.-gov. of the N W Provinces, a village on the route from Calpee to the cantonment of Futeelgurh, and 20 miles N of the former. It contains a population of 5 000 inhabitants, has a large bazar, and is well supplied with water. Lat. 26° 22, long 79° 44.

**RUSKOOND**.—A town in the British district of Midnapore, lieut.-gov. of Bengal, 26 miles N of Midnapore. Lat. 23° 47, long. 87 25.

**RUSKULUNG**.—See **DARSUNG**.

**RUSOOLA**, in the British district of Bareilly, lieut. gov. of the N W Provinces, a village on the route from the city of Agra to Bareilly, and 25 miles S.W. of the latter. Lat. 28 14, long 79 12.

**RUSOOLABAD**, in the British district of Furruckabad, lieut. gov. of the N W Provinces, a town near the left bank of the Rann, 25 miles S. of the city of Furruckabad. Lat. 27 7 long 79 42.

**RUSOOLPOOR**, in the British district of Muttra, lieut. gov. of the N W Provinces, a village on the route from Muttra cantonment to Bhurtpore, and 13 miles S.W. of the former. Lat. 27 20' long 77 38.

**RUSSAREH**, in the British district of Ghazepore, lieut.-gov. of the N W Provinces, a town near the northern frontier towards Goruckpoor and 25 miles N.E. of Ghazepore cantonment. Lat. 25 51, long. 83 55.

**RUSSELKONDAH** in the British district of Ganjam, presidency of Madras, a town with military cantonment on the north western frontier towards the British territory of Orissa. Its name is compounded of the surname of a British commissioner who accompanied the army in its operations in this part of India, and kondah signifying 'hill' the cantonment being situate at the foot of an eminence of moderate height. Two small rivers flow through the cantonment, in a direction south-east, and subsequently uniting pass by Ganjam, a short distance below which the united stream falls into the Bay of Bengal. They overflow their banks during the rains, but are dry at other times, and then the cantonment is supplied with water from wells. In the cantonment are barracks, and a spacious, well built, commodious hospital. The climate is very hot and oppressive during March, April, and May but for the rest of the year pleasant and salubrious. Elevation above the sea 150 feet. Distance from Madras, N.E., 560 miles, Calcutta, S.W., 300 Ganjam, N.E. 50. Lat. 20 long. 84 40'.

**RUSSELLAWALA**, in the Baree Doab division of the Punjab, a town situated 15 miles from the left bank of the Chenab, 18 miles E.N.E. of the town of Mooltan. Lat. 30 12' long 71 47.

**RUSOOLABAD**, in the British district of Cawnpore, lieut.-gov. of the N W Provinces, a town on the route from Cawnpore to Etawah, 53 miles W N W of the former. Lat. 26° 40', long 79 58'.

**RUSOOLABAD**, in the territory of Oude, a town on the route from Cawnpore to Futeelgurh, 40 miles N W of the latter. Lat. 26°, long. 81 30'.

# RUS—RUT

**RUSBOOLPOOR**.—A town in the British district of Behar, West gov of Bengal, 25 miles N.E. by N. of Shergotty Lat. 24 53', long 86° 4'

**RUTHIANPOOR**, in the British district of Mysore, West gov of the N W Provinces, a small town on the route from the cantonment of Etawa to that of Mysore, and 10 miles S. of the latter Lat. 27° 6' long 79° 4'

**RUTHOWRUH**, or **RHUTORAH**, in the British district of Meerut, West gov of the N W Provinces a town on the route from Delhi to Saharunpoor 37 miles N. of the former Ruthowruh contains a population of 5,734 inhabitants. Lat 29 12', long 77° 17'

**RUTLAM**, in Malwa, the principal place of a district of the same name. It is a large and well-built town with good basars. The district contains eighty eight villages, and yields an annual revenue of 4 50 000 rupees, or 45 000. The rajah who holds it as tributary to Scindia, is descended from Ruttan Singh, a scion of the Rajput family of Joud pore, who, about the middle of the seventeenth century, received a grant of the place from Shah Jehan, the emperor of Delhi. Though now much humiliated, he retains influence over a considerable Rajput population, and in 1819 succeeded on a few days' notice, in assembling 1,200 mounted combatants to resist Scindia's claim of tribute. On that occasion, the British government interfered, and enforced an arrangement, by which it guaranteed the annual payment of 84 000 Salim Shahi rupees (about 60,000 Company's rupees) to Scindia, and freedom from molestation or interference to the Rutlam rajah. The population of the town is about 10 000, that of the district, inclusive of Eilana is computed at 91,723. The area of the territory as above, is stated to be 936 square miles. The military force of the state amounts to about 800 men. Elevation of the town above the sea 1,577 feet. Distant 50 miles W of Oojein, 238 S.W. of Gwalior fort. Lat. 23 19', long 75 1

**RUTMOO**.—A river, or rather a great torrent, of the British district of Saharunpoor, has its origin on the south western declivity of the Bewallik range, about lat. 30 10', long 78° 2'. It holds a course of about thirty five miles in a southerly direction, to its confluence with the Solani, in lat. 29° 50' long. 78. The body of water in the Rutmoos in time of flood must be very considerable, as, where the passage of the stream crosses the Ganges Canal, a dam has been constructed, with forty central openings of ten feet each, and two side openings of 100 feet each, with flank overfalls, while a regulating bridge is built across the canal, to exclude the waters of the river during the floods.

**RUTNAGHERRY**, a collectorate of the presidency of Bombay is bounded on the north by the Hubli territory and the collectorate of Tanah, on the south by Sawant Warree and the Portuguese territory of Goa on the

east by Satara and Kolapore, and on the west by the Arabian Sea. It extends from north lat. 15° 44' to 18° 6' and from east long 73° 6' to 73° 58. Its greatest length from north to south is 187 miles its greatest breadth from east to west forty miles. Its area is 3,964 square miles. The population is given under the article BOMBAY. The quantity of arable land in the collectorate is small and from this cause, as well as from the advantage of water-carriage afforded by the numerous creeks which intersect the country and enable the ryot to find a ready market for his produce the comparative breadth of cultivation is considerable. On this account, the extreme of want is seldom experienced in this district while however, many families exist for internal communication, the Concan labourers under the disadvantage of being shut out from the Deccan by the Syandee range, which is a vast obstacle to traffic. Down various parts of this range the different ghats or passes communicate with the sascoast, and these, under the native government, were kept by the farmers of the transit-duties in sufficient repair for the passage of bullocks. The transit-duties being now abolished, there is no person directly interested in the repair, and for the most part these avenues of communication between the upper and lower country from the harbour of Bombay, as far south as Malwan, are in a wretched state. There are two exceptions the "Rotunda Ghat," leading from Mhar to Satara, over the Mahabulshwar range, and the Koombarles Ghat," leading from Chulpoon to the Deccan, south of Satara, which was converted into a good bridle-road in 1824 and has been since kept in tolerable repair. The passes of most importance to the well being of the Concan, independently of the two above specified, are the "Anus Koorra Ghat," which leads to Rajapoor the town of greatest trade probably in the collectorate, and the principal ghat leading to Malwan, that of "Bhowda." The former of these is a very important one, probably the most important of any south of the Elore Ghat. Were it passable for carts, it would open to the coast a large district, extending along both banks of the Krishna, as far east as Bagulikote and Bagapoor a rich district, a large portion of the trade of which still passes by this ghat. Great as has been the relief to the trade of the country from the abolition of transit-duties in 1837, and of sayer-taxes in 1844 greater relief, and a greater impetus to trade, would, in the judgment of competent authority, have been afforded, as regards this district, had those taxes been retained, and their proceeds expended on roads and bridges between the countries separated by the Ghats. At present, trade stagnates for want of adequate means of intercourse, the cost of carriage is greatly increased by the necessity of resorting to the use of pack-bullocks. In unfavourable seasons, when furrage is scarce large droves of cattle can scarcely penetrate into the interior, except at a ruinous cost.

The employment of bullocks in draught, did the road permit it, would effect an extraordinary saving, as two bullocks harnessed to a cart on a fair road would draw an amount of goods which it would require five or six to carry on their backs. The district has suffered much from the ravages of tigers.

The chief products of the country are rice and grain. Attempts have been made to introduce superior descriptions of produce, but they have been attended by very little success. The Mauritius sugarcane has been tried, but to a very small extent, its cultivation is languid, and nearly stationary, the advance being too slight to merit notice. One of the experimental cotton farms was established in Butnagheri, but the failure was complete, and in 1846 the establishment was abolished. Some advance seems to have been recently made in the culture of hemp. To the growth of flax, the soil and climate appear to be uncontrollably opposed. The plant is a miserable dwarf, and the fibres of the stalk too short and too weak to be of any value to the manufacturer. Butnagheri the chief town of the district, is in lat. 17° long 73° 20'.

**PUTER**, in the British district of Chassepore, lieutenant-gov. of the N.W. Provinces, a town near the northern frontier towards Aizingbur and 35 miles N.E. of Ghasseepore cantonment. Lat. 25° 50' long 84° 8'.

**PUTKEA**, in the British district of Hurriana, lieutenant-gov. of the N.W. Provinces, a town on the route from Hissar to Ferozepore 87 miles N.W. of the former. Lat. 29° 40' long 75° 41'.

**PUTOLE**, in Sirhind, a village on the route from Hansee to Lodiana, and 30 miles S. of the latter place. Distant N.W. from Calcutta 1,082 miles. Lat. 30° 29' long 76°.

**PUTTUNGUNJE**.—A town in the British district of Bhagulpore, lieutenant-gov. of Bengal 23 miles W. of Bhagulpore. Lat. 25° 4' long 86° 6'.

**PUTTUNGURH**, in Kuhlloor a fort on the crest of the steep ridge of Malown and a mile and a half N.W. of that stronghold. During the brief but obstinately contested war with the Goorkhas, it was occupied by the British troops, and though of inconsiderable size, being substantially built, and very strong by its site, formed a very important position in the operations against Malown. Distant N.W. from Calcutta 1,098 miles. Lat. 31° 14' long 76° 51'.

**PUTTUNGURH KHEREE** in the territory of Gwalior, or possessions of Sindhis family on the route from Neemuch to Boondee 36 miles N.E. of former 73 S.W. of the latter. It is of considerable size, and has a bazar. Lat. 24° 49' long 75° 13'.

**PUTTUNPOOR**.—A town in Oude, 11 miles from the right bank of the Gogra river, and 13 miles S. from Oude. Lat. 26° 33' long 82° 10'.

**PUTTUNPOOR**, in the territory of Nagpore, a town, or rather collection of huts, on the route from Hazarnag to the city of Nagpore 380 miles S.W. of the former 244 N.E. of the latter. Though the capital of the district of Choteenagpur, Blunt describes it, at the time of his visit fifty years ago, as consisting of about 1,000 huts, a great many of which were desolate. Of the tanks, the largest has been formed by collecting the water by means of an embankment nearly two miles in length. The town is situated in a 'champaign country, abundantly watered with little rivers, full of villages, and beautifully ornamented with groves and tanks.' It was originally called Rajepour, but was named Puttunpoor in honour of Puttun Singh, once rajah of the place. In A.D. 1744, Bhonsla Raghoe, rajah of Berar, having dispossessed the Gond rajah of Deogarh, gave him a jaghire in Puttunpoor. In A.D. 1761 after Law and his French followers, supporters of Shah Alom, were defeated by the British at Patna, a remnant of 120 men, attempting to retreat across the country to the Deccan were entertained here for a few days by the Mahratta commander of the town, and afterwards treacherously massacred by him. Puttunpoor is distant S. from Allahabad 230 miles. Lat. 23° 14' long 82° 8'.

**PUTTUSAW**.—A town in the British district of Purneah, lieutenant-gov. of Bengal 84 miles N.W. of Purneah. Lat. 26° 5' long 87° 9'.

**PUTUNGURH**, in the Rajpoot state of Beekaneer a town near the eastern frontier towards Shekhawatee, on the route from Odeypore to the town of Beekaneer and 55 miles E. of the latter place. It is surrounded by a low stone wall and has a small citadel on the top of a sandhill at its south east angle. The bazars are neatly laid out, and look well. It is the private property of the rajah of Beekaneer or is khalsa, a term in some measure corresponding to our 'crown land.' According to Tod, the number of houses is 1,000. Lat. 26° 8' long 74° 43'.

**PUTUNJUN**.—A town in the British district of Sholapoor presidency of Bombay, 29 miles N. of Sholapoor. Lat. 15° 4' long 75° 57'.

**PUTUNPOOREE**, in the British district of Pilibheet, lieutenant-gov. of the N.W. Provinces, a village on the route by Nanakmath and Rudrapoor, from the town of Pilibheet to that of Kashi 35 miles S.E. of the latter. Lat. 25° long 79° 21'.

**PUTWAH**, in the territory of Gwalior, a village on the route from Calpee to the fort of Gwalior 84 miles W. of former, 40 E. of latter. Lat. 26° 11' long 78° 40'.

**PUTWUL**.—A town in the British district of Suron, lieutenant-gov. of Bengal, 24 miles N.W. of Betnah. Lat. 27° long 84° 17'.

**RUXAM**.—A town in the British district of Gwalpore, lieutenant-gov. of Bengal, 20 miles

# RYA-SAD

**RYA-SAD**.—A town in the hill country of Jaypoor, situated on the right bank of the Lalgah river, and 72 miles N from Vindhyagiri. Lat. 19° 10', long. 83° 20'.

**RYAGUDDAH**.—A town in the hill country of Jaypoor, situated on the right bank of the Lalgah river, and 72 miles N from Vindhyagiri. Lat. 19° 10', long. 83° 20'.

**RYALPETHAH**.—A town in the British district of Cuddapah, presidency of Madras, 50 miles S. of Cuddapah. Lat. 13° 19', long. 76° 45'.

**RYEPOOR**, in the territory of Nagpoor—a town on the route from Outack to the city of Nagpoor 848 miles W of former, 180 E. of latter. It has a large bazar. Though remote from the sea, bulky and heavy articles can be conveyed to its vicinity during the rains by the continuous courses of the Mahanuddee and Sew rivers. Distant from Calcutta, S.W., 465 miles. Lat. 21° 11', long. 81° 40'.

**RYEPOOR**, in the territory of Gwalior, or possessions of Scindia's family, a town six miles S.W. of the fort of Gwalior. Lat. 26° 8', long. 76° 4'.

**RYGURH**.—A raj within the jurisdiction of the political agent for the south west frontier of Bengal. The area is 1,421 square miles the centre is in lat. 22° 10', long. 83° 20'. The country is plain is wild but the native government being a tolerable one, it is improving, and the people are orderly. The town of Rygurh, which is neat and surrounded by agreeable groves, is in lat. 21° 45' long. 83° 12'. The country is computed to be worth 20,000 rupees annually, the tribute is only 170 rupees. The population is returned as nearly 84,000.

**RYKWARA**.—A town in the native state of Oodeyva, 41 miles W from Rewah and 95 miles N.W. by N from Sohagpoor. Lat. 24° 30', long. 80° 44'.

**RYPOOR**, in the tract of Baghelound, in the territory of Rewah, a small town on the route by the Kutra Pass, from Allahabad to Jubbulpore, and 95 miles S.W. of the former. Jacquemont styles it a populous village, the inhabitants of which are in a state of deplorable indigence, and expresses his doubts as to the reported fertility of the surrounding country, which is described by Garden as undulating, well wooded, highly cultivated, and exceedingly beautiful. There is a bazar, and abundance of water from wells and tanks. Elevation above the sea about 1,100 feet. Lat. 24° 34', long. 81° 30'.

**RYPORA**.—A town of Punjab, in the province of Bundelkund 61 miles S. by W from Punjab, and eight miles E. from Sangur. Lat. 25° 36', long. 80°.

## S.

**SABAR RIVER**, in Burmah, an offshoot of the Irrawaddy, one of the branches of the Irrawaddy. It runs in a south-easterly direction,

and falls into the Hittang, near the town of Tougo, in lat. 19° 2', long. 96° 20'.

**SAAWAN**, in the territory of Gwalior, or possessions of Scindia's family, a town on the route by Rhanpoora and the Muskundara Pass, from Neemuch to Kotah, 15 miles E. of former, 109 S.W. of latter. It has a bazar and supplies and water are plentiful. Population about 1,800. Lat. 24° 28' long. 75° 10'.

**SABALGURH** in the territory of Gwalior or possessions of Scindia, a town with a fort of great natural strength, on a hill on the right or south bank of the river Chumbul 45 miles W of Gwalior fort. Lat. 26° 15' long. 77° 24'.

**SABAR**.—A town in the British district of Dacca, lieutenant gov. of Bengal, 18 miles N.W. of Dacca. Lat. 23° 52', long. 90° 13'.

**SABHAYEA**.—A town of Burmah, situated on the right bank of the Irrawaddy river and 144 miles S.W. by S. from Ava. Lat. 20° 10', long. 94° 45'.

**SABHAWALA** in the British district of Dehra Doon, a village on the left bank of the Asan. Here was a station of the series of small triangles in the trigonometrical survey of the Himalayas. Elevation above the sea 1,793 feet. Lat. 30° 22' long. 77° 51'.

**SABURMUTTEE**, a river of Guzerat, rises in lat. 24° 44', long. 73° 30' near the town of Mairpoor, in the Rajpoor state of Oodeypoor and after a course in a southerly direction of about 200 miles, it falls into the Gulf of Cambay in lat. 23° 20' long. 72° 21'.

**SACKEKAMENG**.—A town of Eastern India, in the native state of Munseepoor situated on the left bank of the Nankatha Khyang river and eight miles N.E. from Munseepoor. Lat. 24° 52' long. 94° 9'.

**SACRAPATAM**.—A town in the Mysore 88 miles N.W. from Seringapatam, and 84 miles N.E. by E. from Mangalore. Lat. 13° 26', long. 75° 59'.

**SACUN**.—A town in the British district of Sumbulpoor, on the south west frontier of Bengal, eight miles N. by E. of Sumbulpoor. Lat. 21° 34' long. 84° 2'.

**SADKEEPOOR**, in the British district of Banda, lieutenant gov. of the N.W. Provinces, a town on the right bank of the Jumna, 26 miles N.E. of the town of Banda, 20 miles S.W. of the town of Fatehpore. Lat. 25° 46', long. 80° 57'.

**SADOOLAPOOR**.—A town in the British district of Rungpoor, lieutenant gov. of Bengal, 26 miles S.E. by S. of Rungpoor. Lat. 25° 22', long. 89° 29'.

**SADREAS**, in the British district of Chingleput, presidency of Madras, a town on the Coromandel coast, in this part low and wooded, though inland three or four miles is a range of rugged hills of no great height, called the Sadras Hills. The estuary of the river Palur, three miles to the south, is so obstructed by a

# SAE-SAH

bar as to admit only insignificant coasting-craft, and at Sadra there is no haven, so that ships must anchor in the open sea. According to Heber, "Sadra is a large but poor-looking town, once a Dutch settlement, and still containing many families of decayed burghers, the melancholy relics of a ruined factory. Some of them have little pensions from the clemency of the British government. Here are still the ruins of a fort, a place of some strength during the possession of the town by the Dutch. Distance from Cuddalore, N. 62 miles Arcot, S. E. 62, Madras, S. 42. Lat. 13° 31' long. 80° 15'.

**SAEE**, in the territory of Oude, a river rising in lat. 27° 10', long. 80° 32' about mid distance between the Gomtee and the Ganges. It holds a very serpentine course in a direction generally south-east, and falls into the Gomtee on the right side, ten miles below the town of Jounpore its total length of course being about 280 miles. It is navigable during the rains for craft carrying from ten to twelve tons as far as Ras Bareilly 130 miles from its mouth. At Mohau, about forty miles from its source it is crossed by a stone bridge. Close to Ras Bareilly is a bridge of brick, over which passes the route from Allahabad to Lucknow. At Pertabghur, sixty miles lower down it is crossed by the route from Allahabad to Sooltauport the passage being made during low water by ford, at other times by ferry. Still lower and about twenty miles from its mouth, it is crossed on the route from Allahabad to Jounpore, by means of a fine brick built bridge which has been recently repaired. It now consists of four arches, each of forty-seven feet span. Wilford observes that this river is called Sambu and Suoti, and in the spoken dialects Sya, because it abounds with small shells. "This," he continues, "is really the case as I have repeatedly observed whilst surveying or travelling along its banks. They are all fossil, small and embedded in its banks, and appear here and there, when laid bare by the encroachments of the river, they consist chiefly of cockles and periwinkles." He remarks subsequently "This river is not mentioned in any Sanscrit book that I ever saw but I take it to be the Sambus of Megasthenes."

**SAEL**—A town in the territory of Nagpore, 51 miles S. by E. from Rattunpore, and 110 miles W from Sumbulpore. Lat. 21° 30', long. 82° 20'.

**SAENUGURH**, in the territory of Puna, in Bundelcund a town on the route from Banda to Jabulpore 69 miles N of the latter. The Garhi, or little fort here "consists of four stone houses, connected by a wall, very capable of defence if not attacked by artillery." Lat. 23° 55', long. 80° 30'.

**SAFAPOOR**—A town in the dominions of Ghobab Singh, the ruler of Cashmere, 14 miles N W by N from Siringer. Lat. 34° 14', long. 74° 49'.

**SAFTIBAREE**—A town in the British district of Rangpore, Bent. gov. of Bengal, 14 miles N E by N of Haogpore. Lat. 25° 51' long. 89° 22'.

**SAGGOUR**—A town in the native state of Bonel, on the south west frontier of Bengal, 86 miles E N E. from Sumbulpore, and 110 miles N N W from Cuttack. Lat. 21° 58', long. 85° 15'.

**SAGOR**, in the territory of Indore, or possessions of Holkar's family a small town on the route from the British cantonment of Mew to Baroda, 12 miles W of former. Elevation above the sea 1932 feet. Lat. 22° 36', long. 75° 40'.

**SAHANGURREE**—A town in the territory of Nagpore 60 miles E. by S. from Nagpore and 78 miles S. by E. from Seem. Lat. 20° 59' long. 80° 3'.

**SAHAPOOR**, in the British district of Moradabad Bent. gov. of the N W Provinces, a village on the route from the town of Meerut to that of Moradabad and 30 miles S. E. of the former place. Lat. 28° 59' long. 78° 13'.

**SAHDUREE**—A town in the Rajpoot state of Oodeypore, 51 miles E. S. E. from Oodeypore and 23 miles W by S. from Neemuch. Lat. 24° 21', long. 74° 35'.

**SAHDUREE**—A town in the Rajpoot state of Oodeypore 62 miles E. S. E. from Oodeypore, and 13 miles S. W by W from Neemuch. Lat. 24° 20', long. 74° 45'.

**SAHEB GUNJ**—A town in the British district of Tirhoot Bent. gov. of Bengal 30 miles W N W of Mousserpoor. Lat. 24° 14', long. 86°.

**SAHEEWAL**, in the Jetch Doon division of the Punjab, a town situated on the left bank of the Jhelum river 119 miles W by N of the town of Lahore. Lat. 31° 55' long. 73° 21'.

**SAHGANJ** or **SAEGANJ**, in the district of Pachhamrat, territory of Oude, a town three miles S. W of the right bank of the Tons (North-eastern). It is surrounded by two mud walls, one within the other a ditch of six feet deep intervening. Distance S. E. of Lucknow 78 miles. Lat. 26° 57', long. 83° 2'.

**SAHI** in the hill state of Hindoor, a village and halting place on the route from Subathoe to Belaspore and 18 miles N W of the former. Lat. 31° 7' long. 76° 55'.

**SAHINSPOOR**, a village in the British district of Dehra Doon is situated on the right bank of the Assn. It was a secondary station in the great trigonometrical survey of the Himalayas. Elevation above the sea 1,762 feet. Lat. 30° 24', long. 77° 52'.

**SAHJADPUR**, in the district of Aldenast, territory of Oude, a town 4 miles S. W of the right bank of the river Tons (North-eastern), 100 miles E. of Lucknow. According to Butler the population is 2,000 of whom two-thirds are Mussulmans, principally *muftis*. Lat. 26° 26', long. 82° 25'.

**SAN KRAS**, in the British district of Futtehpore, head-gov. of the N W Provinces, a town situated on the route from the town of Futtehpore to Banda, and seven miles S W of the former. Lat. 25° 55' long. 80° 45'

**SARLAYDAN**.—A town in the British territory of Pagan, situated on the right bank of the Irawaddy river, and 16 miles S.W. by S. from Prome. Lat. 18° 55', long. 94° 54'

**SAHUNPOOR**, in the British district of Hissar, head-gov. of the N W Provinces, a town on the route from Moradabad to Hurdwar, and 64 miles N W of the former. Lat. 29° 38' long. 78° 28'

**SAHUSPOOR**.—A town in the British district of Sumbulpore south west frontier of Bengal, 11 miles S S E of Sumbulpore. Lat. 23° 30', long. 84° 5'

**SAIDABAD**, in the British district of Muttra, head-gov. of the N W Provinces, a town on the route from Agra to Alighur, and 21 miles N of the former. Lat. 27° 26' long. 78° 5'

**SAIGURH**, in the territory of Oude, a village on the route from Lucknow cantonment to Fartahgurh, 80 miles S E. of the former 30 N W of the latter. Water and supplies are plentiful. the road in this part of the route is good. Lat. 26° 18' long. 81° 30'

**SAIN** in Birmour a range of mountains stretching in a direction from north west to south east, between the river Julal, flowing along its south western and the Gurl, along its eastern base. It is entirely of limestone, the course of the Gurl forming the bounding line between that formation and the slate farther north. Fraser states that its height was usually conjectured to be about 8 000 feet but he considers that amount too great, and adds that between 6,000 and 7 000 is more probable. The range stretches about twenty five miles in length, between lat. 34° 37'—30° 51' long. 77° 15'—77° 29'

**SAINJ** a river of Kach, rises in lat. 32° 2', long. 77° 40', and flowing south-west for thirty-eight miles, falls into the Beas, in lat. 31° 45', long. 76° 15'

**SAINT MARTIN ISLAND**, off the coast of Arracan, is formed of two divisions united by a dry ledge of rocks, near the east side of the island. There is anchorage in five to six fathoms, where ships may procure fresh water from the springs on the island. Lat. 30° 25', long. 92° 25'

**SAINT THOMAS'S MOUNT**, in the British district of Chingleput, presidency of Madras, a military station at the foot of a hill, the most northern and least elevated of a small range running parallel to the Coromandel coast, and about five miles west of it. "The cantonment is laid out at the base of the eastern and southern sides of the hill from which it takes its name, and occupies a surface of 760 acres. The principal and most of the buildings have as common aspect, and are open to the

general influence of the sea-breeze." It is the principal station and head-quarters of the Madras artillery. The Adyar river, which in the monsoon season has a considerable body of water but is nearly dry at other times, is at the distance of a mile north of the cantonment, and there are numerous tanks scattered throughout the neighbouring country. The geological formation of the hill is syenite and greenstone and its summit, 340 feet above the level of the sea, is surmounted by a small range of buildings, including a Roman Catholic chapel and appropriate establishment, under the jurisdiction of the Portuguese archbishop of Goa. According to tradition, the hill called Little Saint Thomas's Mount was the scene of the martyrdom of Saint Thomas, whose apostolic toils are thought to have extended thus far. The native population of Saint Thomas's Mount, exclusive of the military establishment, amounted in 1857, according to official statement to 17 720 persons, 3 500 being Mussulmans. Distance from Madras, N E., 253 miles. Tanjore, N, 170 Cuddalore, N, 95 Bangalore, E, 178 Madras, S.W., 10 Lat. 13, long. 80 18'

**ST THOME**, in the British district of Chingleput presidency of Madras, a town on the Coromandel coast, at the bottom of a small bay. From time immemorial this town called by the natives Mallapur is crowded every year with pilgrims from various parts of Asia, including Syria, Palestine and Armenia, eager to visit the spot where according to tradition, St Thomas the apostle suffered martyrdom. The generally alleged scene of the martyrdom is a small mount near the petty fort of St. Thome or Mallapur and is now included within the suburbs of Madras, in consequence of the extension of the city in that direction. Others, however maintain that the apostle was martyred at St. Thomas's Mount, ranged over the military cantonment of that name. According to the traditions of the native Christians, St Thomas, having preached Christianity in Arabia, the island of Socotra, and Malabar proceeded to the Coromandel coast, and having succeeded in making many proselytes at Malabar, excited the violent jealousy and resentment of the Brahmans, at whose instigation he was stoned to death by the populace, and buried on the mount. The place was taken in the year 1547 by the Portuguese, who named it St. Thome, instead of Mallapur or City of Paravacca. During the ascendancy of this nation in India, it became a place of considerable importance. Lat. 13° 2', long. 80° 18'

**SAIPOOR**, or **SHAHIPUR**.—A town in the native state of Rewah. It is situated on the river Ehars, a tributary of the Soane, 90 miles S. of Benares, 170 W of Hamirpore, 409 W of Calcutta. Lat. 24° 5', long. 83° 45'

**SAJAFPOOR**, in the jaghure of Sampter, in Bundelkhand, a town 13 miles N W of the last

bank of the river Betwa. Here, in Dec. 1817, the British army commanded by the Marquis of Hastings, Governor-General, encamped, in the course of its advance towards Gwalior to intimidate Scindia. Distant S.W. of Calpoor 75 miles. Lat. 25 46 long 78° 53'

**SAKKEYMOUN**.—A town in the British territory of Pegu, situate on the left bank of the Iraddy river and 52 miles S.S.E. from Prame. Lat. 18 6, long 95 21

**SAKOON**.—A town in the Rajpoot state of Jeypoor, 49 miles W.S.W. from Jeypoor and 34 miles N.E. by E. from Ajmeer. Lat. 26° 42', long 75° 11'

**SAKOOR**.—A town in Hyderabad, 72 miles S. by E. from Elitohpoor and 81 miles N.W. from Mahur. Lat. 20 10' long 77 40

**SAKUM** in the Raseema Doab division of the Punjab, a town situated 14 miles from the right bank of the Ravee, 18 miles N.W. by N. of the town of Lahore. Lat. 31 49', long 74 8'

**SALAGRA**.—See GUNDUCK

**SALAGRAM**.—A town in the Mysore, 32 miles W.N.W. from Seringapatam, and 77 miles N.E. from Channarayana. Lat. 12 35' long 76 18'

**SALAOON**, or **SALON**, the principal town of the district of the same name, in the territory of Oude is situate close to the right bank of the river Basse. It belongs to a proprietor, who, though denominated fakir, has an annual income of 30 000 rupees out of which reserving 1,300 for his personal wants, he expends the remainder on the maintenance of Hindoo and Mussulman religious mendicants, without distinction of sects. The population is estimated by Better at 4 000, of whom 1,000 are Hindoo cultivators the rest Mussulmans. Lat. 26 2, long 81 30'

**SALBY** or **SALBYE**.—A town in the territory of Gwalior or the possessions of Scindia's family 82 miles S.E. of the fort of Gwalior. Here, in 1782, was concluded a treaty between the Mahratta states and the British government, unfavourable on the whole to the latter but making to them an unqualified transfer of Salsette and two or three islands of minor importance, as well as confirming a previous assignment of the Mahratta claims in regard to the city of Broach. Lat. 25° 58', long 78 16'

**SALERHATTA**.—A town on the south-west frontier of Bengal in the petty native state of Patna, situate on the left bank of the Aurag river, and 42 miles S.W. by S. from Sambulpoor. Lat. 21°, long 83° 39'

**SALEM** is a British district under the presidency of Madras, named from its principal place, is bounded on the north by Mysore and the northern division of Arcot, on the east by the northern and southern divisions of Arcot on the south and south-east by Trichinopoly on the south-west by Coimbatore, and on the

west by the last-named district and by Mysore. It lies between lat. 11° 2'—12° 55' and long. 77° 22'—79°, the area is reckoned at 8,300 square miles. The western part of the district, bordering on Mysore and the British district of Coimbatore, is very mountainous, and some of the ranges attain an elevation of between 5,000 and 6 000 feet above the level of the sea. The Juvannady Mountains are situate on the eastern side of the Raramahal the Sheeravoy near the town of Salem, the Patchamally in the talook of Abteor and the Collemally and Sheudammungalum range in the south-eastern corner of the district. All these hills are inhabited and extensively cultivated, and produce abundance of teak, sandal-wood, and black wood. The river Cavery touches on this district at its north western angle, and flowing first south-eastward, and subsequently southward, forms the western and south western boundary of this district towards Coimbatore for 140 miles. It passes into Trichinopoly, and ultimately falls into the Bay of Bengal. The general drainage of the country is southward and south-westward into the river Cavery; and of the streams taking this course the principal is the Tyromany, flowing by the town of Salem. A few streams in the western part of the district flow northward or north-eastward and discharge themselves into the Palar, which flows through a portion of the northern part of the collectorate. There are no considerable lakes in this district, but tanks or artificial pieces of water are very common and during the rains, much of the country becomes swampy, and productive of malaria. Wells are very numerous, and water is generally found within a short distance of the surface but it is brackish and not perfectly wholesome. The climate, owing to the great difference of elevations, varies considerably on the hills it is cold and bracing, and for a great part of the year very salubrious. The qualities of the soil differ much in the country immediately surrounding the town of Salem is thus a layer of calcareous and red loam generally prevailing through which quartz rocks appear on the surface in many places. Native carbonate of magnesia is found in a stony barren plain about five miles to the north-west of Salem, and is used in forming an excellent cement, as well as in the preparation of sulphate of magnesia, and also in obtaining pure magnesia. In the southern part of the district there is much iron-ore, which, on reduction, yields sixty per cent. of the metal fit for castings. Cotton is the principal commercial crop, and comprises the indigenous, the Bourbon, the American and the Nankin. Coffee, indigo, sugar, and tobacco are also cultivated. An experiment, conducted by the authority of government in this district in 1843, for the improvement of the manufacture of sugar from the cane, is stated to have been successful. The population is stated to amount to 1,195,577

**SALEM**.—The principal place of the British  
845

# SAL.

districts of the same name, under the presidency of Madras. It lies in the lowest and narrowest part of a valley about seven miles in width, bounded by the Shevaroy hills to the northward, and a smaller and undisturbed range to the southward. This valley is prolonged about five miles from Salem in an easterly direction, when, by the termination of the smaller hills, the country again becomes open. Westward, the country is generally open, the only exceptions being occasional small insulated hills.

The climate is somewhat fluctuating and uncertain, 'the thermometer having been found to range in December from 60 to 87° in January from 58 to 82°, in February from 60 to 91°, and in March from 66 to 95° in the two succeeding months the variation is less, being in April from 72 to 96°, and in May from 75 to 96°. Early in June the monsoon from the western coast generally extends to Salem in short but heavy and frequent showers, attended with thunder and lightning, continuing till late in September, by the end of October, rain begins to fall from the north-east monsoon, and showers recur with a very clouded sky till the middle of December. Between June and December, the extremes of the thermometer are 68 and 90°. A north-easterly wind prevails pretty steadily at Salem from the beginning of November to the end of January or middle of February, which is for the first two months after it sets in rather moist, cool, and agreeable; but becomes more and more arid as the season advances, blowing from the mountains which bound Salem on the north. In January the wind becomes disagreeably cold in the morning and unpleasantly warm at noon being dry and purring at both periods. It produces even in people in health an annoying dryness of the skin and exposure to it seems a frequent exciting cause of fever. After the middle or end of February the wind which is at times variable with frequent lulls, shifts round to the south and south-west, and blows from that quarter in hot puffs and with much uncertainty during April and May. Cooled by the rains of the south-west monsoon this wind blows pretty freshly in June and July and more moderately in the two following months. In October the wind becomes again variable, till the setting in of the north-east monsoon."

The river Tromsary which holds its course down the valley, sweeps along the north and west sides of the town, and is traversed by a substantial bridge of three arches. On the western bank of the river, and rather to the south of the town stands the old mud fort of Salem, the ramparts of which have been partially thrown down and the ditch filled up. It is now inhabited chiefly by the peas, or local irregular infantry. The houses of the few Europeans resident here are at some distance west of the fort. The old jail, situated on a slightly-elevated rocky site on the right bank of the river, is a heavy bomb-

proof building, with thick and strong walls of brick and masonry. The new jail is situated on the left bank of the river. There is a small military detachment stationed at this place. There are many handsome choultries or public lodges for travellers and Salem may be considered a well built town for this part of India, there being two wide principal streets, which run from east to west. The number of houses is 3821, the population 19021. Elevation above the sea 1070 feet. Distance from Bangalore, S.E. 100 miles, Madras, S.W. 170. Lat. 11 39' long 78 12'

**SALHANA**—A town in the British district of Shikarpoor province of Sindh, presidency of Bombay 20 miles S. of Shikarpoor. Lat. 27° 44', long 68 37'

**SALIMPUR**, in the territory of Oude, a village on the route from Lucknow cantonment to Puriabgurh, 26 miles S.E. of the former, 84 N.W. of the latter. Lat. 26 45', long 81 4'

**SALLYMAUN** in the Rooncha Doab division of the Punjab, a town situated on the left bank of the Chenab, 38 miles W by S. of the town of Lahore. Lat. 31 33', long 72 29'

**SALMOORA KAPALEE**.—A town in Nepal, situated on the left bank of one of the branches of the Gunduck river, and 144 miles W by N from Khatmandoo. Lat. 28 4', long 88

**SALFEE GHAT**—A town in the British territory of Sattara, presidency of Bombay 28 miles N.N.E. of Sattara. Lat. 17 59', long. 74 14'

**SALSEE**—A town in the British district of Ratanagiri, presidency of Bombay, 60 miles S.S.E. of Ratanagiri. Lat. 16° 20', long. 78 39'

**SALSETTE**, in the presidency of Bombay, an island separated by a narrow channel from the island of Bombay on the south, and from the mainland on the east, but connected with the former by an arched stone bridge and likewise by the Bandora and Makin Causeway, more recently constructed at the joint expense of government and Sir Jamsetjee Jeejeebhoy. Communication between the two islands and the mainland is also now afforded by means of the Bombay and Calcutta railroad. It lies between lat. 19° and 19° 15', long 72° 54'—73° 3', is eighteen miles in length from south-west to north-east, and ten in breadth the area is about 150 square miles. It is a beautiful, picturesque and well wooded tract, its surface being much diversified by hills and mountains, some of considerable elevation, while the lower grounds and valley are very fertile, though in some places inadequately cultivated. The eminence of Koor in the middle of the island, "commands an extensive view, the island of Salsette appears like a map around the spectator, presenting a fine champagne of rice-fields, cocoan-groves, vil-

lagoes, and cattle, woody hills, and fertile vales, the surrounding mountains form a foreground of grey rocks, covered with trees, or hollowed into gloomy caverns, the haunt of tigers, serpents, bats, and bees in immense swarms. The horizon is bounded on the south by the island of Bombay with the harbour and shipping east by the continent north by Bassem and the adjacent mountains and west by the ocean. In various parts of Salsette are romantic views, embellished by the ruins of Portuguese churches, convents, and villas, once large and splendid, but suffered to decay since the Maharrattas conquered the island. According to conjecture of rather recent date, the population amounts to 50,000, an amount which would fix the relative density at 338 to the square mile. Salsette contains several antiquities, especially at Kenari, in the centre of the island.

Salsette was attached to the province of Aurungabad under the Mogul rule, but fell into the hands of the Portuguese at an early period of their Indian career. It was claimed by the English as an appendage of Bombay, under the marriage-treaty with Charles II., but the Portuguese authorities denied its being a dependency of that island, and refused to surrender it to the expedition which in 1682 arrived on the western coast of India to receive possession of the territory ceded as the marriage portion of the Queen Catherine. The British not being in a condition to enforce their claims, were necessitated to be content with such portion of territory as the Portuguese chose to part with and to submit to their construction of the terms of the treaty. In 1739 the island was taken from the Portuguese by the Maharrattas. In 1774 it again changed masters, being conquered by the British who retained possession of it under the additional clause of the treaty of Poona until 1782, when it was solemnly and finally confirmed to them in perpetuity by the treaty of Salbye.

**SALT RANGE.**—An extensive group of mountains stretching generally in lat  $32^{\circ}30'$ — $33^{\circ}20'$ , in a direction from west to east, from the eastern base of the Suliman Mountains to the river Jhelum, in the Punjab. This range is, in different parts, known to the natives under various denominations, but is by Europeans comprehended under the general term Salt Range, in consequence of the great extent and thickness of the beds of common salt which it in many places contains. Though the southern part of this group terminates rather abruptly at the west bank of the Jhelum, the more northern part is, according to Jameson, connected with the recent formation constituting the lowest and most southern range of the Himalaya, and runs "on by Bamber Jummoo, Nurpoor, and down by the south of Belaspoor crossing the Jumsa at Fyzabad, and the Ganges at Hardwar." The general direction of the range is from north-west to south-east.

This extensive range, of recent formation, may consequently be considered to contain not only the saliferous deposits of Kala-Bagh and Pind Dadun Khana, but also those of Mundi, in the north-east of the Punjab. The salt-mines have been long known, being mentioned in the Ayeen Akbery. At the time of the visit of Burnes, in 1832, the total quantity of salt raised in a year amounted to 40 000 000 pounds. The elevation of the Salt Range is not considerable, and probably no summit attains the height of 2 500 feet above the sea. Burnes states that these mountains contain alum, antimony and sulphur. Jacquemont, Burnes, and Wood, obtained numerous specimens of coal from various parts of them.

The Salt Range is remarkably barren—"Vegetation is scanty, and the bold and bare precipices, some of which rise at once from the plain, present a forbidding aspect of desolation." About lat  $32^{\circ}50'$  long  $71^{\circ}40'$ , the Indus traverses this range making its way down a deep narrow, rocky channel, on the sides of which the salt-beds come to light. Those parts of the range which lie on the west side of the river are denominated by Maasrany the Salt-hills of Kala-Bagh or Kara-Bagh from the name of the town where its geological structure is most fully exposed to view. Its appearance there is thus described by Elphinstone—"As we passed beneath we perceived windows and balconies at a great height, crowded with women and children. The road beyond was cut out of the solid salt at the foot of cliffs of that mineral, in some places more than 100 feet high above the river. The salt is hard, clear and almost pure. It would be like crystal were it not in some parts streaked and tinged with red. In some places salt-springs issue from the foot of the rocks, and leave the ground covered with a crust of the most brilliant whiteness. All the earth, particularly near the town is almost blood red, and this, with the strange and beautiful spectacle of the salt rocks, and the Indus flowing in a deep and clear stream through lofty mountains past this extraordinary town presented such a scene of wonder as is seldom to be witnessed.

The rocks in this part of the range are—first, magnesian limestone second new red sandstone third, fossiliferous sandstone fourth, red clay and sandstone containing coal and mineral sulphur rock-salt, gypsum brown and red iron-ore and alum salts. The lower beds contain no organic remains but the upper abound in them. The iron-ore is a red or brown hematite, so rich that in many places the needle of the compass becomes quite useless, even at a considerable distance from the rocks, owing to their being highly magnetic, from the quantity of iron which they contain. The sandstone abounds with the exuviae of enormous animals, either marine or avian. Most of the torrents of the Salt Range carry down gold-dust in their mounds, which are washed in search of the precious deposit, in numerous places, throughout the greater part

# SAL—SAM.

of the year. The hills at Kala-Bagh contain great quantities of aluminous slate, from which alum is obtained at various manufactories in that town. The slate, well sprinkled with water, is laid in alternate strata with wood, until the pile reaches a height of from twenty five to thirty feet, it is then lighted, and the combustion continued for about twelve hours, in which time the colour of the slate is converted from grayish black to dark red. This change of colour indicating that the process has been carried to a sufficient extent, the mass is thrown into a tank holding as much water as it is computed the alum is competent to saturate. After three days, the water, which becomes of a dark red colour is drawn off mixed with a due proportion of potash and boiled down, the residuum on cooling becoming a solid mass of alum. Dr Jameson expatiates with the earnestness of sanguine excitement on the mineral wealth of the Salt Range, concluding in these terms.— Such is a rapid account of the riches of this district, and there are few if any districts in the world where iron, gold, sulphur, salt, gypsum, limestone, saltpetre, and coal, are met with in such quantity."

**SALUR**.—A town in the British district of Visagapatnam, presidency of Madras, 58 miles N of Visagapatnam. Lat. 18 32', long 83 15'

**SALWEEN**.—The largest river in the Tenasserim provinces. Its source has never been visited by Europeans, but it appears to take its rise about lat. 27° 10', long 98 57' to the north of the Chinese province of Yunnan, where it is known by the name of Lookang. It takes a southerly course, passing through the provinces of Laos and Siam, enters the British dominions at the confluence of the river Thon Khan, about lat. 18 40', and after a long course, unites its waters with those of the Gyne and Attaran rivers at Martaban and enters the sea by two mouths, formed by the island of Bela. The northern mouth is in lat. 16° 25' long 97 39'

**SAMANA**.—A town of Sirhind, in the native state of Patialah, 16 miles S.W. from Patialah, and 84 miles S.W. by W from Ambala. Lat. 30° 10', long. 76 20'

**SAMANUGUR**.—A town in the British district of Silhet, lieut. gov. of Bengal, 31 miles W by S. of Silhet. Lat. 24 50' long. 91° 21'

**SAMARKEE**, a river of Central India, rises in lat. 21 50', long 77 53' in the territory of Nagpore, and, flowing north-west for sixty miles, through Nagpore and the Saugar and Nerbudda territories, falls into the Nerbudda, in lat. 23 46' long 77 49'

**SAMB**, in the British district of Sauni, territory of Saugar and Nerbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Jubbulpore to the Nagpore territory 76 miles E. by E. of the former. Lat. 22° 5', long 80 16'

**SAMBHAM**.—A town in the British district of Visagapatnam, presidency of Madras, 49 miles N.N.E. of Visagapatnam. Lat. 18 20', long 83 40'

**SAMBHUR LAKE**, in Rajpootana, partly in the state of Jypore, partly in that of Joudpore, lies on the western boundary of the former and on the eastern of the latter. According to Boileau's map of Northern Rajwara, it lies between lat. 26° 52'—27° long 74 49'—76° 18', is twenty two miles in length from east to west, six in breadth, and about fifty in circuit but in times of very great moisture the length is thirty miles, and the breadth ten miles. These are the dimensions during the periodical rains of autumn, when the saltiness of the water is much diminished but during the hot and dry season the greater part of the water evaporates, and a great quantity of salt is found crystallised on the bottom of the lake. The salt is exposed to the sun to be perfectly dried and hardened and though at first of reddish hue, becomes in the course of the process very clear and of fine flavour. The western part belongs to the state of Joudpore the eastern to that of Jypore and its produce is monopolised by those governments, which dispose of it on the spot, at the rate of a rupee or two shillings, for a bullock load of 375 pounds, according to regulation. The revenue derived from the Jypore division of the lake was placed under British management, to defray the expenses incurred by the military operations in Sheikawuttee, but was released from sequestration upon the liquidation of the debt. The town of Sambhur is situate on the south bank of the lake. Lat. 26 53' long 75 18'

**SAMBRANT**.—A town in the British district of North Canara, presidency of Madras, 37 miles N of Soonda. Lat. 15 14', long 74 49'

**SAMBUL**.—A town within the dominions of Gholab Singh, the ruler of Cashmere, 12 miles N.W. from Surinagar. Lat. 34 11', long 74 47'

**SAMBURA**, in the Rajpoot state of Jodhpore a village on the route from Balmer to the city of Jodhpore and 53 miles E. of the former. It is situate three miles N of the right bank of the Loonee, in a low swampy country liable to be laid under water by the inundation of that river in the rainy season, when the road becomes heavy and difficult. Lat. 25 55', long 73 19'

**SAMKE**.—A town in the native state of Gwalior or territory of Sonada, 20 miles N by W from Indore, and 14 miles S. from Oojein. Lat. 22° 57' long 75 48'

**SAMIWALA**, in the British district of Bijnour lieut.-gov. of the N.W. Provinces, a village on the route from Moradabad to Haridwar and 22 miles S.W. of the latter. The road in this part of the route is good, and passes over a fertile country, much interested

# SAM--SAN

by streams and watercourses. Lat 29° 42', long 78° 18'

**SAMOT**, in the Rajpoot state of Jeypore, a considerable town on the route from Delhi to Mow 143 miles S.W. of former 364 N.E. of latter. It is situated at the base of a fortified hill, and is surrounded by a rampart. Lat. 27° 18', long 76° 54'

**SAMPLUH**, in the British district of Roh tuck, lieut. gov. of the N.W. Provinces, a village on the route from Delhi to Hanses and 30 miles N.W. of the former Lat 28° 46', long 76° 49'

**SAMRA**, in the British district of Agra, lieut. gov. of the N.W. Provinces, a town on the route from Agra to Jeypore 32 miles W. by S. of the former Lat 27° 5', long 77° 57'

**SAMULOOTAH** in the British district of Rajahmundry presidency of Madras a town with military cantonment, situate on the right side of a torrent which falls into the Bay of Bengal ten miles to the south-east. The torrent is devoid of water during a great part of the year but in the wet season is full from bank to bank though at all times fordable. The cantonment is situate to the north west of the village and contains an area of about three-quarters of a mile in diameter. The barracks and depots lines are stated to be judiciously placed, but the hospital is represented as in an objectionable situation, and the officers houses are said to be badly arranged and badly built. This place came into the possession of the East-India Company by cession from the Nizam, in 1766. Elevation above the sea seventy feet. Distance from Rajahmundry, E. 25 miles, Hyderabad E. 245 Bangalore N.E. 410 Ellore, N.E. 75 Madras N. 300, Calcutta, S.W., 550 Lat. 17° 4' long 82° 14'

**SAMUREA**, in the British district of Bareilly division of Pillibhet, lieut. gov. of the N.W. Provinces, a village on the route from Bareilly to Petoagurh and 41 miles N.E. of the former Lat 28° 44', long 79° 52'

**SANAH**.—A town in the British district of Mongher lieut. gov. of Bengal 40 miles S. by W. of Mongher Lat 24° 48', long 86° 20'

**SANAUULI**, in the British district of Ghazepoor lieut. gov. of the N.W. Provinces, a village on the right bank of the Ganges, 25 miles S. of Ghazepoor cantonment by water 14 by land 624 N.W. of Calcutta by water Lat. 25° 25' long 83° 28'

**SANCHORI**, in the Rajpoot state of Jodhpore a village on the route from Nusserabad to Deesa, and 133 miles S.W. of the former It contains eighty five houses, supplied with water from a tank and twelve wells. Lat. 25° 28', long 73° 25'

**SAN COOS RIVER**.—The name given to the Coosy in the upper part of its course.—See Coosy

**SANDAH**.—A town in the British district of Patna, lieut. gov. of Bengal, 18 miles S.E.W. of Patna. Lat. 25° 19', long 85° 6'

**SANDAIRA**, in the Rajpoot state of Jodhpore a town on the route from Nusserabad to Deesa, and 144 miles S.W. of the former It is abundantly supplied with water from wells. Lat 25° 17', long 73° 17'

**SANDI** in the territory of Oude, a small town on the route, by Shahabad, from Shah jehanspore to Lucknow 85 miles N.W. of the latter Tennant, who by a whimsical English corruption calls it Sandy Point, complains of the blank, desolate, and dreary aspect of the country, where you are constantly sinking at every step in loose sand, and blinded by showers of dust; yet he admits, that where irrigation can be practised, good crops of grain could be produced. This tract must have much improved since that description was written (1799), as Heber who traversed it in 1824 says "The country through which we passed to-day was extremely pretty, undulating, with scattered groves of tall trees, and some extensive lakes, which still showed a good deal of water. The greater part of the space between the wood was in green wheat, but there were round the margins of the lake some tracts of brushwood and beautiful silky jungle-grass eight or ten feet high." Tennant, however travelled through the country in the dry season Heber a short time after the close of the rains. This last traveller describes the place itself at present, as "a poor little village" and its neighbourhood infested by a race of very bad character. In the driest season of the year the water of the lake totally evaporates, and its bed then becomes a luxuriant pasture, water is, however, at all times plentiful, and there is a bazar Lat. 27° 18', long 80° 1'

**SANDOWAY**.—A town in the British province of Arracan lieut. gov. of Bengal, situate on the southern bank of a tide nullah, bearing the same name as the town, and distant ten miles from the sea. The town is comprised within a circular area, open on the east and west, where are the defiles through which the river flows. It contains about 500 houses, and was occupied by the British in 1825. The district of which this town is the chief place, forms one of the three divisions of Arracan, 176 miles S.E. of Arracan. Lat. of town 18° 25' long 94° 20'

**SANDWA**.—A town in the Rajpoot state of Beekaneer, 53 miles E. by S. from Beekaneer and 93 miles N.W. from Ajmeer Lat. 27° 45', long 74° 17'

**SANDY ISLAND**.—A small island off the coast of Arracan 80 miles N. of Cape Negamia. Lat. 17° 11', long 94° 31'

**SANEE**, a river of Gurhal, rises in lat. 30° 6' long 79° 12' and flowing southerly for thirty miles, and north west for thirty two, falls into the Bhageretee river, in lat. 30° 4', long 78° 39'

# SAN

**SANGAMOOLASA.**—A town in the British district of Vissnapattam, presidency of Madras, 77 miles N of Vissnapattam. Lat. 18 46, long 83 27

**SANGANEER.** in the territory of Oodey pass, a town on the route from Nasserabad to Mamerabad, 74 miles N of former 69 S. of latter It is of considerable size, and is surrounded by a wall, and from the account of Gardner, its present state appears superior to that in which Elieffenthaler describes it to have been about a century ago when all there was wretchedness and ruin. Lat 25 22 long 74 44

**SANGANEER.**—A town in the Rajpoot state of Jeypoor nine miles S by W from Jeypoor, and 78 miles E.N.E. from Ajmeer Lat. 26 49 long 75 58

**SANGAWARA.** in the raj or state of Bawara, in Rajpootana, a town on the route from Mow to Deesa, 126 miles N.W. of former 166 S.E. of latter Lat 23 37 long 74 8

**SANGHEE.**—A village in the British district of Rohtak, lieut. gov. of the N.W. Provinces Lat. 29 2 long 76 41

**SANGHEE.**—A town in the Portuguese district of Goa, territory of Bombay 24 miles S.E. of Goa Lat. 15 18 long 74 18

**SANGHEE.**—One of the southern Mahratta jaghires, territory of Bombay It consists of several detached portions, but the centre of the principal tract is in lat. 17 28 long 75 30 Sanghees yields an annual revenue of about 46,600L In 1846, a sword was presented to Chintaman Row chief of this territory by the East-India Company, in testimony of their respect for his high character, and in acknowledgment of his unswerving fidelity and attachment to the British government during the Kolapore rebellion. Chintaman died a few years after, and arrangements have been made for the administration of the estate during the minority of the present chief

**SANGOD.** in the Rajpoot territory of Kotah, a town on the route from Nasserabad to Saugor 158 miles S.E. of former, 197 N.W. of latter It is a considerable place, with a bazar Distant from the city of Kota, S.E., 33 miles Lat. 24 55, long 76 20

**SANGOLA.**—A town in the British province of Sattara, presidency of Bombay 81 miles E. by S. of Sattara. Lat. 17 26, long. 75 16

**SANGOLKEE.**—A town in the British district of Belgum, presidency of Bombay 24 miles E.S.E. of Belgum. Lat. 15 44, long 74 54

**SANGROOL.**—A town in the native state of Kolapoor, territory of Bombay, 10 miles W.E.W. from Kolapoor and 63 miles N.N.W. from Belgum. Lat. 16 40, long. 74 10

**SANGWA.** in the Rajpoot state of Jodhpoor, a village on the route from Nasserabad to

Deesa, and 128 miles S.W. of the former Lat. 25 32, long 73 27

**SANICHAHA.** in the British District of Goruckpoor lieut.-gov. of the N.W. Provinces, a small town situate four miles from the left bank of the Ghaghra, and as many from the right of the Koyane It has a market. Distant S.W. from Goruckpoor 25 miles. Lat. 26 30, long. 83

**SANK.** in the territory of Gwahor, a small river rising about lat. 26° 3 long 77 57 It runs in a north-easterly direction and falls into the Asan river on the right side in lat. 26 30, long 78 16, after a course of about forty five miles, the whole of which is through the Gwahor territory It is crossed thirty miles from its source and in lat. 26 28 long 78 9 by the route from Agra to Gwahor and has there water shallow bed stony and rough right bank rather steep At Nurabad, ten miles below or north east of the ford, it is crossed by a bridge of seven arches, very well built of masonry

**SANKERRY DROOG.**—A town in the British district of Salem, presidency of Madras, 26 miles S.W. by W. of Salem. Lat. 11 28, long 77 55

**SANKHA.** in the British district of Cawnpore, lieut.-gov. of the N.W. Provinces, a village on the route from Allahabad to Calpee, and 18 miles E. of the latter Lat. 29 10, long 80 8

**SANSAR DHARA.** in the Dehra Doon a remarkable spot, the romantic characteristics of which are thus described by an eyewitness—

In the commencement of this day's march we enjoyed a sight of uncommon beauty which was rendered more striking by being concealed by a jutting point of rock till we approached very near and ascended a little bank, when it burst suddenly on our view It was a fall of water from an excavated bank with a cave or grotto at each extremity forming together an arch of about 100 feet in perpendicular height, with a subtended base of eighty or 100 yards Through every part of the impending summit, the water cased in drops, which fell in showers into a basin, whence it was carried by a small stream into the river below The lofty trees and luxuriant shrubs which overhung the brow threw a partial shade over the picture, while the sun striking full upon the cascade, was reflected in the sparkling globules, giving a richness and brilliancy to the scene which words are incompetent to express. Upon an inspection of the grotto on the right, we were struck with new and more angular appearances. It is a cavern, about six feet in height, ten in depth and fourteen or sixteen in length, and is a natural excavation, the walls and roof of which are of rock The water filters through the top from which pendent shoots like moles are disposed in all the different stages of petrification The small ramifications form variegated beds of moss, serving as conductors for

# SAN—SAR.

the water when it first begins to crystallize, and from a tube or pipe, they become, by repeated incrustations, a firm consolidated mass. The various columns produced by the vegetation changing with the different shades of light, give to the outer surface the appearance of mother-of-pearl, but when the petrification is complete, the inside has a great resemblance to alabaster. The water is very cold and clear and probably contains much lime that is precipitated upon the various substances on which the shower falls. Sansar Dhara is by the superstitious Hindoos considered sacred to Mahadeva, and in consequence, visited by them in pilgrimage. It is within a dozen miles of the masonry station of Mussourie and Landour. Lat. 30° 21' long. 78° 6'.

**SANTIPORE.**—A town in the British district of Nuddea, lieut. gov. of Bengal, 46 miles N. of Calcutta. The town has long been famous for its learning. Lat. 23° 14', long. 88° 28'.

**SANTOO.**—A town in the Rajpoot state of Jodhpoor, situate on the right bank of a branch of the Sootree river and 84 miles S. S. W. from Jodhpoor. Lat. 25° 18', long. 72° 38'.

**SAONKEIRA.**—A town in Guzerat, or dominions of the Guicowar, 21 miles E. S. E. from Baroda, and 84 miles N. E. by N. from Surat. Lat. 22° 10', long. 73° 31'.

**SAPÉ.**—A town in the native state of Bhutan, 116 miles N. from Guejpara, and 141 miles E. N. E. from Darjeeling. Lat. 27° 48', long. 90° 28'.

**SARAHUN or SERAN.** The summer residence of the rajah of Buxar is situate three miles from the left bank of the Sutlej. Its site is fine, being in a beautifully wooded recess or amphitheatre, formed by the hills advancing round it in a semicircle behind, while in front they slope down to the Sutlej beyond which the mountains of Kulu rise, barren, steep, and with snow-cled summits. The summits of the mountains round the town to the east and south are covered with snow until June, when the rainy season sets in, under the influence of which it melts away. The buildings of this town may be considered handsome according to the humble standard of taste in this region. They are all in the Chinese style with pent-roofs, balconies and some beautifully-carved woodwork. The most remarkable building is a temple dedicated to the Hindoo goddess Kali, to whom, previously to the establishment of British supremacy human sacrifices were here offered. The residence of the rajah is extensive, consisting of several houses. Sarahun is the limit of Brahminism towards the north, as none of that caste are established beyond it. Elevation above the sea 7245 feet. Lat. 31° 30', long. 77° 50'.

**SARANGPOOR.** in the district of Aldema, territory of Oude, a town on the river Tons (North-eastern), 110 miles S. E. of Lucknow.

Its population is estimated by Butler at 6,000. Lat. 26° 24', long. 82° 33'.

**SARAOON.** in the British district of Shruttemana, lieut. gov. of the N. W. Provinces, a town on the route from Scrwah to the Punjab, 82 miles N. W. of the former. Lat. 30° 13', long. 74° 25'.

**SARAWAH.**—A town in the British territory of Pegu, situate on the left bank of the Irawady river and 64 miles W. from Pegu. Lat. 17° 44', long. 95° 19'.

**SARAYAT.** in the British district of Goruckpore, lieut. gov. of the N. W. Provinces, a village 50 miles N. W. of Goruckpore cantonment. Lat. 27° 20' long. 82° 53'.

**SARDAH, or GHOGRA RIVER.**—See GHOGRA.

**SARENDI.** in the district of Banawara, territory of Oude, a town near the right bank of the river Sase, 50 miles S. E. of Lucknow. Butler estimates the population at 6,000 including 100 Mussulmans. Lat. 26° 16', long. 81° 5'.

**SARGAUM.**—A town in the British district of Tannah, presidency of Bombay, 53 miles N. of Bombay. Lat. 19° 48', long. 72° 52'.

**SARH.** in the British district of Cawnpore, lieut. gov. of the N. W. Provinces, a town in the subdivision of Salimpur hence sometimes called Sarh Salimpur. Lat. 26° 14', long. 80° 24'.

**SARHAT.** in the British district of Beerbhoom, lieut. gov. of Bengal, a town on the route from Pachete to Monghyr 45 miles N. of former 80 S. of latter. Lat. 24° 16', long. 86° 52'.

**SARHENDI.** in the British district of Agra, lieut. gov. of the N. W. Provinces, a town on the route from Agra to Karowly, 23 miles S. W. by W. of the former. Lat. 26° 56', long. 77° 46'.

**SARHULL.**—A town in the Rajpoot state of Jhalawar 27 miles E. by S. from Jhalra Patun and 143 miles W. N. W. from Sangur. Lat. 24° 28' long. 76° 40'.

**SARSA.** a small river rises in the valley south of Subatoo and in lat. 30° 54', long. 77° 8'. It holds a north westerly course through the Pinjar Doon, and receiving several small feeders from the mountains of Hindoor falls into the Sutlej near Kanoli in lat. 31° 2' long. 76° 38', after a course of about thirty miles.

**SARSAP.** in the Rajpoot state of Jeypore, a hill fort on the route from Agra to Nasmuch, 145 miles S. W. of former. Lat. 26° 10', long. 76° 10'.

**SARSREE.**—A town in the British district of Belgau, presidency of Bombay, 22 miles E. by N. of Belgau. Lat. 15° 55', long. 74° 34'.

**SARUN.**—A British district under the

# SAR-SAR.

**SARAT-GOV** of Bengal, and named from the town of Saran, its principal place. It is bounded on the north and north-west by the territory of Nepaul, on the east by the British district Theroet, on the south-west by the Ganges, dividing it from the British districts Patna and Shahabad, and the Ghaghra, dividing it from the British district Ghaseepore and on the west by Goruckpoor. It lies between lat. 25° 40'—27° 30', long. 83° 55'—85° 30', is 115 miles in length from north to south, and ninety in breadth. The area is 4884 square miles. It is throughout a very level tract, having no mountains, and scarcely any hills, or even undulations, but with a general inclination towards the south-east, as indicated by the flow of the rivers in that direction. The rivers and watercourses are very numerous, few tracts being better supplied in this respect. The Ganges flowing south-east, forms the south-western boundary from the confluence of the Ghaghra to the confluence of the Gunduck. The other principal rivers by which the district is either traversed or bounded, are the Ghaghra, Gunduck, and Bagmuttee.

The principal products are wheat, barley, rice, grain (Cicer arisidinum), millet, maize, peas, and some other pulse oil-seeds, hemp, opium, indigo, tobacco, cotton. The district in general affords an ample and fruitful field for the cultivation of sugarcane. The esculent vegetables of Europe in general thrive well during the cold season. The forests contain some fine timber-trees. Manufactures are few and of small note. The commerce of the district consists principally in the export of raw produce, of which the chief articles are tumber grain, sugar, tobacco, opium, indigo and cotton. The most important import is culinary salt; the remainder is composed of silks, broad-stuffs, and a few other articles, regarded as luxuries amongst the natives, in general simple in their habits. The principal towns—Saran or Ohupra, Bettiah, Bevelgunj Ahganj—are noticed under their respective names in the alphabetical arrangement. The population is given under the article **BENGAL**.

This district formed part of the kingdom of Magadha, the monarch of which is represented to have been paramount ruler of India long previously to the Christian era. On the overthrow in 1193, of the kingdom of Kunnorj, by Shahab-uddin Muhammad, king of Ghor the victor, following up his success, subdued the kingdom of Behar of which Saran formed part. Subsequently, in the early part of the sixteenth century, it was subdued by Baber, and in 1765 it was included in the grant of the dewanny made to the East-India Company by Shah Akm, the padshah of Delhi.

**SARUNGHUR**.—A town in the native state of Saranghur, on the south-west frontier of Bengal, 68 miles W from Bumbulpoor and 84 miles S.S.W from Odeipoor. The native state of which this town is the chief

place, contains an area of 200 square miles, and a population of 35,000. Lat. 21° 30', long. 82° 50'.

**SARUNGKOT** in the district of Dewas division of the Punjab, a town situated on the left bank of the Swan river, 70 miles S.S.E. of the town of Peshawar. Lat. 34° 15' N, long. 73° 15' E.

**SARUNGPOOR**, in Malwa, in the territory of Dewas, a town on the route from Goona to Mow, 97 miles S.W. of former, 88 N.E. of latter. It is situated on the right or east bank of the Kallee Shudh river, here crossed by a ford 400 yards wide. bottom of rock in lodges and sand water shallow during the dry season. Distant N.E. from Oogen 58 miles. Lat. 23° 31' long. 76° 30'.

**SARWAPALLI**.—A town in the British district of Nellore, presidency of Madras, 12 miles S. by W of Nellore. Lat. 14° 17', long. 80° 1'.

**SARWUR**.—A town in the British province of Sattara, presidency of Bombay 10 miles S.W. of Bejapoor. Lat. 15° 48', long. 75° 41'.

**SASA**, a river of the Muttack country in Upper Assam, rises in lat. 27° 36' long. 95° 16' and flowing westerly for forty five miles falls into the Booree Deling river in lat. 27° 15', long. 94° 43'.

**SASOOKHA**.—A town in the native state of Bhotan, 110 miles N from Gualpara, and 141 miles N.W. from Durrang. Lat. 27° 44', long. 90° 40'.

**SASOORAHULLY**.—A town in the Mysore, situate on the right bank of the Toonga river, and 138 miles N.W. by N from Seringapatam. Lat. 14° 9', long. 75° 45'.

**SASPANTEE**, in the British territory of Sargur and Narbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Jubbulpoor to Nagpoor, 39 miles S.S.W. of the former. Lat. 23° 39', long. 79° 49'.

**SASRAN**.—A town in the native state of Gwalior or territory of Soodia, 43 miles S.W. by W from Gwalior, and 70 miles W.N.W. from Jhannoe. Lat. 25° 55' long. 77° 40'.

**SASSERAM** in the British district of Shahabad, lieut.-gov. of Bengal a town on the route from Hazarabagh to Benares, 117 miles N.W. of former 72 S.E. of latter. It has a bazar, and is of considerable size but the greater part of its extent is occupied by ruinous mosques and tombs of Mussulmans. The town has a few rude manufactures in hardware and jewellery, and there are many weavers, principally Mussulmans. There is an endowed school, supported by lands formerly granted for the purpose. The population is estimated by Jacquemont at 10,000 but according to Buchanan the number of houses is 3600 and assuming the usually received average of inmates, the number of inhabitants would appear to be 15,000. Lat. 24° 57', long. 84° 4'.

**SASSOOR**.—A town in the British district of Poona, presidency of Bombay, 16 miles S.E. of Poona. Lat. 18° 20', long. 74° 8'.

**SASURER**, in the British district of Allypore, head. gov. of the N.W. Provinces, a town on the route from Agra to the cantonment of Allypore, and 14 miles S. of the latter. It has a large bazar. In 1803, the conduct of a refractory sardar rendered necessary the employment of force for the reduction of the fortress, which was consequently attacked by the British, under General Lake, and captured, though not without severe loss on the part of the victors. Sasurer contains a population of 5,524. Lat. 27° 42', long. 78° 9'.

**SATA**, or **SETTA**, in Sind the greatest eastern branch of the Indus, or rather the continuation of the main stream, which formerly sent off to the west a large arm called the Bugaur. This last, however, is now almost completely closed during the season when the river is low becoming then little else than a succession of *desads*, or fresh water pools. The Sata below the diversion is generally about 1,000 yards wide. It sends off on the left or eastern side, two branches,—the Mull and Moutsee, once great streams, but now during the dry season, shallow rivulets. At the time that Charles wrote in 1837 the Hujamree and Kedywarree mouths, which gave exit to two other branches sent off by the Sata on the right side, were navigable but in 1839 the Hujamree mouth was closed by a great alteration in the course of the stream. Having thrown off these branches on the right and left side, the Sata, still the main stream of the Indus, and known in the lower part of its course by the names Munneyah and Wanyanee, falls into the Indian Ocean by the Kookwaree mouth, in lat. 24° 2' long. 67° 32'.

**SATAHUNG**.—A town in Nepal 102 miles W.N.W. from Khatmandoo, and 102 miles N. by E. from Gorakhpore. Lat. 28° 7', long. 85° 44'.

**SATAK**.—A town within the dominions of Gholab Singh, the ruler of Cashmere, 160 miles E.S.E. from Birmagur and 100 miles N.E. from Kangra. Lat. 33° 5', long. 77° 30'.

**SATHEEKA**.—A town in the Rajpoot state of Jodhpore 53 miles N. by E. from Jodhpore and 97 miles W.N.W. from Ajmeer. Lat. 27° 2', long. 73° 15'.

**SATHEWALY**.—A town in Hyderabad, situate on the right bank of the Manjara river, and 64 miles N.W. by N. from Hyderabad. Lat. 18° 9' long. 78° 3'.

**SATIGHAT**.—A town in Nepal, situate on the right bank of the Marshangdi river and 70 miles W. from Khatmandoo. Lat. 27° 46', long. 84° 10'.

**SATKOONEEA**.—A town in the British district of Chittagong head. gov. of Bengal, 27 miles S.E. of Chittagong. Lat. 22° 1', long. 92° 9'.

**SATPOORA** in the territory of Indore, or

possessions of Holkar's family, a small town on a tributary of the Nerbudda, 75 miles S.E. of Indore. It gives name to a range of mountains, which, running east and west, divides the valley of the Taptae from that of the Nerbudda. This range may be considered as extending between lat. 21°—23°, from long. 73° 40' to long. 78° where it becomes confounded with the Vindhya range. The south declivity towards the Taptae is abrupt, the north towards the Nerbudda very gentle. Its elevation does not appear to have been accurately determined. Asseerghur, one of its summits, is probably about 1,200 feet above the sea. Fraser an eye-witness, estimates the elevation of the highest points at about 2,500 feet above the sea. The Satpore differ extremely in appearance from the Vindhya mountains being bold and romantic in the outlines, rising into lofty peaks, and swelling into shapes that would induce the beholder from a distance to consider them as primitive. They however consist of amygdaloid and greenstone, and on the summits, of overlying trap and are altogether of volcanic formation. Satpore is in lat. 21° 48', long. 76° 27'.

**SATTARA**, so denominated from the fort of that name is a British province within the presidency of Bombay. It is bounded on the north by the British collectorate of Poona, on the north-east and east by that of Sholapore, on the south by the collectorate of Belgaum the southern Mahratta jaghires, and the state of Colapore and on the west by the collectorates of Ratnagerry and Tanmah. It lies between lat. 16° 22'—18° 32' long. 73° 24'—76° 20' is 215 miles in length from south-east to north-west and ninety in breadth. The area is about 10,222 square miles. The culminating range of the Ghadri Mountains, or Western Ghats, extend along its west frontier for about ninety miles, separating it from the Concan. Those mountains, which rise so precipitously on the west side, or towards the Concan have a more gradual declivity on the Deccan side, or towards the east and in that direction, though the surface is generally very rugged and diversified by many considerable ranges and isolated mountains, it sinks gradually to the plains of Hyderabad, or territory of the Nizam. All the streams hold a south easterly direction, and ultimately joining the Krishna, which rises in this territory are conveyed by the channel of that great river to the Bay of Bengal. Of the remaining rivers, the chief is the Nera. In addition to the Krishna and the Nera, are the Mar the Yena, the Nandhar the Yaria, the Wurra, and the Quina, over which last-mentioned river a bridge is about to be constructed.

The climate of the higher parts in the west of this territory is characterized by extreme moisture, the annual fall of rain exceeding that registered in many other places, and

having been known to amount to nearly 800 inches in the year. On the eastern declivity of the Ghats in the Deccan, and in the lower parts still farther east, "the rains are light, uncertain, and in all years barely sufficient for the wants of the husbandman and a slight failure occasions much distress." The mean annual fall of rain in the less-elevated parts is stated not to exceed twenty three and a half inches. In the upper parts of the Ghats, the heat is much moderated by the elevation, the mean annual temperature being 65°. April is found to be the hottest month, the mean temperature being 74°, the extreme maximum also occurred in the same month, reaching in 1896-90. In the Deccan, at an elevation of 1,700 or 1,800 feet, the maximum temperature of the whole year is stated to be 94° the minimum 87°. In the upper part of the Ghats, the monsoons during autumn are violent in the extreme, in the less-elevated parts eastward of the Ghats they are in general scarcely felt, though the extreme east is sometimes slightly visited by the monsoon from the northwest, or that from the Coromandel coast. The climate is considered very salubrious.

The great majority of the population is Mahratia, and this part of India appears from time immemorial to have been the head quarters of that race which held the widely extended region of Maharashtra. In the hills adjoining the Ghats southward of Sattara, there are a considerable number of Ramooses, a predatory tribe, in physical aspect resembling the Bhils, but more subdued and civilized. They have no language of their own, and in dress and manners are more like the Mahratias. The total population of Sattara has been returned at 1,005,771, which affords density to the square mile. Such a great density may be regarded as ample for a mountainous tract, in general barren, and subject to frequently recurring droughts. The principal towns—Sattara the capital, Furdapur and Bejapoor—are noticed under their respective names.

During the administration of the country by the last rajah, a good carriage-road had been made from Sattara to Mahabulishwar, a distance of thirty miles, which was continued for twenty-seven miles to Mahar on the navigable river Savitree. There was also a good road continued from the Neera bridge at Sattara, thus completing the communication between that city and Poona. Since the lapse of the territory to the British, many excellent roads have been added. Among them may be noticed one connecting Bejapoor with Sattara, another from the town of Kurat, over the Koombaries Ghaut, to the Goman; a third over the Pusurnee Ghaut, between the town of Wase and Mahabul Peth, on the Mahabulishwar Hills.

Sevaje, who founded the state of Sattara and the Mahratia confederation, was the second son of Shaljee, a Mahratia leader of

some note, under the Nizam Shah dynasty of Ahmednuggur, and subsequently under that of Bejapoor. Sevaje began his predatory career about 1644, and in 1646 acquired his first stronghold, the hill-fort of Toran, by the treachery of the governor holding it on the part of the king of Bejapoor against whom he, in 1648, openly revolted. From that time his course of successful aggression against both Aurangzebe, then king of Delhi, and the king of Bejapoor was rapid. In 1659 he in person annihilated the general of the army of Bejapoor, and attacked the forces, which, thus surprised and deprived of a leader were for the most part slain the Mahratias among the survivors entering the service of their conqueror. In 1662 he had acquired a tract of country 250 miles in length northwards from Goa, and at its widest part 100 miles in breadth, and in this small territory the hardness and predatory habits of his soldiers enabled him to maintain an army of 7,000 horse and 50,000 foot. In 1664 he extended his predatory expeditions so far that he plundered the rich city of Surat, and with his spoil returned unmolested to his fastnesses. In 1665 he collected a fleet, and commenced a course of piratical depredations against the Mussulmans, who were especially enraged by the capture of the ships which according to annual usage, were conveying pilgrims from India to the Red Sea. In the same year, however Sevaje accepted service in the army of Aurangzebe, by whom he was soon after placed in confinement. From this distance he escaped, and returned to his fastness at Raecurg after an absence of nearly a year. He there became so formidable that Aurangzebe admitted him to terms, or rather concluded with him a treaty by which he was acknowledged as jaghiredar or subordinate proprietor of a territory much larger than that which he had formerly held. An attempt, made by order of Aurangzebe to seize Sevaje, caused him to recommence hostilities in which he was eminently successful ravaging to a great extent the territories of the sovereign of Delhi, exacting the tribute or black mail of a fourth of the revenues from such districts as were spared, and in a field action defeating an army of 20,000 men. In rivalry of the king of Delhi, he was, in 1674, crowned at Raecurg, with great splendour, adopting in all their extent, the ceremonies used by that gorgeous court on such occasions. He soon after marched towards the Coromandel coast, and, passing by Madras, took the strong fort of Jinji, one of the possessions of Bejapoor, but in the midst of his triumphs and greatness he was cut off by illness, in 1680, in the fifty-third year of his age. His son Sambhaje succeeded to his possessions, but being devoid of talent, energy and perseverance, and becoming incompetent from drunkenness and debauchery, was, in 1688, made prisoner by the Moguls, and in the following year cruelly put to death, by order of Aurangzebe. Not

withstanding, however, all the talents, resources, and perseverance of the emperor, the Mussulman cause rapidly waned, and that of the Marhattas prospered. They "seemed to multiply as the Mogul armies decayed. After reducing the Deccan to a desert, they had spread over Malwa, and made a powerful incursion into Guzerat, leaving their traces everywhere, in pillaged towns, ravaged fields, and smoking villages." Aurangzebe, after many campaigns, in which he vainly attempted to retrieve his sinking affairs, died in 1707 at Ahmednugur whither he had with difficulty fled the shattered relics of his ruined host. The rapid decay of the kingdom of Delhi accelerated the progress of the Marhatta power. The officers of the king left in charge of the Deccan, first faintly opposed and then concluded the Marhattas a truce was concluded about 1710, by which they yielded the chauth and thus, or the confirmation of the agreement, together with a formal grant of their territorial possessions by the emperor (Padshah) in 1719 may be considered as the final establishment of the Marhatta government, after a struggle of at least sixty years. The office of Peshwa, leader "or 'prime minister'" of the Marhatta empire had always been a place of importance, and Baji Rao who attained that dignity succeeded in 1749 in engrossing the whole powers of the state. Thenceforward the descendants of Serajee were mere pensioned captives. From that humiliating state Pertaub Singh the titular rajah was released in 1813, when the army of the Peshwa, in its rapid flight was surprised and routed by a British force at Ashti. On that occasion the rajah, with his mother and brothers were rescued and set at liberty after the family had been nearly seventy years in durance. To the rajah was assigned the territory of Satara, producing an annual revenue of 187,500*l* besides jaghires or feudal grants, and other alienations from the rent roll making in the aggregate about 200,000*l* for the gross annual income of the raj. The sovereignty of the territory thus assigned was to be held by the rajah "in subordinate co-operation with the British government, which engaged to defend the rajah's territories, and give him protection from all injury and aggression. The Marhatta prince having been always retained in a state of pillage, it was apprehended that to invest him at once with the full measure of power which he was ultimately to enjoy might be mischievous, the following stipulation therefore formed part of the treaty—"The rajah shall ultimately have the entire management of the country now ceded to him, but as it is necessary on account of the recent conquests of the country, that it should at first be governed with particular care and prudence, the administration for the present will remain in the hands of the British political agent. That officer will, however, conduct the government in the

rajah's name, and in consultation with his highness, and in proportion as his highness and his officers shall acquire experience, and evince their ability to govern the country, the British government will gradually transfer the whole administration into their hands. He will, however at all times attend, as above agreed, to the advice which the British political agent shall offer him for the good of his state, and for the maintenance of general tranquillity." The management of the raj remained with the British political agent until April 1822 and an official report of that date records "the general prosperity and good order that prevailed throughout the rajah's districts, and the satisfaction which was shown by all classes of the people towards his highness's government and the existing system of management." At this prosperous time the government was transferred to the rajah, then twenty four years of age and the British functionary hitherto denominated political agent, was thenceforth styled Resident. Contentions, however subsequently arose between the rajah and the government of Bombay which soon increased to alienation. The rajah made demands which the government thought unwarranted by the treaty and being led into proceedings inconsistent with the position which he occupied he was, in 1839 deposed, and his brother elevated to his place. The deposed rajah was sent to Benares, where he died in the month of October, 1847. A treaty was concluded with the new rajah under which a competent revenue was secured to Pertaub Singh and certain modifications of the terms of the original treaty were effected in regard to certain jaghiredars of the Satara raj who, to obviate disputes, were formally declared under the direct control of the British government, though their contingent and pecuniary payments were reserved to the rajah, as previously fixed. Under this arrangement, capital sentences passed by these jaghiredars are made subject to confirmation by the British government.

Under the rule of the new rajah, the condition of the country was highly satisfactory. The British authorities, ever anxious for improvement, found in the prince a willing coadjutor. Not only were substantial reforms introduced but matters little heeded for the most part by native rulers received some measure of attention. Steps were taken to repair and preserve the fine relics of Mahometan architecture at Badajpore, while the great interests of humanity were advanced by the encouragement of vaccination, the abolition of suttee, and the suppression of trade in slaves.

The second rajah under the protection of the East-India Company died in 1848, without issue, but adopted, a few hours previously to his death, a boy distantly related to his family. It was obvious, however that by the general law and custom of India, a dependent principality could not pass to an adopted heir.

without the consent of the paramount power, yet, plain as this was, the decision of the British government was not given without deliberation. That government was under no pledge, direct or constructive, to give such consent, and it was deemed expedient, in reference to the general interests committed to its charge, to withhold it. The territory accordingly lapsed, by the extinction of the race of Sevajee, to the power which bestowed it, and was formally annexed to the British dominions. The revenue derived from all sources in 1850 amounted to 271,304*l*.

**SATTARA**—The principal place of the British province of the same name, in the presidency of Bombay. It is situated amidst the highlands of the Deccan, east of the culminating range of the Ghats, and where the country, though very rugged, inclines generally to the eastward. The site of the fort is the summit of a mountain having an area extending about 1100 yards in its greatest length, and 500 in breadth. The mountain is of no great height, but very steep. "Its defences consist of a scarp, upwards of forty feet in perpendicular black rock, on the top of which is a stone wall" and bastions of it have suffered dreadfully from huge stones precipitated on them from the fort above. Its most striking feature is "the north-east angle, which assumes nearly the shape of a tower, and is one of the strongest points, the rock being forty-two feet high, and the bastion now on the top of it consists of twenty-five feet of masonry, making a total of sixty-seven feet." The town of Sattara lies immediately under the fort, in a deep hollow, nearly surrounded on three sides by hills cut off from the west by the Syhadra Mountains (Western Ghats), and from every other quarter by the Yana, Kistna, and Oornocoree rivers." When the fort was attacked by the British at the close of the war with the Peshwa in 1818, it mounted only twenty-five guns, of various calibre, and was garrisoned by 400 men, who surrendered, having made scarcely any resistance, after a few shells had been thrown into the place. The British soldiers were immediately housed, but next day lowered, and the standard of Sevajee raised in their place, proclamation being made of the restoration of the titular chief to his dignity, and a portion of the territory held by his ancestors. Previously to the rise of Sevajee, this place had been held by the Mummukhan government of Bejapoor, it was taken by that celebrated chieftain in 1675, and made the seat of government by his successors in 1698. In 1706, being besieged by Aurangzebe in person it was taken by blockade after a vigorous resistance of about two months. In 1765 it was retaken by the Mahattes by stratagem and during the ascendancy of the Peshwa, was used ostensibly as the state residence, but actually as the prison of the rajah. After the deposit of the Peshwa, the titular rajah con-

tinued to reside here under the protection and control of the British authorities, till the race of Sevajee failed, by the death of his last descendant in 1848. A new church has been erected in the town by the British government. Distance from Bombay S.E. 115 miles, from Poona, S, 55. Lat. 17° 45', long. 74° 4'.

**SATTAVADE**—A town in the British district of North Arcot, presidency of Madras, 33 miles NW of Madras. Lat. 13° 27', long. 80° 1'.

**SATTENAPATTI**—A town in the British district of Guntoor, presidency of Madras, 21 miles WNW of Guntoor. Lat. 16° 25', long. 80° 12'.

**SATTENWARREE** in the territory of Bhopal a fort on the northern frontier towards the Gwalior territory. In 1818 it was held by a garrison on the part of the rajah of Nagpore or Berar, and on the 8th of June was invested by a British force under Major Lamb, and on the 9th the rampart having been breached an attempt was made to storm, but the advancing party was received with so destructive a fire that thirty-two men of those near the head of the advancing column were unhappily cut down. The rear thereupon fled in panic to seek shelter, and were of necessity followed by the rest. All efforts to bring the men to renew the attack were unsuccessful and under cover of darkness, the party retired from the spot, having suffered the loss of eighty-six of their number in killed and wounded. On the following night, however, the garrison evacuated the fort, somewhere about half their number effecting their escape the remainder being killed or made prisoners. Sattenwarree appears to have been granted with other possessions by treaty of 1818 by the British government to the nawaab of Bhopal, 'in order to mark its approbation of his conduct, and to enable him to maintain the stipulated contingent.' Distance NW of Bhopal 30 miles, N.E. of Ogan 95. Lat. 23° 38' long. 77° 10'.

**SATTIYAMANGALAM**—A town in the British district of Coimbatore, presidency of Madras, 40 miles NNE of Coimbatore. Lat. 11° 30', long. 77° 15'.

**SATULA**, in the British hill state of Kotgarh, a village on a mountain rising steeply over the left bank of the Sutlej. Elevation above the sea 6,771 feet. Lat. 31° 19' long. 77° 31'.

**SAUBIE NULIA**—A river rising in lat. 27° 12', long. 76° 19' and flowing in a north-easterly direction for eighty miles through Alwar and Kot Kassim, and for thirty through the British district of Goozagoon and the native territory of Jhukpur, falls into the Hamrootee river on the right side, in lat. 23° 25', long. 76° 38'.

**SAUCKRA**—A town on the south-west frontier of Bengal, in the British district of

Sambalpoor, 84 miles W by S. of Sambalpoor Lat. 21° 19', long 82° 43'

SAUDERVEL.—A town of Bombay, in the territory of the Daung rajahs, 50 miles E. by S. from Surat, and 66 miles N.W. by W from Malligam. Lat. 21°, long 78° 37'

SAURKLA.—A town in Gujarat, or dooms of the Gulowar, 42 miles E.N.E. from Rajkote, and 83 miles W.S.W. from Ahmedabad. Lat. 22° 51', long. 71° 25'

SAUGOR AND NERBUDDA TERRITORIES.—The country thus designated comprises an extensive tract, bounded on the north by Bundelcund and the British districts of Banda, Allahabad, and Mirzapore on the east by Mirzapore and Kora on the south by the territory of Nagpore or Berar, and the territory of the Nizam and on the west by the territory of Gwalior or the possessions of the Scindia family and the territory of Bhopal. It lies between lat. 21° 16' and 25° 15', long 76° 53' and 82° 51', is 380 miles in length from east to west, and 190 in breadth from north to south, and has an area of 82,114 square miles. Within these boundaries are comprehended the independent state of Rewah, whose rajah is bound to the British government by a treaty of alliance. The other native chieftains are mere feudatories of the East India Company under whose grants they hold their possessions, within which, however, they exercise all the powers of government, subject to the interference, when necessary, of the paramount authority. Of the petty states thus situated, there are four—Kotee, Myhr Oocheyra, and Sohawal but the larger portion of the country known as the Saugor and Nerbudda territory is directly British. This portion comprises the districts of Saugor Jubbulpore, Hoshungabad, Seoni, Dumoh, Nurangpore, Baitool, Ramghur, and Sohajpore. Its outline is very irregular, but it may be described generally as extending from lat. 21° 16' to 24° 30' and from long 76° 53' to 82° 15', and comprehending an area of about 20,000 square miles.

The Saugor and Nerbudda is, with little exception, a considerably elevated tract, its limits embracing a portion of the ranges of the Vindhya and of the Mahadeo Mountains. The eastern part is an elevated table-land, having at its south-eastern angle the summit of Amarakantak, 8,463 feet above the sea, but declining towards the west into the more depressed tract called the valley of the Nerbudda, that great river holding its course along it westward towards the Indian Ocean. The Mahadeo Mountains form the southern inclining range of this valley the Vindhya, the northern. At the distance of about thirty miles south of the Nerbudda, the culminating ridge of the Mahadeo Mountains forms the line of water-head, dividing the streams flowing northward towards the Nerbudda from those flowing southward and south-eastward towards the Godavery. The

Mahadeo range appears to have an average elevation of about 2,000 feet above the sea, one summit is judged to rise as high as 2,500, and two or three others are vaguely conjectured to have a still greater altitude. The elevation above the sea of the Vindhya forming the northern inclining range of the valley of the Nerbudda, is but moderate. This range is little more than the southern brow of a sort of plateau, of very irregular surface, but for the most part declining northward and sending off numerous streams in that direction. Few elevations exceed 2,000 feet, that of the Residency at Saugor, one of the most considerable ascertained, is only 2,050. Down this declivity, towards the north and north-east, flow the numerous feeders of the Betwa, the Cana, the Tons, and many others in their course towards the Jumna and the Ganges. The Sone, rising two or three miles east of the source of the Nerbudda, flows eastward the Taptee, rising in the Mahadeo range, in the south-west of the territory, flowing westward, holds a course parallel to the Nerbudda, but on an average fifty miles more to the southward, and, like that river, it falls into the Arabian Sea. The mineral productions do not present many varieties, but they are highly important, consisting principally of iron and of coal. Iron-ore is found to the north-eastward of Sohagpoor and the eastward of the river Sone, but the most important site is a tract extending from twenty to thirty miles north-east of Jubbulpore, where it is largely raised and smelted. A considerable quantity is manufactured at Poonasse, Chhindgurbh and some other places in this district. At Tendukheri also fifty miles south of Saugor and ten miles north of the right bank of the Nerbudda, is abundance of iron-ore of excellent quality which has been fully tested, as it is the material used in the construction of the excellent suspension-bridge over the Bootee, near the town of Saugor. The inexhaustible supply of iron-ore is the more important from there being abundance of excellent coal at many places in the vicinity as in the Rivan pergunnah of Chandia Kanria, which adjoins Kumbi on the north-east, and again in the Hoshungabad district, on the south bank of the Nerbudda, also about seven or eight miles below Jubbulpore, and at Sohagpoore, on the left bank of the Sone. Limestone abounds in many places, and the sandstone of the northern part of the district is remarkably fine-grained, strong and may be quarried of any quality desired. Little mention appears to be made of any other mineral produce in this district.

A considerable portion of the population appear to be of the stock of the Ghonda, perhaps the aboriginal race of this part of India. Some of the Ghond tribes are nearly in what is called a state of nature, lurking in the gloomiest recesses of the thickest forests, and subsisting for the most part on wild roots and fruits, wild honey, and game, which they kill with

their arrows. It is even alleged that they are cannibals, eating the carcasses of such of their number as they consider irrecoverably ill, and devouring their bodies. However this may be, it is beyond doubt that they offer human sacrifices to their idols. Notwithstanding their barbarism, they are, however, allowed to claim themselves under the second caste of Hindoos. Allied in origin and habits to these savages are the Kolat, Kolia, and Panwars, inhabiting the eastern part of the district. The remaining Hindoo population are Brahmans, Bundelas, various tribes of Rajpoots, and Mahrattas. The Mahomedan population consisting of Pathans and others, is not inconsiderable. This territory belonging to what are called the non-regulation provinces, the statistical information regarding it is somewhat loose, but under the names of the several districts—Saugor, Jabulpore, Hoshungabad, Seoni, Baitool, Sohappur, Belhary, Mandla, Dumoh, and Dhameoni. Of the earlier history of this territory little is known. It was probably long ruled by princes of the Ghoud race. It seems to have been at least partially conquered by Akbar about the year 1598. On the dismemberment of the empire of Delhi, this tract became nominally subject to the Peshwa, but in the latter part of the eighteenth century Raghoojee Bhonsla, rajah of Bernar or Nagpore, having received from that potentate grants of the greater part of the territory made himself master of it. In 1818 this portion was ceded to the British government, in commutation of subsidy and contingent stipulated for by the treaty of 1816, and the cession was confirmed by the treaty of 1826. The claims of the Peshwa in Saugor had been previously surrendered, being included in the "rights, interests, and pretensions, feudal, territorial, and pecuniary," ceded by that prince to the East-India Company under the thirteenth article of the treaty of 1817. Serious disturbances continued in several portions of these provinces after the termination of the Afghan-war, which it was found necessary to quell by concentrating a military force in the disaffected territory.

**SAUGOR** the principal place of the British district of the same name, is situated in a hilly tract, considerably elevated above the surrounding country. The town is built along the west, the north, and the north-east sides of a lake nearly a mile in length and three-quarters in breadth, which occupies the lowest part of a valley, or rather a basin, surrounded by hills of trap formation, interspersed with a few sandstone. Here are military cantonments situated on an undulating plain north-east of the lake, and extending from north to south in a continuous line about a mile and a half. The

ground, however, it is said, has been judiciously selected, being in many places low, swampy and consequently unhealthy. The parade-ground is in front of the lines, and adjoining it is the European burial-ground, the extent and crowded state of which give an unfavourable impression as to the qualities of the atmosphere. The mint occupied a handsome building, situate about a mile to the east of the lake, and here, formerly 400 men were employed, but the establishment was some years since broken up and its business transferred to Calcutta. There is a large fort here, which now serves as an ordnance depot.

In consequence of the considerable elevation of the mts, the temperature at Saugor is rather moderate in proportion to the latitude, the thermometer rarely falls below 50 in the cold season or rises above 95° in the hot. The quantity of rain which falls during the year varies from thirty-four to forty-six inches. Here is a sort of collegiate school, under the management of three members, a secretary, a head master an assistant master, and a Hindoo master. There is an English and vernacular department. In the latter instruction is given in Persian, Hindoo, and Mahratta. The scenery of the beautiful lake well suited for pleasure-boats, and the abundance of fish and wild-fowl on its waters, or on its shores, render it a great source of recreation to the European residents. Saugor is the station of the civil establishment. The European population of the town and its vicinity, vaguely stated as "numbering some hundreds," have the services of a chaplain and a convenient church has recently been erected in the Gothic style. The total population of the town has been conjectured to amount to 60 000 the majority being Mahrattas.

Over the Beas or Beo, a river running near the town, was constructed, in 1830 an iron suspension-bridge of the metal obtained at Tendukheri, about fifty miles to the southward. The bridge is 200 feet in span and was erected by native workmen, at a cost of £ 8000, increased by a gratuity of 5000 £ to Major Frazer, army master of the Saugor mint, under whose superintendence the work was carried on. Elevations above the sea 1 940 feet distance N W from Jabulpore 90 miles, N from Nagpore 135, S W from Allahabad 225, S from Agra 255 W from Calcutta, by Allahabad 308 N E from Mhow 215 N E from Bombay 500 Lat. 23° 50', long 75° 49'.

**SAUGOR ISLAND** bounds the great entrance of the river Hoogly on the east side. It is seven or eight miles in length, and half that in breadth. On the east side is an ancient pagoda, and a large tank of fresh water, held in great veneration by the Hindoos, who go there in great numbers once every year to sacrifice. The island is held under a lease of ninety-nine years from government by a company which engaged at the end of twenty years to pay land-tax to the government on the

# SAU- SAW

cleared lands. It was subsequently found necessary to extend the term of rent-free tenure. The population in 1882 was estimated at 10,000. The system of manufacturing salt formerly carried on here by individuals under a system of license, has been discontinued. An iron lighthouse, to be erected on Middleton Point, was shipped from this country some few years ago. Lat. 21° 42', long. 88° 5'

**SAUMUND.**—A town in the British district of Ahmedabad, presidency of Bombay 17 miles W by S of Ahmedabad. Lat. 22° 59', long. 72° 20'

**SAUNGI,** in the district of Sultanpore territory of Onda, a town 90 miles S.E. of Lucknow. Butler estimates the population at 4,000 all Hindus, of the military class, and cultivators. Lat. 26° 8' long. 81° 58'

**SAUNTE.**—See SAOUTH

**SAUTNAIR,** in the British district of Baitool, Saugar and Nerbudda territory, lieutenant-gov. of the N.W. Provinces, a town on the route from Baitool to Ellichpore 22 miles S.W. of the former. Lat. 21° 33' long. 77° 50'

**SAUTURRA.**—A town in the territory of Nagpore 166 miles E. from Nagpore, and 135 miles S.E. from Raipur. Lat. 20° 59', long. 81° 41'

**SAVAN DROOG** in the territory of Mysore a celebrated hill fort, situated on a vast and bare rock of granite, amidst dense forests and thickets. A small river rushing through a deep ravine, washes the south base of the rock which is divided by an intervening chain into two great summits each surmounted by a fortress independent of each other and both abundantly supplied with water. The circuit of the base is about eight miles, and the sides are so precipitous as to appear inaccessible when viewed from below. In the year 1791 it was invested by the British army under Lord Cornwallis, and the defences, though formidable by position, were soon breached. The garrison also appears to have been weak and pusillanimous, and both forts were carried by assault without the loss of a single life on the part of the British. After the final overthrow of Tipoo Sultan in 1799 it was garrisoned by a small native force, which was subsequently withdrawn on account of the insubordination of the place. Elevation above the sea 4,004 feet, distance from Bangalore W 19 miles, Srirangapatam N.E., 53 Lat. 12° 55' long. 77° 21'

**SAVANOOR.**—A town in the British district of Dharwar, presidency of Bombay, 30 miles S by E. of Dharwar. Lat. 14° 55', long. 75° 19'

**SAVANTACUTTA.**—A town in the Mysore, 173 miles N.W. from Srirangapatam, and 85 miles N. from Mangalore. Lat. 14° 6' long. 74° 51'

**SAVITERRE,** a river in the collectorate of Buntagherry, Southern Concan, presidency of Bombay rises on the western declivity of the Mahabaleshwar range, about lat. 15° 17', long.

73° 27'. It flows west by the town of Mhar, and falls into the Arabian Sea at Bankote, in lat. 17° 58' long. 73° 5', its total length of course being about seventy miles. It is navigable as far as Mhar thirty miles from its mouth, and was formerly accessible at all times for large ships; but a sandbank at the mouth constantly increasing during the south-western monsoon, its facilities for navigation are greatly diminished. The bar has ten feet of water at low tide, and twenty-one at high water, spring tides, and ships may anchor inside in five fathoms. It abounds with fish, and abounds with alligators and other reptiles.

**SAWA.**—A town in the Rajpoot state of Oodeypore, 55 miles E.N.E. from Oodeypore, and 26 miles N.W. from Neemuch. Lat. 24° 45', long. 74° 39'

**SAWAN.**—A river of the Deccan division of the Punjab, rising in lat. 31° 41', long. 69° 40' and flowing easterly for fifty-five miles loses itself in the desert, about lat. 31° 41' long. 70° 30'.

**SAWAR,** in the British district of Ajmeer, lieutenant-gov. of the N.W. Provinces, a town on the route from Gooma to Nussurahad, 177 miles N.W. of former 52 S.E. of latter. The town of Sawar has a good basin, and water is plentiful. Lat. 25° 49' long. 75° 31'

**SAWNAIR.**—A town in the territory of Nagpore 21 miles N.W. from Nagpore, and 91 miles E. by N. from Ellichpore. Lat. 21° 25', long. 78° 57'

**SAWOTTEE.**—A town of Barmah situated on the right bank of the Iraddy river and 58 miles N. from Prome. Lat. 19° 37', long. 94° 55'

**SAWUNTGURH.**—A town in the Rajpoot state of Boondee 19 miles N.E. by N. from Boondee, and 94 miles S.E. from Ajmeer. Lat. 25° 39', long. 75° 54'

**SAWUNT WARREE.**—A small state under the political management of the presidency of Bombay. It forms the southern part of the tract known by the name of the 'Concan' or the territory lying between the Sydras range of ghats and the sea. It is bounded on the north by the Car river, on the east by the line of ghats, on the south by the Tiracol creek and the Portuguese territory of Goa, and on the west by the Vingaria mahal and the Salce mahal of the Malwar talooka, in the British collectorate of Buntagherry. It lies between lat. 15° 38'—18° 15' long. 73° 40'—74° 22' its greatest length from north to south is nearly fifty miles, its greatest breadth rather more than thirty, and it contains an area of 800 square miles.

The physical character of the country, like that of the Concan in general, is 'remarkably rugged and broken, interspersed with huge mountains and thick jungles, intersected by rivers and numberless rivulets, rocky and clear until they descend on the level, where they are affected by the tides, when they are

very deep and muddy." The more eastern part, consisting of a strip of land of no great width extends along the western side of the Ghats, and over their ridges into the Deccan. Of the scenery which presents itself from the summit of these passes, some idea may be formed by imagining mountains succeeding mountains, 3 000 or 4 000 feet high covered with trees, except in places where the huge black barren rocks are so solid as to prevent the hardiest shrub from finding root in their clefts. The monsoon rains on the declivities and ridges of the Ghats are heavier perhaps, than in any other part of the world, and 297 inches of rain have been known to fall in this elevated region in one year. Tigers, leopards, hyenas, and other wild beasts lurk in the more fertile tracts, where the great number of torrents and brooks give rise to luxuriant vegetation. Snakes and other reptiles also abound and the rivers near the sea swarm with alligators which prey on the fish, that exist in vast numbers. The staple crops are rice and jowar (*Holcus sorghum*), but wheat gram (*Cicer arietinum*) and other pulses, as well as excellent vegetables, thrive well in the milder season of the year. The soil is principally a light sand, full of stones and gravel and incapable of yielding the superior kinds of produce such as cotton, tobacco and sugarcane. Cocoanuts are exported largely. The principal manufactures are gold and silver embroidery worked on saddle-cloths and horse-appointments, native guns, swords and spear heads.

The principal road through this state is the great military route made by the British government from Belgaum down the Ram Ghant to the port of Vingoria. Besides this there are native roads from the Deccan, by the Tulikut Ghant, to Banda and the Goa territory down the Parpoles Ghant, to Warree and Vingoria, with a branch road through Dowint and Banda into the Portuguese possessions, down the Hunmunt Ghant by Neror Warree, and Mangaon, to Vingoria and Path, and by the Gottha Ghant to the port of Malwan. There are also cross-roads leading into the Goa territory on one side, and the Company's on the other and numerous small passes in the line of ghats from the upper to the lower country.

The chief rivers are the Gundnaddie the Karlee, the Banda, the Tullovn the Tillaree, called also Koodawee and the Kulna. There are also a number of small streams, which in the rainy season swell into considerable rivers.

The annual revenues of the Warree state amount to about 2 25 000 rupees the expenditure is fixed at something under 2,00 000 rupees leaving a small surplus revenue for the liquidation of debt. The Warree state is not tributary to the British government or to any foreign power but in 1836 the customs leviable on the military road passing through this state from the port of Vingoria to the Ram Ghant, were transferred to the British govern-

ment and in 1838 an agreement was concluded with the chieftain under which the whole of the customs of Sawunt Warree became the property of the British government, and the levy of transit-duties was abolished.

A corps was raised in 1839 by order of the British government, for service within the limits of this principality. It received the name of the Sawunt Warree local corps and is officered from the hrs. It is paid from the revenues of the state and is not bound to serve in foreign territory. This levy consists of 520 rank and file, eighty native officers, and two European commissioned officers. It is disciplined armed and clothed in the same way as the Company's irregular corps, and is maintained at an annual cost of about 45 620 rupees, which forms a debit on the revenues of the state.

A census of the population of Sawunt Warree state was taken in 1844. From this it appears that the total population of the district amounted to 143 733 in the proportion of 74 562 males to 69 171 females.

The Mahratta family Sawunt, from whom as possessors of Warree, the name of the territory originated appears to have first come into notice in the person of Sawunt Bahadur the deshmook or chief of the town and district of Warree, under the Mussulman monarchy of Bejapoor and a member of the Bolea family. In the year 1659, the Sawunt deshmook of Warree formed a treaty with the renowned Mahratta leader Sevajee by which he agreed to transfer his allegiance from the monarch of Bejapoor to that chief to whom he engaged to pay half the revenue of the district, and on his account to garrison the forts, and maintain a force of 300 infantry but this treaty proving unsatisfactory to both parties, it was soon broken, and the deshmook resumed his allegiance to Bejapoor. In 1662, however he was subjugated by the Mahratta chief, who subsequently restored to him his deshmooke rights, and found in him a faithful ally.

In the reign of Phoud Sawunt the first treaty with the East-India Company was negotiated. It appears to have been occasioned by the piracies on British commerce committed by Kanjee Angria and his successors on the gulf of Colaba, and bears date 13th April 1780. It consists of seven articles and after stipulating for perpetual peace and friendship between Phoud Sawunt Bhenabab the Sir Desesayee, and the Company and providing for their mutually assisting each other's ships at sea, proceeds to conclude an offensive and defensive alliance against the son of Kanjee Angria, who is characterized as the mutual enemy of both powers, and engages on behalf of the East India Company to give up all the conquests made during the war to the Sir Desesayee (the ruler of Sawunt Warree), with the exception of Gherah (the fort of Vizadroog) and the island Kennery which are to be retained by the British government.

# SAW—SEC

British commerce having suffered much from the pirates of Sawunt Warree, an expedition was despatched from Bombay early in the year 1765 under the command of Major Gordon and Captain Watson of the Bombay marine. They took the fort of Eastwuntghur or Rauree and changed its name to Fort Augustus but on the 7th April of the same year a treaty was concluded with the chieftain of Sawunt Warree, by which the British government agreed to restore the fort of Rauree on conditions. These conditions do not appear to have been fulfilled the result was the renewal of negotiation terminating in another treaty concluded 24th day of October 1766 by which the restoration of the fort of Rauree was confirmed subject to a certain payment. The consequences were natural and obvious depredations continued to be perpetrated and as Duff observes it is no slight stigma on the British administration that this system of piracy was not finally suppressed until the year 1812. In that year a treaty was concluded between the chief of Sawunt Warree and the East-India Company whereby the fort of Vingoria was surrendered to the latter and very stringent clauses for the suppression of piracy were agreed to. The aggressive and predatory spirit of the rulers of Sawunt Warree was however, not subdued. Demonstration having failed, armed interference became necessary and in 1819 the state was reduced by a British force but given up again with certain exceptions, the forts of Eastwuntghur (Rauree) and Newtee together with the lands round those forts and belonging to their jurisdiction comprehending the districts of Panti and Agraum and the whole line of seacoast from the Charles river to Vingoria, and from Vingoria to the Portuguese territory being ceded to the English. The treaty under which this cession took place was modified by another concluded in 1820 by which the inland villages were restored the British government retaining only the forts and villages forming the line of the seacoast. These two treaties proved equally inefficient with those formerly concluded and a succession of blundering diplomacy and unskilful military arrangements ensued, which appear to have left the country as before, a thorough social and political chaos. This state of things continued until 1838 when on the breaking out of another formidable rebellion it was considered inexpedient again to employ British troops in merely suppressing resistance to a chief to whom like and had already frequently been afforded and who had proved himself utterly unfit to rule. The removal of the Sir Desaijee from all authority was therefore considered to be an indispensable part of the new arrangement now rendered necessary. The country was temporarily placed under British management to be hereafter restored to the Sir Desaijee or his family when there should appear a sufficient prospect of good government. Two invasions of the Warree territory organized by certain malcon-

tents who had found shelter in the Goa territories followed but on both occasions the disturbances were with little difficulty put down. But in 1844 a more formidable insurrection broke out and Anna Sahib, the hereditary, having joined the insurgents, his right to the succession was declared forfeited. The country was taken under the permanent management of the British government and upon the death of its chief will be at the disposal of the paramount power. Since this period the tranquillity of this principality has not again been disturbed. Justice has been abolished and measures have been adopted to afford to all classes of the community protection from oppression and the ready redress of grievances.

**SAWUNTWARRI F**—A town of Bombay in the native state of Sawuntwarree 83 miles W by N from Belgaula and 2 1/2 miles E by N from Vingoria. Lat. 16° 56', long. 74° 1'

**SAWUR** in the Rajpoot state of Jeypoor a hill fort and large populous village on the route from Agra to Noemuch 147 miles S W of former 182 N E of latter. Lat. 26° 8' long. 76° 9'

**SAWURDE**—A town in the British district of Rutnagerah, lieut. gov. of Bombay 33 miles N E of Rutnagerah. Lat. 17° 24', long. 73° 34'

**SAWURGAUM**—A town in the British district of Unadnuggur, presidency of Bombay, 47 miles E. by N of Nank. Lat. 20° 7' long. 74° 30'

**SAWUTSIR** in the Rajpoot state of Beekaneer a village on the route from Rutnagerah to the town of Beekaneer and 33 miles E. of the latter it contains sixty houses. Lat. 27° 54' long. 73° 52'

**SAYGEWUN**—A town in Hyderabad, or territory of the Nizam 61 miles N W by W from Jaulnah and 47 miles E by S from Malgaum. Lat. 20° 35' long. 75° 11'

**SFAL** a river of Bombaypore rises in lat. 21° 31' long. 84° 18' and flowing south west ends for twenty six miles falls into the Mahanuddy river in lat. 21° 28' long. 84° 1'

**SEAI KOTE** in the Reechan Doosh division of the Punjab a town situated on the left bank of the Chenab 63 miles N N F of the town of Lahore. The population amounts to 19,249. A church has been recently erected here. The district of which this town is the chief place has an area of 1,360 square miles and a population of 641,782. Lat. 32° 28' long. 74° 33'

**SEATAKOUND**—A town in the British district of Barua, lieut. gov. of Lachal, 86 miles S E by E of Bettiah. Lat. 20° 30' long. 8° 4'

**SEPLIAN**—A town of Lurrah situated on the left bank of the Irrawady river and 79 miles S W by W from Ava. Lat. 21° 13', long. 94° 59'

**SECLOR F**, in the British district of Benares, 865

## SEC

under the bent-gov of the N W Province, a small town adjoining the city of Benares on the west. It contains the civil establishments, the military cantonments and the residences of the British population whose avocations are connected with the great city in the vicinity. The bungalows or lodges of the British engaged in civil pursuits are rather widely scattered outside the military cantonment, or to the west of it, and among numerous groves and gardens, the only ornaments of a scene otherwise not very attractive. The residences, however, are substantial well finished, and well appointed and rank among the best possessed by Europeans in this part of India. In the midst is the church surmounted by a steeple, and well fitted up in the interior. There is besides a neat chapel, built by subscription and open for divine service in Hindostanee. The other principal establishments are the Courts of Justice, the Treasury and the Jail, plain brick built structures. The best of the government buildings is the Mint erected under the superintendence of Mr James Prinsep formerly manager of that department at Benares. It was scarcely finished, however when the process of coinage within it was stopped, and the entire business removed to Calcutta.

The military cantonment is traversed by the small stream the Burneh Nuddy which, in the middle of the assemblage of lodges and regimental buildings, is crossed, by means of a bridge, by the route from Allahabad to the city of Benares. The cantonment is the head quarters for the Benares division of the Bengal army. Lat 25 18', long 88 2'

**SECUNDERA** in the British district of Agra, bent-gov of the N W Province, a village on the route from the city of Muttra to that of Agra. Here is an asylum for the children of slaves who perished in the dreadful famines of A.D. 1837-1838. The number, originally 350 was in 1841 reduced by death to less than 300 boys and girls, in nearly equal proportion the former are taught gardening and handicrafts the latter, spinning sewing, and similar pursuits suitable to their sex, and both are educated in the Christian faith. When of age, they intermarry and are located in a contiguous village, formed of houses provided for their accommodation. Secundera is celebrated for containing the mausoleum of Akbar who with great prosperity and renown, reigned over India and Afghanistan from A.D. 1555 to 1605. The mausoleum is situate in the midst of a square embattled inclosure, said to contain forty acres, and entered by four vast and superb gateways, one being in the middle of each side of the square. They are built of red sandstone, each surmounted by four minarets, with numerous tablets, mouldings, and other ornaments of white marble, and inscriptions in black marble. That on the west side is in tolerable preservation, the rest are in ruins. The remains of Akbar lie in a deep vault,

under the centre of the building, and beneath an unornamented slab of marble. This building is generally supposed to have been erected by Akbar for the reception of his own body. However Akbar's son and successor Jehangir states that he himself built it, in honour of his father's memory. Lat 27° 18', long 78 1'

**SECUNDERA** in the Rajpoot state of Jeypore a town on the route from Agra to Ajmer, 88 miles W of former 135 E of latter. It is situate on the right or south bank of the Beengunga, a torrent having a channel several hundred yards wide, devoid of water in the dry season but having a wide and rapid stream during the periodical rains. The town is surrounded by a mud rampart. Lat. 26 57' long 76 35'

**SECUNDERABAD** in the territory of the Nizam a British military cantonment, advantageously situate on the north-east side of the Hoosain Sagur, a tank or artificial piece of water about three miles in length from north to south and two in breadth, lying amidst a number of smaller tanks, with which the surrounding country singularly abounds. To the west, and distant three miles, is a range of hills, consisting of granite rocks heaped on each other in a variety of strange and fantastic shapes and two miles to the north east are two very remarkable and large granitic hills, of an hemispherical shape each completely isolated. Their summits which are considerably elevated above the adjacent country are surmounted by the tombs of Mussulman ascetics regarded as saints, and hence numerous pilgrimages are annually performed to them. The cantonment extends in a line from east to west nearly three miles forming a curved irregular street, having the officers houses ranged on either side, in moderately-sized inclosures. This street is intersected in different parts by others, running north and south which afford a facility of communication with the bazars, the sepoy lines, and the parade-ground. The sepoy lines face the north, and behind them are the bazars, extending three-fourths of the length of the cantonment. At the right, or eastern extremity of the cantonment, are the European infantry barracks, and a short distance to the north of Saint John's Church, a large and handsome building, situate on the highest ground in the cantonment in consequence, however, of the unhealthiness of the spot, orders have been issued for the erection of new infantry barracks on a more eligible site. North of the sepoy lines are the hospitals and arsenal. On the western extremity of the barracks are the horse-artillery lines, and north of it, and separated from it by the spacious parade are the foot-artillery barracks. The cavalry lines are two miles north of the cantonment, at Bownepally in an open country, on a rising ground, remarkably healthy. In the town, around the bazars of the cantonment, the streets are crooked, narrow and irregular, and the ground being uneven, pools

# SEC—SEE.

of dirty water and accumulations of filth are formed causing during the hot season miasma and pestilential exhalations. Much attention however has lately been given to remedy these evils by the formation of sewers and the inhabitants are held responsible for the clearing and cleansing of the streets before their respective houses. There is an abundant supply of good water, from numerous wells and fountains. The south-west monsoon commences generally at Secunderabad in the beginning of June, and continues at intervals till about the middle of October. During November and December the sky is frequently cloudy and the winds easterly and sometimes also in the north-east monsoon a considerable quantity of rain falls. From the beginning of January to the end of May the sky is generally clear and the weather dry. Dews are not unfrequent in January and the early part of February and in some years light showers of rain occur during these months. The annual fall of rain is estimated at thirty-two inches, but in years when the monsoon fails, it does not amount to half that quantity. The mean temperature in the house for one year deduced from observations made at sunrise at two o'clock in the afternoon and at sunset, was in January 74½, February, 76½, March 84, April, 91½, May 98, June, 88, July 81, August, 80½, September 79, October 80, November 76, December 74½, giving as the annual mean 81½. The most muggy times of the year are the wet and cold seasons. The prevalent diseases are fever, dysentery, and rheumatism. According to the latest accounts, there are in the town 5,000 houses, containing a population of 34,357. Elevation above the sea 1,337 feet. Distance from Mangalore, N.E. 498 miles. Madras, N.W., 393. Bombay S.E. 449. Calcutta, S.W., 962. Lat. 17° 26' long 78° 35'.

**SECUNDERPOOR**, in the British district of Azimgurh, lieutenant-gov. of the N.W. Provinces, a town on the route from Azimgurh to Meerutpoor 56 miles E. of the former. Lat. 26° long 84° 6'.

**SECUNDERPOOR**.—A town in Oude situated on the left bank of the Ganges river and 33 miles S.W. by W. from Lucknow. Lat. 26° 34' long 80° 39'.

**SEDASHVAGHUR**, in the British district of North Canara, presidency of Madras, a town on the north side of the Cauvery Nuddy and a mile east of its mouth. The Cauvery Nuddy descending from the Ghats, here discharges itself into an inlet of the sea opposite the town, about a mile wide and twenty-five feet deep at high tide but the entrance is hazardous and intricate and ships frequenting this part of the coast anchor outside in Carwar Bay a roadstead sheltered by several islets, of which the principal are Karmaguda and Sedashvaghur, the latter indicates here a fort, founded by Sedashwa Rao, one of the

rajahs of Soonda, who grew into importance on the overthrow of the great kingdom of Vijayanagar at the battle of Talikota, in the year 1564. Distance N.W. from Mangalore 145 miles, S.E. from Bombay 290. Lat. 14° 52', long 74° 12'.

**SEELAPUNT** in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a town on the route from Almora to Tibet 60 miles E.N.E. of the former. Lat. 29° 53' long 80° 39'.

**SEELANUR**, in the British district of Noolandahur, lieutenant-gov. of the N.W. Provinces, a town on the route from Noolandahur to Vondabed 20 miles N.N.E. of the former. It contains a population of 5,841 inhabitants. Lat. 28° 37' long 78° 9'.

**SEELAU KA CUR**, in the Sindh Sagor Division of the Punjab a town situated 10 miles from the right bank of the Chenab, 33 miles N.N.E. of the town of Multan. Lat. 30° 54' long 71° 50'.

**SEEMUNJE**, in the British district of Bograh, lieutenant-gov. of Bengal a town on the river Surrat, a considerable stream flowing from north to south and navigable throughout the year for small craft and during the periodical rains for those of great burden. Lat. 25° long 89° 20'.

**SEEBGUNIE**.—A town in the British district of Maldah, lieutenant-gov. of Bengal, 36 miles S. of Maldah. Lat. 24° 40' long 88° 10'.

**SEEBPOOR**.—A town in the British district of Midnapoor, lieutenant-gov. of Bengal, 46 miles S. by E. of Midnapoor. Lat. 21° 47', long 87° 30'.

**SEEBPOOR**.—A town of Assam, in the British district of Seebpoor 46 miles S.E. by E. of Loochinpoor. Lat. 27° long 94° 40'.

**SEEBPOUR**.—A town of Assam in the British district of Seebpoor two miles N. of Seebpoor. Lat. 27° 2', long 94° 30'.

**SEEDTM**.—A town in the lapsed territory of Odempoor on the south-western frontier of Bengal, 20 miles N. from Odempoor and 74 miles S.W. by S. from Palanow. Lat. 23° 57', long 83° 24'.

**SEEHIA**, in the British district of Goochraon, lieutenant-gov. of the N.W. Provinces, a village close to the western frontier, towards the jaghirs of Jajhur. Lat. 25° 15' long 76° 29'.

**SEHLIN HOU**.—A town of Burma, situated on the left bank of the Irrawaddy river and 109 miles S.W. from Ava. Lat. 20° 51', long 84° 41'.

**SEERAR**, in the Rajpoot territory of Shekawtee, a town the residence of a thakoor or chief one of the five principal leaders of that country. His revenues according to Tod, amount to 8,00,000 rupees annually. On the invasion by the British troops in 1835 it was occupied by them having been surrendered without resistance. Distance S.W. from Delhi 847.

## SEE

143 miles NW from Agra 180 Lat.  
27 36 long 75 20'

**SEEKREE**, in the British district of Budaon  
 1st-gov of the N W Provinces, a town on  
 the route from Bareilly to Delhi, and 35 miles  
 W of the former It has a bazar and is  
 supplied with water from wells Lat. 28 26  
 long 78 59'

**SEELDHURRUMPORE**—A town of Assam, in the British district of Nowgong 80 miles S.E. by E of Nowgong Lat 26° 7' long 93 10'

**SEENA.**—A river rising in the British col-  
lectorate of Ahmednuggur in lat 19° 8' long  
74° 37'. It flows south east through this  
collectorate and that of Sholapore, and falls  
into the Beemah river in lat 17° 22' long  
75° 58'.

**SEENGURH** in the British district of  
Muzaffurnugger, lieut.-gov. of the N W Pro-  
vinces, a village on the route from Kurnal to  
Meerut, and 17 miles S E of the former. Lat.  
29 33' long 77 14'

**SLEPAH**—A town in the British district of baron lieut.-gov of Bengal 80 miles S. by W of Bettiah Lat. 26 21 long 84 30

**SEEPPOW**—A town in the native state of Dholpoor 18 miles N W from Dholpoor and 83 miles S W by S. from Agra. Lat 26 47, long 77 50.

**SEEPRA**.—A river of Malwa, rising on the north side of the Vindhya range, 11 miles E of the small town of Preppada, and in lat. 22 37 long 76 12'. It has a winding course generally north westerly through a fertile country and forty miles from its source recedes on the left side the small river Kaund and passing subsequently by the towns of Ojeyn and Mahadpoor falls into the Chambal on the right side in lat. 23 54 long 75 29' after a total course of 120 miles. So numerous is its progress, that in a distance of twenty-six miles it is thrice crossed by the route from Mhow to Mahadpoor, by Ojeyn being in each instance fordable in fair weather. At the point of passage, six miles north of Ojeyn or lower down the stream than that city and fifty five miles from the source the passage is made by a rugged rocky ford of about 100 yards in width. Higher up the stream, and four miles south of Ojeyn it is crossed on the route from Agra to Mhow and there has a bed rocky for 100 yards banks steep and cut into ravines at the ghat (ford) width of the stream in dry season twenty yards, and from one to one and a half feet deep. Still higher at Bowles, about twenty miles from the source it is crossed, on the route from Mhow to Sangur by a ford fifteen yards wide with little water, and a sandy bed. Close to Mahadpoor, it is crossed on the route from Neemuch to that town by ferry or otherwise by a deep ford higher up. During the rains, the river swells and overflows many places on its banks. In 1831 it rose to such

a height as to wash away part of the town of Mahipour. In the Ayen Akbery it is gravely stated. It is astonishing that sometimes this river flows with milk. A similar belief according to Jaquemont, is still entertained by devotees respecting the water of a small deep tank close to the bank of the river, at Oojein. The water of this basin notwithstanding its uninviting appearance has, for devotees of competent faith, varied and delicious tastes according to the various seasons of the year. In summer the taste is that of sherbet in autumn of milk in winter of honey &c &c. It is not drunk unless it has passed through the hands of the Brahmins who frequent the place, and hve by the credulity of the devotees.

**SEER**, in Sunda the mouth of the Goongroo or Pinyaree branch of the Indus, which in its lower part is in consequence of the dam thrown across it at Maghissee, deserted by the stream except during the highest state of the inundation. This estuary is navigable for boats of forty tons. The Seer mouth is in lat. 23 46', long 68 7'

**SEERAMPOOR**—A town in the territory inhabited by the independent hill tribes of Orissa 49 miles W from Goomsoor and 120 miles S from Sambulpoor Lat 19 45', long 83 57'

**SEI RHUTTER.**—A town in the native Mahratta jaghure of Sauglee, presidency of Bombay 41 miles ESE from Dharwar and 90 miles W from Bellary Lat 15 18' long 75 38'

SEERMOW in the territory of Bhopal a town on the route from Hooshangabad to Saugor 76 miles N E of former 88 S W of latter It is situated at the south base of a ghat or passage over a ridge of trap amidst stupendous hills and cliffs of the same formation It has a bazar and is supplied with water from wells Lat. 23 24 long 78 34

**SEERMOWA** in the British district of Furruckabad, Rent-gov of the NW Provinces, a village on the route from the cantonment of Allypore to that of Futtogh and 14 miles NW of the latter Lat. 27° 26', long 79° 29'.

SEEROCKE.—See SKROH.

**SEERPAHDKE.**—A town in the native state of Mohurbunge, on the south west frontier of Bengal 70 miles W by 9 from Midnapoor and 57 miles S. from Burraboom. Lat. 23° 16, long 86 20'

**SEERPOOR**—A town in Hyderabad, or territory of the Nizam, 164 miles N N E. from Hyderabad, and 128 miles S.E. from Ellich poor Lat. 19 30' long. 79 35'

**SEERPORE**, in the British district of Patna, *leut. gov of Bengal* a town on the right or south bank of the Ganges. It has about 1,000 houses, and a population of 5 000. The town is distant W from Patna 15 miles.

## SEE-SEH

**E** from Benares, by way of Ghazipur 140  
Lat. 25 40' long 85 2'

**SEERPOR**—A town in the British district of Moorshedabad, lieut. gov. of Bengal, 18 miles W by S. of Moorshedabad Lat. 24 8' long 85 1'

**SEERPORE** in the British district of Bogra, lieut. gov. of Bengal a town near the south frontier towards the British district of Pubna. It is situated on the right bank of the great river Curattee, and is of rather considerable size. Distant 8 from the town of Bogra 12 miles, N F from Murhampoor 82 from Calcutta 200 Lat. 24 40' long. 89 24'

**SEERSONDIE**—A town in the territory of Nagpur 100 miles S E. by E from Nagpur and 122 miles S E. by E from Seoni Lat. 20 27' long 80 30'

**SEETABULFEE**—An eminence in the outskirts of the town of Nagpur the chief place in the British territory of the same name. This spot has been rendered memorable by an action which took place there on the 26th November 1817 when a treacherous attack upon the British made by order of the rajah of Nagpur with a body of 20 000 men was gallantly met and defeated by a force of not more than 1 400. A noble charge made by Captain Fitzgerald with a small party of cavalry upon a large body of the enemy's horse, decided the fortune of the day. The resident, Mr. Jenkins was on the field throughout the day as was also his assistant Mr. Sotheby who was there killed. Distant 10½ miles F from Ellichpore and 60 miles E. by E from Raibool Lat. 21 10' long 79 9'

**SEETA MOW** in Malwa a town the principal place of a small raj of the same name. It is held by a petty rajah a descendant of a scion of the family of Joudpore. The annual revenue paid to the rajah is estimated at 90 000 rupees out of which he pays 60 000 Salim Shye rupees, or 47 250 Company's rupees, to Scindia. The rajah some time since claimed a reduction of tribute, on the ground of the insufficiency of the resources of the country to meet the claim, and compliance with his request has been made dependent upon the result of a survey of his territory. Population of the town about 10 000. Distant N W of Oojein 66 miles S W of Gwalior fort 230 Lat. 24 8' long 75 27'

**SEETE LEKH** in the British district of Kumaon, lieut. gov. of the N W Provinces, a peak of the main range of the Himalaya, on the right bank of the Kali (Eastern) and forming part of the ridge separating the mahall or subdivision of Buns from that of Dharma. Elevation above the sea 16 833 feet. Lat. 30 8', long 80 52'

**SEETULGUREE** in the British district of Munshiganj lieut. gov. of the N W Provinces, a village on the route from Kurnal to Meerut, and 11 miles S E of the former Lat. 29 30', long 77 10'

**SEFWANA**—A town in the Raypoot state of Jodhpoor, nine miles N of the left bank of the Loonee river and 62 miles S W from Jodhpoor Lat. 25 40' long 72 20'

**SECAON**—A town in the territory of Nagpur 68 miles S from Nagpur and 123 miles S E by E from Ellichpore Lat. 20 20' long 79 13'

**SEGOR CUNGE**—A town in the jaghire of Rampoor lieut. gov. of the N W Provinces, Lat. 28 40' long 79 1'

**SEGOWLEE**, in the British district of Sarun lieut. gov. of Bengal a town on the route from Coochpore cantonment to that of Mulye 38 miles E of former 51 W of latter. Supplies and water are abundant. Lat. 26 44' long 84 47'

**SEGU**—A village in the British district of Boodlandsbuhur lieut. gov. of the N W Provinces, 45 miles E of Daulta Lat. 23 25', long 78 1'

**SEHAI** in the British district of Futtahpore lieut. gov. of the N W Provinces a town on the right bank of the Ganges, nearly opposite Daulana, and 18 miles N E of the town of Futtahpore. Lat. 2 long 81'

**SEHAI KA SAIKAE** in the British district of Agra, a village on the route from the city of Agra to Jeypore and 1½ mile W of the former Lat. 27 9' long 77 58'

**SEHMBILL**—A town in the Raypoot state of Oodey, 33 miles N W from Oodey and 90 miles N by E from Jodhpoor Lat. 25 3' long 73 30'

**SEHOOI**—A town in Hyderabad or territory of the Nizam 30 miles N W from Ikutabad, and 63 miles N from Ahmednuggur Lat. 20 3' long 74 50'

**SEHORE**—A town in the British district of Ahmedabad presidency, of Kumbay 103 miles S S W of Ahmedabad, Lat. 21 40' long 71 55'

**SEHORE**, in Malwa, a town of Bhopal on the route from Sangor to Ausergureh 132 miles S W of former 152 N E of latter. It is situated on a bold rising rock of quartz, and is a considerable town the residence of the British political agent for Bhopal. Around it is a large grove of mangoes and other trees. There is a considerable manufacture of printed muslins. There is a good bazar and water is abundant, the town being situated on the right bank of the Seven a small river tributary to the Parbutty. Distant S W of Bhopal 22 miles, N W of Hoshangabad 66 Lat. 23 15' long 77 5'

**SEHRA**—A town within the dominions of Gholab Singh the ruler of Cashmere, situated on the left bank of the Pir Panyal river and 67 miles S W by W from Srinagar Lat. 33 38' long 74 6'

**SEHUL** in the British district of Moradabad lieut. gov. of the N W Provinces, a village on the route from the town of Moradabad to Almora, and five miles N of the former Lat. 28 04', long 78 05'

# SEH-SEM

**SEHURKE**, in the British district of Goruck poor, lieut. gov. of the N W Provinces a town on the route from Goruckpoor to Buraesh 63 miles N W by W of the former Lat. 27 8 long 63 31

**SEHWAN** in Sindh a town situate on an eminence at the verge of a swamp on the right or south west bank of the Arul, which flows from the Lake Manchar into the Indus, and which at present of the town is about 100 yards wide and when lowest twelve feet deep The Indus a few years ago flowed close to the town but is now two miles distant from it Ruined houses mosques and sepulchres cover here a wide space, and bear evidence of the greatness of this city before it was ruined by the Kalora princes of Sindh The houses of the present town are of mud often several stories high and arched. They are superior to those usually to be seen in the towns of Sindh but the bazar long crooked narrow and covered with mats to exclude the scorching beams of the sun, is ill supplied with goods and has little trade The manufactures are inconsiderable, consisting of caps, shoes and petty silken fabrics. The inhabitants are chiefly fishermen or beggars, which last class are supported by the pilgrims who flock to the shrine of Lal Shah Bas whose memory stands high for sanctity not only with Muslims but also with Hindus The remains of this reputed saint, who was originally from Khorasan, lie in a tomb inclosed in a quadrangular edifice, covered with a dome and lantern, ornamented with smaller domes and spires, and with glazed porcelain tiles, bearing numerous inscriptions in Arabic characters. The gate is of hammered silver, as is the balustrade round the tomb, which is covered with rich cloths. The sepulchre is reputed to contain a considerable treasure, and its keepers are endowed with the gardens of Sehwan and several villages. Great numbers of pilgrims flock to this spot from all parts of Sindh and the neighbouring countries but neither the possession of so sacred a deposit, nor the example of so much devotion, has any beneficial effect on the morals of the population who are remarkable for idleness and profligacy North west of the town and separated from it by a deep channel is an eminence about eighty feet high having its sides encased with a brick wall The summit is oval, and is 1,200 feet long and 750 wide. It is covered with ruins and fragments of pottery, the remains of towers are visible along the circuit of the wall, and two fine arched gateways are in tolerable preservation. The population of Sehwan is estimated by Buraesh at about 2,000 Lat. 26 24 long 67 55

**SEIK STATES**.—See **SEIKH**

**SEILGOMNA**.—A town in the native state of Koraon, on the south-west frontier of Bengal, 68 miles E N E. from Sobagpoor and 101 miles W by S. from Palamou Lat. 23 40, long 82° 25'

**SENEE**—A town in the native state of Bhotan, situated on the left bank of the Monas river and 103 miles N by W from Gowhaty Lat. 27 38 long 91 87

**SENGE KHABAB, or INDUS RIVER.**—See INDUS.

**SENOWRA** in the British district of Mysore, lieut. gov of the N W Provinces, a village on the route from the cantonment of Alighur to that of Ktawa, and 40 miles N W of the latter. Lat. 27 12, long 78 38

**SENTULGURH** in the Rajpoot state of Jeypore, a small town on the route from Dohin to the town of Jeypore, 26 miles N E of latter. It is surrounded by a mud rampart, and is situated in a sandy plain little capable of production and consequently scantily cultivated. Lat. 27 5 long 78 23

**SEOLURH**—A town in Orissa 63 miles N E from Lucknow and 120 miles E. from Shahjehanpore Lat. 27 43 long 81 54

**SEOHARA** in the British district of Dijnour, lieut. gov of the N W Provinces, a town on the route from Dehra to Moradabad and 29 miles N W of the latter. The surrounding country is in general sandy and overrun with jungle. Elevation above the sea 701 feet. Distance N W from Calcutta 917 miles. It contains a population of 6 414 inhabitants. Lat. 28 18 long 78 39

**SEONDA** in the British district of Banda, lieut. gov of the N W Provinces, a small town on the route from the town of Banda to Kalleenjur 25 miles N W of the latter. Lat. 25 18 long 80 25

**SEON DARA**, in the British district of Moradabad, lieut. gov of the N W Provinces, a town on the route from Moradabad to Badaoon 19 miles S by E. of the former. Lat. 28 38 long 78 56

**SEOTIE**—A river rising in Mirzapoor about lat. 24 44 long 82 15 close to the Bujhat Ghat, and at an elevation above the sea of probably about 1 000 feet. It holds a northerly course of about fifteen miles and then turning to the north west, flows by the northern base of the Kutra Pass, and receiving several small streams, falls into the Bilund, on its left side in Lat. 24 55 long 82 8, having flowed altogether a distance of about forty miles.

**SEOWLA**, in the British district of Futtah-

pore, lieut. gov of the N W Provinces, a village on the route from Caswore to the town of Futtahpore and nine miles N W of the latter. Lat. 26 2 long 80 44

**SERA**, in the British district of Bijnour, lieut. gov of the N W Provinces, a village on the route from Moradabad to Hurdwar and 43 miles N W of the former. Lat. 29 24, long 78 31

**SERA** in the territory of Mysore, a town situated on a tributary of the river Veilarati. It has a fort wall built of stone of considerable size and regular construction. Within are the remains of the residence of the former nawab or Mussulman governor. There is likewise a large mosque besides some others of less importance, this having been formerly a very populous place, but it suffered dreadfully from the predatory attacks of the Mah rattas, and Tippu Sultan further urged its ruin by taking away 1,000 families to re-people the town of Shahr Ganjam which he built on the island of Seringapatam. It has, however, since the establishment of British supremacy in some degree revived and contains a few good streets. 2 000 houses having been built in the first year after the overthrow of Tippoo Sultan. Here are two extensive tanks, but in few years is the rain sufficient to replenish them; the climate of this part of Mysore being very dry. The overthrow of the monarchy of Vijayanagar by a Mussulman confederacy at the great battle of Falkote, took place in 1564 and about eighty years later Sera was subjugated by the king of Bejapoor and granted in jaghire to Shajjee, the father of Surjee. The town became the seat of an extensive provincial government. On the overthrow of the state of Bejapoor by Aurungzebe it appears to have become part of the soubah or province of the Deccan and was held as a sort of fief, ostensibly subordinate to the Nizam after that officer had attained independence. In 1757 it was captured by the Mahrattas and though still in their possession, it was in 1761 nominally conferred on Hyder Ali the formidable adventurer of Mysore, by Basalat Jung the brother of Nizam Ali. Hyder found little difficulty in making himself master of the place. In 1767 it came into the possession of the Mahrattas, but was immediately restored for a pecuniary compensation. In 1773 it was again wrested from that potentate by the Mahrattas, but retaken in the following year by his son Tippoo Sultan. In 1791, when Lord Cornwallis advanced into Mysore, it was occupied by the British. Its elevation above the sea has been estimated at 2 223 feet. Distance from Seringapatam, N, 92 miles, Bangalore N W, 73. Madras W., 234. Mangalore, N E. 150. Lat. 18° 45', long 76° 57'

**SERAEN**—A town in the British district of Pooree, one of the divisions of Cuttack, presidency of Bengal, 17 miles N W by N of Juggurnaut. Lat. 20, long 85 45

India

# SER.

**SERAI**, in the British district of Bundel-  
cund, lieut. gov. of the N W Provinces, a  
town on the route from Tehree to Saugur 30  
miles S of the former Lat. 24° 7' long 78° 50'

**SERAI GUNGON** in the British district  
of Saharunpoor a village on the route from  
Kurnal to Saharunpoor and 23 miles N.E. of  
the former town. Distance N W from Calcutta  
988 miles. Lat. 29° 46' long 77° 20'

**SERAMPORE**, in the British district of  
Hoogly lieut.-gov. of Bengal, a town on the  
right or western bank of the river Hoogly  
Heber describes it as a handsome place, kept  
beautifully clean and looking more like a  
European town than Calcutta, or any of its  
neighbouring cantonments; and viewed from  
the opposite side of the river, it has a peculiarly  
pleasing appearance. Here are a court-house,  
and a large building which was the govern-  
ment house during Danish rule. The place  
acquired some celebrity as being the spot  
where, in the latter part of the last century  
the Baptist missionaries established themselves  
and where they prosecuted their labours for  
the advancement of Christianity in India, and  
for the acquisition by Europeans of a know-  
ledge of the languages of the East. The in-  
stitution which they reared attracted to the  
place a degree of attention which otherwise it  
certainly would never have commanded.

Serampore was at one time the Alsatia of  
Calcutta, and afforded refuge to schemers, in-  
solvent debtors, and reckless adventurers, who  
had found it prudent to disappear from that  
metropolis. It was in consequence a bustling  
lively gay dissipated place, but the state of  
affairs has been changed by the loss of its in-  
sources, which having been found very trou-  
blesome to the jurisdiction of the East India  
Company the place has been purchased from  
the Danes, and formally transferred to the  
British. The pecuniary equivalent was calcu-  
lated at twenty five years' purchase of the net  
revenue. Serampore is noted for its manufac-  
ture of paper. The supply required for the  
impressions of the *Calcutta Gazette* is furnished  
from hence, and the coarser quality denomi-  
nated cartridge-paper is said to be equal in  
every respect to that of England. Population  
of town, exclusive of that of the suburbs,  
13,000 distant from Calcutta, N 18 miles  
Lat 22° 46' long 88° 24'

**SERAMPORE**—A town in the British  
district of Rangpur lieut.-gov. of Bengal,  
61 miles E by N of Hazareebagh Lat.  
24° 6' long 86° 20'

**SERAN**—A town in the native hill pro-  
vince of Koonawar situate on the left bank of  
the Sulej river and 48 miles N.E. by E from  
Simla. Lat. 31° 30', long 77° 51'

**SERAO** in Gurwhal a small town in the  
valley of the Budeear and on the left bank of  
the river of that name. It is situate amidst a  
large extent of terraces, formed on the decli-  
vity of the mountains rising behind it, and

carefully cultivated. Serao is 7 885 feet above  
the sea. Lat. 30° 57', long 78° 17'

**SERGOONG**—A town in the native state  
of Bhutan, 62 miles N by E from Durrung  
and 73 miles N W from Bishnath Lat. 27° 18',  
long 92° 17'

**SERIEKALA**.—A town in the British  
district of Singboon on the south west frontier  
of Bengal 18 miles N.E. from Chalbassa, and  
36 miles S W by W from Burraboom Lat.  
22° 46' long 85° 58'

**SERINAGUR**—See **SIRINAGUR**.

**SERINGAPATAM**, a celebrated fortress  
and town formerly the capital of the territory  
of Mysore is situate on the western extremity  
of an island in the river Cauvery. The island  
is about three miles in length and one in  
breadth, and the writer by whom these dimen-  
sions are furnished, describes it as having a  
most dreary ugly appearance, inasmuch as  
naked rock and dirty mud walls are its most  
predominant features. The town of Seringa-  
patam is an ill built, mean place with narrow  
streets, and houses ill ventilated, hot, and ex-  
cessively inconvenient for Europeans. It is  
described by the author already quoted as  
altogether a sink of nastiness. Water is,  
however, abundantly supplied from the river  
Cauvery, which washes the walls on the  
northern and south west sides. The ramparts  
rising from the banks on those sides were the  
weakest parts of the defences, Tippoo Sultan  
judiciously confiding in the difficulties which  
the river presented to assaults though it  
may be forded during the dry season. In the  
rainy season however, it is a great torrent,  
utterly unfordable, and at all times, the  
rapidity of the current and roughness of  
the bed, filled with rocks and fragments  
of granite, render the fording it a matter of  
some difficulty. The ground plan of the in-  
closed space is an irregular pentagon measur-  
ing in diameter from south east to the north  
west angle, about one and a half mile and  
three-quarters of a mile in breadth. On the  
east and south sides, which are not washed by  
the river, Tippoo Sultan erected defences very  
massive and heavy and though not skilfully  
planned, offering such resistance to an attack,  
that the final and conclusive one in 1799 was  
made across the Cauvery in preference to an  
attempt to breach those enormous masses.  
The palace of Tippoo Sultan is within the fort  
and is a very large building formerly sur-  
rounded by a strong and lofty wall of stone  
and mud. It is however of very mean  
appearance but has some spacious apartments  
which after the place was taken were used for  
barracks but, in consequence of defective  
ventilation, they were but indifferently suited  
for the purpose. The inclosing rampart of  
this inner work has been destroyed, and the  
space has been planted with trees. Contiguous  
to the fine and lofty temple of Sriranga, the  
tutelary deity and at no great distance the  
ancient palace of the Hindoo rajahs of Mysore

The *Shahr Gagan* a considerable suburb detached from the fortified town and east of it was demolished by Tipoo Sultan on the eve of the investment of the place, lest it might afford shelter to the besiegers but after the capture it was rebuilt with considerable regularity. The population of the island in the reign of Tipoo has been conjectured to have amounted to 150 000 all supported by the court and army scarcely any manufactures having been established. This estimate can hardly however be assumed as approaching to correctness as in 1806 the population, exclusive of the garrison and its followers, was taken to be only 31 895. The number is now only 12,744 the place having been abandoned as a military station in consequence of the deadly character of an endemic fever which prevailed there and which for several years carried off vast numbers both of Europeans and natives and it is now fast falling into decay and becoming every year more and more deserted. Srirangapatna, the name of which has by British usage passed into Seringapatam, is said to have been founded by Sri Rang an ancient prince, who called it Sri Rang, Patna, or the town of Sri Rang but according to another account, it was founded as late as 1454 by a devotee who named it the city of Sri Ranga, or the Holy Ranga which is considered to be one of the names of Vishnu. Native legends again ascribe its foundation to the wives of Ravana the giant tyrant of Lanka or Ceylon who, foreseeing his approaching destruction by Rama, caused the females of his family to escape by flying northward. No historical records however trace its existence earlier than 1610 when it was acquired by the Ray Wodegar a chief of Mysore and made the seat of his government, though there is some reason to believe it to have been previously the residence of the viceroy of the great rajah of Vijayanagar. In 1697 it was besieged by a tumultuary army of Mahrattas, who were repulsed with great slaughter. In 1755 it was besieged by the army of M. Bussy acting on behalf of Salabut Jung, claiming to be son-in-law of the Deccan whose hostility was bought off by the payment of a large sum as arrears of tribute. In 1765 it was chosen by the formidable adventurer Hyder Ali as the seat of his government. In 1773 it was again besieged by the Mahrattas, who departed on receiving from Hyder Ali 15,00,000 rupees, with the promise of a like sum at a future period. In 1791 the British government being engaged in war with Tipoo Sultan, son and successor of Hyder Ali Lord Cornwallis governor-general and commander-in-chief after having without opposition succeeded the gharis by the Mugh Pann, and stormed Bangalore, arrived before Seringapatam but from want of provisions he was obliged to relinquish the siege, and retrace his course in the direction of Bangalore. Resuming his operations in the beginning of 1793 when an army better appointed and provisioned

he signally defeated the forces of Tipoo Sultan on the north bank of the Cauvery, and having succeeded in establishing a considerable force on the island the town and its environs nearly invested on all sides, when further hostilities were averted by the arrangement of a treaty under which the ruler of Mysore ceded one-half of his dominions, paid 3 300 000*l.* to defray the expenses of the war and gave up to the custody of Lord Cornwallis two of his sons, to be detained as hostages till the conditions were fulfilled. In 1793 Tipoo Sultan was so infatuated as to seek the aid of France to overthrow the British power in India. Thereupon in the following year a British army amounting to 26 802 men with the addition of the subsidiary force of the Nizam of 10 157 and 6 000 irregular horse in the service of the same potentate, proceeded to chastise the insolent contriver of this insane design. On the 5th April Seringapatam was invested with an ordnance train of forty battering guns fifty-seven field pieces, and seven howitzers. On the 3rd of May the British batteries had made a practicable breach and at one in the afternoon of the succeeding day a storming party of 4 376 men mounted the rampart and wheeling one party to the right, the other to the left after a long and desperate conflict accompanied with dreadful carnage, became masters of the place. Tipoo Sultan himself falling by the hand it is believed of a private soldier. The territory of the fallen despot, already greatly diminished by the results of the former war with the English was divided, and a portion allotted to the titular rajah of Mysore the representative of the race which Hyder Ali had supplanted. The island, town and fort of Seringapatam were retained by the British as a military station but being found unwholesome, the place was subsequently, on account of malaria, abandoned for that purpose, but still remains a possession of the British government. Elevation above the sea 2 412 feet distance from Madras W. 248 miles, from Bangalore S.W. 70 Mangalore E. 130 Bombay S.E. 515, Hyderabad N. 360 Calcutta, S.W. 1 045 Lat. 12° 25' long 76 45'

**SERINGHAM**.—A town on an island formed by the division of the river Cauvery into two streams. The island is fourteen miles long from east to west and nearly two in breadth the town is one mile and a half N. from Trichinopoly Lat 10 51 long 78 45'

**SERNAL** in Gorwal, a village on the left bank of the Buhar a leader of the Jannas. It is situated amidst groves of mulberry and apricot-trees, on a fertile expanse rising gently up the side of a mountain. Elevation above the sea 7 255 feet. Lat. 30° 54', long 78 18

**SEROHEE**.—A small raj or state of Rajpootana, named from its principal place. It is bounded on the north-west by the territory of Joudpore on the north-east by Godwar, on the east by the territory of Mawar or Odeypore, and on the south by the dominions

# SER-SES.

of the Gulpoovar. It lies between lat. 24° 23'—25° 16', long. 73° 10'—75° 12' and the area is estimated at 2,024 square miles. The eastern and north-eastern parts of the territory are hilly extending over the north western slope of the Aravalli, and inclining towards the desert of Marwar towards which numerous streams flow in a north westerly direction, pursuing their course to the river Loni, by the channel of which they find their way into the Gulf of Cutch. The southern and south eastern part is very mountainous and rugged, containing the lofty mountain Aboo and the various ridges branching from it. The elevation of the summit of Mount Aboo has been estimated at nearly 5,000 feet above the sea. Many splendid ruins, especially at Chandravati and on Mount Aboo indicate the former prosperity and civilization of this state, now greatly declined. An important commercial route lying through this country from Guzerat to the great mart of Pales, in the territory of Joudpore, contributes to its reviving welfare. The annual revenue of the rao or prince is estimated at 70,000 rupees, out of which a tribute has been claimed by the state of Joudpore. The military force consists of 200 cavalry and 600 infantry exclusive of the feudal troops of the jaghedars but the whole population consisting principally of the predatory tribes Minna, Graenas and Bheels, are armed. The rao is of the Deora subdivision of the Chauhan tribe of Rajpoots.

This state was for some time considered a district of Joudpore. Tod says, "For a few thousand rupees annually paid to the British government by Serohes, who however, protested against being a party to its ultimate disposition, which might otherwise at some future period have again involved her independence, she was enfranchised for ever from the claims of Marwar, and now looks to the British government alone." A treaty was formally concluded, October 31st, 1828, between that government and the rao of Serohes. The country has been greatly misgoverned and in compliance with the solicitations of its ruler the administration has been assumed for a term of years by the British government.

**SEROHEE**—A town of Rajpootana, on the route from Nussurnabad to Deesa, 188 miles S.W. of the former and 67 N.E. of the latter. The present town is supposed to have been founded in 1424 and to have been named originally Sheopooras. It superseded the original city of Serohes the ruins of which are still perceptible at no great distance. Since taken under British protection, Serohes has become a place of some commerce and wealth though not many years ago it was merely an expanse of ruins. The extent of the town is rather considerable, the houses are good, and built of brick, but many are still unoccupied. The palace of the rao or chief which stands on a slightly-elevated site, has no architectural beauty to attract notice. The sword blades

manufactured at Serohes are celebrated for their excellence now as formerly. On this point, Ali Mohammed Khan affirms "the swords of Sirahi are celebrated everywhere, and adds, 'there are no better reeds than such as are procured in this country so that they are carried to Hindoostan, Persia, and other countries for the manufacture of arrows.' Distance from Mhow N.W. 248 miles from Ojasa, N.W. 220, from Deemuch, W. 180, Agra, S.W. 360. Lat. 24° 59', long. 72° 56'.

**SEROHEE**—A town in the British district of Tirhoot, lieut. gov. of Bengal 59 miles N.W. of Purneah. Lat. 26° 25' long. 86° 57'.

**SERONCHA**—A town in Hyderabad or the Nizam's dominions, situate on the left bank of the Wain Gunga river, and 142 miles N.E. from Hyderabad. Lat. 18° 55' long. 79° 56'.

**SERONGE**—See SUMOR.

**SEROOR**—A town in the British district of Ahmednuggur, presidency of Bombay 30 miles S.W. by W. of Ahmednuggur. A road connecting the two towns was constructed in 1836 at a cost of 1,200 rupees per mile. Lat. 18° 50' long. 74° 25'.

**SEROWLEE** in the British district of Bareilly lieut. gov. of the N.W. Provinces, a town on the route from Bareilly to Moradabad 20 miles W.N.W. of the former. Lat. 28° 30', long. 79° 10'.

**SERRAW**, in the peninsula of Kattywar, province of Guzerat a town in the grant or subdivision of Rajkote situate 41 miles N.E. by N. from the town of Rajkote, and 94 miles S.W. from Ahmedabad. Lat. 22° 47', long. 71° 10'.

**SERRUVIAL**—A town in the British district of Madura, presidency of Madras, 38 miles E. of Madura. Lat. 9° 55' long. 78° 45'.

**SERRYAH**, in the peninsula of Kattywar province of Guzerat, a town with a fort, in the grant or division of Hallar on a stream called the River of Serryah. The town and fort are two miles and a half from the mouth of the river which not admitting large ships, they are compelled to anchor in a channel between two reefs about three miles off. Notwithstanding this unfavourable circumstance, it is a place of considerable traffic. Distance from Ahmedabad, S.W., 190 miles, Baroda, W., 220. Lat. 22° 18' long. 69° 47'.

**SERUMOGAY**—A town in the British district of Coimbatore, presidency of Madras, 28 miles N. by E. of Coimbatore. Lat. 11° 20', long. 77° 4'.

**SERWA**, in Bundelcund, a small town on the route from Banda to Sangor by the Hira-poor Pass, 110 miles S.W. of the former 62 N.E. of the latter. It has a bazar and water from wells, but supplies are rather scarce. Lat. 24° 25' long. 78° 20'.

**SESSARUH**—A town in the native state of Bhawalpoor 57 miles S.E. from Bhawalpoor, and 70 miles N.W. from Beekaneer. Lat. 25° 45', long. 73° 37'.

**SETAPOOR**, in the territory of Oude a British cantonment on the route from Bareilly to Lucknow 105 miles S.E. of the former 61 N.W. of the latter. Supplies and water are abundant. The road in this part of the route is good, the country open and but partially cultivated. Lat. 27° 35' long 80° 44'

**SETROONJEE**, a river rising in the peninsula of Kattywar province of Guzerat, in lat 21° 15' long 70° 45' and, flowing easterly for sixty miles, falls into the Gulf of Cambay in lat 21° 16' long 72° 5'

**SECNI** in the British district of Saugor and Nerbudda, lieut. gov. of the N.W. Provinces, a town on the route from Jubbulpoor to Nagpoor 82 miles S. by W. of the former. The district of which this town is the principal place is inhabited by Goonds, and appears to have been less skilfully managed than the other districts of the Saugor and Nerbudda territory. Measures have been suggested for its amelioration. Lat. 23° 1' long 79° 40'

**SEVERNDROOG**—See **SOOWUNDROOG**  
**SEVUR**—A town in the British district of Combaator presidency of Madras, 25 miles N.E. of Combaator. Lat. 11° 15', long 77° 18'

**SEWAGANJ** in the parghies of Myhr territory of Saugor and Nerbudda, a village on the route from Mirzapoor to Jubbulpoor 171 miles S.W. of former 74 N.E. of latter. It has water from wells and tanks, but supplies must be collected from the surrounding country. Lat. 24° 2' long 80° 32'

**SEWALIK MOUNTAINS**—A low but extensive range bounding on the north-east the plain of Sirhind and that of the doab between the Jumna and the Ganges. The name Sewalik is applied to that series of summits or ridges which extend in a north-west direction from the right bank of the Ganges. Hills, however of similar character to the Sewalik range on the left bank are continuous with the mountains of Kumaon and diverging from them a little farther south-east, inclose the Patlee Doon. Trail describes this part, south-west of Patlee Doon "as a low range of hills, which contains numerous passes, some of them practicable for wheel carriages." Royle indeed, states that this low range of recent formation may be traced from Roopoor on the Sutlej in lat. 30° 53' long 70° 38' to the bottom of the Sikhim hills, in lat. 26° 34' long 88° 30' a distance of about 800 miles. It decreases in elevation to the east of the Ganges, and as already observed, the name Sewalik is applied to that portion which at its south-eastern extremity near Hurdwar in lat. 29° 55', long 78° 14' forms the right side of the gorge through which the Ganges flows into the plain of Hindoostan. Its length from Hurdwar to Roopoor in a direction from south-east to north-west, is about 155 miles in breadth where widest about ten. In the northern part, towards the

Sutlej the range is little more than a succession of sandhills. According to Jacquemont, "the Pinjor valley is separated from the plains by a sort of downs, from sixty metres to eighty in height, and composed of sand scarcely consolidated." The highest part is about lat. 30° 17', long 77° 50' between the Timb and Lal Derwase passes, and in that vicinity some of the peaks have an elevation of about 3,500 feet above the sea. The Sewalik hills have a direction parallel to the great chain of the Himalayas, with nearly a similar dip, the slope being towards the north, and the abutment to the south. In this part they rise at once in an abrupt mural front from the plain extending to the south-west, but slope gradually on the north-east side towards the Dhona, or valley lying between them and the base of the Himalayas, the strata of which they are composed dipping in that direction at an angle of from 20° to 33°. As they run in a direction from south-east to north-west, the numerous gorges by which they are crossed have a direction generally from south-west to north-east. Those gorges cut the ranges into a succession of parallel ridges, the ends of which are steep towards the plain and sloping towards the Doons. They are thus described by Dr Royle—"In many places each hill if separated might be represented by a right-angled triangle the base resting on the pass the perpendicular facing towards the south-west and the hypotenuse sloping towards the north-east, and corresponding in dip with the strata. This side is sometimes continued to the level of the pass at others another hill, with its perpendicular side, seems to arise from the middle of the last, and in itself in like manner succeeded by a third forming a succession of abrupt and sloping sides like the teeth of a saw." In the phraseology of geologists they are of tertiary or alluvial formation consisting of subordinate beds of clay loam-grained sandstone, with much mica interposing conglomerate cemented by calcareous matter beds of gravel and rolled stones, consisting of various kinds of rock granite trap limestone, claystone, gneiss, micaceous schists, and all other formations which enter into the composition of the Himalayas, thus offering an explanation plausible at least of the origin of the range in the supposition that it was originally the debris swept down from the Himalayas, and subsequently upheaved by an earthquake of great extent and force. Parallel in some degree to the Sewalik Mountains, and inclosed between them and the Himalayas, is a succession of valleys—north-west the Pinjor Doon south-east that of the Khynda Doon and south-east of this last the Dehra Doon. The line of direction of the range is crossed by the Ganges, the Jumna, the Markunda, an offset of the Soomutry the Gagar, and some other streams of less importance but in general the drainage of the Doons is parallel to the direction of the range, and either to the north-west or south-east. Thus

# SEW—SEA

the Fnyor Doon is drained by the Surma, flowing north west, the Kyarda Doon by the Patta or Bhuta, flowing south east, the Dehra Doon by the Asun flowing north west the Saswa flowing south east. The geology of the Sewalik is characterized by the occurrence of enormous quantities of fossil remains of animals, especially mammals. Of those the most remarkable is the Sivatherium, an extinct ruminant of gigantic dimensions, exceeding those of the rhinoceros. It was horned and provided like the tapir with a short trunk. Here also have been discovered fossil remains of the family of quadrumana, the existence of which in a fossilized state had previously been generally denied. The Sewalik is in many places covered with forests of saul fir, cotton tree and various other kinds. Jascement represents it as presenting a very varied field of research to the botanist, but of uninteresting appearance, being little more than an extensive copse, dense with underwood and herbage of large growth above which timber trees grow at considerable intervals.

**SEWAR.**—A town in the British district of Barun, bent. gov of Bengal 41 miles S. by W of Bettiah. Lat 26 11, long 84 25

**SEWABRA.**—A town in the Rajpoot state of Jodhpoor 147 miles S.W. by S. from Jodhpoor and 42 miles N. from Deesa. Lat. 24 50', long 72

**SEWEHUT,** in the British district of Allahabad Bent gov of the N.W. Provinces, a small town on the route from Allahabad cantonment to that of Futtehgurh in Oude eight miles N. of the former 23 S. of the latter. Lat 25 36 long 81 55

**SEWNA.**—A town in the British district of Poonah presidency of Bombay 24 miles N.W. by W of Poonah. Lat 18 42 long 73 35

**SEWNEE** in Hyderabad, or territory of the Nizam, a town near the north-east frontier towards Nagpore situate on a small river tributary to the Pengunga. Distance from the city of Hyderabad, N 200 miles from the city of Nagpore, S.W 80 Lat. 20 15 long 75° 28

**SEWUNGAON.**—A town in one of the sequestered districts of Hyderabad 36 miles E.S.E. from Ellichpore and 20 miles N.E. from Omraouttee. Lat. 20 58, long 78 3

**SEWUNWARRAH.**—A town in the territory of Nagpore 111 miles E.S.E. from Nagpore, and 145 miles S. from Bamgurb. Lat. 20 45, long 80 50'

**SEYHUJ.**—A river of Malwa, rising in lat. 24 27, long 78 25 and, flowing through Scindia's territory for about forty miles, falls into the Betwa, on the right bank, in lat 25 long 78 28'

**SEYLOO.**—A town in the territory of Nagpore 34 miles S.W. from Nagpore and 81 miles E.S.E. from Ellichpore. Lat. 20 50', long 78 48'

**SEYMREE** in the British district of Muttra, bent. gov of the N.W. Provinces, a village on the route from Muttra cantonment to Delhi, and 18 miles N.W. of the former. Lat. 27° 40', long 77 38'

**SEYNGUR,** called also Kuroon, a small river of the Doab rises in the British district of Allygurh, lat. 27 50' long 78 12. As its source is on the south western side of the great or slightly elevated tract which stretches down the middle of the Doab, its course, though very tortuous, generally in a south easterly direction, tends towards the river Jumna, into which it falls, on the left side, about fifteen miles below Calpee. About sixty miles from its source, it is crossed by the route from Etawah to Futtehgurh, and is there fordable. It is also fordable where it is crossed, about thirty miles lower down by the route from Etawah to Cawnpore and also fifteen miles still farther down, where it is crossed by the route from Calpee to Futtehgurh in lat 26 28' long 78 34 and is also fordable where crossed, thirty-six miles lower down by the route from Calpee to Cawnpore. Its total length of course is about 210 miles.

**SEYRAH,** in Guzerat, or the territory of the Guccowai, a town on a small river tributary to the Muhi or Mbi. Distance from the city of Ahmedabad, E., 56 miles. Lat. 23 58' long 73 37'

**SHABAZPORE RIVER.**—One of the mouths of the Megna, flowing east of the island of Deccan Shabazpore into the sea, in lat. 22 27' long 91 8'

**SHADAUTPOOR,** in Sindh a town on the route from Larkhana to Gundava, and 26 miles N.W. of the former place. It is situate in a barren tract, nearly destitute of population and described by Kennedy as 'more like the bed of a salt lagoon in an interval of spring tides, than an inland district. To the north west stretches the dreary tract called the Paz or desert of Shikarpore noticed by the same writer as a boundless level plain of indurated clay of a dull earthen colour and showing signs of being sometimes under water. At first a few bushes were apparent here and there, growing gradually more and more distant, until at last not a sign of vegetable life was to be recognised.' Lat. 27 46', long 67 55

**SHADREABAD** in the British district of Ghazepore, a town situate on the Busu, a small river tributary to the Ganges, distant 12 miles N.W. from Ghazepore cantonment, 32 N.E. from Benares. Lat 25 40', long 83 22'

**SHADIPOOR.**—A town within the domains of Gholab Singh, the ruler of Cashmere, nine miles N.W. from Srinagar and 11" miles N.E. from Jhelum. Lat. 34° 7' long 74 53

**SHADOWRA.**—A town in the native state of Gwalior, or territory of Scindia, 117 miles S.S.W. from Gwalior and 22 miles N.W. by N. from Sangur. Lat. 24 37 long 77 40

**SHAGURH.**—A town of Sindh, in the ter

territory belonging to Ali Moorad, 36 miles S E by E from Bakkur and 53 miles W by N from Jessulmer Lat. 27, long 70° 6'

**SHAHABAD**, in Cashmere, a town formerly a favourite residence of the Mogul emperors, but now ruinous and neglected. It is situate in a long narrow valley bounded on the south-west by the Panyal of Banihal and on the north-east by a ridge of green hills several miles in length, dividing it from the valley of Bureng or Breng. The valley in some places has a width not exceeding 1 000 yards. It is watered by a stream flowing from the celebrated spring of Vernag and which lower down, where increased by several small feeders, is called the river Sandaran. Accounts received by Vigne represented the valley to be very rich in mines of iron and copper.

The neighbourhood of Shahabad is celebrated for its fruits especially apples, and for its wheat, considered the finest in Cashmere. The town, when visited by Mouton, had a bazar and a few shops, at which provisions, coarse cloth and very fine honey were sold. It was formerly the residence of the most powerful of the seven hereditary maleks, or wardens appointed by the emperor Akbar to watch over the passes of Cashmere. The malek of Shahabad had charge of the pass of Banihal and enjoyed a considerable income from lands held in jaghire. Shahabad has an elevation of 5 600 feet above the sea. Lat. 33 32, long 75 16.

**SHAHABAD**, in the Rappoot territory of Jhalawar, a town on the route from Calpee to the town of Kotah 226 miles S W of former 96 E of latter. It has a good bazar and water and supplies are abundant. Lat. 25 13 long 77 12.

**SHAHABAD** in Sirhind, a town on the left bank of the Sutroodi, here nearly devoid of water in winter but sometimes in summer a deep and violent torrent. It is described by Jacquemont as a heap of filth and ruins. The population is returned at 10 852. There is a bazar and supplies are abundant, as the neighbouring country is fertile and well cultivated. Distance N W from Calcutta 1,002 miles. Lat. 30 10 long 76° 56'.

**SHAHABAD**—A town in the jaghire of Rampoor, head gov. of the N W Provinces. Lat. 28 24, long 79 4.

**SHAHABAD** in the territory of Oude a town on the route from Lucknow to Shahjahanpur 15 miles S. of the latter and 30 miles N E of Fatehgarh. Tiefenthaler describes it, about A.D. 1770 of considerable circuit and nearly in the middle is a palace of brick strengthened with towers like a fortress, with a vestibule and spacious covered colonnade. Most of the houses are of brick, and there is a fine mosque built of the same material, and inclosed by a wall. The town extends a mile from north to south its breadth is something less but of its flourishing state little remains. When visited by Tennant, A.D. 1799 it was an

expanse of ruins, 'that appeared in the form of hills and broken walls crumbling to dust;' yet Heber found it, 1824 a considerable town or almost city with the remains of fortifications and many large houses. According to Tiefenthaler it was founded by Angror, the nephew of Rama, king of Oude and it so, must be of high antiquity, as Rama is considered to have reigned 1 800 years A.D. hence it is sometimes called Angotpur. It was renovated by Dilawar Khan an Afghan chief contemporary with Aurangzebe. At present it has a bazar and encamping-ground close to which are two tanks lined with brick. The road to the north or towards Shahjahanpur, is good, to the south-east, or towards Lucknow, very bad. Lat. 27 39, long 80° 1'.

**SHAHABAD** in the head-gov. of Bengal, a British district, bounded on the north by the British districts of Ghazeeপুর and Baran on the south-east by the British districts of Patna and Behar on the south by the British district of Behar on the west by the British district of Mirzapore and on the north-west by the British districts of Benares and Ghazeeপুর. It lies between lat. 24 30'—25 40' long 83 20'—84 56' is 106 miles in length from north-east to south-west, and fifty-six in breadth the area is stated at 4 405 square miles. About a third of the entire district, situate in its south-western part, is rough and elevated forming a sort of highland rising on the surface into small detached hills nearly equal in height. The average elevation of this irregular plateau is probably about 500 feet above the more depressed country on the banks of the Ganges or the Son, or about 700 feet above the level of the sea.

The climate is very sultry in the latter part of spring and the early part of summer and the succeeding rains are usually heavy. The winters are generally mild yet frosts are not unknown. West winds prevail for half the year from the middle of October to that of April. There are some peculiarities in parts of the district as to winds, the notice of which would require too much minuteness.

The Carumnassa rises a few miles from the southern frontier of the district, of which it forms the western boundary for ten miles, and subsequently the north-western for sixty miles, dividing it from the districts Mirzapoor, Benares, and Ghazeeপুর. It does not appear to be navigable. The Ganges forms the north-western and northern boundaries for eighty-eight miles, dividing the district from those of Ghazeeপুর and Baran. It is navigable for craft of considerable burthen, and in the lower part of its course in this district is generally a mile wide. The Son flowing eastward from the district of Mirzapoor touches on this district at its south-western extremity and taking a direction north-easterly forms for 110 miles its southern and south-eastern boundary dividing it from the district of Behar, and for twenty-five miles more its eastern boundary

## SHA

dividing it from the district of Patna. In the rainy season, it is too rapid for navigation above the mouth of its tributary the Kiyul, 108 miles from its confluence with the Ganges and in the dry season is too shallow in that part of its course for boats of any considerable burthen though floats are then conveyed downwards, being pushed over the shoals. Below the mouth of the Kiyul it is navigable for boats of ten or twelve tons burthen. Thus the total river navigation of the district is about 200 miles. Those principal rivers receive numerous small streams and torrents, flowing during the rainy season but dry in some parts at other times of the year. The low country forming the greater part of the district, is very level especially to the north and west, and parts are liable annually to be inundated. The portion of soil unfit for the plough is very trifling close to the hills it is excellent. The soil may be divided into two kinds, one consisting of fine sand mixed with loose mould the other of a tenacious clay intermixed with coarse sand the latter on the whole, is reckoned the most valuable, producing wheat, barley and all winter crops, without irrigation. In the northern portion of the district the soil is of the utmost richness and consists of land regularly flooded by the Ganges. It forms the most valuable part of the district, and the crops there never fail. The river deposits a fine mould, and scarcely ever covers a field with sand.

The lands best suited for irrigation are cropped with rice which is considered the staple crop where it can be successfully cultivated. It is both a rubber, or crop sown at the commencement of winter and reaped in spring, and kurruf or that sown in the beginning of summer and reaped in autumn. Besides these already mentioned crops of various kinds are produced for aliment or condiment as maize, millet, murraya (*Eleusine coracana*) gram (*Cicer aricturum*), lentils, various sorts of kidney beans or phaseol, till erysime mirtus or castor-oil weed, and some other oil-seeds, melons and other cucurbitaceous plants most of the European garden vegetables, which thrive well in the cool season ginger turmeric, and capsicum. Sugar is raised to considerable extent. Of commercial crops, an important one is cotton, though attempts to introduce the profitable culture of American cotton have not been successful. Of the rest, the chief are indigo, opium, tobacco and betel-leaf. There are several hundred square miles of jungle and forest, but the trees are stunted, and Buchanan states that in the whole district there are not ten fine trees of natural growth. Hence timber cannot be obtained of sufficient size for houses suited for accommodating Europeans and in the large buildings constructed by the natives, stone is exclusively used. The principal manufactures are cotton cloths, threads, tapes, strings, fabric of silk, and of mixed silk and cotton, paper, spirits, oil, the extraction of salt from brine drawn from wells, sugar and the extraction of sulphate of iron from

native mineral. The exports are principally silk, paper cotton, and cotton cloths, wheat, millet, rice, barley pulses, bamboos, paper, oil seeds opium, and some other articles of less importance the imports are tobacco, sugar iron copper, lead tin, zinc, salt, coconuts, and betel leaf. The population is given under the article BURGAL.

The principal towns Arrah Sasaram, Jehanabad, Buxar, and Bhogpoor are noticed under their respective names in the alphabetical arrangement. The route from Calcutta to Allahabad traverses this district in a direction from south-east to north west. The only other important route is from east to west, from Dinapore to Ghaseepoor.

The district of Shahabad formerly part of the great empire of Magadha appears to have been subjected to the sway of the Patan Muslims towards the close of the twelfth century as it is recorded that Shahabuddin Muhammad sultan of Ghor subdued the country as far as the confines of Chhna, and his lieutenant, Muhammad Bakhtyar consolidated the Mussulman power in Behar. Shahabad subsequently acquired some note in consequence of being the scene of the early military operations of Sher Shah who wrested the empire of India from Humayun the son of Babar. It afterwards became a part of the subah of Behar according to the division of the empire of Delhi and down in the Ayacu Akbery. The right of the East-India Company to the southern part of this district is derived from Shah Alum, emperor of Delhi to the northern part, from Asaf ud Dowlat vizier of Oude under a treaty dated 21st May 1775. This treaty was the consequence of a memorable engagement which took place at Buxar in the north eastern part of this district when a decisive victory was gained by the British forces, commanded by General Munro, over the combined armies of Cossam Ali and the Vizier.

**SHAH ALUM** in the Sindh Sagur Doab division of the Punjab a town situated on the left bank of the Indus river, 176 miles W by N of the town of Lahore Lat 32° 2' long 71° 17'

**SHAHAPPOOR**—A town in the British district of Poonaah presidency of Bombay 82 miles W N W of Poonaah Lat 18° 40' long 73° 28'

**SHAHBAZAR**, in the British district of Hoogly lent.-gov of Bengal, a town near the north west frontier towards the British district of Bardwan, four miles from the right or east bank of the Damooda. Distance from Bardwan S.E., 16 miles, Calcutta, N W, 38. Lat 22° 59' long 88° 4'

**SHAHBAZGARHI** in the district of the Peshawar division of the Punjab, a town situated 26 miles N W from the right bank of the Indus, 35 miles N E of the town of Peshawar Lat 34° 15', long 72° 12'

**SHAH BUNDER**, in Sindh, in the delta of the Indus, a small place on the east bank of the channel which discharges its water into the sea by the Mulla mouth. Hither the English factory was removed from Aurangabunder or Dehrajanka, in consequence of this latter place being deserted by the water of the Indus. Previously to the dissolution of the factory here in 1776 its establishment for navigating the Indus consisted of fourteen small vessels, each of about forty tons burthen. Subsequently this place also was deserted by the stream, and on the re-establishment of the factory in 1799 Laboreabunder thirty five miles north west, on the Buggar or western branch of the Indus, was selected as its site. **SHAH Bunder** is in lat 24 6 long 67 57.

**SHADERA**, in the British district of Agra, a village and halting place on the left bank of the Jumna, on the route from the city of Agra to Mynpooree and five miles N E of the former. Lat. 27 12, long 78 8.

**SHADERAH** in the British district of Meerut, lieutenant gov. of the N W Provinces, a town on the route from Delhi to Meerut, and six miles E of the former. It is situated near the left or eastern bank of the Doh Canal there crossed by a brick built bridge. Lat. 28 40, long 77 21.

**SHAEKE**, in the British district of Bareilly, lieutenant gov. of the N W Provinces, a small town on the route from the town of Bareilly to Almora, and 19 miles N of the former. It is situated near the right bank of the river Bhagel, here having a bed 220 yards wide, with steep banks and a sandy bottom, and in the dry season a stream sixty yards wide, and two and a half to three feet deep. There is a bazar with a market. Lat. 28 33 long 79 23.

**SHAHGARH**, in the British district of Bareilly, lieutenant gov. of the N W Provinces, a town on the route from the town of Pilibhoet to that of Nageenah, and 25 miles N W of the former. Lat. 28 47, long 79 34.

**SHAHGHER** — A town the principal place of a raj or petty native state in the province of Sagar and Nerbudda. The territory has an area of 676 square miles, and a population of 30 000. The chief maintains a military force consisting of 150 cavalry and 800 infantry. Lat of town 24 19' long 79 10'.

**SHAH GUNJ** — A town in the British district of Mirzapoor, lieutenant gov. N W P. 41 miles S.E. of Mirzapoor. Lat. 24 41, long 83° 1.

**SHAHGURH** in the British district of Bareilly, lieutenant gov. of the N W Provinces, a town on the route from Bareilly to Almora, 30 miles N of the former. Lat. 28 49, long 79 35.

**SHAHJEHANABAD** — A name given to the city of Delhi by Shahjehan, its founder. — See **DELHI**.

**SHAHJEHANPOOR**, in the territory of

Gwallior or possessions of the family of Seindia, a town of Malwa, on the route from Gwalior to Mow 114 miles S W of former 72 N E. of latter. Malcom, who designates it a large city mentions that a considerable degree of civilization, refinement, and domestic comfort has been introduced into this place from the European settlements in Guzerat, by the Borahs, an intelligent and wealthy class of Mussulman merchants. It is situated on the left bank of the river Tili, and just above the town is ground for encampment supplies are abundant. It received its name from its founder Shahjehan, emperor of Delhi, who reigned from the year 1628 to the year 1659. Distance S W from Agra 235 miles. Lat. 23 24 long 76 18.

**SHAHJEHANPOOR** in the British district of Meerut, lieutenant gov. of the N W Provinces, a town on the route from the town of Meerut to Moradabad, and 21 miles S.E. of the former. It has a bazar and a small mud-built fort, now fallen to decay. Lat. 28 52, long 78 1.

**SHAHJEHANPOOR**, in the British district of Cawnpore, lieutenant gov. of the N W Provinces, a town on the route from Calpee to Etawa, and 12 miles N of the former. There is a bazar and water is obtained from wells. Lat. 26° 16' long 79 49'.

**SHAHJEHANPORE** — A British district under the lieutenant gov. of the N W Provinces, deriving its name from its principal place. It is bounded on the north east, east, and south-east, by the territory of Oude, on the south by the district of Farrukhabad and on the west by the British districts Dudhna and Bareilly. It lies between lat. 27 15'—28 45, long 79 23'—80 30' and contains an area of 2 483 square miles. The shape is very irregular but partially resembles a crescent, the concavity being towards the west. The north eastern frontier is formed by the river Sarjo or Gogra, the south western for a short distance by the Ganges and the descent of both rivers towards the south-east proves the inclination of the surface in that direction towards which also flow the intervening rivers the Goomtee, Gurrak, Ramganga, and some others of less magnitude. The greatest elevation is at the most northern point Barindee twenty miles above that point, and situated on the right bank of the Gogra, having an elevation above the sea of 788 feet, and Elilheri, about ten miles lower down 741. The southern part of the district is considerably below this, being traversed by the Gurrak, the stream of which, at Pilibhoet, sixty miles higher up, has an elevation of only 517 feet. The elevation of the bed of the Ganges, where it washes the northern frontier in all probability falls short of 500 feet.

The most northern part, adjoining the base of the Sub-Himalaya, forms a strongly characterized portion of the Terai or tract of marshy forest and jungle stretching along the

## SHA.

foot of the mountains. Numerous small streams, issuing from the hills, or rising from beneath stagnate, in consequence of the inclination of the surface being too slight to allow the escape of their waters, and their own want of force to cut channels. These, saturating the deep and fertile soil give growth to gigantic trees, woven together by immense creepers enumbered above with air-plants, and below with impenetrable underwood. Grasses and other herbage, attaining a height of ten feet, overrun the more open parts, and are annually fired to allow the spring of a more succulent growth which is depastured by numerous herds of kine and buffaloes for about two months, after which they cease to be penetrable or suitable for grazing. Throughout the entire region broods a malaria, almost inevitably fatal to the human race and to domestic animals, but not incompatible with the constitution of the elephant, the rhinoceros, wild buffalo, stag, tiger, panther, leopard, and other wild creatures, which in the densest recesses of the forest and jungle attain extraordinary size and vigour. This tract gives rise to the Gomtee a large river which, pursuing a southerly course crosses the frontier into the territory of Oude. As there is a general slope to the south east this 'region of death' might obviously be made productive by drainage and cultivation but the first steps in the operation would be marked by a frightful sacrifice of human life. At present the tract is available only for pasturage during a very brief period as already mentioned, or to yield timber and other forest and jungle produce.

Bishop Heber states that including the wooded part of the Terra there is a large forest along the whole eastern southern and northern frontiers. He found the southern part of the district to have a fine climate little incommoded by the hot winds, with a well wooded, fertile and highly-cultivated soil producing in profusion rice, maize, wheat, cotton, sugar, tobacco, pulses, mangoes, dates, plantains, walnuts, strawberries, grapes, apples, and pears. The people, though in general skilful and industrious agriculturists, are much annoyed by a set of 'landless resolute,' the descendants of Rohilla chiefs, and at once too lazy to work, and too proud to enlist in the East-India Company's service. The land revenue of this district has been fixed for a term of years, which will expire in 1868. The latest official returns (1848) give to this district a population enumerated as follows—Hindoo, agricultural 436 166, non agricultural, 124 420, Mahomedan and other classes, agricultural 124 520, non-agricultural, 117 482 total, 812 588. The relative proportion of the two great divisions therefore is between three and four Hindoos to one of any other class. Of the whole population 812 588 the children numbered 279 392 leaving an adult population of 533 196 the children having been counted as such up to

twelve or thirteen years of age, if unmarried if married below that age, they were considered as adults. The number of houses was stated to be 160 481 which gives an average per house, on the total population, something above five persons.

The principal towns are Shahjehanpore, Powain, Tilber and Jalalabad, which will be found noticed in their proper places. The following is a classification of the towns and villages in the district—Number containing less than 1 000 inhabitants, 2 062, ditto more than 1 000 and less than 5,000 108, ditto more than 5 000 and less than 10,000, 3 ditto more than 50,000 1.

Shahjehanpore formed part of the possessions of the Rohilla Patans previously to 1774 when their dominion was overthrown by the signal defeat which they received at Teesnau from the British army supporting the cause of Shooja-ud Dowlah the nawab of Oude. The country about Shahjehanpore with a much more extensive portion of Rohilkund was then transferred to the nawab, and ultimately in 1801 ceded in commutation of subsidy to the East-India Company.

**SHAHJEHANPORE**—The principal place of the British district of the same name. It is situated on the left bank of the Gurnah which, near the town in dry weather may be forded, but in the rains can be crossed only by ferry. Bishop Heber describes this town as a large place, with some stately old mosques and a castle. These are mostly ruinous, but the houses are in good plight. The bazars show marks of activity and opulence. The population according to a recent census, amounts to 62,785. Shahjehanpore is in lat 27 52', long 79 58'.

**SHAHJUHAPPOOR**, in the British district of Goruckpoor, sent gov. of the N.W. Provinces, a town the principal place of the pergunnah of the same name, on the route from Goruckpoor to the Sarun collectorate 30 miles E of the former. Lat 26 40' long 83 53.

**SHAHJUHANPOOR**, in the British district of Goorgaon, sent gov. of the N.W. Provinces, a town the principal place of a pergunnah of the same name, situate 62 miles S.W. of Delhi. Lat. 28 long. 76 32'.

**SHAH JUMBAU**, in the Daman division of the Punjab, a town situated on the right bank of the Indus, 56 miles S.W. of the town of Mooltan. Lat. 29 37', long 70 49'.

**SHANLIMAR**—A splendid pleasure-ground, about three miles east of Lahore made by order of the Mogul emperor Shah Jehan. Here were numbers of pavilions and other buildings for ornament and pleasure but many of them were demolished or defaced by Runjeet Singh to obtain the marble materials for the embellishment of his residence in Lahore and the construction of his religious capital of Amritsar, and of the neighbouring

# SHA

fortress of Govindghar. Still there is much to cause admiration. Lat. 31° 35' long 74° 23'

**SHAH NUHUR CANAL** flows out of the Ferozshah Canal in lat. 29° 23' long 76° 54' and joins it again in lat. 28° 50', long 77° 4'

**SHAHPOOR**, in the British district of Allahabad, lieut. gov. of the N W Provinces, a town on the left bank of the Jumna, 40 miles W of the city of Allahabad. Lat. 26° 23', long 81° 15'

**SHAHPOOR** in the Bareilly division of the Punjab, a town situated on the left bank of the Ravee, 16 miles S. S. W. of the town of Lahore. Lat. 31° 24' long 74° 12'

**SHAHPOOR**, in the Punjab, a town situated on the left bank of the Jhelum. The district of which this town is the chief place has an area of 3,500 square miles and a population of 261,092. The town is in lat. 32° 20', long 73° 10'

**SHAHPOOR**—A town within the dominions of Ghulab Singh the ruler of Cashmere, eight miles E. of the left bank of the Jhelum river and 93 miles S. W. from Srinagar. Lat. 33° 5' long 73° 53'

**SHAHPOOR** in Sirhind, a village on the route from Subarnapur to Subathoo and 31 miles N. W. of the former place. Here was a secondary station in the trigonometrical survey of the Himalaya. Elevation above the sea 1,228 feet. Lat. 30° 17' long 77° 23'

**SHAHPOOR or PADSHAHPUR** in the British collectorate of Belgaum, presidency of Bombay, a town situated on the river Guitpurba, 50 miles N. W. of the town of Dharwar. The population is estimated at between 6,000 and 7,000. Lat. 16° 8' long 74° 45'

**SHAHPOOR**—A town in the native principality of Rajkote in the peninsula of Kattywar, province of Guzerat, 84 miles N. E. by E. from Rajkote, and 43 miles W. W. from Ahmedabad. Lat. 22° 51' long 71° 59'

**SHAHPOOR**, in the British district of Goruckpoor, lieut. gov. of the N W Provinces, a town on the route from Goruckpoor to Ammargh, 25 miles S. by W. of the former. Lat. 26° 21' long 83° 17'

**SHAHPOOR**, in the British district of Ramgarh, lieut. gov. of the N W Provinces, a town on the route from Ramgarh to Rewah, 18 miles N. by E. of the former. Lat. 23° 3', long 81° 3'

**SHAHPOORA**, in the Rajpoot state of Jeypore, a town on the route from Delhi to Mhow, 125 miles S. W. of former, 352 N. E. of latter. It is of considerable size, and is surrounded by a rampart. Lat. 27° 25' long 75° 12'

**SHAHPOORAH**, in the British district of Ramgarh, lieut. gov. of the N W Provinces, a town on the route from Ramgarh to Bijnawar, 32 miles N. W. of the former. Lat. 23° 11', long 80° 45'

**SHAHPOOR KURRA** in the British district of Goruckpoor, lieut. gov. of the N W Provinces, a town on the route from Goruckpoor to Ammargh, 12 miles S. of the former. Lat. 26° 31' long 83° 23'

**SHAHBUH**—A town in the native state of Gwalior or territory of Sandia, 160 miles S. E. by S. from Gogain, and 82 miles N. W. by W. from Ellschoor. Lat. 21° 51' long 78° 31'

**SHAHZADAHNUGAR**, in the British district of Budaon, lieut. gov. of the N W Provinces, a town on the route from Agra to Bareilly and 34 miles S. W. of the latter. There is abundance of water from the river Yarwuffadar or Soh, and from wells. Lat. 28° 7' long 79° 7'

**SHAHZADPOOR**, in the British district of Cawnpore, lieut. gov. of the N W Provinces, a village on the route from the cantonment of Etawa to that of Cawnpore and 26 miles W. of the latter. Lat. 26° 22' long 80° 2'

**SHAILGAON**—A town in Hyderabad, or territory of the Nizam, 124 miles N. W. from Hyderabad and 122 miles E. from Ahmednagar. Lat. 19° 4' long 76° 58'

**SHAIRMADAVY**—A town in the British district of Tinnevely, presidency of Madras, 10 miles W. S. W. of Tinnevely. Lat. 8° 40' long 77° 36'

**SHAKAPORE**, in Sindh, a town on the great route from Cutch to Hyderabad. About a mile north east of the town are the ruins of a large city, built of excellent burnt brick and still in such a state of preservation that the walls and bastions are plainly discernible. To the north east of these ruins is the large bed of a great branch of the Indus, now completely devoid of water. Lat. 24° 34' long 68° 24'

**SHALKUR**, in Buzasir, a fort near the northern boundary of Koonawar, where the valley of the Spiti river has a less inclination of slope. It is situated on the right bank of the Lee, or river of Spiti; the site being the summit of a diluvial deposit and elevated 400 feet above the stream which here, 92 feet wide is crossed by a wattle or rude wooden bridge made of trunks of the fir tree. Inside are houses all round the walls, with a small space in the middle. The population consists of Tartar families and a few monks and nuns of the Lamaic mode of belief residing in their respective communities. Elevation above the sea 10,413 feet. Lat. 32°, long 78° 34'

**SHALLEE** in the hill state of Bhuggee, a lofty peak about four miles south of the left bank of the Sutlej is very difficult of access on account of its steepness. On the summit is a wooden temple, in which human sacrifices were formerly offered to the Hindoo goddess Kalas, and some maintain that the horrible rite is secretly continued notwithstanding its prohibition by the British government. Elevation above the sea 9,623 feet. Lat. 31° 11', long 77° 20'

# SHA

**SHALWI** in the hill state of Jubbah a river having its sources on the south eastern declivity of the great range stretching from the peak of Ohar to that of Warton, and in about lat 31 3, long 77 86 Holding its way in a south easterly direction through an elevated and densely wooded valley and being swollen with numerous feeders right and left, it after a course of about twenty five miles falls into the Tonne river in lat 30 48 long 77° 49 In the upper part of its course where it is called the Koti Nala, it is described by Fraser as a fine copious stream

**SHAMGHUR**, in Srinil a village on the route from Kurnul to Loodiana, and five miles N W of the former town It is situate on the edge of a jungle which stretches the whole distance to Kurnul. Though the greater part of the population are Mussulmans or Hindoos of the Jat denomination the village with the surrounding country belongs to a chief of the protected Sikhs, to whom it yields an annual revenue estimated at 5500 sterling Shamghur is distant N W from Calcutta 970 miles Lat 29 45 long 76 57

**SHAMGULH** in the British district of Marwar, lieutenant gov of the N W Provinces, a town on the route from Jussagarbad to Jallor 24 miles S W by W of the former Lat. 26 8 long 74 82

**SHAMLEE** in the British district of Musaffurnugur, lieutenant gov of the N W Provinces a town on the route from Musaffurnugur to Jheend 22 miles W of the former Shamlee has a population of 11 816 inhabitants Lat 29 26 long 77 28

**SHANDAMANGATUM**—A town in the British district of Salem, presidency of Madras, 24 miles S. by E of Salem Lat 11 19 long 78 18

**SHAPOOREE**—An island off the coast of Arracan, fronting the entrance of the Naaf river The centre of the island is in lat. 20 46', long 92° 24 This island in 1623 was in the occupation of the British, when the Burmese, who then possessed Arracan, demanded its surrender The requisition was followed up by the despatch of troops under the rajah of Ramree, who attacked and captured the island on the 24th September Thus, with other encroachments on the part of the Burmese, led to the first British war with that nation, in 1824

**SHAPORAH**—A town in the Raypoot state of Oodeypoor 104 miles N E from Oodeypoor and 62 miles S S E from Ajmeer Lat. 25 37', long 75

**SHARA**—A town within the dominions of Gholab Singh the ruler of Cashmere situate on the right bank of the Senghe Khabab or Indus river and 192 miles N E by E from Jammu, Lat. 33 50', long 77 57

**SHARGODA**—A town in the British district of Ganjam, presidency of Madras, 32

miles W N W of Ganjam Lat 19 32, long 84 40

**SHATUL PASS**, in Buzmahur on the route from Choosar to Koonawar over the most southern ridge of the Himalaya, here running in a direction from east-south-east to west-north west It is excessively dangerous not only on account of the deep snow from which it is never free, but also the furious cold winds which so refrigerate the surface of the body and the lungs as to cause the death of many who attempt the passage The formations at the summit are chiefly mica-slate gneiss, and granite Gerard, who encamped on the crest of the ridge found the thermometer there at sunrise on June 9th, eight degrees below the freezing point The snow was covered with a species of musquito apparently dead but restored to life and activity when exposed to the rays of the sun The elevation of the pass is 16 655 feet above the sea Lat 31 23 long 78 8

**SHAWCOTTA**—A town in the British district of Madras, presidency of Madras, 44 miles E N E. of Madras Lat 10 7 long 78 47

**SHAWPOOR**—A town in the British district of Tannah presidency of Bombay 46 miles N E. of Bombay Lat 19 27 long 73 21

**SHAWPOOR**—A town in Hyderabad or territory of the Nizam 119 miles S W by W from Hyderabad and 93 miles S E. from Shalapor Lat. 16 40' long 76 56

**SHAYAK**—A town within the dominions of Gholab Singh the ruler of Cashmere 187 miles E by N from Sonmugur and 186 miles N E. by N from Kangra Lat. 34 13 long 78 17

**SHAYLODE**—A town in the British district of Malabar presidency of Madras 50 miles E S E of Cannanore Lat 11 84 long 76 6

**SHAZADAPPOOR**, in the British district of Allahabad, lieutenant gov of the N W Provinces, a town on the route from the city of Allahabad to that of Futehpore, and 35 miles N W of the former It is half a mile from the right bank of the Ganges and is described by Tiefenthaler a century ago as consisting of one long street, and having at its north western extremity a serai or public lodging house for travellers, strongly and well built, resembling a quadrangular fort, with a tower at each corner Lat. 25 40' long 81 28

**SHAZADPORE** in the territory of Oude, a town on the route from the cantonment of Goruckpore to that of Sultanpore 73 miles S W of the former 37 N E. of the latter It is situate on the river Tons (North-eastern), here crossed by a brick built bridge 400 yards long Lat. 26 24 long 82° 28

**SHAZADPORE**—A town in the British district of Pubna, lieutenant-gov of Bengal, 28

# SHE

miles N E. by E. of Puba. Lat. 24 12', long 89° 38'

**SHEALBA** in Gurhwal, a village on the right bank of the Juma, is situated near the confluence of the Buddear a feeder of that river Lat. 30 50 long 78 20'

**SHEALLY**—A town in the British district of Tanjore, presidency of Madras, 61 miles N E of Tanjore. Lat. 11 15 long 79 45

**SHEANKRA**—A town of Malwa, in the native state of Tonk 11 miles S S W from Tonk, and 81 miles E S E from Ajmeer Lat. 26 long 75 54

**SHEBEE** in Bussahir a village of the district of Koonawar is situated in the valley of Baskulung near the left bank of the river Darbung Close to the village is a copper mine, but it has not been worked for some years. The village is inhabited by a few monks and nuns of the Lamaic religion. Elevation above the sea 9 800 feet. Lat. 31 47' long 78 29

**SHEEDIAL**, one of the southern Mahratta jaghires, the centre of which is in lat 16 30' long 74 47' Its chief derives from it a revenue of 12,300 and maintains a force consisting of sixty eight cavalry and 212 infantry He was formerly bound to furnish a contingent of cavalry for the service of the British government, but has now commuted the obligation for a money payment His jurisdiction is not put at issue has been rejected

**SHEEKUR** in the Rajpootana of Jessulmere a village on the route from the town of Beekaneer to that of Jessulmere and 17 miles N E of the latter place It is situated in a wooded undulating country and contains fifty houses, supplied with water from a well 220 feet deep The road in this part of the route is alternately stony and sandy Lat. 27 6' long 72 10'

**SHEET GANWA**—A town in the Rajpoot state of Jodhpore 58 miles N E. by N from Jodhpore and 10 miles W N W from Ajmeer Lat. 26 56 long 73 42'

**SHEEMOGA** or **SIMOGA** in the territory of Mysore a town on the left or north west bank of the river Tungri here broad and navigable downwards during the rainy season In 1793 it was besieged by the Mahrattas, aided by an auxiliary force of the British army commanded by Captain Little As a Mysorean force, commanded by Muhammed Reza, a relative of Nijmoo Sultan was posted in the vicinity ready to attack the besiegers as soon as engaged by active operations, Captain Little advanced against them at the head of 750 sepoy, and completely defeated them though very strongly posted and greatly superior in force which was estimated at 10 000 foot, 1 000 horse ten guns and thirteen elephants The Mysorean army was quite dispersed, having lost a great number of men and all their guns ammunition baggage and quantity of small arms, and in a few days the

town and fort surrendered. At this period the east side of the fort was during the rains washed by the Tungri, and the other three sides had an indifferent ditch twenty feet wide and twelve deep the other defences being likewise injudiciously constructed The town was then estimated to contain 6 000 houses, and according to the usually received ratio of inmates to houses, above 30 000 inhabitants. The town was destroyed by the Mahrattas At the time of Buchanan's visit, the town was estimated to contain 500 houses and was said to be screwing fast. Distant from Bangalore, N W 150 miles from Seringapatam N W, 180 Mangalore, N E. 90 Madras W 325 Lat. 13 56 long 75 37

**SHEERKULI** in the British district of Muthra head of the N W Provinces a town on the route from Muthra to Delhi 30 miles N by W of the former Lat. 27 46', long 74 40'

**SHEETWAT**—A town in the British province of Bhatina presidency of Bombay 32 miles N of Bhatina Lat. 18 3 long 74 1

**SHEFENKUR** in the British district Bareilly head of the N W Provinces a small town on the route from the town of Bareilly to Almorah and 34 miles N of the former It is situated on an insupportable and has been seen in this level country and rendered more conspicuous by a ruinous fort on its summit It is well supplied with water and has a bazar and market the country pen and well cultivated Lat. 23 43, long 73 23

**SHEFVAROY HILLY**—See SHELW

**SHEHARI DILLON** in the Bham division of the Punjab a town situated 15 miles W from the right bank of the Indus 130 miles S S W of the town of Lashawar Lat. 32 18' long 70 56

**SHEKAPPOORA** in the British district of Munghyr head of Bengal a town situated at the foot of a hill on the route from the city of Munghyr to that of Bohar 40 miles S W of former 20 E of latter Here is a thana or station for a police division of the same name It is a filthy ugly place inhabited by a very bad set of natives, who commit crimes and wickedness of every kind Lat. 25 10 long 85 07

**SHEKAWUTTEE** in Rajpootana, a state, or rather collection of small states, dependent upon Jeypore. It is bounded in the north west by Jekamer on the north east by Joharoor and Jhujhur on the south east by Jeypore and Laiton and on the south west by Jeypore It lies between lat. 27 20'—29 3' long. 74 52'—76 11' It is ninety five miles in length from north to south west, and sixty three in breadth in the direction of the opposite angles the area is 8 595 square miles It is an arid barren tract occupied with little except either of sandy

...of rocky hills and mountains. The latter, in the south and south-eastern parts of the territory, being a continuation of the hills extending a short distance south west of them. They are in some parts rock-strewn, especially in the vicinity of Singhan, where copper-mines have been worked from time immemorial. The sands are not totally unproductive, being sprinkled with tufts of babul (*Acacia vera*) kurl (*Capparis sphylla*) and phok. The Katurae, which is almost the only river, crosses the south frontier from the territory of Jeypore, traverses Shekawattie from south to north, flowing into the territory of Bikaner and is there lost in the sands. The most productive parts of the territory are the valleys among the rocky hills in the south eastern part. There the soil is rather fertile, and the wells being of no great depth, the rubber, or crop reaped in spring, is abundant. It consists of wheat, barley, and some other grain pulse, red pepper and bharg or hemp, yielding an intoxicating resin. The sandy part of the country produces so little vegetation suitable for human sustenance, that great numbers of the people are obliged to subsist occasionally on the seeds of blurt, a species of strong bar.

The population though of Rajpoot descent, appear to follow a mongrel religion and to have grafted some Mahomedan points of belief, or at least of observance on their original Brahminism. Hog's flesh is considered unclean food, and on the birth of every male child the Musulman profession of faith is repeated but on the same occasion a goat is sacrificed and the infant sprinkled with the blood. This hybrid and semi-barbarous population have been inveterate freebooters, and the avocation seems to have thriven with them, as though their country is little productive. It contains several towns. The most important of these are Sikur, Khundhalla, Futtehpoor, Lunkarwah, Khedi, Goodah, Jamkhana, and Singana. The revenue of Shekawattie according to Tod, was 23 00 000 rupees.

Before the firm and regulating influence of British authority was recognised here, there appears to have been little or nothing deserving the name of government. The territory was partitioned among many thakors or petty chiefs, the highest influence being exerted by five, who claimed to be descended from Shekji, a son of the Rajpoot family reigning at Amber. Shekji, about the beginning of the fifteenth century succeeded in wresting the greater part of Shekawattie from the ruler of Amber, to whom it had previously belonged, but in the early part of the eighteenth it was recovered by the celebrated Jay Singh founder of the city of Jeypore. Subsequently the disturbed state of the country required the intervention of the British government, and after some movements of less importance, an adequate force was in 1834, sent into the country the most important forts and posts taken, and efficient means adopted for enforcing order. Towards the

close of the year the British force having effected its object, was withdrawn, but the freebooters again proving occasionally troublesome, further measures became necessary, and with a view to the preservation of order as well as of providing honest employment for part of the predatory population, a body of irregular cavalry was raised, and for some time maintained at the expense of the chiefs. This body known as the Shekawattie brigade, is now a British force and the native chiefs have been for some years relieved from any charge on account of it. Its cavalry and artillery branches have been disbanded.

**SHEKHASIR**, in the Rajpoot state of Jeemmeer, a decayed village on the route from the town of Beekaneer to that of Jeemmeer, and 96 miles N.E. of the latter. It is important merely on account of a good supply of water from a tank. The road in this part of the route is good, through an open country. Lat. 27° 12' long. 72° 14'

**SHEKHPOOR**, in the British district of Cawnpore. Hout-gov of the N.W. Provinces, a village on the route from Calpee to Etawa, and nine miles N. of the former. Lat. 26° 18', long. 79° 48'

**SHEKOABAD** in the British district of Mynpooria, a town on the route from Agra to Etawa, and 32 miles N.W. of the latter. It has a good bazar and is supplied with water from wells. Lat. 27° 6' long. 78° 39'

**SHEKUL**.—A town in the British district of Madras, presidency of Madras, 60 miles S.E. of Madras. Lat. 9° 15', long. 78° 45'

**SHEMAR**, in the British district of Kumaon. Hout-gov of the N.W. Provinces, a village on the route up the course of the Ramganga (Eastern) from Potoragurh to the Unta Dhura Pass, 14 miles N. of Potoragurh half a mile E. of the left bank of the Ramganga. Lat. 29° 47' long. 80° 12'

**SHEM DEO** in the British district of Kumaon. Hout-gov of the N.W. Provinces, a Hindoo temple on a summit of the Sub-Himalaya, or mountain system south of the main range, east of Almora cantonment 11 miles. Elevation above the sea, 6,760 feet. Lat. 29° 37' long. 79° 52'

**SHEENCOTTA**.—A town in the British district of Tinnevely presidency of Madras, 49 miles N.E. by N. of Tinnevely. Lat. 9° 17', long. 78° 10'

**SHEO** in the Rajpoot state of Jodhpoor, a town on the route from Jeemmeer to Bikaner, and 36 miles N. of the latter. It is the capital of an extensive but barren district, subdivided among numerous thakors or feudatories, who pay little deference to the rajah of Jodhpoor's governor stationed here with four guns and a small detachment of soldiers. There are 200 houses, and a thakur or police-office. Water is obtained from a fine tank on the north west side of the town, and from seven wells forty feet deep. Lat. 28° 12' long. 71° 14'

# SHE.

**SHEOGANGUNJE**, in the British district of Jounpoor, lieut. gov. of the N W Provinces, a town on the route from the cantonment of Jounpoor to Futehgarh, 26 miles W of the former, 22 E. of the latter. It has a bazar and is well provided with water. Lat. 25 46', long 82 14

**SHEOPOOR**, in the British district of Benares, a town on the route from Benares to Jounpoor three miles N W of the former 34 S.E. of the latter five N W of the left bank of the Ganges. Lat. 25 21, long 83 1

**SHEOPOOR**, in the territory of Gwalior or possessions of Scindia's family a town near the western boundary, towards the Jeypore territory. It is the principal place of a pergunnah the annual revenue of which is estimated at 3,25,000 rupees. It was formerly the capital of a small Rajpoot principality but in the early part of the present century was subjugated by the forces of Doulut Rao Scindia. In 1816 when garrisoned by Scindia's general Baptiste with 200 men it was surprised and taken by escalade by the celebrated Rajpoot chief Jey Singh who had only sixty men. The captor seized a large amount of treasure and made the family of Baptiste prisoners. Lat. 25 33, long 76 48

**SHEOPOOR DEAR**, in the British district of Ghazepoor lieut. gov. of the N W Provinces, a town two miles from the northern bank of the Ganges, and five miles S E from Bullish. Sheopoor contains a population of 6,382. Lat. 25 40', long 84 18

**SHEOPORE**, in the British district of Benares lieut. gov. of the N W Provinces, a town on the route from Benares to Jounpoor three miles N W of the former. Lat. 25° 21' long 83° 1'

**SHEORAJPOOR**, a small town, with a bazar on the route from Cawnpore to Futehgarh, and 21 miles N W of the former. Lat. 26 41' long 80 12'

**SHERADONE**.—A town in one of the sequestered districts of Hyderabad, 172 miles W N W from Hyderabad, and 60 miles N from Sholapoor. Lat. 18° 31' long 76 18'

**SHERBAL**.—See **SHERDAL**.

**SHERBOOTE**, in the British district of Bynour, lieut. gov. of the N W Provinces, a town situated on the river Koh. Elevation above the sea 658 feet distance N W from Calcutta 920 miles, from Miradabad 44. It contains a population of 12,084 inhabitants. Lat. 29 20' long 78 33

**SHERBURGH**, in the British district of Bareilly lieut. gov. of the N W Provinces, a town on the route from Bareilly to Almorah, 26 miles N of the former. Lat. 28° 40' long 79 27'

**SHERGHOTTY**, in the British district of Behar, a town, the principal place of a thana or police-division of the same name. It lies on the route from Hazareebagh to Benares, 66

miles N W of former, 181 S.E. of latter. It is situated on a small island formed by a tributary of the river Poonpun. There are several bungalows or lodges, formerly occupied by officers of the government when the place was a civil station. The number of houses is estimated at 1,019 and admitting the usually received ratio of inmates to houses, the population may be assumed at 5,100 persons. The town is distant 20 miles S.W. of Gaya. Lat. 24 53' long 84 31

**SHERGURH**.—A town in the Rajpoot state of Jeypoor 74 miles S E by S. from Jeypoor and 121 miles E. by S. from Ajmeer. Lat. 26 2' long 76° 35'

**SHERGURH** (Fort of), in the British district of Shahabad, lieut. gov. of Bengal 20 miles W.S.W. of Samsaram. Lat. 24 50', long 83 49'

**SHERKHANWALA**, in Sirhind a village on the route from Ludiana to Ferozpoor and nine miles E. of the latter town. It contains a few shops and has an abundant supply of good water from three brick lined wells, each about thirty feet deep. The surrounding country is barren wild, and overran with jungle. Distant N W from Calcutta, by Delhi and Munnuk, 1,169 miles. Lat. 30 56' long 74 42'

**SHETTYKAIRA**.—A town in the Mysore, 62 miles S. by E. from Chittel Droog and 60 miles N from Seringapatam. Lat. 13 21, long 76 38

**SHEU** in Ruamahir a pass on a ridge projecting northwards from the most southerly range of the Himalaya, and subordinate to it. The route from the Burenda Pass, northwards, into Koonawur lies over the Sheu. The extreme elevation at which birches were found to grow was 12,800 feet, and pines 12,000. The highest cultivation, which was that of buck-wheat, was 10,650 feet above the sea. The elevation of the pass itself is 13,350 feet. Lat. 31 24' long 78 13'

**SHEVAGUNGA**.—A town in the British district of Madras, presidency of Madras, 38 miles E by S. of Madras. Lat. 9 51, long. 78° 33'

**SHEVLY**.—A town in Hyderabad, or territory of the Nizam 130 miles S W from Ellchpoor and 111 miles E.N.E. from Ahmednuggur. Lat. 19 46' long 76 16'

**SHEWAR**, in the British district of Benares, lieut. gov. of the N W Provinces a village on the left bank of the Ganges, 806 miles by water N W of Calcutta, or 843 by the Sunderbund passage three miles N of the city of Benares, or lower down the stream. Lat. 25 21, long. 83 5'

**SHEWE ZUTO**.—A town of Burmah, 18 miles W from the right bank of the Irrawaddy, and 151 miles S.W. from Ava. Lat. 20° 14', long 94 25'

**SHEWHUR**.—A town in the British dis-

# SHE-SHI.

trict of Berar, East gov of Bengal 23 miles N by W. of Musuffurpoor Lat. 26° 30', long. 85° 51'

**SHEWLEE**, in the British district of Cawnpore, East gov of the N W Provinces, a town on the route from Cawnpore to Mynpoore, 21 miles W N W of the former Lat. 26° 54', long. 80° 7'

**SHEYL**, in Buzabir, a village at the south-eastern base of the Wurtu Mountain. Its site is very pleasant, amidst much cultivation, and surrounded by picturesque mountains. Here is a mine of excellent iron ore, easily extracted and smelted with the charcoal of the surrounding forests. Elevation 8 000 feet above the sea. Lat. 31° 14', long. 77° 37'

**SHIAB**, in Buzabir, a pass over a ridge proceeding southwards from the great range of the Himalaya bounding Koonawar on the south. On the highest part of the pass is a small piece of level ground about 100 feet across consisting of a swampy turf yielding to the foot. The prospect from this spot is vast and magnificent, comprehending the Chur Mountain to the south west on the east the flanks of Boorenda, but not the pass itself, to the south-east the peaks of Jumnotry rising one above the other in majestic disorder and covered with perpetual snow and beyond, the Goonnan Pam, one of the huge Ruldum peaks, upwards of 21 000 feet high. Shiar Pass has an elevation of 18 720 feet above the sea. Lat. 31° 19' long. 77° 28'

**SHIKARPOOR**.—A town in the Mysore 160 miles N W by N from Seringapatam, and 162 miles N N E from Mangalore. Lat. 14° 26', long. 76° 28'

**SHIKARPOOR**, in the British district of Belandshur East gov of the N W Provinces, a town on the route from Boolundshur to Mynpoore 14 miles S. E. of the former. It contains a population of 11,065 inhabitants. Lat. 28° 16' long. 76° 6'

**SHIKARPOOR**, in the British district of Musuffurungur, East gov of the N W Provinces, a town on the route from Musuffurungur to Rahtak, 14 miles W S. W. of the former. Lat. 29° 23' long. 77° 33'

**SHIKARPOOR**, in Sude, a town, the most important in the country in a commercial point of view, and probably the most populous, though not possessing the distinction of being regarded as the capital. It is situated 20 miles due W of the Indus, in a country so low and level, that, by means of canals from that river it is, during the inundation extensively flooded and so completely is the soil saturated with moisture, that, by digging to the depth of twelve or fifteen feet, water may at any time be obtained in quantity almost without limit. A branch from the Sude canal, dug from the Indus, passes within a mile of the town, and is navigable for large boats during four months of the year. Though the inundation leaves extensive tracts covered with stagnant water,

and the heat is excessive, the climate is not considered insalubrious, except towards the end of September, when agues prevail. The soil is alluvial, being the deposit of the waters of the canals and channels. It is so rich as to require no manure producing very great crops, in return of culture and irrigation. The town is surrounded by flourishing groves and orchards, yielding in abundance dates, mangoes, oranges, mulberries, and other fruits the usual produce of this country. Sugarcane is cultivated more with a view to its consumption as a sweetmeat than for producing sugar. The wall by which Shikarpoor was once fortified is now in ruins but eight gates may still be traced the circuit of the wall is 3 831 yards. The approaches to the town are bad and when reached it exhibits nothing attractive. Much waste ground is interspersed among the houses in the inhabited part, the streets are narrow and the houses in general small. The mansions of the opulent Hindoo merchants are large, massy gloomy piles enclosed and secluded by high brick walls. Shikarpoor contains no public edifice worthy of notice. The character of the place is thoroughly commercial, almost every house having a shop attached to it. The bazar extends for about 800 yards through the centre of the city and is covered with rafters thatched with palm leaves. This arrangement is intended to afford protection against the rays of the sun, but it renders the air stagnant, oppressive, and injurious to health. Improvements in the town are, however, about to take place, under the proposed application of the provisions of the Legislative Act of the government of India, No. 26 of 1850. Trade meanwhile appears to thrive. Conolly observes, that the shops seemed to be well filled with the necessaries of life and various merchandises, and the people had that busy air which characterizes men engaged in active trade. Burnes states the number of the shops in the bazar in 1837 at 884. Postans, in 1841 represents the number of Hindoo shops as 923. The laborious trades and handicrafts are followed exclusively by Mahometans. The transit-trade is important, as the town is situated on one of the great routes from Sude to Khoreman and Afghanistan, through the Bolan Pam, and also on that which leads northward to the Derajat, by the western side of the Indus. There is likewise a route to Kurrachee, by way of Sehwan and one to Hindostan and the eastern side of the Indus, by the ferry at Koros and Sukkur besides others of less importance. 'The direct trade of the town of Shikarpoor itself,' Burnes observes is not extensive its port is Kurrachee. The trade with Khoreman and Kandahar is considerable, but there is scarcely any with Northern Afghanistan that being conducted through the Panjab and Bhawalpoor. The transit-trade is principally that from Marwar and the adjacent parts of Hindostan to Khoreman and Persia, but banking and other branches of monetary traffic constitute the more important departments of the commercial

operations of Shikarpoor. There are several Hindoos possessing large capitals, which appear to have been accumulated under the supremacy of the Afghans. The improvidence of the latter left the management of money matters to these acute financiers, who, by farming the revenues, and exacting exorbitant interest on loans, public and private, have amassed immense wealth. These capitalists are represented as enterprising, vigilant, and ravenous for gain, living impersonations of heartless avarice, but at the same time specious, civil and intelligent to an extraordinary degree. Their lingual acquirements are extensive, as they usually understand Persian, Baloochee, Pushtoo, Hindostanee and Sindhee. Their credit stands so high that their bills can be negotiated in every part of India and Central and Western Asia, from Astracan to Calcutta. In every important town throughout this vast extent they have agents, whose families remaining at Shikarpoor are a sort of hostages for their fidelity. The commerce and general prosperity of the town, which had rapidly declined under the power of Scindian rulers, are reviving under the lately established supremacy of the British. So much diversified had society become when Masson visited the place a few years ago that to pass the walls was almost to incur the certainty of being robbed.

The population of the town is estimated at 30,000. Of these 20,000 are Hindoos characterized by great laxity in respect to their peculiar tenets. The remaining 10,000 are Mahometans, of whom 1,000 are Afghans. These share in the general character of the population being considered ignorant, crafty, contentions, and cowardly. It may be hoped that the prevalence of evil is but the result of the long course of oppression, extortion and cruelty to which the people have been subjected by their rulers, and that under better auspices the tone of morals will be raised, while increased security will be afforded to life and property. Shikarpoor is the principal place of one of the three territorial divisions of Sindh, having an area of 6,120 square miles, and a population of 850,401. The town was founded in 1617. Lat. 25° long. 68° 39'.

**SHINGR.**—A town of Eastern India, in the British province of Tenasserim, 116 miles S.E. of Moulemy. Lat. 14° 50' long. 98° 10'.

**SHIPKEE.** In Chinese Tartary lies close on the north eastern boundary of Bussahir, and is usually the limit of the exploratory travels of Europeans in the Celestial Empire, all beyond being guarded from intrusion with the most vigilant jealousy. In proceeding to it from Dabing there is a choice of two routes: one by Peemung Ghat, having an elevation above the sea of 18,518 feet, the other a little to the south of the former, by the Kungma Pass, having an elevation of 16,000 feet, but, notwithstanding its greater height, easier than the former. The village is situated a mile from the

left bank of the Sutley, and three miles south of its great fissure, where, having thus far from its source held a north-westerly course, it turns to the south west. The ridge traversed by the passes just described, stretches in a direction from north to south about three miles west of the town and forms not only the boundary between the British and Chinese empires, but also the physical limit between the craggy wilds of Koonawur and the more open waste of Chinese Tartary. Here," observes Gerard, "the scene was entirely changed: a more marked difference can scarcely exist. The mountains to the eastward were quite of another nature from those we before met with: they are of granite, broken into gravel, forming regular slopes, and neither abrupt nor rocky. The country in that direction has a most desolate and dreary aspect, not a single tree or blade of green grass was distinguishable for nearly thirty miles the ground being covered with a very prickly plant, which greatly resembled furze in its withered state. This shrub was almost black, seeming as if burnt, and the leaves were so much parched from the arid wind of Tartary that they might be ground to powder by rubbing them between the hands. The brownish tint of the furze together with the bleakness of the country gave the appearance of an extensive heath and would strongly remind a Scotch Highlander of his native land." The wind, during the visit of the (Gerards), blew a hurricane and it is said to blow with almost equal violence throughout the year: its aridity is great, and everything exposed to its influence is dried up. The collection of dwellings called Shipkee consists of six hamlets, scattered over the declivity of a bare and brown mountain sloping northwards to the Sutley, and presenting everywhere a surface of rocky barrenness except in the immediate vicinity of the houses, where persevering industry has succeeded in establishing some extent of cultivation. The crops are wheat, barley, buckwheat, and turnips, besides the never-failing apricots. The houses are built of stone, flat roofed, and have a neat appearance: gardens, hedged in with gooseberry bushes appear in front of each and the scene is enlivened by herds of huge yaks, and of shawl goats and flocks of Tartar sheep, unrivalled for size, heavily and the richness of their wool. These animals are guarded by large native dogs which, like one of the objects of their charge, the shawl-goats, have fine wool under their coat of hair affording a defence against the rigour of the climate. The Gerards found the Chinese officers determined to stop their further progress by withholding provisions the most effectual mode that could be adopted but they were courteous, either out of regard to the numbers which followed in the train of the travellers (nearly 100 persons), or from a better motive. Gerard says of the inhabitants, "The Tartars pleased us much. They have none of that ferocity of character so commonly ascribed to them. They have

something of the Chinese features, and their eyes are small, they go bareheaded, even in the cold weather, and have their hair plaited into a number of folds, ending in a tail two or three feet long. Their dress consists of a garment of blanket, trousers of striped woollen stuff, resembling tartan and stockings or boots of red blanket, to which are sewed leather shoes, most wear necklaces upon which are strung pieces of quartz or bone. They have also knives in brass or silver cases, and all carry iron tobacco-pipes, of the same shape as those used by labourers at home, and the higher classes have them ornamented with silver. In common with the inhabitants of Komanur the greater part of them have a flint and steel for striking fire, attached to their apparel by a metal chain. The women, whose dress resembles that of the men, wear generally grooving under a load of ornaments, which are mostly of iron or brass, mixed with silver or tin and beads round their necks, wrists, and ankles and affixed to almost every part of their clothes. The elevation of Shipken above the sea is 10,597 feet. Lat.  $31^{\circ} 48'$  long.  $78^{\circ} 48'$

**SHIPPOOR**, in Gurwal, a lofty peak on the north-east frontier, towards Chinese Tartary is situated six miles N. E. of Gangotri, and in the bifurcation between the rivers Bhagorettee and Jahnovi. Elevation above the sea 18,681 feet. Lat.  $31^{\circ} 1'$ , long.  $79^{\circ} 4'$

**SHITABGURH**, in the Barce Doab division of the Punjab, a town situated 16 miles N. W. from the right bank of the Sutlej, 39 miles E. by S. of the town of Mooltan. Lat.  $29^{\circ} 57'$ , long.  $72^{\circ} 8'$

**SHIVANASUNDRUM**—An island in the British district of Coimbatore, presidency of Madras, formed by the river Coavery. It is three miles in length by one in breadth, and upon it are the ruins of an ancient city of the same name. Lat.  $12^{\circ} 17'$ , long.  $77^{\circ} 14'$

**SHIVILPUTUR**—A town in the British district of Tinnevely, presidency of Madras, 55 miles N. of Tinnevely. Lat.  $9^{\circ} 30'$ , long.  $77^{\circ} 39'$

**SHORDOWN**—A town in the British territory of Pegu, situated on the left bank of the Irawady river, and 10 miles S. by W. from Prome. Lat.  $16^{\circ} 38'$ , long.  $95^{\circ}$

**SHOLANGHUR**—A town in the British district of North Arcot, presidency of Madras, 14 miles N. N. E. of Arcot. Lat.  $15^{\circ} 4'$ , long.  $79^{\circ} 39'$

**SHOLAPADI**—A town in the British district of Salem, presidency of Madras, 27 miles N. W. of Salem. Lat.  $11^{\circ} 53'$ , long.  $77^{\circ} 56'$

**SHOLAPPOOR**—A town in the British district of the same name, in the presidency of Bombay, 124 miles E. of Sattara. Lat.  $13^{\circ} 40'$ , long.  $75^{\circ} 58'$

**SHOLAPUR**, a British collectorate in the presidency of Bombay, is composed of three

separate divisions, the two largest lying north and south of each other, and the smaller division situate to the north-east of the other two. These districts are bounded on the north by the collectorate of Ahmednuggur and the dominions of the Nizam on the south by Sattara and the Belgaum collectorate, on the east by the Nizam's dominions and on the west by the collectorates of Ahmednuggur, Poona, and by Sattara. The collectorate extends from lat.  $16^{\circ} 10'$  to  $18^{\circ} 34'$ , and from long.  $75^{\circ}$  to  $76^{\circ} 28'$  its greatest length, from north west to south east, is 170 miles its greatest breadth from east to west, fifty miles. In 1838 this district, then a portion of the principal collectorate of Poona, was formed into a separate collectorate.

The general face of the district is described as undulating, and presenting a succession of upland and valley and, with the exception of some mango-trees and other plantations in the talooks of Barase Mungolee, and Mondebehall the country is stated to be nearly devoid of trees. The Kistna forms the southern limit of the district which is also traversed by the Bhema, and its confluent the Sena. The climate is dry and healthy the average fall of the monsoon rains averaging twenty-two inches.

Cotton is the staple product. The experimental cotton farms are stated to have succeeded beyond expectation and the soil to be admirably adapted to the growth of the New Orleans species but the district is represented as suffering from the want of roads. There is no metalled or made road through any part of this collectorate all traffic and communication are carried on by means of the ordinary country roads, which are nothing more than tracks, hardened by long use to a degree that, especially in the hot season, renders them quite sufficient to answer all the purposes of the best cross roads. There is a cleared road from Sholapore through Wyrag Barase, and Kurnulla, to Patna, within forty miles of Poona, which has been rendered passable for all kinds of carriage since 1844 and a continuation of the whole line to Poona, as a fair-weather road, was sanctioned by the home authorities in 1847 but a more substantial road from Sholapore to Poona is highly desirable. The amount of traffic which passes in this direction is exceedingly large and as the produce of the whole of the western part of the Nizam's dominions is brought to Barase for transshipment to Bombay there are few lines where a good made road would be more desirable. There are no passes or ghats in this collectorate. The two rivers, Sena and Bhema, are the only natural obstacles to regular internal communication, and it is only during the season that they offer any serious impediment. The population is given under the article BOMBAY Compared with their former condition, the people are said to possess a larger amount of competence among them great wealth is more rare than formerly, but a

## SHO.

medium degree of easy circumstances is also much more common. Many attempts have been made to introduce European implements of husbandry in this collectorate, but with little success. Agricultural skill is by no means at a low standard, and many estates give proof of the greatest care having been taken in their cultivation, but the means of performing many of the most ordinary operations are exceedingly defective and the same may be said of the mechanical arts, in which the productions are out of all proportion superior to the means of producing them.

The lands of this collectorate have been surveyed, classified, and assessed, and the government demand thereupon fixed under the new settlement for a term of thirty years. The district was acquired by the East-India Company in 1818, on the fall of the Peshwa.

**SHOLAPORE**, in the British collectorate of the same name, presidency of Bombay, a town in the lower tract at the eastern extremity of that collectorate. Its ground plan is an oblong of a considerable area, with a wall and fosse-trace of substantial masonry, flanked by spacious round towers. A broad and deep wet ditch surrounds the place, and the north and east sides are covered by an extensive pettah or exterior town, surrounded by a good wall, and divided in the same manner into two parts. To the southward, communicating with the ditch, is a tank, surrounded on three sides by a mound, which, on occasion of the attack by the British force, formed a good breastwork to the Peshwa's army posted outside the place. Sholapore though having no natural strength was early a fortress of importance in the Deccan being mentioned in 1478 as one of the principal strongholds of the Bahmanid sovereigns. Long afterwards, its possession was a frequent subject of content between the sultans of Ahmednuggur and Bejapoor and so continued until it was taken by Aurangzeb in 1688. During the dismemberment of the empire of Delhi, in the early part of the eighteenth century Sholapore fell into the hands of the Marhattas, and after the defeat of the Peshwa and his flight from Poona, in 1818, was invested by a British force under General Pringle. At that time the number of guns in the fort amounted to thirty-seven, including eleven field guns besides which, there were thirty nine wall pieces. The defending force consisted of 850 horse and 5,560 foot, stationed in the town, outside the fort, besides the garrison estimated at 1,000 men. The town was taken by escalade, and the defenses of the fort being breached the place surrendered in four days. A church has been erected in the town. Distance from Poona, S.E. 165 miles from Satara, E., 135, from Bombay, S.E., 230. Lat. 17° 46', long. 76°

**SHOLAVANDAN**—A town in the British district of Madura, presidency of Madura, 12 miles N W of Madura. Lat. 10° S, long. 78° S

**SHOOGONG**—A town of Eastern India, in the native state of Munseepoor, situate on the left bank of the Nashikha Khyong river, and 80 miles S. from Munseepoor. Lat. 24° 15', long. 93° 59'

**SHOOLJUL**—A town in the Rajpoot state of Jodhpoor situate on the left bank of the Rairee river, and 46 miles S.E. by R. from Jodhpoor. Lat. 25° 56', long. 73° 44'

**SHOOK**—A town in Nepal, 148 miles N W by W from Khatmandoo, and 145 miles N from Goruckpoor. Lat. 28° 47', long. 83° 15'

**SHOOKRABAD**—A town within the dominions of Ghoolab Bugh, the ruler of Cashmere, situate 65 miles W from Sarinagar and 78 miles N N E. from Jhelum. Lat. 33° 53', long. 74° 14'

**SHORAPORE**—A small subordinate state situate in the south-west angle of the territory of the Nizam. It is bounded on the south by the river Krishna separating it from the Raikasee Doab and on the north by the territories of Hyderabad. In 1842, the rajah of Shorapore having fallen into pecuniary difficulties, found himself unable to fulfil his engagements to the Nizam, his superior. This necessitated the interference of the paramount power by whose authority an arrangement was effected, under which the rajah ceded certain possessions south of the Krishna, in commutation of the Nizam's tribute. Rajah Kuntappa Naik dying shortly after an arrangement was made by the British government for the cession of the administration during the minority of his successor, by his uncle, Pidd Naik. It was, however, unsuccessful, and the British government found it necessary to assume the direct management of the raj. Through their agency, a thorough reform was effected in every department of the previous vicious system of administration, and the country handed over to the young chief in a flourishing condition. Its revenue in 1842 was estimated at five lacs of rupees. The withdrawal of the British agency took place in 1853. No sooner however, was the government made over to its native ruler, than a system of maladministration recommenced, and the consequences of the relinquishment of British control over the affairs of this petty state are stated to have proved most disastrous. Shorapore, the principal place, is in lat 16° 37', long 75° 32'

**SHORE KOTE**, in the Punjab, a small town situate on the route from Jung to Tulamba, and 26 miles N W of the latter town. Here are some ruins, which Purana states to be similar to those of Sehwan, but more extensive. In the Ayce Akbari, mention is made of Syakrote and of Moorat, two towns in this part of the Punjab, and Shorapote may, perhaps, be the ruins of one of them. Lat. 30° 50', long. 73° 1'

**SHORAPUR CHECKI**, in the British district of Dehra Doon, East-gov of the N.W. 889

# SHO—SIA.

Provinces, a halting place on the route from Delhi to Buharnspoor, and seven miles S W of the former town. It is situated on the crest of the Khara Pass, across the Sewalik Mountains. Distant N W from Calcutta 1 040 miles. Lat. 30 14, long 78 1'

SHOBON, in the British district of Musuf furnugur, a town on the route from Musufurnugur to Reware, 18 miles S.W. of the former. Lat. 29 19' long 77 39'

SHOULAH or BURA SHOULAH in the British district of Bynour, a town of the N W Provinces, a village on the route from the town of Moradabad to Mousuffurnugur and 81 miles N W of the former place. It is situated in an open country partially cultivated, and supplies and water are plentiful. Distant N W from Calcutta 918 miles. Lat. 29 8 long 78 36

SHOYLAGOODY—A town in the British district of Madura, presidency of Madras, 57 miles S.E. of Madura. Lat. 9 10', long 78 30'

SHUBERNAGHERRY—A town in the territory inhabited by the hill tribes of Orissa, 51 miles W from Goomsoor and 113 miles S from Sambalpur. Lat. 19 50 long 83 54

SHUBKUDIR in the Peshawar division of the Punjab, a town situated on the right bank of the Lundy river, 18 miles N of the town of Peshawar. Lat. 34 15 long 71 40'

SHUHEKABAD in the British district of Panesput, a town on the route from the city of Delhi to Kuranaul and 18 miles N W of the former. Lat. 28 53, long 77 8'

SHUHUL, in the Rajpoot state of Jeypore, a town on the route from Agra to Nussacabad 92 miles S.W. of former, 129 N E of latter. It has a hill fort, water is plentiful, as well as supplies of all kinds except wood. Lat. 26 37, long 76 47'

SHUJAGANJ, in the territory of Oude, a town on the route from Goruckpore cantonment to Lucknow 110 miles W of the former, 56 E of the latter. Provisions and water are plentiful and good, but firewood rather scarce. Lat. 26 50, long 81 35

SHUJANPOOR—A town in the Jullunder Doab of the Punjab, situated 74 miles N E by N of Ludhiana. Lat. 31° 50', long 76 33'

SHUJAWULPORE—See SOOJAWULPORE.

SHUKURPOOR, in the British district of Meerut, a town on the route from Meerut to Reware, 38 miles S.W. of the former. Lat. 28 57, long 77 21

SHUMSABAD—A town in the native state of Gwalior or territory of Scindia's family, 29 miles N W from Bhilsa and 81 miles W by S. from Saugur. Lat. 23 49', long 77 31'

SHUMSGURH—A town of Malwa, in the native state of Bhopal, 12 miles W S W from Bhopal and 37 miles N W from Hoosangabad. Lat. 23 5', long 77° 20'

SHUMSHABAD in the British district of Furruckabad, the principal place of the pergunnah of the same name, is situated in the marshy tract on the right of the Ganges, and eight miles from its western bank. It must have been formerly more important than at present, as Baber who wrested it from the Patana, estimated the annual revenue derived from it at nearly 20 000*l*. In the Ayceen Akbery the revenue derived from it is estimated at 7 138 458 dams or 1 78 460 rupees. Distant N W from Furruckabad 12 miles N E from Agra 88 miles. A recent return gives Shumshabad a population of 6 920 inhabitants. Lat. 27 32' long 79 30'

SHUMSHUR NUGGUR.—A town in the British district of Behar, head gov. of Bengal, 41 miles N N W of Sherghotty. Lat. 25 4, long 84 31

SHUNKERNACOIL—A town in the British district of Tinnevely, presidency of Madras, 32 miles N by W of Tinnevely. Lat. 9 10' long 77 37'

SHUNTHAPA.—A town in the British district of Tinnevely, presidency of Madras, 10 miles N E. by E. of Tinnevely. Lat. 8 47' long 77° 55'

SHUPIEN—A town within the dominions of Gholab Singh, the ruler of Cashmere, situated 26 miles S from Srinagar, and 84 miles N E. by E. from Jhelum. Lat. 33 43, long 74 56

SHUREEARE—A town in the Rajpoot state of Jodhpore, 62 miles S E from Jodhpore and 78 miles S.W. from Ajmeer. Lat. 25° 40' long 73 53

SHURUFOODEENPOOR—A town in the British district of Tirhoot, head gov. of Bengal, nine miles E of Morufferpore. Lat. 26 6', long 85 35

SHUSHABAD in the British district of Agra, head gov. of the N W Provinces, a town 14 miles S.E. of the city of Agra. Lat. 27 1 long 78 12'

SHUTENEE, in the British district of Cawnpore, head gov. of the N W Provinces, a village on the route from the cantonment of Cawnpore to that of Calpee, and 14 miles N E of the latter. Lat. 26 16' long 79 57'

SHWAYGREEN—A town in the British province of Pegu, situated on the left bank of the Sittang river and 44 miles N E. from Pegu. Lat. 18 6', long 96 46

SHWELY, a river of Burmah rises in lat 23 51 long 98 30, and flowing westerly for about 180 miles, falls into the Irawaddy, in lat. 25° 50' long 96 10'

SIAM—An independent kingdom of Eastern India, bounded on the north by Laos,

# SIA-SID

on the east by Laos, Cambodia, and the Gulf of Siam on the south by the Gulf of Siam and the Malay peninsula, and on the west by the Bay of Bengal and the Tenasserim provinces. It extends from lat.  $6^{\circ} 30'$  to  $18^{\circ} 2'$ , and from long  $93^{\circ} 25'$  to  $103^{\circ} 45'$  is about 800 miles in length from north to south and 370 in breadth. The principal rivers are the Menam and the Me-Ping flowing north and south. The chief products are rice, sugar, pepper, tobacco, and teak wood. The earliest connection between this state and the British government appears to have taken place towards the close of the seventeenth century when the Siamese envoys who had been deputed on an embassy to Louis XIV. visited London and concluded a commercial treaty with the government of Charles II. This treaty was superseded by one dated in 1715 and from this time to the year 1821 little intercourse seems to have subsisted between the two governments. During this long interval Siam had been subjected to frequent revolutions and had carried on constant war with Burmah. In the last-mentioned year (1821) Mr. John Crawford was deputed from India by the Marquis of Hastings on a mission to Siam the chief object of which was the establishment of commercial intercourse but it was received with distrust. On the breaking out of the Burmese war in 1824 the Siamese volunteered their alliance against their hereditary enemies but substantially rendered little assistance. The war being terminated a new treaty was concluded with Siam in June, 1826, and an arrangement agreed to for the regulation of British trade with its ports. An amicable understanding between the two countries has been the result. In the year in which the treaty was concluded the Siamese had invaded Quada, and expelled the rajah who took refuge in Penang where his residence was permitted on condition of his abstaining there from any hostile proceeding against Siam. The condition was violated and on the failure of all attempts to effect a reconciliation between the parties an article was inserted in the treaty above mentioned binding the English government to exclude the ex-rajah from his place of refuge and from certain other localities. By the same article, the English government engaged to prevent any attack upon Quada or any part of the Siamese territory from the exiled rajah or his followers and it was compelled twice to interfere for this purpose. In 1842, however, the king of Siam reinstated the rajah on his submission and at the request of the king the clause of the treaty relating to the rajah was annulled. The death of the king of Siam occurred in 1851. A new treaty has been recently concluded with his successor which promises to open an extensive sphere for British commerce and enterprise.

**SIANEYGUA**—A town in the British district of Tavoy one of the Tenasserim provinces, presidency of Bengal, 139 miles N N W of

Tenasserim and eight S. of Tavoy Lat.  $13^{\circ} 58'$ , long  $98^{\circ} 21'$

**SIAPRI**—A town in Nepal, situate at the foot of the Himalaya Mountains, and 64 miles N N F from Khatmandoo Lat.  $28^{\circ} 35'$ , long  $85^{\circ} 37'$

**SICKINDRABAD** in the Barce Doab division of the Punjab a town situated on the left bank of the Chenab 13 miles S W of the town of Multan Lat.  $29^{\circ} 58'$  long  $71^{\circ} 28'$

**SIDDAPPOOR**—A town in the British district of North Canara, presidency of Madras, 81 miles E of Honahwar Lat.  $14^{\circ} 21'$  long  $74^{\circ} 53'$

**SIDDAWATTAM**—See SIDHOUT

**SIDHAM** or **SIDHUA** in Sirhind, a small town on the route from Ludhiana to Ferozpoor and 30 miles W of the former place. It is situate in a level fertile country partially cultivated, and about half a mile from the left bank of the Sutley crossed here by a ferry. It is within the British district of Ludhiana. Population about 1,500. Distance N W from Calcutta 1106 miles Lat.  $30^{\circ} 55'$ , long  $75^{\circ} 25'$

**SIDHOUT** in the British district of Cuddapah presidency of Madras a town on the north or left bank of the Northern Penna or Pennar river. Here are the remains of the fort which though of inconceivable strength was the place of refuge of the last chief of Cuddapah who was here obliged to surrender to Hyder Ali the adventurer who succeeded in acquiring the sovereignty of Mysore. It subsequently was the locality of a British civil establishment on the removal of which to the town of Cuddapah this place sank into insignificance. Distance from the town of Cuddapah E. 10 miles Madras, N W 180 Lat.  $14^{\circ} 28'$  long  $79^{\circ} 2'$

**SIDHPOOR** in Cuzerat, or the territory of the Guicowar a town on the route from Mhow to Deesa. It is eligibly situated on the river baraswah which being esteemed a sacred river many rich Brahmins and Mussulmans have fixed their dwelling places here. There is a Math or sacred college where instruction is given to disciples and hospitality afforded to travellers qualified to receive it. Weaving is carried on extensively many Mussulman merchants of the denomination called Khoras are engaged in trade here. Distance from Deesa, S E 32 miles from Ahmedabad N 58 from Baroda, N W 125 from Mhow N W, 230 Lat.  $23^{\circ} 50'$  long  $74^{\circ} 20'$

**SIDHAWAH** in the jaghirs of Loharoo (rent-gov. of the N W Provinces) a village on the route from Hansee to Churu and 21 miles S W of the former Lat.  $23^{\circ} 42'$  long  $75^{\circ} 49'$

**SIDHWA**, in Sirhind, a town on the route from Bocrash to Nahan. It is situate near the base of the Sul-Himalaya, and close to the left bank of the Markunda, a torrent descending from that range. It is a large town, well for

# SIL-SIL

filled with a brick wall and tall towers of the same material, pierced with three or four tiers of loopholes for musketry. There is a good bazar, and supplies and water are abundant. Part of it belongs to the East-India Company, and the rest to a Sikh sardar. Situated distant from Calcutta N W 1,047 miles. Lat. 80° 28', long 77 16'

**SIKHUR**, in the British district of Benares, a small town with fort on the left bank of the Ganges, nearly opposite Chunar but a little higher up the stream. In A.D. 1781 it was garrisoned by the refractory rajah of Benares, Choyt Singh, with 3000 matchlockmen and 150 cavalry but was stormed by the British under Lieutenant Polhill. Distant N W from Calcutta, by water 698 miles, or 870 taking the Sunderbund passage 23 S.W. of Benares by water 17 by land. Lat. 25 8', long 83° 53'

**SIKKIM**, a petty native state in North Eastern India, is bounded on the north and east by Tibet, on the south-east by Bhutan on the south by Darjeeling, and on the west by Nepal. It extends from lat 27 5 to 28 3 and from long 88 2 to 89. It is sixty six miles in length from north to south, fifty two in breadth, and contains an area of 1 870 square miles with a population of 81 766. Sikkim became tributary to the Goorkhas in 1789. During the Nepal war in 1814 the rajah co-operated with the British, and upon the termination of hostilities, his safety and independence were guaranteed by the treaty of Segunlee, and his dominions increased in acknowledgment of his attachment by the grant of certain tracts which had been ceded to the British by the Nepalese. In 1836 the rajah made an unconditional cession to the British of the territory of Darjeeling but shortly after an annual grant of 6 000 rupees was agreed to be made to him as compensation. This, however he forfeited together with the territory bestowed on him at the close of the Nepal war, in consequence of outrages committed by him against British subjects. In 1863 the rajah abdicated the throne in favour of his son.

**SIKLEBUN**—A town in Nepal, situated on the left bank of a branch of the Taptee river, and 104 miles W by S. from Khatmandoo. Lat. 27 30' long 85 38'

**SIKREE** in the British district of Ghaseepore, lieut.-gov. of the N W Provinces, a town on the route from Ghaseepore cantonment to Aumgurh, situated on the river Munghes, 80 miles S.E. of the latter. Lat. 25 45', long 83 29'

**SIKREEGULEE** in the British district of Furruck, lieut. gov. of Bengal a town on the route from Berhampore to Dinapore, 97 miles N W of former 197 E. of latter. It is situated on the right bank of the Ganges in a difficult pass, where the Rajmahal hills close upon the river. The eminence above the town is surmounted by the picturesque tomb of a Mussulman, regarded by his co religionists as a

saint. Distant N W from Calcutta, by Berhampur 216 miles by the course of the river, 263. Lat. 25 10' long 87 48'

**SIKRI**, within the territory of the British district of Goorgaon lieut. gov. of the N W Provinces a small town on the route from Delhi to Muttra, and 31 miles S of the former. It is the principal place of a small jaghure containing ten villages, the owner of which, a Mussulman styled Nawaub received this recompense for his military services during Lord Lake's campaigns against the Maharrattas in this neighbourhood. Lat. 28 17, long 77 21

**SIKUNDERPOOR**, in the British district of Goruckpore, lieut. gov. of the N W Provinces, a small town 69 miles W of Goruckpore cantonment. Buchanan states the number of its houses at 100. Lat. 26 51, long 82 21

**SIKUNDRABAD**, in the British district of Boondababur a town on the route from Bareilly to Delhi, and 36 miles S.E. of the latter. It is of considerable size has a bazar and supplies and water are abundant. Elevation above the sea 792 feet. population 14,848. Lat. 28 27, long 77 46'

**SIKUNDRAROW**, in the British district of Allygurh lieut.-gov. of the N W Provinces, a town on the route from Coal to Mynpoore 23 miles S.E. by E. of the former. Lat. 27 40' long 78 29'

**SIKUNDURPOOR** in the British district of Saharanpoor lieut.-gov. of the N W Provinces, a village on the route from Saharanpoor to Haridwar and 13 miles E of the former town. There is a small bazar. Distant N W from Calcutta 1 090 miles. Lat. 29 57 long 77 50'

**SIKWADANRA**—A town in Nepal 184 miles W by N from Khatmandoo and 40 miles N W from Khasi. Lat. 28 26', long 82 26'

**SILCHAR**—A town of Eastern India, in the British district of Southern Cachar, 65 miles E. by S. of Silhet. Lat. 24° 45', long 92° 51'

**SILDAH**—A town in the British district of Midnapore, lieut. gov. of Bengal, 39 miles W N W of Midnapore. Lat. 22° 40', long 86 51'

**SILHET**—A British district in the lieut. gov. of Bengal, named from its principal place. It is bounded on the north by the hilly jungly tract inhabited by the wild Garoas, and by Jyrisah on the east by the British district of Cachar on the south by independent Tipperah, on the west by the British districts Mymensing and Tipperah. It lies between lat. 24 5—25° 12', long 91—92° 56', is 102 miles in length from east to west, and eighty in breadth. The area, according to official report, is 8,532 square miles. In the northern part the country is rugged, rising into jungly eminences towards the Coorg,

## SIL—SIM.

to north, from the town of Silhet to Chirra Poojoe.

**SILHET**, the principal place of the British district of the same name, bent. gov of Bengal, is situate at the southern base of the Oowya hills, and on the river Soomah, a tributary of the Brahmapootra. It is described to be a mean place, merely a large straggling village, having a bazar, where only the most common articles of native use are to be obtained. The civil establishment of the district is located here. Silhet is the head quarters of the eastern division of the Bengal army. Distance from Jumalpoor E. 110 miles, Dacca, N E. 120, Calcutta, N E, 260. Lat. 24 54 long 91 50.

**SILLAY MEW**—A town of Burmah, situate on the left bank of the Irawady river, and 116 miles S.W. from Ava. Lat. 20 45, long 94 38.

**SILLEE**—A town in the British district of Chota Nagpoor bent. gov of Bengal, 71 miles N of Lohadugga. Lat. 23 23, long 86 53.

**SIMBOLONG**—A town of Eastern India, in the native state of Munespoor 37 miles W from Munespoor, and 40 miles E. from Silchar. Lat. 24 48, long 93 28.

**SIMBULKET**, in the British district of Kamaon, bent. gov of the N.W. Provinces, a village in the Palice Doon, on the route, by the course of the Hemgunga (Western) from Moradabad cantonment to Almora. It is situate on the north eastern declivity of the Sewalik range, bounding the Doon on the south. distant 56 miles N of Moradabad. Lat. 29 36, long 78 45.

**SIMERIA** or **SIMRIA**, in the territory of Gwalior a village on the route from the fort of Gwalior to Saugor, 29 miles S of former. 184 N.W. of latter. Lat. 25 55, long 78 21.

**SIMIRIKRAH**, in the raj or principality of Rewah, a town on the table land surmounting the mountain styled by Franklin the second or Panna range, and 62 miles S.E. of Allah abad. It is the principal place of a jaghire held under the rajah of Rewah, on annual payment of a tribute of 2,500 rupees. The jaghiredar, considering himself obnoxious to the persecution of the rajah, in consequence of his good services towards the British authorities, they guaranteed his possessions to him. The benefit of this guarantee was spontaneously relinquished in 1823 by the jaghiredar who was immediately expelled by the rajah and his nephew placed in his stead, but the British government subsequently interfered so far as to have a provision made for his widow. Elevation above the sea 1,000 feet. Lat. 24 45, long 81 16.

**SIMLA**—A British station in the lower or more southern part of the Himalayas between the rivers Sutley and Giree, celebrated as a retreat for those seeking renovation of

health, or relief from the oppressive heat of the plains of Hindostan. It is situate on the route from Soobathoe to Kotgurh, 22 miles N.E. of the former post. The houses built for the accommodation of residents or visitors at this place, are irregularly scattered over a narrow ridge of mountain advantage being taken of every level spot, or moderate slope, for building. A few dwellings are erected on a spur of hills running north at right angles to the Simla range. The eastern extremity of what may be properly called the Simla ridge, is abruptly terminated by the peak of Juko rising about 400 feet above it. At the western base of this eminence is the base of the settlement. The sides of the Juko Peak were originally thickly clothed with wood, and the quantity is still considerable, but the demands for the purposes of building may be expected to cause a rapid diminution. At the western extremity of the ridge of Simla is another eminence inferior in height to Juko, and devoid of timber, the summit crowned by a mouldering ruin. The scenery within view from the town is very noble. Immediately south is a dark, deep precipitous valley, which as well as the neighbouring mountains, is thickly covered with pine-forests, beyond, to the south west, are seen the mountains about Soobathoe and still further the vast plain of Hindostan, traversed by the mean dering Sutley. To the north successive mountain ranges rise in proportion as the distance increases, and are terminated with surpassing grandeur by the snowy crescent of the Himalaya, the peaks of which, in fine weather, have so distinct an outline against the dark blue sky that their real distances of sixty or seventy miles seems not more than eight or ten. The following description of this scene, and of its impressions on the observer, occurs in a modern work. The general appearance of this mass of snow is that of a wide undulating plain from which peaks rise in every imaginable shape. Upon reaching the crest of the ridge at Simla, the vastness of the scene became oppressive. The lofty snowy range shone from the dense azure of the heavens, its giant flanks were broken with black mural precipices and profound ravines, which were purple from their depth below was heaped a shattered mass of mountains, peaks and glens, ridges and valleys, some aridly bare, others luxuriantly rich.

The trees in the neighbourhood are, the deodar or Himalaya cedar, pine, oak, and rhododendron, the last named glowing with bunches of rich scarlet blossoms. Of four-footed animals, the most commonly occurring are the kacker or barking deer (*Cervus muntjac*), so called from its cry resembling a short bark the antelope, the wild goat, and the marmot there are also the wild hog, the flying squirrel, musk, and other kinds of deer, and monkeys, both the hanuman or langoor (*Semnopithecus entellus*), and the himdar (*Simia thersia*). The carnivorous quadrupeds

# SIM.

are leopards and leopard-cats, bears, jackals, hyenas, and foxes sometimes, though rarely a tiger makes its way to these elevated regions. There is no great variety or abundance of game the principal of the feathered kind are pheasants, chukars and black partridges, quails, and woodcocks. Eagles, vultures, and crows are very numerous. The fruits and saculent vegetables of Europe in general thrive well here potatoes especially are grown in great abundance and excellence and are sent in large quantities to the plains. The climate is considered highly salubrious, and in consequence of its lower temperature, appears in favourable contrast with that of the plains. The winter is sometimes very severe. In 1836 snow lay in the month of February to the depth of six or eight feet, and did not melt away in shady places until the end of May.

In 1841 there were at Simla upwards of 100 houses built in the English style, and varying in rent from 40*l* to 150*l* a year. The position and habits of those resorting to the place cause it to be abundantly supplied with the luxuries as well as the necessities of life though most sorts of provisions have to be borne three or four days' journey over mountain roads. The population is very fluctuating. In a recent publication it is thus prospectively estimated. Should the Governor-General and the Commander-in-Chief come up next season it will consist of British subjects, 200 natives 8 000 and when the tributary chieftains and followers come in, it will be nearly 20 000. Again in winter when but few remain it will probably not exceed British subjects, 20 natives 2,000. Measures have been taken for providing funds for the purpose of carrying out public improvements. The first British dwelling erected in this place was that of Lieutenant Ross, in 1819. It was thatched over, and its walls were composed of spars, grass, and mud. In 1822, the first permanent cottage of the usual materials stone and timber roofed with pine-wood shingles, was erected by Captain Kennedy. Simla is the seat of an observatory at which a series of magnetical and meteorological observations were commenced on the 19th January 1841. A church has been provided, at an expense of 16,000 rupees, of which amount the government contributed 5 000 rupees, the remainder being raised by private subscription.

The district known as Simla is composed of territory acquired partly from the rajah of Putesala, and partly from the rajah of Keonthul, in both cases by exchange. It is under the civil jurisdiction of the board of administration in the Punjab and contains a population of 31 858. Elevation of encampment above the sea 7 866 feet. Distance N W from Calcutta, via Kurnal and Soothahoo, 1 097 miles. Lat. 31° 6', long. 77° 14'.

**SIMHURIA**, in Bandedand, a village or small town on the route from Allahabad to

Baugor 230 miles S.W. of the former, 83 N.E. of the latter. It is situate in the depressed tract or basin of Lohargoon. Lat. 24° 16', long. 79° 55'.

**SIMONBONG**—A town in the British district of Darjeeling, lieut. gov. of Bengal, six miles N.W. by W. of Darjeeling. Lat. 27° 4', long. 88° 15'.

**SIMONG**—A town of Eastern India, in the territory inhabited by the Bor Ahar tribe 46 miles N.W. by N. from Sudiya, and 105 miles N.E. from Luckimpoor. Lat. 28° 22', long. 95° 20'.

**SIMONGELPOOR**—A town in the British district of Silhet, lieut. gov. of Bengal, 45 miles S. by W. of Silhet. Lat. 24° 18' long. 91° 42'.

**SIMOOLBARIA**—A town in the British district of the Twenty-four Pergunnahs, lieut. gov. of Bengal, 40 miles S. by W. of Calcutta. Lat. 22° long. 88° 31'.

**SIMOWNEE**, in the British district of Banda, lieut. gov. of the N.W. Provinces, the principal place of the pergunnah of the same name a small town on an insignificant stream tributary to the Jumna eight miles S. of the right bank of the latter 20 N. E. of the town of Banda 78 W. of Allahabad. Lat. 25° 36', long. 80° 40'.

**SIMRA** or **SIMORE**, in the British district of Goruckpore, lieut. gov. of the N.W. Provinces, a small town in the pergunnah of Sidhwa Jobhna, which contains no other, except the principal place, Parana. It contains about 100 wretched dwellings. Buchanan does not state its precise position but it must be about forty five miles east of the town of Goruckpore and is perhaps the Simore of Garden who states that it is 93 miles N.W. of Dinapore. Lat. 26° 35' long. 84° 7'.

**SIMRABAS**—A town in Nepal 44 miles S.W. by S. from Khatmandoo and 35 miles N.E. from Bethab. Lat. 27° 10' long. 84° 56'.

**SIMRAUTA** in the district of Salon, territory of Oude a town 50 miles S.E. of Lucknow. It belongs to a brother of the Tiloi rajah, a reputed descendant of the ancient Hindoo monarchs of Oude. The proprietor is styled by courtesy rajah and resides in a mud fort, having in the interior buildings of masonry and defended by 500 of his armed followers. The population is estimated by Butler at 8,000. Lat. 26° 17', long. 81° 30'.

**SIMRAW**—A town in Nepal, 141 miles S.E. by E. from Khatmandoo, and 66 miles N.N.W. from Purneah. Lat. 26° 40' long. 87° 18'.

**SIMREEK**—A town in the British district of Behar, lieut. gov. of Bengal, 36 miles W. of Sherghotty. Lat. 24° 32', long. 84° 19'.

**SIMTOKA**—A town in the native state of Bhutan, 73 miles E.N.E. from Darjeeling, and

# SIM—SIN

120 miles N W from Goalpara. Lat 27 25', long 89 25'

**SIMULIKA**.—A town in the British district of Dacca, head gov of Bengal, 21 miles N.N.E. of Dacca. Lat. 24 2', long 90° 40'

**SINAWUD**.—A town in the native state of Indore, or territory of Holkar 43 miles S.E. by S. from Indore, and 112 miles N W by W from Ellichpoor Lat 23° 8', long. 76 10'

**SINCHUL**.—A mountain of Sikkim, having an elevation of 9 000 feet, upon a spur of which stands the British settlement of Darjeeling

**SINDE**, a river rising in Malwa "from the small range of mountains about 12 miles S.W. of the town of Serunge" and in lat. 24 1, long 77 29' It first has a course north for about 180 miles to Narwar at the north west corner of Bundelcund, and thence turning north-east, generally forms, for about 180 miles, the boundary between that district and Gwalier, and falls into the Jumna on the right side, in lat. 26 26' long 79 18' flowing altogether about 280 miles. It right and left receives during its course many small streams the principal being the Parbati and the Pohoy the first falling into the Sunde on the left side, about twenty five miles below Narwar and the other on the right side four or five miles above its mouth. The Sunde is crossed twenty miles from its source by the route from Nus serabad to Saugor, and is there '100 yards wide, rocky bottom, low banks, and depth of water two feet in fair season. About 150 from its source, and in lat 25° 50' long 78 25', it is crossed by route from Agra to Saugor and there the bed is about 200 yards wide and sandy breadth of stream in dry season, about forty yards and from one and a half to two feet deep banks steep and cut into ravines." It is subject to great inundations during the periodical rains.

**SINDE**.—An extensive and important province of Western India, so called probably from the river Sunde or Indus. Others consider that the name both of the river and the country is derived from the word Sindhi synonymous with Hindi as the inhabitants from the first dawn of recorded knowledge have principally been of the great Hindoo family. It is bounded on the north by Beloochistan, the Daman, and Shawpoor on the east by Jessulmere and Marwar on the south by Cutch and the Indian Ocean on the west by Beloochistan and is situated between lat 23 37'—28 32', and long. 68° 43'—71 3' It is 360 miles long from north to south, 270 miles in its greatest breadth from east to west, and contains a surface of 52,120 square miles. Its seacoast, washed by the Indian Ocean, extends a distance of 150 miles in a north west direction, from the Kere or greatest mouth of the Indus (long deserted by the stream) straight to lat. 23° 32', long 68 25' to Cape

Monse, or Ras Moorree in lat. 24 51 long 68° 43' Thus whole extent of coast, except the part intervening between Kurrachee and Cape Monse, which are distant from each other about fifteen miles, is very low being merely a series of mud banks deposited by the Indus, or in a few places, low sand hills, blown in from the sea-beach. Exclusive of those few sand hills, the shore observes Charles, "is low and flat throughout, and at high water partially overflowed to a considerable distance inland. With the exception of a few spots covered with jungle, it is entirely destitute of trees or shrubs, and nothing is seen for many miles but a dreary swamp. Whenever this occurs, the land is scarcely discernible two miles from the shore." Wood also observes—"The coast-line is submerged at spring tides when the delta of the Indus resembles a low champagne tract of verdure. Burnes, too states that the coast of Sind is not distinguishable a league from the shore. Westward of the Garrah estuary and between it and Kurrachee, the southern extremity of the Hala or Puab Mountains approaches the shore, the point of Munoor, which forms the southern shelter of the harbour of Kurrachee being rocky but with the exception of this point, the coast itself is like that eastward, low and alluvial, and so continues westward to Cape Monse, or Ras Moorree, which rises from the sea to a moderate height. The capability of the coast of Sind for the purpose of navigation is thus summed up by Wood—

It is plain to all who are conversant with nautical affairs, that Kurrachee is the only safe seaport for the valley of the Indus. When the season is favourable the merchant may indeed send his goods direct to the mouth of the Indus but everything here is subject to such constant change—the weather the depth of water the channels, and the very embouchure itself—that this voyage, even in February is not without hazards. He then observes, that as the danger of entering the river is greater than of leaving it, exports may be sent from the mouths in November December and January but that all imports should be brought by Kurrachee. It should be observed, however that though sea-going ships of 400 or 500 tons can at no time safely enter the river yet smaller vessels, if their draught do not exceed six or seven feet may do so. An inland navigation or even a ship canal, could probably be easily made from Kurrachee to the deepest and most navigable part of the Indus below Hyderabad, as the Garrah a small stream communicating with the Indus, falls into the sea at that port and is navigable from it for boats as far as Garrah Kot, a distance of forty miles.

Kurrachee, the only port in Sind for sea-going ships of burthen amounting to 400 or 500 tons, has, at high water, a depth of two fathoms and a half, and at spring tides of three fathoms, but, during the south-west monsoon, the swell is so great on the bar, that it is

highly dangerous to cross. The Kookwarree called the Gorn by Burnes, was formerly the principal mouth of the Indus, having a width of 1100 yards, but it is now blocked up by a sandbank. The Kedewarree has a well-defined channel, with seven or eight feet water at low spring tides. The Hoogjamree and Joos, during the low water season are safe roads for ingress and egress for vessels drawing not more than six feet water. The Pittiee is the largest, deepest, and best-defined mouth. The Koorse mouth is the most eastern, forming the bound-ary of Sindh towards Cutch. It has long been deserted by the stream except in very great inundations, when sometimes the Poorana and Fulahee branches pour their waters into it. Burnes states its breadth at Colatir twenty miles from the sea, to be seven miles and that it increases, proceeding downward, until neither shore can be seen. He however, adds very justly that it is nothing more than an arm of the sea.

The base or seaward line of the delta of the Indus measures, from the Garrah mouth in lat. 24 43 long 67 13', to the Koorse mouth, in lat 23 33 long 68 25 about 125 miles. If it be regarded as having the shape of a triangle, to which it in some degree approximates the perpendicular measured from the seashore to the vertex near Tatta where the great branches of the Indus—the Nara or eastern, the Buggaur or western—divaricate is about fifty miles, and its surface is about 8 000 square miles. But as the river has in some degree deserted a considerable portion of the south-eastern part the present delta proper does not probably contain more than 2,500 square miles. Unlike the densely wooded delta of the Ganges, it is nearly destitute of timber resembling in this respect that of the Nile. It is almost level, of alluvial soil, apparently brought down by the Indus, and consisting of vegetable mould, clay and mud which becomes hard soon after being deposited even in the channels of the river. There are however even within the limits of the delta proper, and eastward of the Buggaur or western branch of the Indus, some rocky hills known by the name of the Mukah Hills. Near the Pittiee, or western mouth of the river is a dangerous rock, the only point in the delta south of the range just described which is not alluvial.

In some degree similar to the delta, but superior to it in scenery, cultivation and climate, is the alluvial tract extending on each side of the Indus for a distance varying from two to twelve miles. One of the finest parts is a long narrow island, extending from north to south a distance of about 100 miles, with an average breadth of about eight, inclosed by the Indus on the east, and on the west by the Nara. The greatest extent of this alluvial land in the upper part of Sindh appears to be about Khyrpoor, Shikarpoor and Larkhana where canals and watercourses, communicating with the Indus during inundation cover the

surface to a wide range with water, which both irrigates the ground and deposits on it a fertilizing sludge. According to Poetana, the soil is so rich that no manure of any kind is used, though it regularly produces two crops every year and sometimes three and Macnurdoo states, that the fertility of this province in those parts which are exposed to the floods of the Indus is exceeded by that of no tract of country on the earth. "Throughout the alluvial tracts of Sindh, the soil contains saltpetre in great abundance and it is largely extracted both for home consumption and for exportation."

An extensive alluvial region stretches eastward of the fertile tract along the Indus, but having been generally deserted by the water of the river it became a desert, yielding a scanty pasture to camels or horned cattle and in the less-frequented parts occupied only by the fleet goarkhur or wild ass. Through it, however flows the Eastern Nara during the height of the inundations of the Indus, for a distance of 300 miles, and a project has just been sanctioned for securing to its channel a permanent supply of water by means of a cutting near Buree. The great silt contained between this branch and the Indus is on an average about seventy or eighty miles wide, the soil consisting generally of a hard sun-baked clay like the rest of the alluvial soil of Sindh where devoid of water. In this doab are two low ranges of recent limestone the more southern that of Hyderabad about 100 feet high and on one part of which that city is situated the more northern running north-westward from the vicinity of Jessulmer, and towards the Indus attaining an elevation of 150 feet, and abounding in flint, which forms, almost exclusively the rocks on which Khorre and Bukkur stand. These ranges are not, however completely continuous, being cut by valleys, through one of which the Nara, already mentioned holds its course through another the Fulahee branch insinuating Hyderabad.

The stiff nature of the deposit of the river is probably owing to its course in the upper part generally lying through a very mountainous region principally of primitive formation. In the more southern part of Sindh, the soil has a very large admixture of sand, and is sometimes so impregnated with common salt, that, as Lord observes, it is not uncommon to see the same sod which, during the season of irrigation, had yielded crops of grain, transferred afterwards to the salt-pans, and furnishing, by the simple process of pouring water over it, which is subsequently evaporated, an abundant supply of salt. The moisture, so indispensable to the productiveness of the soil, is altogether supplied by the water of the Indus, rain in Sindh being very scanty and uncertain. In consequence, the country where destitute of the means of irrigation, becomes a desert. Of this nature, on the north-east, is the Pind, or desert of Shikarpoor lying between that town and the Bolan Pass, and apparently consisting

of the clay deposited by the Bolan, the Nar, and other torrents which flow down from the Hala Mountains, and which are all lost in this dreary tract. It is about ninety miles across, and according to Kennedy, in some places resembles the dry bed of a salt lagoon in an interval between spring tides. In others, it is a level plain of indurated clay of a dull earthy colour, and having the appearance of being occasionally under water but during the dry season exhibiting, at long intervals a few wretched, parched, and stunted shrubs, but without a single blade of grass or other herbage. In the eastern part and in general reaching to within twenty miles, or even a less distance of the river is a region called the Thar or desert, having considerable resemblance to that just described, except that it is much more sandy extensive tracts being covered with sand hills, varying and shifting under the influence of the tempests of the wilderness yet, in many places, there is a considerable growth of low shrubs, coarse herbage, and prickly saline or aromatic plants, affording pasturage for camels, buffaloes, kine, sheep, and goats, all in continual motion in search of water, or its concomitant vegetation. Numerous beds of rivers long dried up intersect this arid tract, appearing to indicate that the waters of the Indus, or of some of the Punjab rivers, once found their way through it. Vestiges of ancient towns also may be observed, in great quantities of fragments of bricks and pottery in some places strewn over the surface. That the Indus, which now finds its way through the limestone rocks at Boree, might at one time have poured its waters in many branches over this waste, at present parched, is by no means improbable as there are unequivocal indications that it formerly flowed fifty feet above its present level in the channel between Sukkur and Boree, and that the country on both sides of the river along the base of the limestone range was at that time under water. The old course of the river may also be traced along the northern base of that rocky range, which, stretching nearly 100 miles to the south eastward, must have sent the water of the Indus over the surface of the country now become the Eastern Desert, since it has been deserted by the stream.

The climate of Sindh is remarkably sultry and dry. As Lord observes—"Situated on the verge of two monsoons, it is unrefreshed by the waters of either. The south west monsoon, he proceeds, 'terminates at Lacput Bunder (on the western coast of Cutch) as accurately as though it covenanted not to violate the Sindh frontier.' At Kurrachee, the annual fall of rain does not exceed six or eight inches, at Hyderabad, the rain of an entire twelvemonth amounted only to 255 inches and farther north, at Larkhana, three years had elapsed continuously without rain at the time of Hamilton's visit in 1699. The consequence was a pestilence, which cut off one-half of the population. But Bornee, in travel

ling through the delta on the 10th of April, experienced very heavy showers and a severe fall of hail and in June, 1809 during the visit of the British mission the rain fell so heavily there, that the streets frequently resembled rivulets, and none could stir abroad. In the following August, the rains were again excessively heavy during the stay of the mission at Hyderabad. But, notwithstanding the discrepancy in our information on the subject, there can be little doubt that, throughout Sindh, the climate is generally too dry for the purposes of agriculture, except in the parts irrigated by means of the river. On this subject, the ameer of Khyerpoor remarked to Bornee, that rain always brought disease and that they were better without it. The temperature is very high in summer. Lord states the mean maximum of the temperature of the atmosphere at Hyderabad during the six hottest months, to be 93.5 in the shade and considers it the greatest hitherto registered in an authenticated form. The water of the Indus at that time attains the temperature of 92° or 93 when highest, and consequently very nearly blood heat. There appears reason for concluding that the temperature is still higher in Northern Sindh where the cooling influence of the ocean cannot extend. Bornee states it at 96 at Khyerpoor in the beginning of April. In Northern Sindh, however frost is not unknown and ice has been observed in February. In January the difference of the temperature at night and during the day has been found as much as 40, the thermometer ranging to 84 and upwards. So high however in general is the temperature in Lower Sindh, that there is, in fact no winter.

The natural history of Sindh is only now receiving the attention due to so important a subject. An extravagant addiction to field sports characterized the ameers of Sindh, who sacrificed to it the welfare and even the existence of their subjects, laying waste and inclosing extensive cultivated tracts to form their *shikargahs* or hunting jungles. One of the ameers, some years ago depopulated, near the capital an extensive tract of fertile ground, and converted it into a shikargah, though this foolish and monstrous act of tyranny caused a loss of revenue equal to 20,000, or 30,000 a year. Another razed a village to the ground, because the noise of the population and domestic animals was considered to disturb the game of a neighbouring preserve.

There are generally two harvests in Sindh the rabbee, or spring harvest, reaped from seed sown in autumn and the kureef, or autumn harvest which is sown in spring. The rabbee crops in general consist of wheat, barley, oil seeds, millet (*Holcus sorghum*), the durra of the Arabians, and called here bayra, opium hemp, tobacco, the kureef crop consists of those productions which require considerable heat to bring them to maturity such as rice, sugarcane, cotton, indigo, maize. The results of the experiments made for the cultivation of

the American cotton and *Mauritius* cane were not encouraging. Pulse and pumpkins, cucumbers, melons, and esculent vegetables, are sown for both crops, and some products are sown indifferently for either. Rice appears to be the staple crop, and, with maize and wheat, forms the principal article of diet, besides being exported in great quantities. Much importance is attached to the culture of flax. The fruits are dates, mangoes, plantains, pomegranates, limes, citrons, figs, apricots, apples, plums, tamarinds, mulberries, pistachio and some other kinds of nuts, and melons. They in general, are of inferior quality the grapes especially are small and sour. The plantations of date-palms are very general and extensive and the fruit is used largely for food and for distillation by which process a strong spirit is drawn from it. As food it is found to be of a very heating nature.

Camels are bred in great numbers in the salt-marshes of the Indus and though such tracts might seem very uncongenial to the nature of that animal, those reared there are considered very hardy strong and enduring especially of thirst, in consequence of the scanty supply of fresh water in their original soil. The value of the camel is not confined to its virtues as a beast of burden its milk is a favourite article of diet (though it spoils if not used very fresh) and its hair is woven into coarse cloths. Buffaloes are kept in great numbers in the swampy tracts, where they may be seen wallowing in the mud with their heads only above water. Their flesh is excellent and their milk is preferred to that of cows, yielding better butter which, when clarified forms, under the name of *gher* a great article of commerce. A considerable trade is also driven in the hides of these animals. Sheep and goats abound in Upper Sindh, especially on the borders of the *Pat* of Sukarpur and of the *Thur* or Eastern Desert. The former district called Boordgh produces the best wool in Sindh both of goats and sheep and both animals are kept throughout Upper Sindh, as well for their fleeces as for their milk and flesh. The wool is taken from the carcass of the animal only when slain for food, as the heat would cause its death after losing its fleece. The coarser wool is manufactured into bags, ropes, and strong clothes the finer might be obtained in such quantities as to be an important branch of commerce for which however there has been hitherto but little encouragement. The horses of Sindh are small and of mean appearance, but hardy active, and enduring. They are mostly used for the saddle the beasts of burden being the camel, the mule, and the ass. The camel is the dromedary or one-humped variety and the finer descriptions are used for the saddle, carrying generally the rider and his attendant. The breed of asses is small, but they are neatly made, strong active, capable of enduring great fatigue and of living and thriving on the coarsest fare. The mules are large, strong handsome, and quick in pace.

The Sindians of the present day are a mixed race, consisting partly of the Jats, probably aboriginal Sindians, of Hindoo extraction (many of whom have been converted to Mahometanism), and the Beloo who have settled here in recent times. Those Hindoos who have adhered to their original religion and manners are divided into Bhattias and Lohannas, with their respective gurus or pastors, and the Pokarna and Sarat Brahmins. They deviate much in their mode of life from the Hindoos of Hindostan proper and this laxity is more particularly observable in the Lohannas, who are the most numerous. These last decline no means of subsistence and readily entered into the service of the amirs, in which case they were obliged to wear their beards like the Mahometans. Compulsory conversions to Mahometanism were not infrequent, the helpless Hindoo being formerly subjected to circumcision on slight or misconstrued profession, or the false testimony of abandoned Mahometans. It is still more remarkable, that this forcible conversion was sometimes inflicted as a punishment and in all instances operated as an irreparable loss of caste. The Mahometan population sprung from the converted Hindoos are a penonable race generally engaged in agriculture, and are despised by the Belooches, who affect a bold and martial character. In this, the latter have been encouraged by the amirs, of the same descent as themselves. Besides these distinctive races, there is a large part of the population the offspring of their intermarriages. The Hindoos, however in many places form a very large proportion of the population at Sukarpur for instance, they are estimated at two thirds. There are likewise a few Afghans, especially in the north western part of the country. The Sindians, collectively are described as hard some though of dark complexion, well limbed, but inclined to corpulence and above the middle size. The beauty of their women is proverbial, and Pottinger remarks that among the numerous sets of dancing girls whom he saw there was not one who did not display loveliness of face or symmetry of figure. The Belooches, and the mixed race between them and the Hindoos are considered the finest part of the population. Sindh is supposed by Sir William Jones to have been the original country of the gipsies, who, according to Adelung fled from India to escape the manacles of the ruthless Tamerlane. The Sindian language is a branch of the Sanscrit or Indo-Germanic stock, merely a little differing in spelling and inflection from the pure Hindi of Upper India, and is by some considered the elder of the two being more elaborate and regular in the inflections of its nouns and verbs. Macnair states, on the authority of native scholars, that "it has fewer modern innovations, and a greater number of Sanscrit words than the Gujarati, which is a pure Hindoo dialect." It has a character peculiar to itself, which is written from left to right. Beloochee, another of the Indo-Germanic

tongues, is of course largely spoken especially in the hilly country, and Peralan may be regarded as the language of the court and of the higher order of the people.

From the period when Sinde was visited by the Greeks under Alexander its history is in a great degree a blank. Native annals appear to be magniloquent in regard to the grandeur and resources of some of its princes and on the event of a revolution, brought about through the criminal passion of a queen for a young Brahmin, who was enabled by her favour to ascend first to the office of chief minister, and subsequently to the throne, the historian who records the facts indulges in the following burst of mingled grief and admiration — Such was the close of the race of Ragh Sasee which had governed the kingdom of Sinde for upwards of 2,000 years whose princes at one period received tribute from eleven dependent kingdoms and who had set the threats of the greatest monarchs of the world at defiance. In the sixth century of the Christian era the country was invaded by the Persians, and to this invasion probably refers the allusion of the enthusiastic chronicler above quoted to the defiance offered by the royal house of Sende to the greatest monarchs of the world. The result, however was disastrous to the reigning prince, though unproductive of any permanent change in the relation of the two countries. The Persians defeated the rajah in a pitched battle in which the prince fell. But the object of the invaders appears to have been not so much conquest as plunder and having secured as much booty as they had the means of carrying away they departed. Among the spoils which they bore from Sinde were some thousands of its most beautiful women.

At an early period of the Khalifate the reputed wealth of Sinde seems to have excited the cupidity of the representatives of the Prophet, but their attempts, for a time were unsuccessful. A subsequent invasion was attended by a different result. The Khalifs were in the habit of importing slave-girls from Sinde and a party of the followers of the Khalif Abul Mulk, in charge of a selection of Hindoo beauties, destined for the harem of their master were attacked by the rajah's troops, some of them killed and the remainder made prisoners. This occurrence provoked a hostile visit from a Mahometan army. The rajah was permitted to remain quiet in his capital while the enemy were ravaging his dominions with fire and sword, and when, at last, he left the city with his army it was but to encounter disaster defeat, and death. The events of the battle transferred the kingdom to Mahometan rule.

Some centuries later Sinde became a tributary to the empire of Ghuznee. On the dissolution of that empire, the Sindian chiefs asserted their independence against the Ghorians during many years, and with various success. Ultimately they were compelled to yield and

Sinde became a consistent part of the imperial dominions. In the time of Baber it was invaded and conquered by the prince dispossessed by that emperor at Kandahar. The invader was subsequently compelled to yield the larger portion of his conquest. His son made an effort to regain what his father had lost, but found new enemies to whom he was compelled to make large sacrifices. Sinde then, for a time, maintained a claim to independence but was the scene of great disorders, two successive princes being afflicted with insanity in its most outrageous form. Late in the sixteenth century it yielded to the emperor Akbar and for about 150 years it remained in the usual condition of Oriental dependencies its chiefs usually professing unqualified submission to the emperor paying tribute when they could no longer postpone it but scrupulously evading that acknowledgment of supremacy whenever their fears were not sufficiently active to prompt to a different course. In 1739 Sinde fell to the Persian conqueror Nadir Shah. On his death and the consequent dismemberment of his empire, it seems to have reverted to its nominal subjection to the imperial throne of Delhi. In 1768, Sinde was included in certain territories forming part of a dowry bestowed by the reigning emperor upon Tymur son of Ahmed Shah Durrani. It is thenceforward to be regarded as an appendage of Kabool, the new relation being maintained precisely in the same mode as that previously existing with the sovereign of Delhi. In 1779 a rebellion was raised by the Talpoor tribe of Belooches against the reigning nawab of the Kooloon tribe who was defeated and forced to fly. He was reinstated in his dominions by the aid of the ruler of Kabool, and the insurgents retired. They soon, however returned, deposed the Kooloon prince once more, and took possession of his throne and power. The ruler of Kabool again advanced to maintain the rights of his dependant, but the usurpers had collected an army superior to that of the Afghans, which they totally defeated. This was in 1786. Fortune being against the Afghan prince it only remained for him to make the best terms he could. The battle was followed by negotiation in virtue of which the Talpoor chief engaged to discharge all arrears of tribute, and to meet the accruing payments in future with punctuality. Within little more than three years presuming on the inability of the nominal emperor to coerce them, the rulers of Sinde signified their indisposition to paying tribute at all, and the weakness of the Durranie government insured to them for a time impunity. Zeman Shah approached their frontier in 1794, to enforce the demand of his house, but was prevailed on to return with a small portion only of the arrears due. A similar result attended the advance of Shoojah-ool Moolk in 1809 he received a sum equal to something more than one-third of the amount which had accumulated, and returned, perhaps not altogether indisposed to congratulate him

self on his good fortune in obtaining anything. The disturbances which subsequently prevailed in Afghanistan were admirably calculated to gratify the dislike of the ameeers to dispensing any part of their treasures in the shape of tribute.

The government of Sindh, under the Talpoor dynasty, has been quaintly described by Kennedy, as a tailor-like personification of royalty requiring precisely nine ameeers or princes to make up one sovereign. In 1738 when Meer Fatah Ali the Balooche chief of the Talpoor tribe, succeeded in expelling the Kalora dynasty and was recognised by the Durani monarch, he assigned large tracts of country to those of his relatives who had aided his enterprise to Sohrab Khaypoor and Northern Sindh to Thara, Meerpoor in the south east, with the adjoining country at the same time investing them with independent powers. He reserved Hyderabad and the greater part of the country for himself and his three brothers, residing with them in the same palace and publicly administering the government with them in the same common durbar (hall of audience). Thus the country became divided into three states—Hyderabad, Khaypoor, and Meerpoor—each having their little knot of ameeers or rulers. In 1839 there were four ameeers of Hyderabad, the sons of the first who enjoyed the dignity. There were at the same time three ameeers at Khaypoor and one or according to Kennedy two at Meerpoor.

The government under the Talpoor ameeers appears to have been a military despotism unchecked, except by a regard to the dogmas of Islam. The ameeers held courts of justice every Friday and reserved to themselves the right of deciding in cases of life and death. These potentates, in time of peace had no more standing army than was sufficient to guard their persons and treasury to collect the revenue and retain the forts. Their avarice made them keep the regular military force so low in point of number that it probably did not exceed 1500 men. For great and important occasions of national warfare, the army consisted of a feudal soldiery maintained by the respective chieftains, to whom had been allotted jaghires or grants on condition of bringing into the field a proportionate number of men for whom they were responsible, incurring forfeitures in cases of serious misconduct.

The relation of the British government with Sindh was at no time very close or very friendly. It was always characterised by coldness and suspicion on the part of the Scindian authorities and sometimes by stronger marks of dislike. The agents of the East-India Company resorted thither for the purposes of trade but early in the present century the commercial resident of the Company was violently expelled and a large amount of property in his custody seized. According to Pottinger an attempt was made to murder the Resident. That author deems it matter for regret that on that

occasion the ameeers were not "made to feel the force of our arms within their dominions had that been the case he continues, their conduct would doubtless have been of a very different nature towards the late missions to their court." Those missions were treated in various instances with great indecorum, and attempts were made to cast indignity on them in matters of etiquette and ceremony. In 1809, however a treaty was concluded the most important article of which was the following — "The government of Sindh will not allow the establishment of the tribe of the French in Sindh" it being then an important point to exclude from the vicinity of our Indian possessions an enemy who had long been desirous of attacking them. In 1820, another treaty was concluded the chief object of which seems to have been the exclusion of European and American adventurers from the dominions of the ameeers. A new treaty was formed in 1832 the most important provisions of which are those relating to the opening of the roads and the river of Sindh to the merchants of India. This privilege is stipulated for by the third article and by the fifth, fixed and moderate duties are to be levied but the concession was shackled by three conditions. First that no military stores should pass second that no armed vessel or boat should come by the river and third, that no English merchants should reside in Sindh but should come as occasion might require transact their business and return to India. The third restriction was a step in retrogression it having been stipulated in the treaty of 1820 that if any of the subjects of either of the two states [the British and the Scindian] should establish their residence in the dominions of the other, and should conduct themselves in an orderly and peaceable manner in the territory to which they may emigrate, they will be allowed to remain in that situation. The change sufficiently marks the jealous feeling of the ameeers towards the British government, while the first and second of the restrictions operated materially to diminish the value of the opening of the Indus. A commercial treaty was concluded in the same year and thus rested the relations of the Anglo-Indian government and Sindh till 1838 when Runjeet Singh prepared to carry into effect a design which he had long meditated of reducing Sindh to subjection to himself. By the interposition of the government, however he was prevailed upon to suspend his progress, and the opportunity being thought favourable for establishing a closer connection with Sindh Colonel Pottinger was despatched to negotiate for the purpose. After a measure of delay proportioned to the practice of Eastern courts, a treaty was concluded in April 1838 which possessed at least the merit of brevity. It contained only five articles by the first of which the British government engaged its good offices to adjust the differences between the ameeers and Runjeet Singh. by the second,

It was stipulated that an accredited British minister should reside at the court of Hyderabad, and that the ameer should be at liberty to depose a vakeel to reside at the court of the British government.

The British government was now engaged in a series of measures designed to erect a barrier to the Anglo-Indian empire by settling Afghanistan under a prince believed to be friendly to British interests, and an invasion of that country was meditated for the purpose of restoring Shoojah-ul Moolk to the possession of the dominions then held by Dost Mahomed Khan and his relations. With a view to this, a tripartite treaty was concluded in July 1838, the parties thereto being the British government of India, the exiled Shah Shoojah-ul Moolk and the Sikh chieftain Ranjeet Singh. Preparatory to carrying out its object, it became necessary to establish some more satisfactory relation with Sind, and measures were taken accordingly on which the treaty above mentioned was signed. A copy of it, with other papers illustrative of the existing policy of the British government, was transmitted to Colonel Pottinger who was instructed to the following effect:—He was to apprise the ameer of the conviction of the Governor-General that a crisis had arrived at which it was essentially requisite to the security of British India that the real friends of that power should unequivocally manifest their attachment; he was to inform them of the intentions of the British government with regard to the westward, and to point out articles in the tripartite treaty by which that government engaged to arbitrate on the claim of Shoojah-ul Moolk, as sovereign of Afghanistan, upon the ameer of Sind; and proposed to bring also to a final settlement the claims of Ranjeet Singh, as connected with the Shah and with the territories along the course of the Indus formerly included within the dominions of the Afghan kingdom. Colonel Pottinger was also to intimate the approach of Shah Shoojah, supported by a British force, to express a hope, on the part of the Governor-General, in the friendly dispositions of the ameer, and to warn them that the disappointment of that hope would render necessary the temporary occupation of Shikarpore and of as much of the adjacent country as might be required to afford a secure basis to the contemplated military operations, while, by neglecting to avail themselves of the proffered mediation in regard to the claim of Shoojah they would become exposed to the full effect of any measures which he might deem proper for the enforcement of his claim which, under such a supposition the Governor-General could not interfere to control. The instructions advert to some other points, but the above are the chief.

Colonel Pottinger, in the discharge of his duty had to encounter a full share of the impediments usual in oriental diplomacy and the general conduct of the ameer of Hyder-

abad was such as to lead to an unqualified suspicion of their hostile feelings, the British army however passed without molestation, and the members of the British mission were compelled to take their departure. Alexander Burnes was somewhat less difficult, though here a great obstacle to the conclusion of terms existed in the demand of the British government for the surrender of the fortress of Bukkur. The ameer at length gave way, and signed a general treaty of alliance, together with the most unpalatable article, conveying to his ally the right of occupying the strongest hold in his dominions. The Hyderabad ameer also finally gave way and after various unsuccessful attempts at agreement, ratified a treaty originally consisting of twenty one articles, but which had been cut down by the Governor-General, Lord Auckland, to four teen. Among the articles expunged were several prescribing the manner in which intercourse should be carried on with the port of Kurrachee. Hostile possession of that place had previously been taken by a British force, and the Governor-General regarded this fact as placing in the hands of the captors the power of dictating the terms on which intercourse with the port should be carried on. The general effect of the treaty was to place the territory of the ameer of Hyderabad in a state of subsidiary dependency on the British government. A treaty nearly corresponding with that entered into with the Hyderabad chiefs was subsequently concluded with Mero Shero Mohamed Khan, ameer of Meerpoor.

These arrangements did not prevent the recurrence of disputes. The disasters encountered by the English in Afghanistan were calculated to call forth the latent particles of enmity to that power wherever they might lurk, and some of the ameer at last were confidently believed to have passed beyond hostile wishes, and to have committed themselves to acts inconsistent with their relations of perfect amity and alliance with the British government. These circumstances were thought to call for some considerable changes in the existing treaties and Sir Charles Napier was entrusted to negotiate new treaties, his diplomatic functions being sustained by a considerable military force to act against the ameer in case of necessity. The ameer hesitated but ultimately the treaty was signed by those of Lower Sind, amidst the clamours of a host of infuriated Belooches, who openly insulted the officers of the British residency and their servants. On the following day the residency was attacked and its inmates were obliged to seek safety elsewhere. Sir Charles Napier immediately advanced, gave battle to the enemy on the 17th February, 1843 and though the Belooches fought bravely, succeeded in achieving the signal victory of Meeanee,—a result greatly aided by the superiority of the arms of the British forces over those of their opponents. Triumph continued to attend the career of the victorious general.

He was again successful in defeating the army of the sinner of Meerpoor, and the result was the complete subjugation of Sind. Of the conquered territory a small portion was added to Bahawalpoor, a tract far more considerable was conferred upon Ali Moorad of Khyrpoor but of this the sinner has been recently dispossessed, under circumstances which will be found narrated in the article KHYRPOOR and he now retains only the territory which he had inherited. With these exceptions the province has been annexed to the British dominions, stipends have been granted to the ameer, amounting in the aggregate to 45,614*l* of which the sum of 18,284*l* is allotted to the Khyrpoor branch 25,290*l* to the Hyderabad branch and 3,060*l* to the Meerpoor branch.

Since its annexation to the British dominions, Sind has been distributed into three collectorates those of Shikarpore Hyderabad, and Kurrahee. The province is traversed by a railway running in a north easterly direction from the seacoast, and which with its extensions, will probably at no distant period connect every part of Northern India with the flourishing port of Kurrahee. The last census gives a population of 1,087,762. A new system of revenue administration has been introduced annual fairs have been established at Kurrahee and Sukkur and customs duties, previously levied on the land frontier and on the river Indus, have been altogether abolished. The country is represented as rapidly improving according to official reports lands which have lain waste for half a century are now under cultivation old canals, long choked up, are reopened and fresh ones are constructed new villages are springing up, and people go about everywhere unarmed and in perfect safety.

**SINDE CANAL** flowing from the Indus, at lat. 27° 59' long 69°, through the British district of Shikarpore.

**SINDE SAGUR DOOAB**—A division of the Punjab situated between the river Indus to the west, and the Chenab and Jhelum rivers to the east. Its limits are from lat. 28° 27' to 34° 33' and from long 70° 31' to 75° 39'.

**SINDKHAD**—A town in Hyderabad territory of the Nizam 54 miles E from Aurangabad and 111 miles N.E. by E from Ahmednuggur Lat. 19° 55', long 76° 11'.

**SINDOODIBOOG**—See MALWAN.

**SINDOORNEE**—A town in the British district of Candesh, presidency of Bombay 72 miles E. of Malignum Lat. 20° 35', long 75° 37'.

**SINDOUSH** in the British district of Etawa, head-gov of the N.W. Provinces, a fort and village in the pergunnah or subdivision of Burpoora. It was until lately a fearful den of thieves, the inhabitants, who are Rajpoots, intermixed with a few Brahmins, being a wild race, and until roughly handled by the British

authorities, the principal haunts of thugs in that part of India and it was at Murza, adjoining Sindoush [Sindous], that Lieutenant Maunell was killed on duty with Mr. Halhed, then in pursuit of the thugs. This enforced honesty has been more beneficial to the neighbouring districts than to the lawless occupants of the wilds of Sindoush since the resources of the simeendars have been greatly straitened by the expulsion of the thugs and they have since much declined in prosperity. It contains nineteen mousahs or hamlets Sindousi the principal place, is eight miles W of the right or west bank of the Jumna, 22 miles E, of the cantonment of Etawa. Lat. 26° 39', long 79° 10'.

**SINDRAPA**—A town in the native state of Jallera, on the south west frontier of Bengal 53 miles S.E. by E. from Buzulpoor, and 90 miles N from Goomsoor Lat. 21° 9', long 84° 44'.

**SINDREE**, in the Rajpoot state of Jodhpore a town on the left bank of the river Sonce and 90 miles S.W. of the town of Jodhpore. Boileau who passed near Sindree, states merely that it is a place of some consequence and nothing more appears to be known about it. Lat. 25° 32' long 71° 59'.

**SINDUNOOR**—A town in one of the sequestered districts of Hyderabad 25 miles S.E. by E from Moodgul and 43 miles W from Bellary Lat. 16° 46', long 76° 50'.

**SINDWA** in the presidency of Bombay a village with a fort on the route from Mow to Bombay 90 miles S.W. of former 274° N.E. of latter. It is situated nine miles outside and north of the Sindwa Ghat, or pass across the Satpore range of mountains. The ghat is a descent moderately steep from the highlands, amidst the Satpore range, to the valley of the Tapi, in Candesh, and being traversed by the Bombay and Agra road it has become a much frequented channel of communication and trade. The fort, which is of masonry, about a mile in circumference was, with a garrison of 2,000 yards, ceded in 1818 to the British government by Holkar by the treaty of Mundeasoor but has been recently restored to Holkar upon the condition of his building a bridge over the Gohar river Lat. 21° 40', long 75° 20'.

**SINDWAH** in the British territory of Saugor and Nerbudda, a small town on the route from Tehree to Oojein 20 miles S.W. of former 246° N.E. of latter. It has a fine tank, embanked with masonry, and is situated in a remarkably fine country Lat. 24° 30', long 78° 40'.

**SINDWARA**—See CHINDWARA.

**SINGA** in Dummshir a pass crossing the range of Himalaya bounding Kunawar on the south. This pass and three others traverse the crest of the ridge within a space of little more than a mile. It is open during May, June, July, and the first half of August, but

# SIN

nearly impracticable at other times, on account of the scow which either sinks under the traveller, or parts into deep fissures. Its elevation above the sea is between 16 000 and 17,000 feet. Lat. 31 15', long 78 29'

**SINGAPORE**—A town in the Rajpoot state of Jeypoor, situate on the left bank of the Laiglah river and 71 miles E N E. from Jeypoor. Lat. 19 30', long 83 28'

**SINGAPORE**—An island situated in the Straits of Malacca, at the southern extremity of the Malay peninsula, from which it is separated by a narrow strait, which though not exceeding half a mile in breadth at some points, was formerly the channel of navigation between India and China, now carried on by a more southward course. According to a statistical report, prepared by order of the government, the island appears to be twenty six miles in length and thirteen in its greatest breadth, and to contain an area of 375 square miles. The physical aspect of the island is characterised by a low and undulating surface, rising in parts into rounded hills. From a view taken from one of the most elevated spots about the town the whole island appears to be pleasingly diversified with hill and dale, and covered with luxuriant foliage to the water's edge presenting to the eye a scene that has repeatedly excited admiration. There appears to be only one hill of any considerable elevation in the island namely Bukit Temiah which is situated near the old straits, and which seems to be about 500 feet in height. The climate of Singapore though hotter than that of Malacca, is noted for its salubrity, the thermometer ranges from 71 to 89, frequent tropical showers tend to keep vegetation in a state of perpetual verdure and the island continues to attract invalids seeking the removal of the prejudicial effects of the sultry climate of Hindoestan. The soil, except on the hills, is generally alluvial producing fine crops of sugar cotton, coffee, nutmegs, and pepper. Attempts have been made to cultivate the clove but these have proved unsuccessful. For rice the island is dependent upon external commerce. The population of Singapore has rapidly increased from the date of its occupation by the British in 1819. At that period it consisted only of about 150 fishermen and pirates, living in a few miserable huts. In 1824 when the first regular census was taken, the number of inhabitants amounted to 10 553 twelve years later they numbered 39 084, and according to the latest return (1843) the total population of the island inclusive of military and convicts, had then increased to 57 421.

Singapore owes its prosperity to the freedom of its port, which has rendered it the great entrepôt for the goods of Europe and Asia. The number of European or American vessels arriving or departing from its port amounted in one year (1853-54) to 1 028, of which 644 were British, the aggregate tonnage was 346 997 tons. The arrival of native vessels in the

same period numbered 2,510, with a tonnage of 75 858 tons. The value of the trade for the same year was as under —

Imports	£4 481 454
Exports	3,748 939
Total	£8,230,393

Singapore is one of the penal settlements for India. Setting aside the cost of its convict establishment, the revenues of the island are represented as nearly equalling the expenditure, and thus, at a trifling cost, this great commercial depot is maintained, with an annual commerce valued at from six to seven millions sterling. Singapore has no fortress, and its defenceless state has recently occupied the attention of the government. It has been well observed, however that in the event of a European war the only defence upon which reliance could be placed would be a British fleet, and that any other should be calculated only for the repulse of privateering attacks, or for resistance against assault, in the event of the temporary absence of men-of-war. In accordance with this view, it has been determined to limit the fortifications of Singapore to a few batteries, which have been erected on commanding positions within the island. The harbour affords a safe anchorage to vessels at all seasons, its position is also favourable for commanding the straits and from the great and growing importance of the settlement, the eligibility of the locality as a naval rendezvous has been strongly urged.

In regard to the promotion of commercial interests, the British government in 1818 were desirous of establishing a settlement in the Eastern Archipelago. Its accomplishment was confided to Sir Stamford Raffles, and the result was an arrangement, made in 1819 with the tumongong or governor of Johore for the transfer of Singapore to the British, in consideration of a pecuniary equivalent. Subsequently the absolute cession of the island in full sovereignty was effected by a formal treaty with the sultan of Johore, dated August, 1824, and the territory was recognised as part of the British empire under the twelfth article of the treaty concluded with the king of the Netherlands in the same year. It now forms one of the British possessions termed the Eastern Settlements, which embrace this island, Malacca, Province Wellesley and Penang or Prince of Wales Island the last named being the seat of the government, which is directly responsible to the government of India.

The town of Singapore is built on both sides of the embouchure of a small river, that empties itself into the sea at the western head of a deep bay and which is navigable for small craft. Lat. 1 15' long 103 58'

**SINGABENY**—A town in Hyderabad, or territory of the Nizam 120 miles E. from Hyderabad, and 85 miles N by W from Guntoor. Lat. 17 31, long 80 20

**SINGARPOOR.**—A town in the British district of Saran, lieut. gov. of Bengal, 28 miles N of Bettiah. Lat.  $27^{\circ} 6'$ , long.  $84^{\circ} 31'$

**SINGARUPATTI.**—A town in the British district of Salem, presidency of Madras, 63 miles N E by N of Salem. Lat.  $12^{\circ} 15'$ , long.  $78^{\circ} 42'$

**SINGAWALLA,** in Sirhind a small town twenty miles from the left bank of the Sutlej. It was comprised in the possessions which the maharaja of the Punjab held to the left of the Sutlej under British protection and control but has since been incorporated with the British district of Ferozepore. Distant N W from Calcutta 1,146 miles. Lat.  $30^{\circ} 46'$ , long.  $75^{\circ} 11'$

**SINGGAH,** in the British district of Tirhoot, lieut. gov. of Bengal a town on the route from Dinapore to Katmandoo, 29 miles N E. of former 176 S of latter. At Balgung closely contiguous to it, is the thana or police-station of the police division of the same name. Lat.  $25^{\circ} 50'$ , long.  $86^{\circ} 15'$

**SINGHA,** in the British district of Shahjehanpore lieut. gov. of the N W Provinces, a town on the route from Futtighurh to Shahjehanpore and 18 miles N of the former. Lat.  $27^{\circ} 38'$ , long.  $79^{\circ} 40'$

**SINGHANA,** in the Rajpoot territory of Shekawtee a town near the eastern frontier towards Jhuyar. Biphinstone describes it as a handsome town built of stone on the skirts of a hill of purplish rock about 600 feet high. In a rocky hill two miles S.W. of the town is abundance of copper ore which is worked to considerable extent, the subterraneous galleries being in the aggregate nearly two miles in length. The miner's occupation in every case painful here is peculiarly so from deficient skill and capital and most stark under their labours before they have attained forty years of age. The ore is of very poor quality yielding from two to seven per cent. and the miners pay to the Ketr raja, the proprietor a sixth of the produce besides a fixed rent of 14,000 rupees annually. There are two kinds of ore—a sulphate and a sulphuret. The scorite or khangar that have been accumulated for ages, form a line of small hills several hundred feet in length and from thirty to sixty feet high. There are four isolated stone bastions built on those artificial hills. Distance of Singhana from Agra, N W 149 miles, S W from Delhi 95 N from J-yypoor 80. Lat.  $28^{\circ} 6'$ , long.  $75^{\circ} 55'$

**SINGHAPOOR** in the British district of Shahjehanpore lieut. gov. of the N W Provinces, a village on the route from Bareilly to Seetapore and 41 miles S.E. of the former. Lat.  $28^{\circ} 9'$ , long.  $80^{\circ} 4'$

**SINGHARPOOK,** in the British district of Agra, a village on the route from the city of Agra to Jeypore, and 17 miles W of the former. Lat.  $27^{\circ} 7'$ , long.  $77^{\circ} 42'$

S 2

**SINGHBHOOM.**—A district of British India, under the superintendence of the political agent for the south west frontier comprehending within its limits Colaban, Sorakalla, Khumsa, and another petty native state bearing the name of the district. It lies between lat.  $22^{\circ}—22^{\circ} 53'$ , long.  $85^{\circ} 7'—85^{\circ} 12'$  is sixty miles in length from east to west, and fifty in breadth from north to south. The area of the portion strictly British is stated to be 2,944 square miles. The population of the British part is returned at 200,000. The only place probably to which the name of town can justly be applied is Chailbasa, where the civil establishment is located. There also a detachment of the Ramguri light infantry and some local horse are stationed and there is a jail for criminals. The rajah of the petty state called Singhbhoom pays a tribute of 107 rupees, the computed annual value of the estate being only 4,000. The other small states comprehended within this district will be found noticed under their respective names in the proper places in the alphabetical arrangement.

**SINGHESUR.**—A town in the British district of Bhagulpore lieut. gov. of Bengal, 51 miles N by W of Bhagulpore. Lat.  $25^{\circ} 50'$ , long.  $86^{\circ} 51'$

**SINGHLA** in Sirhind a village on the route from Hansa to Ludhiana, and 84 miles N of the latter town. It is situated in a country with a slightly undulating surface, moderately fertile and partially cultivated. Distant N W from Calcutta 1,055 miles. Lat.  $30^{\circ} 27'$ , long.  $75^{\circ} 59'$

**SINGHPUR.**—In the British district of Shahjehanpore, territory of Saugar and Narbudda, lieut. gov. of the N W Provinces, a town on the route from Sohagpur to Ruttunpur 10 miles S.E. of the former. Lat.  $28^{\circ} 11'$ , long.  $81^{\circ} 30'$

**SINGIMAREE.**—A town of North Eastern India, in the British district of Goalpara, 56 miles S W by W of Goalpara. Lat.  $25^{\circ} 41'$ , long.  $89^{\circ} 53'$

**SINGOLA,** in the British district of Budaon lieut. gov. of the N W Provinces a village on the route from Allypore to Moradabad, and 36 miles S W of the latter. Lat.  $28^{\circ} 37'$ , long.  $78^{\circ} 26'$

**SINGON.**—A town in the native state of Indore or territory of Holkar 52 miles S.S.W. from Indore, and 122 miles N.E. from Mallgaum. Lat.  $21^{\circ} 59'$ , long.  $75^{\circ} 24'$

**SINGORA.**—A town in the native state of Phoolpur, on the south western frontier of Bengal, 50 miles W S W from Sumbulpore and 96 miles S. from Odalpur. Lat.  $21^{\circ} 18'$ , long.  $83^{\circ} 15'$

**SINGOWLEE.**—A town in the Rajpoot state of Oodeypore 100 miles E.N.E. from Oodeypore, and 46 miles N.E. by N from Neemuch. Lat.  $25^{\circ}$ , long.  $75^{\circ} 20'$

**SINGPOOR,** in the British district of Mirra-

poor hant-gov of the N W Provinces, a town on the route from Mirzapoor to Sirgoudah, 78 miles S. by E of the former Lat. 24° 7', long 82 55'

**SINGPOOR**, in the British territory of Sagar and Nerbudda, hant-gov of the N W Provinces, a town on the route from Sagar to Seoni 68 miles S.E. of the former Lat. 22 58', long 79 18'

**SINGPOOREAH**, in Sirhind, or the Oisutlej territory, an estate formerly held by one of the protected Sikh chiefs. Upon the decease of Umar Singh, in 1848, a collateral branch of the family was admitted to the inheritance; but the chief no longer exercises independent powers within his possessions. Lat. 31 2' long 78 40'

**SINGRAMOW**, in the British district of Jounpore hant-gov of the N W Provinces a town on the route from Jounpore cantonment to that of Seolitanpore in Onda, 25 miles N W of the former 33 S.E. of the latter Lat. 25 67' long 82 28'

**SINGROUR**, in the British district of Allahabad, hant-gov of the N W Provinces, a town on the left bank of the Ganges, 37 miles above the city of Allahabad by the river, and 885 miles from Calcutta by the same way Lat. 25 25', long 81 42'

**SINGROWLEE**—A tract of country of which a portion (termed the Sapore or Shah pore division) now belongs to the rajah of Rewah, and the remainder (styled Singrowlee Proper) to the British government, forming a pergunnah of the district of Mirzapore. The boundaries of the entire tract are as follow—North the Mirzapore pergunnah of Agoree east, the British district Palamow south east and south Sirgouda, in Gundwana, subject to the British, west, Rewah and north-west, Burdoo. It lies between lat 23 44'—24 24' long 82° 18'—83 17' its length from east to west is seventy miles, and its breadth from north to south thirty five. The British portion consists of the tract lying eastward of long 83° 49' and comprises about one half of the whole territory. The rajah of Singrowlee was dependent upon the British government for one part of his zemindary termed Singrowlee Proper, and upon the Rewah rajah for the remaining portion, named Shahpore. Of this last, however he was, in 1840, dispossessed by the rajah of Rewah, and the rest has been since incorporated with the district of Mirzapore, of which, as above stated, it forms one of the pergunnahs.

**SINGUR**, in the Rajpoot state of Jodhpur, a village on the route, via Nagor from Jamulmeer to Numsarabad, and 101 miles N W of latter. The only water obtainable is from a very brackish well and from a tank, which becomes dry in hot weather, when the inhabitants have recourse to a well four miles distant. The road is good, passing over a large plain. Lat. 27° 10', long 73 40'

**SINGURH**, in the British collectorate of Poona, presidency of Bombay a fort among the mountains south of Poona. It was originally called Konarah, and received its present name from Sevajee, the founder of the Maratta sway, who in 1667, obtained it by bribing the commandant. In A.D. 1665 Sevajee, hoping to make his peace with Aurungzebe, surrendered this place to his general Jas Singh, but subsequently revolting recovered it by surprise in the year 1670. After a lapse of more than thirty years, Singurh again appears as an object of contention between the Marattas and the Mahomedans. Between 1701 and 1705 Aurungzebe laboured incessantly to annihilate the Marhatta power and in that period was successful in reducing many of their forts of which Singurh was one. The emperor did not long retain his prize it being retaken by one of the Marhatta leaders to the great annoyance of Aurungzebe who forth with despatched one of his generals to recover possession of the place a mission in which he succeeded from the failure of supplies in Singurh. From the same cause it was almost immediately retaken by the Marhattas, who continued to hold it during the remaining period of their ascendancy. In 1817 it was surrendered by the Peshwa to the British troops and restored to him at the close of the same year. After the expulsion of that chief from Poona, in 1819 it was invested by a considerable British army and having suffered much from shells and shot, the garrison, at the end of ten days capitulated. This took place on the 1st of March. The natural strength of Singurh is very great, from its situation among the Western Ghats. With these hills it only communicates on the east and west, by very high, narrow ridges, while on the south and north it presents a huge rugged mountain, with an ascent of half a mile in many parts nearly perpendicular. After arriving at this height there is an immense craggy precipice of black rock, upwards of forty feet high and surmounting the whole there is a strong stone wall, with towers. The fort is of a triangular shape, its interior upwards of two miles in circumference, and the exterior presents on all sides the stupendous barrier already mentioned so that, except by the gates, entrance seems impossible. Elevation above the sea 4162 feet. Distant from Poona, S.W., 11 miles from Bombay by Poona, S.E., 70 miles. Lat. 18° 24', long 73 50'

**SINGWARUH** in the British district of Sobagpore territory of Sagar and Nerbudda, hant-gov of the N W Provinces, a town on the route from Sobagpore to Dinnah, 23 miles W by N of the former Lat. 23° 24', long 81 1

**SINGY**—A town in Onda, situate on the left bank of the Ghogra river and 101 miles N from Lucknow Lat. 28° 19', long 80 57'

**SINNUR**—A town in the British district of Ahmednuggur, presidency of Bombay, 73 906

# SIO-SIR.

miles NW of Ahmednugger Lat 18° 51', long 74

**SION**—A village in the island of Bombay situate at its northern extremity and near the point where the island of Salsette is united with that of Bombay by a causeway and also by the railway bridge Lat 19° 2, long 72 55

**SIPOON** a river of Bussahir rises at an elevation of 15 000 feet in lat 31° 24' long 78° 6' on the southern declivity of the Yasa Pass, whence it is sometimes called the Yasa River. In the upper part of its course it is a violent torrent making its way with difficulty under snowbeds, and amidst huge masses of rock. The further we went," observes Gerard, the glen became more contracted till at last it was bounded by mural rocks of granite, with the Seepoon forcing its passage between them in impenetrable obscurity under immense solid heaps of indestructible ice, running in ridges, and studded with tumult of snow shaped like inverted bottles. The fall of the torrent here appears to be above 20 " After a precipitate course of about five miles in a south west direction it receives a considerable torrent flowing from the north east, and about two miles below falls into the Pabur the confluence having an elevation of 8,300 feet, and being in lat 31° 18' long 78° 4

**SIPPREE** in the territory of Gwalior, or possessions of Soinda a family a town on the route from Calpee to Kotah 162 miles S W of former 159 E of latter It is now much decayed but eighty years ago according to Tieffen thaler it was, after Narwar the principal town in the district of that name East of Suppre and between it and the town of Narwar the Sindh was traversed by a good bridge of squared stone now ruined by the monsoon floods. Distance 65 miles S. of Gwalior fort. Lat. 25° 24' long 77° 46'

**SIRA**, in the Baree Doosab division of the Punjab, a town situated on the left bank of the Ravvee river 49 miles S.W of the town of Lahore. Lat. 31° 7' long 75° 41'

**SIRAKOT** in the British district of Kuzson heut gov of the NW Provinces a fort with a Hindoo temple, nine miles NW of the confluence of the Gorse and Eastern Kales. It is situate on a rocky ridge, projecting from the northern slope of a mountain and having two of its sides craggy steep to the depth of about 2 000 feet, and the part most remote from the mountain terminated by a chasm 700 feet deep The point where it joins the mountain is traversed by five trenches of considerable depth, cut in the body of the ridge and formerly crossed by drawbridges, but now in some degree obliterated. The path from Almora to Nepal winds round one of the steep sides, and is so narrow and broken that it might be rendered impassable in an hour The temple is situate on a conical

rock, which rises nearly perpendicularly from the crest of the ridge, along which the decayed fortifications extend Water can be obtained only from a small spring and reservoir three-quarters of a mile distant from the fort, the garrison of which could readily be reduced by cutting off the supply and accordingly on its investment by the Gorkha invaders, it at once surrendered, since which time it has remained unoccupied and has gradually fallen to ruin. Elevation above the sea 6 924 feet. Lat 29° 49' long 80° 1,

**SIRAWUH** in the British district of Meerut heut gov of the NW Provinces, a town on the route from Meerut to Booldundeluhur 16 miles S of the former Lat 25° 47' long 77° 49'

**SIRCI**, in the subdivision of Soenda, in the British district of North Canara, presidency of Madras, a town with a small mud fort, situate on the declivity of a ridge, one of the undulations of the rugged plateau into which the Ghats expand in this latitude It is the station of the teahsildar or collector for the district. Though not centrally situated, throu according to Buchanan appears to have been selected for that purpose in consequence of its great thoroughfare and large custom house. Distance from Mangalore, W 120 miles from Bombay S E 340 from Madras, W 355 Lat 14° 54' long 74° 54'

**SIRDARNUGGIUR**, in the British district of Cawnpore heut gov of the NW Provinces, a village on the route from Calpee to Etawa, and 62 miles S E. of the latter The road in this part of the route is rather good, the country partially cultivated Lat 26° 20', long 79° 43'

**SIRDHANA**, in the subdivision of the same name, district of Meerut, heut gov of the NW Provinces, a town on the route from Kurnal to the town of Meerut, and 11 miles NW of the latter It is surrounded with a weak mud wall and has within it a citadel built of the same material, but latterly allowed to fall to decay The principal building is the palace of the late Zeb ul Nissa, more generally known by the name of the Begum Sumroo a spacious and handsome structure, profusely ornamented with paintings At no great distance is the church built by the same personage, who professed herself a proselyte to the Roman Catholic faith It is on a small scale, an imitation of St. Peter's at Rome and has an altar ornamented with a beautiful piece of mosaic, enriched with precious stones. The population amounts to 12 481, about 1 200 of whom are professed Christians, having become proselytes to recommend themselves to the favour of the Begum and notoriously an idle profligate race The remarkable woman of whose petty dominion this small town was the capital is generally reported to have been a native of Cashmere, originally a dancing-girl, subsequently concubine of Wulder Sumroo, a desperate adventurer, of German origin, and

# SIR.

ultimately, by a course of unscrupulous intrigue and fearless sanguinary measures, possessor of three considerable jaghires or principalities, one immediately around Sardhana, another fifty miles south of it, and a third a few miles south-west of Delhi. In 1803 when Doulat Rao Scindia ceded to the East-India Company the Doab, and some adjacent tracts, the claims of the female adventurer to the jaghires above mentioned were recognised by the supreme government, and confirmed by convention in 1805 and on her death, in 1836 all her territory having lapsed was embodied into the adjacent British districts, Sardhana and the contiguous country being made a pergunnah of Meerut. Sardhana is situated in an open level country and has water and supplies for troops in abundance. The road in this part of the route is good the encompassing ground is on the east side of the town near the church. Elevation above the sea 882 feet. Distance N W from Calcutta 897 miles. Lat. 28° 9' long 77 40'

**SIRDHURPOOR.**—A town in Oode, situated on the left bank of the Ganges river, and 49 miles W from Lucknow. Lat. 26° 56', long 80 15'

**SIRDILLA.**—A town in the British district of Behar, lieut. gov of Bengal, 41 miles S. by W of Behar. Lat. 24° 38', long 85 29'

**SIREENKUGUR,** in British Gurwal under the lieut. gov of the N W Provinces a town now much decayed, though once the capital of Gurwal. It is situated on the south or left bank of the Alukunda, a great feeder of the Ganges, and in the midst of a valley about four miles long in the direction from east to west, and two miles broad. Viewed from above, the hollow in which the town is situated has the appearance of a double valley one on a level with the river, the other on its banks, elevated above the water about forty or fifty feet, and extending along the base of the inclosing mountain. The lower valley in which the town is situated, has apparently been excavated by the river and left dry by the stream flowing further to the northward, and leaving between its present margin and the original bank a space of land stretching three or four furlongs south of the town, and now laid out in small fields and inclosures, among which mango-trees are thinly scattered. The aspect of the surrounding mountains is very barren and in the dry season their scanty vegetation is soon parched up, with the exception of a few trees. On an island in the Alukunda, close to the town, are ruins of buildings formerly connected with it and on the opposite side are several hamlets, situated along the base of the mountains. The city has somewhat the shape of the segment of a circle, of which the river's bank is the chord. The principal street, which contains the bazar is about half a mile long, and tolerably broad, but the others are so narrow that two persons can scarcely pass

abreast. The houses are built of large rough stones, laid generally in mud instead of mortar and are usually two stories high with shalving roofs, covered with slates or shingles. The lower stories are allotted for stores or shops, the families occupying the upper. The houses of the higher orders are little distinguished from those of others, except by a narrow balcony. A gloomy air is given to the town from this uniformity, which probably resulted in former times from the desire of the wealthier inhabitants to avoid attracting the notice of extortionate rulers. The palace of the rajah must have once displayed architectural pretensions and extent, wonderful in a community so rude and poor. It was built of large blocks of black stone laid in mortar and had three grand fronts, each four stories high, with projecting porches, and profusely ornamented in the lower part with elaborate sculptures. The porches still remain but the rest of the building has been laid in ruins by earthquakes. There are many Hindoo temples none however, meriting much notice. At one time the town was in a very flourishing condition, being the residence of the rajah of Gurwal and the channel of a brisk trade between the highlands and Tartary on the one side, and the plains on the other. The larger portion of this trade is now conducted through the eastern part of Kumaon, and the place has ceased to be the residence of the rajah since 1803, when he was expelled, and subsequently slain by the Goorkha invaders. In the same year an earthquake nearly destroyed the town, so that when Raper visited it in 1808 not above one house in five was inhabited the rest being heaps of ruins. At the time of Moorcroft's visit in 1820 it had a few manufactures of coarse linens and woollens. The number of the houses in 1821 was 582, of which 438 were inhabited by Hindoos, ninety-six by Doms or outcasts, and twenty-eight by Mussulmans. The number of inhabitants is probably about 8 000. The native establishments for the revenue and police of the western part of the province have been stationed at this place, and cause some improvement. The Alukunda has here a channel 250 yards wide, but the breadth of the stream in the dry season does not exceed 100 yards. At the western extremity of the valley in which the town is situated, the current strikes with violence against the rocky base of the mountain. Near that part it is crossed by a jhula, or rude suspension bridge of ropes, and in the immediate vicinity of the town is a ferry. The river according to Hardwicke, is navigable for rafts or canoes. On the right bank of the river and opposite to the town, is the village of Ranishth, containing a temple sacred to Rajah Iswara, at which the dancing-girls, who form the majority of the population, devote themselves to prostitution, by abjuring their kindred and anointing their heads with oil from a lamp placed before the altar. At a short distance beyond it is the fane of an idol, styled by Raper Ramsee Devi, or 'the god of

low." In the hot season the temperature at Sreenuggur is high, as the elevation is not considerable, being probably little more than 2 000 feet above the sea. Distance N W from Calcutta, by Lucknow Bareilly, and Almora, 1,007 miles. Lat. 80 13, long 78 49'

**SIREENUGUR**, in the British district of Ajmer. Lieut. gov. of the N W Provinces, a town on the route from Ajmer to Tonk, 10 miles E by S. of the former. Lat. 26 27, long 74 58'

**SIREY** or **SIRSA**, in the British district of Allahabad. Lieut. gov. of the N W Provinces, a small town on the route, by the *Kutra Pass*, from the cantonment of Allahabad to Rewah, and 25 miles S E of the former. It is situate on the right bank of the Ganges close to the confluence of the Tona, and on the right bank of the latter which has here a bed 400 yards wide and in the dry season a stream 150 yards wide running under the left bank. Distance N W from Calcutta by land 490 miles, by the river 785. Lat. 26 18' long 82 10

**SIRGOOJAH** — A raj of British India, named from its principal place, and under the control of the political agent for the south west frontier of Bengal. It lies between lat. 22 34—23 54 long 82 40'—84 6' or 90 miles in length from north to south and 85 in breadth. The area is 6 441 square miles. The surface is rugged and mountainous rising from 500 to 600 feet above the table-land of the adjoining district of Chota Nagpore. It is drained by the rivers Kunher and Rheru with its feeder the Mahan flowing in a direction generally northerly. These rivers are mostly shallow except during the rains, when they become rapid torrents.

Besides the ruined town of Sirgoojah giving name to the district, the only place of the least importance is Barnuda, and this is little more than a village. The population of the district is stated at 316 252

The forests contain elephants, leopards, tigers, deer and hogs, buffaloes come down in large numbers from Benares and Mirzapore to graze here. The timber is of the same species which abounds in Chota Nagpore.

The tract called Sirgoojah was nominally part of the possessions of the Bhouda sava reign of Berar or Nagpore, but in 1802 in consequence of the frequent predatory incursions made by its insubordinate population into the British territory Major Jones proceeded at the head of a detachment to the residence of the petty rajah or local chief and the awe produced by this measure appears to have in a great degree checked further attempts at annoyance. By treaty with the rajah of Nagpore in 1818 the supreme control of this district was ceded to the East-India Company with some other territorial rights. The country a few years since, was reported by the Governor-General's agent to be worth annually four or five lacs, and to be in an improving

state. The tribute was paid with regularity: it amounted originally to 3,200 rupees per annum but upon the lapse to the British of the small raj of Odeypore a deduction was made of the amount which had previously been annually credited to Sirgoojah from the revenues of that petty state. On the death of the rajah in 1851 the elder son and successor being of infirm intellect an arrangement was made, by which the administration was placed in the hands of his younger brother, Bindasere Pershad. For the relation of the state to the British government, see *SOUTHWEST FRONTIER OF BENGAL*.

**SIRGOOJAH**, the place giving name to the district so called is a ruined town 140 miles E of Mirzapore and 340 W of Calcutta. Hamilton states that in 1827 scarcely a vestige existed of it. Lat. 23 8' long 83 8

**SIRHIND** — An extensive territorial division of Hindostan bounded on the north by the Panjab on the east by Sirmoor and other hill states, and by the British districts of Saharunpore, Pampot, and Rohtuck on the south by Rohtuck and Hurrreana and on the west by the state of Bahawalpore. It is about 220 miles in length from east to west and 160 in breadth, and lies between lat. 29 3'—31 24, and long 73 50'—77 39'. The superficial extent is probably about 17 000 square miles. Sirhind in nearly its whole extent is a level plain except where the surface, at the north east, rises into the lower ranges of the Himalaya. This small extent of elevated surface terminates at the north-east frontier in a low range, which stretches seventy five miles in a south-east direction from near the left bank of the Sutlej a little above Hopur to the right bank of the Jumna close to its efflux from the Dehra Doon. This range consequently extends from about lat. 30 32' long 77 38' to lat. 31 2' long 76 40'. It is the lowest step of that hill tract described by Dr Royle in the following passage: "The low range of hills, frequently separated from the true Himalaya by diluvial valleys or doons, such as that of Dehra seldom attains an elevation of more than 3 500 feet or 2,500 above the plains of Northern India. The principal passes across this range were 2,339 and 2,935 feet before they were cut down."

The plain which forms the rest of Sirhind slopes very gradually from north east to south west and is unbroken except by depressions swept by watercourses, or sandhills, especially in the more barren tract which extends over the west and adjoins the territory of Bahawalpore and of that of Bhutteana. A few years ago a survey was made by order of government and a line of levels taken for ascertaining the practicability of connecting the Sutlej and Jumna by canal at the points on those great rivers where the downward navigation commences for vessels of any considerable burthen. The south-eastern extremity of the line contemplated is on the right bank

# SIR.

of the Jumna, six miles east of Karnaul, and at an elevation of about 1,000 feet above the sea and it held a course in a right line nearly due north west to Lodiana, on the left bank of a navigable channel of the Sutlej. This line 112 miles long crosses all the watercourses flowing from the Himalaya, and probably traverses the roughest part of the country. The inequalities result either from ridges rising to small elevation above the average level of the country or from shallow valleys, apparently formed by the numerous streams. The country however, in proceeding westward, has a general and gradual rise, which attains its maximum elevation of sixty seven feet at Kundoo, twenty miles from the Jumna, whence in twenty two miles it falls to the Sutlej the level of which is two feet lower than that of the Jumna. Thus the whole of Sirhind may be regarded as a low ridge running between the Jumna and the Sutlej as the bed of every watercourse between these two rivers is invariably several feet higher than that of either.

In the course of the survey the depth of 156 wells was taken. By this, the surveyor wished to ascertain whether as some supposed measurements of the level of springs would give data for an approximate calculation of the profile of the country. In this respect the author remarks, my present observations as well as those made with the same view in other localities, show that the level of springs is too much affected by the vicinity of streams, the degree of permeability of soils, and other local circumstances, to admit of any accurate conclusion being drawn from them regarding the profile of the surface. The water drawn off from the projected canal by the expenditure for lockage or by evaporation or absorption, could be replaced on the eastern slope at the highest level by means of a feeder from the Delhi Canal communicating with the Jumna, and on the western, by one from the Sutlej above Ropur. Such a canal would connect the extensive and highly important navigation of the Ganges and its tributaries with that of the Indus.

The Jumna, where it issues from the mountains, touches on this territory, in lat 30 25' long 77 39', and forms its south eastern boundary for about seventy miles. The Sutlej from the point of its egress from the mountains, about thirty five miles above Ropur forms the northern and north western boundary of Sirhind the course of the river being for the upper part, first from north to south then from east to west, for the lower, from north-east to south west. The country between the Jumna and the Sutlej is traversed by above a dozen considerable torrents. Of these the principal are the Sursooty the Markanda, the Gagar or Gaggur the Puteela Nullah, and the Khan pourtee-Nuddes. These torrents generally communicate with each other during the season of inundation. On this subject a recent accurate observer says. From near Thanesar to Konehore the whole tract of

country (with the exception of village sites) is liable to inundation from the Sub-Himalayan torrents, diffused over its surface by means of a network of natural and artificial watercourses, of which some are supplied from more than one of the rivers above named others again flow from one river into another and during great floods (as I was given to understand), all three are frequently united. The inhabitants avail themselves largely of the inundation for rice-cultivation though during the present season at least little advantage appeared to have been taken of the facilities afforded for irrigating rabbes (spring) crops, which where they existed, were generally watered from wells. I had not leisure to ascertain by personal examination whether the first diffusion of these rivers (which I have myself seen nearer the hills in single and separate streams) were caused by natural or artificial means, but it is probably attributable to both. The slope and evenness of the country are calculated to favour even the rudest attempts to divert the streams from their original beds and the same circumstances would also render it easy were it desirable to confine them again to one or two principal channels. Far more important than these streams is a system of artificial watercourses, which in the eastern extremity of Sirhind run in some measure parallel to the Jumna, but to the west of it, and conveying a volume of water nearly equal to that of this river. This great work originated with Firoz Toghluk Tartar king of Delhi who ascended the throne 1351 and died 1388. He commenced it at the right bank of the Jumna, in lat. 28 19' and turning into it several of the torrents which traverse Sirhind, conducted it 100 miles in a south westerly direction to Dhatrat, where, according to the opinion of Colvin he took advantage of the natural bed of the Chittung torrent flowing in the same direction thirty five miles farther to Hansa beyond which the watercourse is continued about eighteen miles in a direction a little north of west, to Hissar. The total length consequently of the canal of Firoz to this place is 150 miles. A few miles beyond Hissar all traces of excavation cease but a natural channel in time of inundation conveys the redundant water westward, until lost in the sands of Bikanur or probably in case of very great floods, discharged into the Gagar and ultimately into the Sutlej. The canal of Firoz having after the death of its constructor been allowed through neglect to become choked up, was early in the seventeenth century cleared out by Ali Murdan Khan who, at Mudlioda, about eighty miles from its commencement, formed a channel proceeding due south, and consequently diverging there from the original watercourse. This new channel has a south-easterly direction for about seventy miles to Delhi, whence it is generally known by the name of the Delhi Canal, sometimes by that of Ali Murdan Khan and sometimes is styled Shah Nahr (King's River), probably in

honour of the royal master of the projector, or perhaps of Ahmed Shah Durrane, who, during his brief possession of Delhi, expended a lac of rupees in repairing the work. Both these canals were by command of the supreme government put into adequate repair in the years intervening between 1817 and 1826. The extent of the Feroz Canal, with its various branches, is 240 miles.

The territory is held by native chieftains, with the exception of such portions of it as have escheated to the East-India Company in virtue of its paramount authority over the country. The descent of the three principal chieftainships, of Putesala Jhesud, and Nabha, has been formally determined to be to heirs male only, and on failure of such in a direct line, the estate passes to the next of kin. In the minor possessions, the right of inheritance, as established by the custom of each family so far as it can be ascertained is invariably respected by the superior government. The customs are not only widely different, but appear to be in their origin and character exceedingly capricious. Captain Murray for nearly superintendent of the hill territories, thus speaks of them — "The rules of succession to landed property in the Sikh states are arbitrary, and are variously modified, in accordance to the usages, the interests, and prejudices of different families: nor is it practicable to reduce the anomalous system to a fixed and leading principle." Among some tribes female succession is recognised by others it is disallowed. Succession by adoption has never been practised and in one or two instances in which attempts were made to obtain the sanction of the British government to the adoption of an heir it was, with reference to the utter want of precedent, refused. The Sikhs in general, in obedience to an injunction of their religion, eschew smoking tobacco but considering the use of fermented drinks not forbidden, they exercise the liberty supposed to be allowed them by indulging in the copious use of ardent spirits inasmuch that sobriety is rare among these people, and numbers shorten their days by excess in this indulgence. They also use opium freely as well as bang, the intoxicating drug extracted from hemp. Every sort of food is allowed by their religion except the flesh of the cow the slaying of which is punished with cruel death. The Sikhs, however may on the whole be considered tolerant, though they treat both Hindoos and Mussulmans with contempt, and prohibit the latter from delivering from their mosques the azan, or solemn call to prayers.

The establishment of the Sikh modification of Brahminism, in many respects a highly important event, is especially so as being perhaps a step to the abrogation of a vast system of superstition, probably the most influential, as well as the most tyrannical and mischievous that has ever enthralled and depraved human nature. Nanak, the founder of this faith, was born 1469 at Talwandi, a village on the river

Beas. Being of a contemplative disposition, and it is said devout and benevolent he became an ascetic, remarkable for his austerities, even among the Hindoos. Subsequently he is said to have preached the unity and annihilation of God, the necessity of good works, of peace and of good will towards men. His successors however have greatly departed from the first principles of their faith, if the above statement of the tenets of their founder be correct. He was a very moderate innovator according to the following account, in which, however the original purity of the Hindoo creed seems rather needlessly and groundlessly assumed. He made it is said, no material invasion of either the civil or religious usages of the Hindoos and as his only desire was to restore a nation who had degenerated from their original pure worship into idolatry he may be considered more in the light of a reformer than of a subverter of the Hindoo religion and those Sikhs who adhere to his tenets, without admitting those of Guru Govind are hardly to be distinguished from the great mass of Hindoo population, among whom there are many sects who differ much more than that of Nanak from the general and orthodox worship at present established in India. His followers were called Chikhs, or disciples himself Guru or 'spiritual guide. He died at seventy years of age having bequeathed his spiritual supremacy to a favourite disciple. Ram Dass, the third guru in exclusive succession from Nanak formed a celebrated tank which he called Amritsar or lake of ambrosia "and the great city which has grown up about it bears the same name. Arguably the fourth guru compiled the Adi Granth, one of the sacred books of the Sikhs, from the various effusions of his predecessors. This last guru having fallen a victim to the persecution of the Mahomedans, his successor Har Govind ordered his followers to arm and take vengeance on their persecutors. He also permitted his adherents to eat the flesh of all animals except kine whereas Nanak had prohibited that of hogs. Guru Govind the fourth in exclusive succession from Nanak was a bold innovator and a brave but ferocious soldier who, furiously exasperated at the fate of Tegh Bahadur his father and predecessor executed by order of the Mogul emperor Aurangzeb in 1675 took up arms, and mastering his followers, gave them institutions calculated to inspire fierce nationality and unconquerable military ardour. They were to bear the name of Singh or lion which had hitherto been exclusively arrogated by the Rajpoots were always to have steel in some form about their persons, as an emblem of their devotion to war and its duties while, as external marks of distinction, they were to allow their beards and the hair of their heads to grow in undiminished luxuriance, and to wear blue clothes. At the same time all distinctions of caste were abolished and every one was invited to receive the initiatory rite,

and, becoming a member of the Singh Khanda or commonwealth, to participate in its adventures. These institutions of Guru Govind caused the division of the Sikhs into two great sects,—the Khalsas, or those who rejected these innovations, and the Singhs, who adopted them and are actually the great influential body of the nation. Initiation into the community of the Singhs is celebrated by five of their number who administer to the candidate five draughts of sugar and water, making him at the same time repeat a rhyming liturgy. According to Princep the sacred beverage is made with the water in which the initiators and the neophyte or candidate have washed their feet. Forster, however states that it is merely touched with the toe. Wilson says, "The Sikhs are still to a certain extent Hindoos. They worship the same deities as the Hindoos, and celebrate all their festivals; they derive their legends and literature from the same sources, and pay great veneration to the Brahmins. The mystery of their origin is still therefore, strongly retained, notwithstanding their rejection of caste and their substantiating the Das Padshah ki Granth, the compilation of Guru Govind, for the Vedas and Puranas." This view of the doctrines and practices of the Sikhs is obviously inconsistent with that which assigns to them the belief in a creed of pure theism, and the practice of a spiritual and benevolent devotion. Probably this pelony state never existed if it ever did, it is certain that it did not continue long.

Guru Govind, at the head of his followers, whom he had succeeded in transmitting into a host of sanguinary and desperate fanatics, gained repeated victories over the armies of the Mogul emperors but being at length overpowered, he was obliged to flee leaving his mother and his two children in the hands of the Mahomedans, who cruelly put them to death at the town of Sirhind. He sank under the weight of his misfortunes, and died in obscurity. He was the last of the gurus, and thus was luckily fulfilled a prophecy which imputed their number to ten. Such prophecies are easily manufactured. Sometimes they follow the event, and when they precede it, they conform to their own fulfilment. After the death of Govind, the military force of the nation was successfully wielded by Banda, a brave but ferocious leader who, in revenge for the slaughter of the wife and children of Guru Govind, stormed the town of Sirhind demolished the mosques, exterminated the inhabitants, tore the bodies of the dead from their graves, and cast them forth to birds and beasts of prey. He then overran the whole of the district of Sirhind, and threatened to conquer all Hindostan, until, being defeated in a decisive engagement, he was made prisoner, and about the year 1710 put to death with studied cruelty at Delhi. The Sikhs continued prostrate and obsequious until the power of the Mogul empire was broken up by the invasion of Nadir Shah, whose army they harassed and

plundered in his return homewards. Subsequently, in their predatory expeditions they overran the Punjab, and on the flight of Timur, the son of Ahmed Shah in 1768, made themselves masters of Lahore. In 1762, Ahmed Shah Dooranee, after the battle of Paniput, raised Amritsar to the ground, filling up the sacred tank with the blood of kins, and moreover polluting it with the blood of kins erected pyramids of the heads of the slain Sikhs, and washed the walls of the mosques with their blood in revenge for their previous desecration of those edifices. In the following year when Ahmed Shah had marched home to Cabul, the Sikhs made themselves masters of both Lahore and Amritsar and retallied on the Mussal mans the disgrace and cruelties which they had endured. During the year 1764 they had overrun and seized on an extent of territory reaching from the borders of the Indus to the districts of Delhi, and throughout this extensive region firmly established their power and religion.

The British power first came into collision with the Sikhs in 1806, when Lord Lake marched into the Punjab in pursuit of Jeevunt Rao Holkar the Mahratta potentate, who, disconcerted by the wily Runjeet Singh, then in an early stage of his career, was constrained to make peace with his conquerors. In 1809 the aggression of Runjeet Singh on the Sikh chiefs on the left bank of the Sutlej, exciting the apprehension of the Anglo-Indian government, a British force was marched across the Jumna, whereupon the audacious but politic adventurer speedily and with a good grace, concluded a treaty by which he restricted himself from all hostile operations in the country lying left of the Sutlej the number of his troops there being limited to so many as should be required for government purposes in the districts over which his supremacy extended. The British government then issued and circulated, among the remaining sardars or chiefs, a general declaration that they were under its protection.

Several portions of this territory have at different periods lapsed to the Company's government, from failure of heirs and when that government was forced into war with Lahore, further alienations took place, from a different cause. The penal measures which it became just and expedient to inflict on several of the Sikh chiefs, for acts of hostility or non-performance of their feodatory obligations during the Lahore war led to considerable changes in the state of territorial possessions in the Cis-Sutlej territories. In addition to the territory of Ladwa, and that of Roopur was wholly confiscated, and the chief having been pensioned, resides at Saharnapore. The Cis-Sutlej possessions of the Alowallees chiefs were also confiscated and Nabah, one of the principal of the protested states, has been mutilated of one-fourth of its territory. The British government availed itself of these acquisitions to reward the fidelity of the rajahs

of Patiala, Jheand, and Farwadhota, to each of whom an addition of territory was granted. New sanads were granted to the rajahs of Patiala and Jheand, in which clauses have been inserted, binding them to renounce all transit-duties, to make and keep in repair a military road and to abolish seties, infanticide, and slave-dealing. The British police jurisdiction has been introduced into most of the protected Sikh states and the levy of customs has been abolished in the whole, compensation being granted to the chiefs.

The British possessions in the Cis-Satlaj Sikh territory have been divided into four districts.—Ferozepore, Ludhiana, Umballah, and Kythul the aggregate revenue is between eighteen and nineteen lacs of rupees (180 000*l.* to 190 000*l.*) A civil and sessions judge for the Cis-Satlaj territory has been appointed, and also a commissioner.

Sirhind, situate between the Himalaya on the north and the desert of Bikaner on the south, has repeatedly been traversed by armies advancing to the invasion of India, and hence has been the scene of many conflicts and other memorable events. As it was saved from the threatened invasion of Alexander by the routing of his troops, probably the first great military operation recorded to have taken place on its soil was the capture of Thanesur in 1011, by Mahmud of Ghaznee, who plundered the city, broke the idols, and carried the fragments of that called Jugumsa to Ghaznee to be trodden under the feet of Mussulmans. After the death of Mahmud the Hindoos, in 1043 recovered possession of this place and the rest of Sirhind. In 1191 Mahmood, the Afghan prince of Ghor attempting to recover the Musulman conquests in Sirhind received a severe defeat near Thanesur and fled to Ghaznee, but returned in the following year and having on the same field routed a great Hindoo army made himself master of the whole country which continued subject to the Musulmans until the Sikh outbreak. It escaped the horrors of the invasion of Tamerlane in 1397 as the route of that prince in marching from Batair, which he had laid in ruins, to Delhi only touched the southern frontier, and having proceeded to Cuppli or Kowpala, to exterminate the Hindoos assembled there, he returned to Khorsana, through the Sewalik Mountains, by Jamoo and the southern boundary of Cashmere probably crossing the Indus above Attek. In 1525, Baber in his advance against Ibrahim the Panah king of Delhi, overran and won the greater part of Sirhind. In 1554 the vicinity of the town of Sirhind was the scene of an action, in which Humayun the son of Baber, gained a decisive victory over the far more numerous army of his Panah rival, and gave peace to the Mogul empire. Sirhind appears from that time to have tranquilly enjoyed the imperial favour, until the outbreak of the Sikh insurrection, of the progress and result of which a sketch has been given under the article PUNJAB.

**SIRHIND**.—A town in the native state of Patiala, 33 miles N from Patiala, and 27 miles N W from Ambala. Lat 30 35', long 76 29'

**SIRHOORPOOR**, in the territory of Oude, a village on the route from Asimgurb to Sultanpoor cantonment 46 miles W of the former 32 S.E. of the latter Lat 26 15', long. 82 45

**SIRINAGUR**, "the town of Surya or the Sun, the capital of Cashmere, and at present more generally known by the same name as that of the valley at large. The town extends about four miles along both banks of the Jhelum or Behut, which here, deep and slung gush, winds in a very picturesque manner through the town and adds much to the prospect, by the salubrious effect of the numerous and variously constructed vessels by which it is navigated. The north west part of the town is the principal and is situate on the right bank of the river on the south-east and south is the suburb of Sher-Geri, which has fortifications of no great strength, and contains the usual residence of the governor. This seat of government has two stories overtopping the ramparts and a principal entrance communicating with the river by broad wooden stairs. On the north of the city rises a hill, called the Kohi Maran, Hari Parbat, or Himey Parbat, of trap formation and having an elevation of about 250 feet above the Jhelum on the summit is an ill-constructed fort of slight strength, though according to Hugel it might easily be made impregnable. According to the statement of Vigne, the Mogul emperor Akbar caused a wall to be built round the base of the hill, a circuit of about 4 000 paces. Of the five gates in this wall, one bears an inscription stating that the tower Naginagar thus inclosed, was built A.H. 1005, cost 11 000,000 of rupees, and that 200 master-builders were employed on it. Of this great undertaking nothing remains but a handsome mosque the rest has been reduced to a vast extent of shapless ruins at present totally uninhabited. Moorcroft draws a very repulsive picture of the city of Sirinagar.

The general character of the city of Cashmere is that of a confused mass of ill-favoured buildings, forming a complicated labyrinth of narrow and dirty lanes, scarcely broad enough for a single cart to pass, badly paved, and having a small gutter in the centre, full of filth, banked upon each side by a border of mire. The houses are in general two or three stories high, they are built of unburnt bricks and timber the former serving for little else than to fill up the interstices of the latter. They are not plastered are badly constructed, and are mostly in a neglected and ruinous condition, with broken doors or no doors at all, with shattered lattices, windows stopped up with boards, paper, or rag, walls out of the perpendicular and pitched roofs threatening to fall. The roofs are formed of layers of

birch bark covered by a coating of earth, in which seeds, dropped by birds or wafted by the wind have vegetated, and they are constantly overrun with grass, flowers, and seeds. The houses of the better class are commonly detached and surrounded by a wall and gardens, the latter of which often communicate with a canal. The condition of the gardens is no better than that of the buildings, and the whole presents a striking picture of wretchedness and decay."

The public buildings of this city are not in much better style than the private dwellings. The oldest structure is the tomb of the mother of a Cashmirian king, who reigned in the middle of the fifteenth century. It is built in an octagonal form, of brick, the walls being seven or eight feet thick and surmounted by a dome constructed with great strength and solidity, but altogether devoid of architectural beauty. The Jama Masjid, or "great mosque," is the most celebrated building of the city and native estimate, which is probably exaggerated, represents it capable of containing 60,000 persons. The foundation and lower part of the walls are built of stone the upper of brick. The whole is surmounted by a dome and spire rudely constructed of timber and partly supported on pillars of the same materials, and of these there are 884. Every pillar is a pile of square deodar logs, each about a foot thick, and laid one over another as beams are usually stored in a timber-yard, so that each face presents a succession of butts and sides. These pillars are about ten feet high, and seem to have been devised with a precautionary view against earthquakes, which are here of frequent occurrence, and have damaged the roof of the structure without shaking them, or causing them to deviate from the perpendicular. The deodar is a timber so durable, that though these pillars have stood nearly two centuries, they exhibit no symptoms of decay. The ground plan of this spacious building is a square of about 400 feet. The mosque of Shah Hamedan is built of deodar in a singular style of architecture, resembling the Chinese, but less fantastic and meretricious. The Jhelum is crossed by seven bridges. The piers of these are formed of deodar logs, arranged as in the pillars of the great mosque, the road being formed by beams of the same timber stretching from one pier to another. There are no parapets, nor side-rails of any kind, and as the beams are in most places some distance asunder the passage of these singular bridges is not altogether free from danger. So durable is the material, so gentle the current of the Jhelum, and so exempt the climate of Cashmere from storms, that some of these apparently frail structures have lasted for several centuries. Houses are built on some of them, and in many places trees have spontaneously grown up. Close to the east of Srinagar is the city Dal or lake, described by Vigne as five miles in length from north to south, and two and a half miles in breadth

from east to west. The water is very clear and not deep, in few places exceeding eight or ten feet. The lake is divided into two nearly equal parts by an artificial causeway, made across it in the direction from south west to north east. This is covered with rushes, and has the appearance of a green lane traversing the water. A single opening, bridged over admits the passage of boats from one part of the lake to the other. Various tongues of land divide the Dal into inlets or basins, which have distinctive names. It is supplied with water by a stream called the Tybal but which descends from the mountains bounding the valley on the north-east. This beautiful lake communicates with the Jhelum by a canal having floodgates, which remain open when the current sets from the lake towards the river. During inundations of the Jhelum, the floodgates are closed by the first rush of water towards the lake, which is thus prevented from overflowing the lower part of the city. That part of the city situate between the Jhelum and the lake is in several places intersected by canals, which, with proper care, would serve important commercial purposes and contribute to salubrity and cleanliness, but in their present neglected state they must rather be classed amongst the deformities and disadvantages of this fallen city.

The Mar Canal is described by Vigne as a singular monument of the ancient prosperity of the city. Boats pass along as at Venice its narrowness, for it does not exceed thirty feet in width, its walls of massive stone its heavy single-arch bridges and landing-places of the same material, the gloomy passages leading down upon it betoken the greatest antiquity, whilst the lofty and many-storied houses that rise directly from the water supported only by thin trunks of deodar seem ready to fall down upon the boats with every gust of wind. It could not but remind me of one of the old canals in Venice, and although far inferior in architectural beauty is perhaps not without pretensions to equal singularity. The verdant and level margin of this beautiful piece of water was the favourite resort of the Mogul emperors and their courtiers, and is still in many places overspread with the relics of their pleasure-grounds and palaces. Of these, the most celebrated is the Shahimar, where Moore's imagination has pictured the closing scene of Lalla Rookh. This pleasure-ground, laid down by the emperor Jehan Gior, is shaded by noble chumars or plane-trees, now, from age, verging to decay. It is, according to Vigne, 700 or 800 yards in length by 280 in breadth. The principal building is placed at the upper end of this inclosure, and is thus described by Vigne in rather singular terms — It is of polished black marble, and consisting of two rooms on either side of a passage, which runs through the centre of the building. On the east and west sides of it there is a corridor, six and a half yards wide, formed by a range of six polygonal pillars,

about thirteen feet in height, and of the same material. They are said to have been taken from the ruins of a Hindoo temple, but the capitals and bases appear to have been the work of a Mahomedan architect, and the latter in particular are most beautifully scalloped and polished. The building itself is twenty four yards square, the north and south sides being ornamented with Saracenic rebab. It stands in the centre of a square reservoir which is also lined with black marble, whose sides are about fifty four yards long, and in its whole circumference contains 147 fountains, which are made to play on holidays, the reservoir being filled by the stream, which enters it in the shape of a cascade. The height from the stone floor to the roof is about twenty feet. The latter may originally have been pointed like the Tuscan roof but as it is now covered with thatch its original shape cannot be determined. The stream thence descends from the reservoir by a shallow canal out through the centre of the gardens, and lined with marble and it falls over an artificial cascade at each of the three lodges through which it passes in its way to the lake. A broad causeway or walk runs on each side of it, overshadowed by large ohinar trees, and here and there a few turfed walks branch off at right angles into the shrubberies, in which are little else than wild plum trees planted for the sake of their white blossoms. At the end of one of these is a decayed bath built of brick, and the walls around are covered with ivy. The view of the lake from the vicinity of the city is very beautiful, the entrance lying between two striking eminences—Hori Parbat on the west, and on the east the Tukhti Sukman of greater elevation and more imposing aspect. Between these, a magnificent crescent of mountains rises on the north the east and south-east, and on the north-west the huge summit of Haramuk towers in the distance with great grandeur. The foreground is formed by the expanse of the clear water of the lake, in many places mantled with the rich green leaves and brilliant blossoms of the water-lily (*Nelumbium speciosum*) and studded with green islets, in many instances tufted with trees. The beauty of this delightful scene is heightened by the appearance of the shore, teeming with the richest verdure and ornamented with groves of noble plane-trees and poplars. The floating gardens formed of matted reeds, weeds and sedge overlaid with earth and bearing abundant crops of melons and cucumbers, though on account of their singularity attracting the notice of the traveller, form no feature in the landscape, being at a short distance nearly undistinguishable from the contiguous bank. The scene is, however, enlivened by the numerous boats employed in taking the fish with which the lake abounds. Formerly many persons lived by taking the countless water-fowl which frequent the lake, but these are now uncollected, in consequence of the strictly enforced orders of the Sikh rulers.

The appearance of the antique city falling piecemeal into ruin, when viewed at some distance, is no unpleasant feature in the prospect. The aspect of the city itself is curious, but not particularly striking. It presents an innumerable assemblage of gable-ended houses, interspersed with the pointed and metallic tops of minarets or mosques, melon grounds, edgy islets from the lake and narrow canals fringed with rows of willows and poplars. The surface of the lake itself is perfectly tranquil, and the very vivid reflections which cover its surface are only disturbed by the dabbling of wild fowl, or the rippling that follows the track of the distant boat. In the more prosperous ages of Cashmere, this lake was the scene of the frequent pleasure-parties of the volatile and voluptuous Cashmirians. According to Foster

when a Kashmirian even of the lowest order, finds himself in the possession of a few shillings, he loses no time in assembling his party, and, launching into the lake, solaces himself until the last farthing is spent. This fondness for festive pleasures is especially displayed at the

Fest of Roses, which flowers are produced in Cashmere of unrivalled beauty and fragrance.

The season when the rose first opens into blossom is celebrated with much festivity by the Kashmirians, who resort in crowds to the adjacent gardens, and enter into scenes of gaiety and pleasure rarely known among other Asiatic nations. As oppression and consequent misery have frozen the genial current of the soul in the Cashmirians, that romantic festival has degenerated into the fest of Sins, or water nuts, celebrated on the 1st of May by ascending to the summit of the Tukhti Suliman, and fasting there, "eating more particularly of sugarcane." Srinagar was formerly much celebrated for its manufacture of shawls, paper leather, brooms, and attar of rose but these have nearly disappeared under the oppression which has long crushed the energies of a people naturally ingenious, industrious, and persevering. Moorcroft, who visited the city in 1823 estimated the population at 240 000 the judicious and cautious Elphinstone, in the early part of the present century at "from 150 000 to 200 000." By another authority the population of Srinagar was subsequently computed not to exceed 40 000. Vigne, as well as Cunningham, estimates the population at 30 000. This appalling reduction of the population in so brief a period has been the combined effect of oppression, pestilence, and famine. Srinagar is generally considered to have been founded by Pravarasena, who reigned in Cashmere from A.D. 128 to 176. It is supposed to have succeeded to a more ancient city of the same name, the ruins of which are conjectured by some to be observable at Wenspur, by others at Matan. The elevation of Srinagar above the sea has been the subject of much controversy, though stated by several intelligent Europeans who have resided at the city for a considerable time, and made this point the

specific object of their notice. There can be little doubt that it exceeds 5,000 feet, and falls below 6,000, and 5,500 may be taken as the mean and probable amount. Lat. 34° 5', long. 74° 57'.

**SIRKUN FORT**, in the district of British Gurhwal, head-qv. of the N W Province, a town on the route from Almora to the native state of Gurhwal, 43 miles N W by N of the former. Lat. 30° 15' long. 79° 20'.

**SIRMOUR**, a hill state under British protection, is bounded on the north by the hill states of Balaun and Joober, on the east by the Jhaumar Bawar pergunnah of the Deyra Doon, from which it is separated by the rivers Tons and Jumna, on the south and west by Sirhind, the territories of the rajah of Puitseela and Koonthul. It lies between lat. 30° 25'—31° 2' long. 77° 5'—77° 53', and has an area of 1,075 square miles. Except a very small tract about Nahau, on the south western extremity where a few streams rise, and flow south-westward to the Soorutti and the Gager rivers, the whole of Sirmour lies in the drainage or basin of the Jumna, which receives from this tract the Giree, and its feeders the Jalal and the Paloor. The river Tons, the great western arm of the stream, called lower down the Jumna, flows along the eastern boundary of Sirmour, and on the right side receives from it two small streams, the Minus and the Naerue. The surface generally, though irregularly declines in elevation from the north to the south: the elevation of the Chur Peak, and station, on the northern frontier being respectively 12,160 and 11,689 feet above the sea, and that of the confluence of the Giree and Jumna, on the southern, being 1,616. From that confluence the Kyarda Doon stretches westward, forming the southern part of Sirmour, and extending about twenty-five miles in length from east to west, and six in breadth, terminating to the west at the eastern base of the Nahau ridge. Its surface rises gradually to the westward from the Jumna to the Ghatsum Pass, a distance of fourteen miles. From Ghatsum, having an elevation of 2,500 feet above the sea, the country falls both eastward, as already stated, and westward, the streams in the former direction flowing to the Jumna, in the latter to the Markunda and other streams holding their course to the Soorutti and Gager. The Kyarda Doon is bounded on the south by the Sewalik range. These are of recent formation, and shew in fossil remains of animals, marine and terrestrial. They have probably an average elevation of about 2,500 feet above the sea, and are crossed by the river Markunda at the pass of Magisund. On the north, the Doon is bounded by the Sub-Himalaya, the formation of which is thus described by Fraser:—"Apparently of a hard stone, very apt to crack and break in sharp irregular ridges, which, on exposure to the air, easily bursts in small fragments, and then falls into

dust. It consists, I think, of clay and sand, and is generally of a dusky brown colour, or of a brownish grey." The formation is probably the same as that in the vicinity of Bahr, a short distance farther north, and described with more precision by Jamieson, as consisting of 'sandstone, slate, clay and trap. Gowan describes this portion of the Sub-Himalaya as from 4,000 to 5,000 feet above the level of the sea, and consisting principally of a very compact and hard sandstone of light bluish gray colour, and spotted with dark purple. In some places the formation becomes slaty or rests on clay slate in others, limestone of an earthy fracture, graywacke, and graywacke slate. The Sam ridge rises to the north west of the range bounding the Kyarda Doon. On the north, it stretches along the right bank of the river Giri, and has a massive contour, rising at its south-eastern extremity into the summit of Thanda Bhawanee, having an elevation of 5,700 feet above the sea at its north western, into that of Suru Debi, of 6,299. Its formation is of limestone, which extends generally to the head of the Giri, where the slate rock commences. Beyond the Giri, and at the northern extremity of Sirmour, is the remarkable peak of Chur, 12,160 feet above the sea, connected by a transverse ridge with the outer Himalaya, and itself a central point, from which subordinate ranges ramify in every direction. Of the subordinate ridges, some summits attain a considerable height. Hajgarh and Chithroon Debi west of the Chur have respectively elevations of 7,115 and 7,048 feet above the sea: the elevation of Jannu Peak to the south-east of these, is 6,853 feet: that of Chundpore, near the right bank of the Tons, 8,561; and that of Kangra, little farther south 6,660. The summit is composed of vast tabular masses of granite, which, though compact, is readily decomposed by the weather. Sirmour though its rocks consist of formations usually metalliferous, at present yields little mineral wealth. At Kalsi a copper-mine was formerly worked, but has been for some years abandoned. A lead mine is worked profitably and gives employment to about 100 men. Iron-ore is abundant, and smelted with charcoal on the spot, where it is sold at the rate of about a penny a pound. The extensive slate strata are in some places worked to supply roofing, and in situations admitting of easy transport to the plains, might be found a source of great wealth. The climate varies, from that of Chur, where the surface is under snow the greater part of the year to the stifling malaria of the Kyarda Doon of which the greater part is a mere desert, untrodden by human beings, except by woodcutters and collectors of gum catechu, yielded in great abundance by the mimosa, which flourishes there. The shape of the Kyarda Doon, resembling a deep narrow trench, shut in on every side except to the east, where it opens to the Jumna, and having a deep alluvial swampy soil, bearing

with rank vegetation, confers on it an aspect and climate similar to those in most inter-tropical tracts. The air is from these causes fatal to the human constitution, so that in 1815 there were only 600 inhabitants in a tract which, if fully cultivated, would probably maintain thirty times that number. Prior to the Ghoorka invasion however the Kyarda Doon is said to have contained eighty four populous villages. At present, extensive thickets of bamboos indicate the character of the climate. So dense are the forests, that the sportsman finds difficulty in making his way through them in search of wild elephants, tigers, leopards, bears, and hyenas, with which they abound. Wild peafowl are in many places very numerous, being unmolested, in consequence of the superstitious regard of the natives. Rice, cotton, tobacco, opium, caspium, turmeric, ginger and all the pulse and several vegetables of the plains are cultivated in the Kyarda Doon and in the lower valleys along the banks of the rivers where the heat is sometimes as great as in the lowlands of Hindoostan and to which the periodical rains of the monsoons extend. In the northern part, according to Blane it is said that rain never falls "but as the rainy monsoon is in some degree felt in Koonawur so much farther north and behind the lofty barrier of the outer Himalaya, such a statement seems extraordinary. Wheat and barley are successfully cultivated, but the principal crop is marwa a small black seed produced by the *Eleusine coracana* (*Oryzopsis coracana* of Linnæus, or thick-spined dog grass") a most prolific vegetable as, according to Dr Royle the ordinary produce is 120 fold and in one variety 500. Bang or hemp for narcotic intoxication is also cultivated. In many places there are two crops in succession annually the first of wheat barley poppy oil seeds, or marwa the second of rice cotton and tobacco. The rice is very fine and cultivated in situations suited for irrigation the ground being arranged in terraces. The natives are indefatigable, repeatedly turning up with the plough their naturally sterile soil, and aiding its productive powers by manuring or fallowing. The grain is trodden out by kine in inclosures floored with slate slabs the straw is used for fodder and being insufficient in quantity is eked out with dried grass gathered from the jungles, and the leaves of trees, especially pinea, oaks, and mulberries. Man and women share the labours of agriculture with equal industry and perseverance. The kine are humped, generally black, and for the most part well tended, fat, handsome, and larger than those of the plains. They are kept for their milk, most of which is used to yield butter or ghee the Hindoo superstition of the natives preserves them from slaughter. The houses are frequently three stories high, built of stone, bounded with timber of which there is great abundance, as forests of fine fir, oak, rhod-

dendron, horse-chestnut, and some other trees, overspread the mountains. The roofs are generally of slate, but sometimes of shingles. The family inhabits the upper story, which is surrounded with an inclosed balcony six or eight feet beyond the wall, and the village, usually situate on the slopes or tops of hills, have a picturesque and pleasing effect in the landscape. Sometimes the houses are slender and lofty so as to have the form of towers fifty or sixty feet high. These like the others, are formed of uncemented stone, bonded with wood, on the decay of which, the whole fabric becomes ruinous and untenable and as the natives find it less costly to build new houses than repair the old ones, the country abounds with the relics of former habitations in every stage of decadence.

The manufactures of this poor territory are limited to the smelting of a trifling quantity of iron, and the working up of wool and other raw native produce for home consumption. There is no commerce, unless a very trifling carrying business be considered as such. The state of the roads, or rather paths as described by Blane is incompatible with any considerable transit. The communications through the country are imperfect, and totally unfit for the marching of troops exceeding a few companies. A path of a foot and a half in width with the mountain rising precipitously on one side and a deep glen on the other if not very rugged is esteemed by the natives a good road. Benets of burthen are never used beyond Nahun or Kalei and it is with difficulty that a led horse even of the indigenous breed accompanies the traveller. The natives of Sirmour are of the physical type called Caucasian by physiologists and obviously of a race allied to the Hindoos of the plains on the north-east there is an admixture of the Mongolian race. Gout is very prevalent amongst all classes, and is sometimes extirpated by the knife. The stature of these mountaineers is low, but they are active and strong carrying over their rugged roads loads of sixty or seventy pounds weight twelve or fifteen miles in the course of the day. The dress of the middling classes consists of a simple tunic or frock, reaching down to the knees, trousers, and a scarf usually worn across the shoulders, but when the sun is hot thrown over the head the lower orders content themselves with a blanket girt round the waist the higher classes dress after the fashion of Hindoostan, and wear the Sikh turbans. The women enjoy as unfortunate notoriety for indolence and total want of chastity. Polyandry is universal, several brothers cohabiting by a sort of legalized union with the same woman. As this hateful practice leads to what political economists would term a 'surplus female population,' the occurrence of an inconvenient excess is staved off by the prevalent arrangements of selling the superfluous stock to the inhabitants of the plains, where they

## SIR.

are held in esteem. The price of the "help-meet" of men varies from five to twenty pounds, the rate rising or falling according to the degree of beauty or other attraction possessed by the object of sale. The British government has prohibited this traffic which is, however, still covertly practised. The general character of these mountaineers has been variously delineated. Fraser's picture is a dark one. He says, "All are bad. They are revengeful and treacherous, deficient in all good qualities, abandoned in morals, and vicious in their habits. Female chastity is here quite unknown and murder, robbery, and outrage of every kind, are here regarded with indifference." It is to be remarked, that the juncture at which Fraser visited the country was likely to give scope to the worst passions of a people long subject to the cruel oppression of the Goorkhas, and then at once given up to anarchy in consequence of the expulsion of that people by the success of the British arms. Gerard, writing fifteen years later, describes the people as liberal and obliging. "Private stealing," he says, "is almost unknown, and of all the many Europeans who have visited the part of the hills of which I am treating, none of them ever lost a single article. I have often travelled over this tract without a guard, and had I occasion to go through it again, I would never take a single sepoy." Possibly the statements of all travellers as to the moral characteristics of a strange people should be received with caution as their stay is rarely of sufficient length to enable them to perceive and appreciate either all the good or all the evil which longer and closer acquaintance might detect. The religion prevailing in Simour is mainly Brahminism, to which is added the superstitious adoration and dread of innumerable local divinities, with which the imagination of the natives has peopled every hill, dell, or grove. The lives of kine are sacred. The people are divided into two castes, as in the plains, and Brahmins abound. The custom, or practice of burning women alive with the dead bodies of their husbands, was formerly frequent, and in the instances of the death of men of rank, not only the favoured wife, but a whole host of females, were doomed to blaze on the pyre of their deceased lord. The strong disapprobation of the British government has caused the diabolical rite to disappear throughout the hill states. The language of the natives is a dialect of Hindostanee.

Simour is governed by a rajah, who claims a Rajpoot descent. Indeed, nearly all classes make the claim, except the lowest, who style themselves either coolies or labourers, or chumars, persons who stay cattle and work in leather. The rajah holds his possessions by a grant made on the expulsion of the Goorkhas by the British government, and dated 21st September, 1816. The Kyarda Doon was granted by the same power on the 5th September, 1817: the rajah, however, ill repaid this

liberality by fomenting in Kuhlloor an insurrection against the East-India Company, who, in consequence, punished him by fine. The annual revenue is estimated at 10,000*l.* by Moorcroft at 4,000*l.* but this was before the annexation of Kyarda Doon. Nahun, at the western extremity of the Kyarda Doon is the residence of the rajah, and the only town in his dominion as Kyarda is a mere village, and Kalm has latterly so dwindled as to be no better. The whole territory is divided into twenty-seven pergunnahs or districts the aggregate population is estimated at 75,596. According to Francis Hamilton, the ruling family has held Simour fifteen generations since its acquisition by the first rajah, a son of the house of Jessulmeer. In 1879 it was made tributary by Feroz Shah, of Delhi, and that prince and several of his successors frequently visited it in their hunting excursions. In 1809 the Goorkhas conquered the country, and in 1816 were conquered by the British, who restored the rajah, as has been already mentioned. His military force is not great it appears to consist of about 400 infantry and two guns.

SIRONJ in Malwa, a town lying within the territory possessed by the noted Patan freebooter Ameer Khan, is situate on the route from Nussurah to Saugor 273 miles S.E. of the former 78 N.W. of the latter. It is built at the base of a ghāt or descent from the elevated table-land farther north. The country towards the east, south, and west, is open, fertile, and well cultivated. Sironj, though still a large town, is much decayed from the prosperity in which Tavernier found it in the seventeenth century when it was crowded with merchants and artisans, and famous for its fine muslins and chintzes, the highly prized objects of an extensive traffic. The walls which surrounded the town in the time of Tiesenthaler have disappeared, but the fine bazar which he describes remains. There are two caravanserais and many mosques, but no Hindoo temples, though outside the town is the huge black head of an idol, which the Hindoos anoint with oil and butter. West of the town is a rectangular fort with a square tower at each angle, and to the south a tank of good water. Water of good quality is also supplied in abundance by a small stream flowing from an eminence west of the town that obtained from wells is brackish. Sironj, with the appertaining pergunnah, was, in 1798, granted to Ameer Khan, by Jawant Rao Holkar. In 1809 the threatening attitude assumed towards Nagpore by Ameer Khan led to the advance upon Sironj of a British force under Colonel Clive subsequently in 1817, this town and district, with other territories, were guaranteed by the British government to the ameer. The territory is estimated to yield an annual revenue of 2,00,000 rupees, or 20,000*l.* Its area is 244 square miles. The estimate of its population is included in that of

# SIR-SIT

the entire possessions of Ameer Khan, for which see the article on Tonk. Distance of the town from Oosain, N.E., 140 miles S.W. from Allahabad 260, S. from Agra 212, S. from Delhi 310 Lat. 24° 6' long 77° 49'

**SIROTE**, in the Rajpoot state of Jeypore a town on the route from Agra to Mow, 62 miles S.W. of former 350 N.E. of latter It is inclosed by a mud rampart, and has within a square mud fort with double wall and ditch There is a bazar here, and supplies and water are abundant. Lat. 26° 49' long 77° 12'

**SIRPOOR**.—A town in the British district of Candeish, presidency of Bombay 64 miles N N E of Malhgaum Lat. 21° 20' long 76°

**SIRPOORUH**, in the British district of Mysore, a small town or village on the route from Allypore to Futehghur and 57 miles S.E. of the former It has a small bazar and is supplied with water from wells and tanks Lat. 27° 38' long 76° 56'

**SIRBINUGGUR** in the British territory of Saegur and Nerbudda, lieutenant-gov. of the N W Provinces, a town on the route from Damoh to Sauni, 63 miles N of the latter Lat. 22° 57' long 79° 40'

**SIRBUD** in the Rajpoot state of Jemul meer a group of villages on the route from the town of Beekanser to that of Jemul meer and 70 miles S.W. of the former It is situated in a woody plain and has an abundant supply of good water from a tank, and from wells about ninety feet deep The road in this part of the route is in some places hard and good, in others sandy and deep Lat. 27° 25' long 72° 35'

**SIRSA** in the British district of Bareilly division of Pilibheet, lieutenant-gov. of the N W Provinces, a village on the route from Bareilly to Petoragurh and 36 miles N.E. of the former Lat. 28° 40' long 79° 52'

**SIRSAH**, in the British district of Bhubteeana, lieutenant-gov. of the N W Provinces, a small town on the route from Hansae to Bhubnair and 60 miles N.W. of the former Lat. 29° 31' long 75° 5'

**SIRSALLA**.—A town in Hyderabad, or territory of the Nizam, 170 miles N.W. by W. from Hyderabad, and 111 miles E. from Ahmednuggur Lat. 18° 59', long 76° 23'

**SIRSAWA**, in the British district of Saharanpore lieutenant-gov. of the N W Provinces a town on the route from Saharanpore to Ambala, 10 miles W N W of the former Lat. 30° 2', long 77° 29'

**SIRSEE**, in the British district of Moradabad, lieutenant-gov. of the N W Provinces, a town with a bazar on the route from Allypore to the town of Moradabad, and 16 miles S. of the latter It is situated near the small river Sote, in a level, open, cultivated country Lat. 28° 35', long 76° 42'

**SIRSEEAH**, in the British district of Gorakhpore, lieutenant-gov. of the N W Pro-

vinces, a town on the route from Gorakhpore to Nepal 66 miles N. by E. of the former Lat. 27° 30', long 83° 32'

**SIRSEEGHURREE**, a small fortified place in the jaghire of Dadree, lieutenant-gov. of the N W Provinces. Lat. 28° 49', long 76° 30'

**SIRSOO** in the British district of Gorakhpore lieutenant-gov. of the N W Provinces, a town on the route from Gorakhpore to Jeonpore, 22 miles S.W. of the former Lat. 26° 29', long 83° 9'

**SIRSOUL**, in the British district of Cawnpore, lieutenant-gov. of the N W Provinces, a town on the route from the cantonment of Cawnpore to Futehghur and 15 miles S.E. of the former Lat. 26° 13' long 80° 33'

**SIRSOUL** in the British district of Allypore, lieutenant-gov. of the N W Provinces, a village on the route from the cantonment of Allypore to that of Delhi and three miles W. of the former Lat. 27° 55' long 78° 6'

**SIRZA**, in the British district of Agra, lieutenant-gov. of the N W Provinces, a town situated in lat 27° 21' long 77° 48'

**SISAHEE**.—A village in the British district of Hurriana, lieutenant-gov. of the N W Provinces Lat. 29° 10', long 76° 6'

**SISANDY**.—A town in Oude, 15 miles S. from Lucknow and 49 miles N. by E. from Futehghur Lat. 26° 37', long 80° 59'

**SISSERY** in the district of Bainswara, territory of Oude, a town 15 miles S. of Lucknow It was lately purchased by the chukledar or governor of the district, who expended considerable sums on the repairs of the defences. The chukledar pays to the government of Oude an annual quit-rent of 1 32 000 rupees, which sum is only six tenths of what he himself collects from his ryots or tenants. Lat. 26° 38', long 80° 50'

**SISSORAH**, in the territory of Oude, a village on the route from Bareilly to Lucknow, 59 miles S.E. of the former 96 N.W. of the latter Lat. 28° 2' long 80° 13'

**SISWAL**, a village in the British district of Hurriana, division of Delhi, lieutenant-gov. of Agra. Lat. 29° 12' long 76° 25'

**SITAKUND** in the British district of Bhagalpore lieutenant-gov. of Bengal, a celebrated hot well four miles S.E. of the city of Mongheer It is much revered by the Brahmmins, in consequence of a legend concerning Sita, the wife of Rama, the renowned legendary king of Ayodha Sita had been abducted by Ravan, tyrant of Lanka or Ceylon but when restored to her husband, she asserted that her conjugal purity had remained inviolate The gods, however insisted on her undergoing the fiery ordeal whereupon at the spot where the spring now is, she threw herself "into a pit filled with fire, and when she came pure from its flames, warm water flowed from the rock, as it continues to do at this day" The water runs in the bottom of a basin inclosed with

memory and is too hot to admit the immersion of the person unacquainted. It is perfectly tasteless, and when cold is esteemed remarkably fine, and conveyed to the very great distances for the use of wealthy and fastidious water-drinkers. The temperature varies from 93° to 138° Lat. 25° 30' long. 86° 31'

**SITLAH.**—A town in the British district of Bencoor, lieut. gov. of Bengal, 14 miles N E. of Bencoor. Lat. 25° 22' long. 87° 15'

**SITOONDA.**—A town in Hyderabad or territory of the Nizam 48 miles N by E. from Aurangabad, and 62 miles E from Mallgaum. Lat. 20° 53' long. 75° 28'

**SITTANG.**—A town of Burmah, situate on the left bank of the Sittang river and 72 miles N N E. from Rangoon. Lat. 17° 42' long. 96° 49'

**SITTANG.** a navigable river rises in lat. 21° 40', long. 96° 50' and flowing south for 230 miles through Burmah, and for about 190 miles forming the boundary between the Tenasserim provinces and Pegu falls into the sea, in lat. 16° 50', long. 97° 15'

**SITURWALA.** in the British district of Bijnour, lieut. gov. of the N W Provinces, a village on the route from Moradabad to Hurdwar and 40 miles S.E. of the latter Lat. 29° 30' long. 78° 28'

**SIVAGANGA.** in the Mysore, a town in closed with a rampart, situate at the east base of a lofty mountain Distance from Bangalore N W 28 miles Seringsapatam, N E, 66 Lat. 13° 11', long. 77° 13'

**SIWANER.** in the British district of Hissar, lieut. gov. of the N W Provinces, a town on the route from Hissar to Jhounhpore 19 miles S.S.W. of the former Lat. 28° 53', long. 75° 44'

**SLICKKALKE.** in the Jetch Doob division of the Punjab, a town situated 13 miles from the right bank of the Chenab, 51 miles N.N.W. of the town of Lahore Lat. 32° 53', long. 73° 53'

**SOAMWARPETT.**—A town in the British district of Coorg, presidency of Madras, 70 miles S.E. of Mangalore. Lat. 12° 34', long. 75° 53'

**SOANG.** in Bussahir a village of Koonawar situate near the left bank of the Beas. The vicinity is pleasant, abounding in apricot and walnut-trees, and producing pines of great size, one of them measured by Gerard, was thirty feet in girth. The crops are poor and consist of wheat, barley, buckwheat, amaranth, or cockenomb, peas, and some other pulses. The climate has little to recommend it save for five months, and, during summer, the periodical rains prevail, though not so heavy as in Hindostan. Elevation above the sea 3,100 feet. Lat. 31° 26', long. 78° 18'

**SOANGHER.**—A town in the British district of Cutch, presidency of Bombay,

40 miles N N E. of Mallgaum. Lat. 31° 3' long. 74° 45'

**SOAOUTH, or SAUNTE,** a small district of the Rewa Cantia in the province of Guzerat, presidency of Bombay bounded on the west by Loonawarra, on the north by the Myhee Cantia, on the east by Jhaloda, belonging to Soudia, and by Banawarra and on the south by Barra. It is situate between lat. 23° 56' and 23° 33' long. 73° 45' and 74° 10'. It is sometimes called Soauth Rampoor, from a village of the latter name of the Sookee, which unites with the Ocheoota, a tributary to the Myhee. The fort and town of Soauth stand three or four miles from the open country to the westward from which it is separated by a continuance of jungly hills of moderate elevation. The fort is built on the western face of a high rocky hill which it crowns, but the lower walls commence from the base, where there are some tolerably well built small houses, forming a village in which the rajah's palace is situated. The country of Soauth is strong, difficult to penetrate, troublesome to subdue, and but indifferently productive, yielding only a revenue of about 70 000 rupees.

In the year 1808 the chief entered into an alliance with the British government, and agreed in lieu of the tribute paid to Dowlat Row Soudia, to maintain at its own expense, devoid of every claim to remuneration, a military force for the defence of his territories, and to oppose any attempt of a hostile power to effect a passage of troops through it. This treaty was similar to that made with the neighbouring state of Loonawarra and it continued in force only for a similar period viz. till the year 1806. In 1819 Soauth was included in the arrangement made with Soudia, and it is now one of the protected states. It is subject to a tribute of 7,000 rupees to Soudia the payment of which is guaranteed by the British government.

Soauth was formed, like its neighbour Loonawarra, into a raj by usurpation or grants from other states. The present rajah, named Bhowan Sing, was born in the year 1838. During his minority the affairs were conducted by his mother the Bae, whom it was found necessary to assist in the administration of affairs by stationing a thanadar to report all matters of importance and carry into effect the orders of the Rewa Cantia agency, under whose political superintendence the state has been placed. Under this arrangement, tranquillity has been preserved, the audacity of the Bheels checked, and the feudatory chiefs reduced to obedience.

The father of Bhowan Sing was Kullian Sing, the uncle of his predecessor Kewee Sing. The race derives descent from the ancient Powers of Dhar, who, beyond all others, are celebrated in the ancient history of Central India. They were subdued by the Mahomedans in the general conquest of the country when this family took refuge in the

wilds of Scouth, and are now represented by the petty rajahs of that district. Scouth, the principal place, is in lat. 22° 10', long. 73 47.

**SOHADAH**—A town of Eastern India, in the British district of Northern Cachar 73 miles S. by E. of Nowgong. Lat. 25° 20' long. 92 50.

**SOBORA**—A town in Souda, situate in the territory belonging to Ali Moored, 61 miles E.S.E. from Bakur and 74 miles W.N.W. from Jessulmeer. Lat. 27° 21' long. 69 51.

**SOBRAON**—The name of a small village on the left bank of the Sutlej and within the country under the management of the com. commissioner and superintendent of the Cis-Sutlej territories, near which, on the 10th of February 1846 an obstinate battle was fought between the British army under Sir Hugh Gough, and a Sikh force of great strength, formidably intrenched. By the exercise of extraordinary courage and perseverance on the part of the assailants, the intrenchments were in succession forced and the enemy ultimately driven across the river with immense slaughter. The Sikh army was estimated at 30,000 strong, the British force did not exceed half that number. The event of the battle entirely cleared the left bank of the Sutlej of the Sikh force and the victors immediately after wards crossed the river and entered the Punjab. Lat. 31 8 long. 74 54.

**SODAKHOR**, in the Rajpoot state of Jessulmeer, a village on the route from the town of Beekaneer to that of Jessulmeer and 84 miles N.E. of the latter. It has a small fort, fifty houses, four shops, and a well yielding a good supply of water. The road in this part of the route is tolerably good. Lat. 27° 5' long. 71 31.

**SOEGAUM**—See SOOREAUM.

**SOFAHUN** in Cashmere, a small town at the south-eastern extremity of the valley. Here are the only iron-mines in the province, and the works have greatly fallen away. The iron is considered inferior to that obtained from Bajour and Chinese Tartary. Sofahun is in lat. 33° 32' long. 75 12.

**SOGAM**—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate on the left bank of the Jhelum river, and 37 miles N.W. from Srinagar. Lat. 34 30', long. 74 35.

**SOHAGI GHAT**, in the tract of Boghal, and, in the territory of Rewa, a pass on the route from Allahabad to the town of Rewa, and 26 miles E.W. of the former. The village of Sohagi is situate five miles from the right bank of the Tons. 'At five furlongs from the village of Sohagi, the ascent commences, and continues for about a quarter of a mile very steep and rugged, path winding, and practicable for Indian cattle with difficulty; remainder of the road rugged and rocky but comparatively level, passing through jungle.

Two easy ascents of about 100 yards each, near the end of the stage; no village water from tank in the jungle." This pass is an indentation in the brow of the Kutra range, forming the north-eastern buttress of the second plateau, by which the elevated region of Bundelund rises above the valley of the Ganges, lying to the north-east. The village of Sohagi, situate at the base or northern extremity of the pass, has about 130 houses, including twelve shops, and is supplied with water from a never drying tank and a peeka or brick lined well. Four miles north west of the village, the river Tons falls over a rock the depth of 200 feet and as the elevation above the sea, of the waterway at that point is 830 feet, that of the crest of the pass probably exceeds 900. Lat. 24 58' long. 81 45.

**SOHAGPOOR**—A town in the British district of Sangor and Nerbudda, lieut. gov. of the N.W. Provinces. Little more than the name and locality have been made public respecting it, though it is the principal place of a large district, and the station of a small civil establishment. Sohagpoor originally possessed by a Gond chief tributary to the rajah of Garha Mandla, was, after a long period of anarchy and devastating warfare, subjugated, A.D. 1799, by Ragooe Bhoonsla, rajah of Nagpore, and subsequently ceded by that state to the British government, in 1813, by the eleventh article of the treaty of Nagpore. Sohagpoor is distant E. from Sangor 170 miles E. from Jubbulpore 90 S. from Allahabad 250. Lat. 23° 30' long. 81 28.

The territory of which this town is the chief place, forms a subdivision under the jurisdiction of the political agent for the Sangor and Nerbudda provinces. It has an area of 3,595 miles, and a population of 75,225.

**SOHAGPOOR**, in the British district of Sangor and Nerbudda, lieut. gov. of the N.W. Provinces, a town on the route from Hoshangabad to Goona, 32 miles E. of former. 75 W. of latter. It has a bazar. Elevation above the sea 1,515 feet. Lat. 22 46', long. 78 15.

**SOHAWUL**, in the Sangor and Nerbudda territory lieut. gov. of the N.W. Provinces, a town, with bazar in the jaghirs of the same name. It is situate on the route, by Rewah, from Allahabad to Sangor, 165 miles S.W. of Allahabad and on the river Bara, here crossed by ford fifty yards wide. It was formerly defended by a fort, of massive proportions but rude construction, and now in ruins. Elevation above the sea 1,059 feet. The jaghirs of which this town is the chief place, contain an area of 179 square miles, with a population of 20,000. With the view of relieving its chief from pecuniary embarrassment, the British government has consented to undertake the management of the raj. Lat. of town 24 28', long. 80° 50'.

**SOHEEPUR**, in British district Banda, lieut. gov. of the N.W. Provinces, a village on route by Chala Tara Ghat, from Cawnpore to

town of Banda, 18 miles N of the latter Lat. 25° 44', long. 80° 32'

**SOHNPOOR.**—See **SONMPOOR.**

**SOHOLA.**—A town in the British district of Sambulpoor on the south-west frontier of Bengal, presidency of Bengal, 40 miles W by S. of Sambulpoor Lat. 21° 18', long. 83° 28'

**SOHROH.**—A town in the British district of Belasore, one of the divisions of Cuttack, lieut. gov. of Bengal, 22 miles S.W. of Belasore. Lat. 21° 16', long. 86° 46'

**SOHURERA.**—A town in the British district of Sarun, lieut. gov. of Bengal, 53 miles N.W. of Bethuah Lat. 27° 20', long. 84°

**SOKINDA.** one of the Cuttack mohals, situate on the western border of the British district of Cuttack, presidency of Bengal. Sokindapur the chief town, is in lat. 20° 54' long. 85° 50'

**SOLAGEEBY.**—A town in the British district of Salem, presidency of Madras, 71 miles N. of Salem. Lat. 12° 40', long. 78° 7'

**SOLANI.**—A river rising at the south western base of the Sewalik range, in about lat. 30° 18' long. 77° 55'. It is crossed by the route from Dehra to Saharanpore, in lat. 30° 4', long. 77° 51'. It holds a course of about fifty five miles, generally south westerly and falls into the Ganges on the right side, in lat. 29° 3', long. 78° 1'

This river is crossed by the Ganges Canal and to effect the passage, works of extraordinary character became necessary. Across the valley through which the river flows, the canal is conducted generally by means of an earthen embankment, protected by walls of masonry. But this could not be continued throughout as no provision would have existed for passing the waters of the Solani. To provide this, the river has been bridged by an aqueduct of stone, the bed of which affords transit to the canal. This magnificent work rests upon fifteen arches, each having a span of fifty feet thus giving a clear waterway of 750 feet for the passage of the river. The strength of this work is enormous, and its duration almost appears destined to be co-existent with that of the earth on which it rests. It is supported by a series of blocks of masonry sunk twenty feet below the bed of the stream, most of them measuring twenty feet also in length and breadth, the full depth (twenty feet) being never departed from. Vast masses of piles and stones protect every part from being injured by the force of the current, and a full description of all the contrivances, multi-form and ingenious almost beyond conception, by which it has been sought to secure the fabric from every accident which the imagination could anticipate, would fill a moderate volume. The expense of the aqueduct has been great,—not less than thirty lacs of rupees (300,000), but the work is not only the

greatest on the line of the canal, but probably the greatest of its kind in the world. A section of the canal of which this noble aqueduct forms part, was recently opened, and is now diffusing fertility throughout its course.

**SOLEGONG.**—A town in Hyderabad, or territory of the Nizam, 16 miles S.W. from Aurangabad, and 52 miles N.E. by N. from Ahmednagar Lat. 19° 44', long. 75° 10'

**SOMADGANJ.** in the British district of Jounpore, lieut.-gov. of the N.W. Provinces, a village on the route from Allahabad cantonment to that of Jounpore, 49 miles N.E. of the former 17 S.W. of the latter. It has a bazar Lat. 25° 42' long. 82° 29'

**SOMANHULLY.**—A town in the Mysore, presidency of Madras, situate on the left bank of the Chitravutty river, and 114 miles N.E. from Seringapatam. Lat. 13° 39', long. 77° 53'

**SOMAWARRUM.**—A town in Hyderabad, or territory of the Nizam, 134 miles E. by S. from Hyderabad, and 61 miles N. from Guntoor Lat. 17° 10', long. 80° 25'

**SOMEESIE.**—A town in the Rajpoot native state of Jodhpoor, 63 miles W. by N. from Jodhpoor, and 78 miles E.S.E. from Jessul meer Lat. 26° 31' long. 73° 10'

**SOMEREA PASS.**—See **KOMULMAD.**

**SOMIEGOOL.**—A town of Eastern India, in the native state of Munseepoor, 63 miles W.S.W. from Munseepoor, and 85 miles S.E. by S. from Silehar Lat. 24° 23', long. 93° 2'

**SOMNAGANJ.** in the British district of Allypore, lieut.-gov. of the N.W. Provinces, a town on the route from the cantonment of Allypore to that of Delhi, and 16 miles N.W. of the former. It is supplied with water from wells, and has a bazar and market. Elevation above the sea 752 feet. Lat. 28° 3', long. 78°

**SOMNATH PATTAN** in the peninsula of Kattywar, province of Guzerat, a town situate on the south west coast washed by the Arabian Sea. The ground plan of the town is an irregular quadrangle, inclosed by a wall nine feet thick, one mile and six furlongs in circuit, with two gateways, thirty-six square towers, and two round towers. The defences are on three sides strengthened by a ditch on the west, the base of the wall is washed by the sea. The walls and towers are constructed of uncoincement square stones, and are throughout massive and of great solidity and strength. They are everywhere adorned with Brahminical sculptures on mythological subjects, though much decayed by time and the defacing hands of malicious Mussulmans. The site of the place is fine, commanding the view of the Arabian Sea, of a beautiful bay, and of the headland and resort of Billawal, fortified as a defence against pirates. The population of the town is at present chiefly Mussulman, and there are many mosques, among which the most remarkable is

the Jozna Masjid, described by Burnes as in the Jain style of architecture, of an oblong square figure, with pillars on the great sides, and four domes, resting on pillars at the end which faces the entrance the shafts of all these pillars are low. The great temple of Somnath is finely situated on an eminence at the north west of the town, so advantageously, that it can be seen at the distance of twenty five miles. The accounts of this celebrated temple are numerous, but very confused, and in many instances discrepant. According to Pottani, it consists of one large hall in an oblong form from one end of which proceeds a small square chamber or sanctum. The centre of the hall is occupied by a noble dome over an octagon of eight arches, the remainder of the roof terraced and supported by numerous pillars. There are three entrances, the sides of the buildings face the cardinal points, and the principal entrance is on the eastern side. These doorways are unusually high and wide, in the Egyptian style decreasing towards the top they add much to the effect of the building. Internally the whole presents a scene of complete destruction the pavement is every where covered with heaps of stones and rubbish, the fungus of the walls capitals of the pillars, in short every portion possessing any thing approaching to ornament, having been removed or defaced. Externally the whole of the building is most elaborately carved and ornamented, with figures single and in groups of various dimensions. Many of these appear to have been of some size but so laboriously was the work of mutilation carried on here, that of the larger figures scarcely a trunk has been left whilst few even of the most minute remain uninjured. The front entrance is ornamented with a portico and surrounded by two slender minarets. The dimensions are stated to be—extreme length inside (not including the small chamber or sanctum) ninety-six feet, extreme width sixty-eight feet, extreme height twenty-eight and a half feet. If the subject be cleared from the clouds of grandiloquent verbiage with which it has been so profusely overcast, it must appear that the structure of which the ruins are still to be seen at Pattan was a gloomy massive, and rather rudely-built temple, of diminutive size, overhad externally with a prodigious quantity of mythological sculptures. Of the huge, of historical celebrity there does not appear to remain a trace, and scarcely a tradition, but near the temple is a multifarious symbol of Shiva, called Koteswara, meaning with a million of lingas. It is a huge cylinder of red freestone, covered with miniature lingas. The splendour of Somnath when greatest, is described (no doubt with much exaggeration) by Mirkhond. 'Somnath was an idol in a temple situate on the seacoast which idol the Hindoos worshipped, especially at times of eclipse. More than a lakh of people used to come to it on nights when the moon was under eclipse and they believed, too, that the souls of the

deceased came to Somnath on first leaving the bodies they had occupied, and were there assigned fresh bodies. They also believed that the sea worshipped Somnath, and the rise and fall of the tides were considered to be proof of this. From the most distant parts of India pilgrims used to come to worship at this shrine, 10,000 villages were assigned for its support, and there were so many jewels belonging to it as no king had ever one-tenth part of it in his treasury. 2,000 Brahmins served the idol and a golden chain of 300 muns supported a bell plate, which being struck at stated times, called the people to worship. 300 shavers, 500 dancing-girls, and 300 musicians were on the idol's establishment, and received support from the endowment and from the gifts of pilgrims."

This temple was taken by storm by Mahmood of Ghuznee, after repeated attacks, it being desperately defended by its fanatical guardsmen. It has been said, and the assertion has obtained pretty general belief that the celebrated "destroyer of idols" carried away as a trophy of his success a pair of gates, which subsequently adorned his own tomb. Firishta, however makes no mention of this; and for various reasons, the truth of the story seems open to question. On the retirement of the British army, however from Afghanistan, in 1842, this reputed trophy was considered of so much importance that its recovery and consequent restoration to Hindostan, were announced in a proclamation distinguished by remarkable elevation of language as avenging the insult of 800 years, and the chiefs and princess of Sindh, Rajwara, Malwa, and Guzerat, were invited to transmit the gates, 'with all honour,' to the place from which they had been violently removed. That destination however, they never reached the home authorities altogether disapproved of the intended re-erection of the gates in their original place, if such it were regarding such a proceeding as calculated to stimulate religious animosity to identify the British government with one of the two great parties of religionists into which India is divided and to give deep offence to the other. The gates were said to be composed of sandal-wood but less costly materials have been named as more probable and even an opinion has been expressed that they were nothing better than 'rotten old deal.'

Ahla Bhas, a superstitious old lady of the Holkar family has recently caused a temple to be built for Somnath, in the vicinity of the ancient edifice. The present town contains about 900 houses and 5,000 inhabitants. Billawal, or Vairawal two miles west of Somnath Pattan, is its seaport, and is a good haven for trading vessels, the traffic being considerable. Distance from Ahmedabad, S.W. 210 miles, Baroda, S.W. 310. Somnath, W. 163 Bombay N.W., 210. Lat. 26° 55', long 70° 25'

SOMURA — A town in the Rajput state of

Jodhpore, 80 miles N.E. from Jodhpore, and 70 miles E. by S. from Beekanes. Lat. 27° 12', long. 74° 4'

**SONADAH.**—A town in the British district of Nudda, lieut.-gov. of Bengal, 80 miles N. of Calcutta. Lat. 23° 45', long. 88° 30'

**SONARE.**—A town in the British district of Ahmednuggur presidency of Bombay, 22 miles N. by E. of Ahmednuggur. Lat. 19° 24', long. 74° 50'

**SONAHAUT.**—A town in the British district of Chota Nagpore, lieut.-gov. of Bengal, 66 miles E. by S. of Lohadugga. Lat. 23° 18', long. 86° 40'

**SONAKHODA.**—A town in the British district of Purneah, lieut.-gov. of Bengal, 58 miles N.E. of Purneah. Lat. 26° 18', long. 88° 16'

**SONAMGUNJE.**—A town in the British district of Silhet, lieut.-gov. of Bengal, 80 miles W.N.W. of Silhet. Lat. 25° 3', long. 91° 24'

**SONAPUSSEE.**—A town in the native state of Mohurbunge on the south west frontier of Bengal, 100 miles W.S.W. from Midnapore, and 98 N. from Cuttack. Lat. 21° 51', long. 85° 58'

**SONAR.**—A river rising in the Raugor and Nerbudda territory, about lat. 23° 28', long. 76° 48', and at an elevation of 1,250 feet above the sea. It holds a north-easterly course of 110 miles, and receives the Beasra on the right side, and eight miles lower down falls into the river Cane, on the left side, in lat. 24° 22' long. 79° 52'. The fall of its channel from its source to the confluence is about 950 feet.

**SONARA.** In the territory of Indore, or possessions of Holkar's family a town on the route from Neemuch to Kota, 70 miles N.E. of former 52 S.W. of latter it is of considerable size, and has a good bazar. It was on his march to this place, whether he had despatched his baggage and stores that the ill-fated Colonel Monson, in July, 1804, received intelligence that the irregular horse under Lieutenant Luman, who had been left to watch and report the motions of Holkar had been attacked by that chieftain with his entire cavalry, the communication being almost immediately followed by the still more afflicting news, that the party thus assailed was beyond the reach of succour having been totally routed, their gallant commander wounded and made prisoner. Colonel Monson, who was preparing to support them consequently pursued his march to Sonara. Lat. 24° 34', long. 75° 55'.

**SONDWARA.** in Malwa, a district lying between lat. 23° 10'—24° long. 75°—76° 15', is a fine, fertile, well-watered tract of diversified surface. It has received the denomination from its inhabitants, the Sondis. 'They are often called Rajpoots, but are a mixture of all

clauses, or rather descendants of a mixed race. In their origin they were probably outcasts, and their fabulous history (for they consider themselves as a distinct people) traces them from a prince who in consequence of being born with the face of a tiger, was expelled to the forests, where he seized upon women of all tribes, and became the progenitor of the Sondias, or, as the term implies, mixed race. At the conclusion of the treaty between the British government and Holkar, at Mundmor, in 1818 the Sondis were estimated in number at 1,249 horse, 2,250 infantry, all subsisting by plunder. They were, however, quickly reduced to obedience by a force formed of the troops of the East-India Company, of Holkar, and of the rajah of Kota, and at present the territory belongs partly to the last-mentioned chief and partly to Scindia.

**SONE** a river rising in Gondwana, in the territory of Nagpore, and on the elevated table-land of Ummurkuntik, in lat. 22° 41' long. 82° 7' and four or five miles E. of the source of the Nerbudda. Flowing north for thirty miles, it crosses the frontier into the British district of Sangor and Nerbudda, through which it holds a course unbroken, but generally north west, for fifty miles, after which it constitutes the boundary between that territory and Rewa for thirty miles, passing into the latter at the confluence of the Johila, which joins it on the left side. Thence pursuing its course in a northerly direction for forty miles, it receives the Mahanudda, which falls into it on the same side, in lat. 24° 8', long. 81° 6'. From this point it turns north east, and flowing along the south-eastern base of the Kymore range, through the territory of Rewa, or that of its dependences, for 125 miles, crosses the eastern frontier of the raj in lat. 24° 37' long. 82° 51', into the British district of Mirzapoor. At the town of Bardhee, it on the right side receives the small river Goput. Its course through the district of Mirzapoor is east for thirty five miles, to the east frontier, in lat. 24° 31' long. 83° 33', and in this interval it on the right side near Agoree, receives the Behund, and twelve miles lower down, on the same side, the Kasher. From the place where it leaves the district of Mirzapoor, it forms the north east frontier of the British district of Shahabad, being for 120 miles the boundary between it and the British district of Behar and for fifteen more the boundary between it and the British district of Patna. Its tributaries of any importance in this part of its course are all on the right or south-east side. Of these, the greatest is the Khyal, Koel, or Koyl, joining nearly opposite the celebrated fort of Rohas, and in lat. 24° 31' long. 83° 54'. The Sone falls into the Ganges on the right or south side, ten miles above Dinapore, and in lat. 25° 37', long. 84° 55' after a total length of course of 465 miles. There appears reason to think that it formerly joined the

Ganges by some other channels besides the present one. A nearly effaced channel may be still traced opening on that of the Ganges at Bankipoor, below Dinapore, and another still farther down the stream, below Patna. In the time of Abulfaiz, in the commencement of the seventeenth century, and in that of Baber, a century earlier, it flowed near to Munir Bunt, who viewed the stream in lat. 24 35', long 83' about 280 miles from its source, found that there "the bed of the river was about half a mile wide and full of quick sands, but the stream was not more than a hundred yards broad, and flowed rapidly with about three feet of water in the deepest part. It rapidly increases in size as, forty or fifty miles lower down, after it has entered the British district Shahabad, the width of the channel is nowhere less than 600 yards, and in many parts is 1 000. In the end of December the stream is 300 or 400 yards wide, not rapid, but rather clear generally deep, and scarcely anywhere having fords, though in spring there are numerous yet even then, when lowest, though boats of burthen can scarcely pass, vast quantities of bamboos are conveyed down in floats. Below the mouth of the Koel, the width of channel increases variously from 600 to 2 000 yards, which great extent is during the periodical rains filled for several days together and the stream is at such junctures navigable for craft of ten or twelve tons, though the passage is intricate precarious, and tedious altogether, it may be regarded as a vast torrent. In lat. 24 52' long 84 13', and seventy miles above its mouth it is traversed by the route from Hazareebagh to Benares, and in that part according to Jacquemont, its bed, two miles wide, is during the periodical rains filled by the stream but in early spring, or the dry season, there were only two streams, each as large as the Seine at Paris, one near the left bank the other half a mile nearer the right. The passage was made by ferry, but Gardien states that it may also be forded. With the view of testing the feasibility of throwing a bridge over this river the construction of a causeway was some time since intrusted to the superintendent of the grand trunk road and the effect of the stream during the rainy season was thus ascertained. Measures are now in progress for the construction of a bridge over the Sone, in connection with the East Indian Railway. The navigation of the river is not considered available for purposes of important utility higher than Daud nagar sixty miles from the confluence with the Ganges.

**SONEGURH**, in Guzerat, or the territory of the Guzerow a town 45 miles E. of Surat. Lat. 21 8' long 73 33'

**SONEPOR**.—The name of a native raj subject to the political agent for the south western frontier of Bengal its centre is in lat. 21 long. 84, and it contains an area of 1,467 square miles. The country is generally

flat and pretty well cultivated, but when last visited by the political agent, the people complained greatly of oppression. The heat here is intense. The southern part of the raj is inhabited by Khoonds, and human sacrifices are represented as of frequent occurrence. The country was estimated by the agent to be worth about six lacs, and the annual tribute (6 400 rupees) was regularly paid. The population is believed to be about 65,000

**SONEPOOR**.—A town in the raj of the same name subject to the political agent for the south west frontier. It is situated on the right side of the Mahanuddy river, navigable by large river-craft from the sea to this place, a distance of 200 miles. It is distant 59 miles S. from the town of Sumbulpore. Lat. 20 55', long 84 5'

**SONEYEE**, in the British district of Muttra, lieutenant gov. of the N W Provinces, a town on the route from Muttra to Buddoon, 13 miles ENE of the former. Lat. 27 35' long. 77 58'

**SONEYRA** in the territory of Gwalior, or possessions of the family of Scindia, a small town in Southern Malwa, on the route from Gooma to Mow, 107 miles S W of former, 78 N E. of the latter. It has a bazar and supplies may be obtained. Lat. 23 27' long 76 23'

**SONG**, a river of the British district of Gurhwal rises on the southern declivity of the Sarkanda peak and in lat. 30 24' long 78 22'. It first flows in a south-westerly direction for about twenty miles to Nalapani, and washes its eastern base, from which it takes a southerly course of about twenty miles to the confluence of the Rocoza, where it turns south-east, and after a further course of about eight miles, falls into the Ganges, in lat. 30° 3' long 78 19' and at an elevation of 1,200 feet above the sea. Its volume of water is in winter inconsiderable, as Moorcroft, who saw it in the middle of February, styles it a rivulet.

**SONGDEE**.—A town in Hyderabad, or territory of the Nizam, situate on the right bank of the Payne Cunga river and 166 miles N from Hyderabad. Lat. 18° 42' long 78 55'

**SONHAT**, in the native state of Kora, on the south western frontier of Bengal, a town among the mountains of Gondwana, 50 miles N W of the ruined town of Surjoogh 120 S. of Mirzapoor 426 W of Calcutta by Hazareebagh. Lat. 23 20' long 87 23'

**SONK** in the British district of Muttra, lieutenant gov. of the N W Provinces, a town on the route from Kombar in Bhurtpoor to the cantonment of Muttra, and 15 miles S W of the latter. Lat. 27 23' long 77 34'

**SONKUTCH**, in the territory of Gwalior, or possessions of Scindia's family, a large and populous town, the principal place of a pergunnah of the same name, is situate on the east or right side of the river Kalou Sindia.

This pergunnah, with Ouchel united to it, yielding an annual revenue of 90,000 rupees, was by treaty, 1844, placed under British management, for the maintenance of the augmented Gwalior contingent. Distant 40 miles S.E. of Oojain Lat. 23, long. 76 21'

**SONMEANKE**, properly **SOUMEANKE**, in Beloochestan, a small town on the shore of the Arabian Sea. It is situate at the northern extremity of an inlet, called the Bay of Sonmeane, and described, probably in too favourable terms, by Pottinger as a very noble sheet of water, said to be free from rocks or shoals, and is capable of affording anchorage to the largest fleet. This bay is formed by the projection of Cape Moussé on the east. According to the competent authority of Carless, "the harbour, which has been formed by the Poorally river is a large irregular inlet, spreading out, like that of Kurrachee, in extensive swamps, and choked with shoals. The channel leading into it is extremely narrow, and has a depth of sixteen or seventeen feet at high water in the shallowest part but it shifts its position every year, and vessels of any size could not navigate it without great difficulty until it has been buoyed off inside. There are six or seven, or even ten fathoms in some places but towards the town the channels become shallow and the trading boats cannot approach it nearer than a mile. At the spot where they anchor they are always aground at low water. During the south west monsoon the harbour cannot be entered for the bar at the entrance is exposed to the whole force of the swell and the breakers on it are heavy." This bar, according to Hornburgh, has two fathoms of water when the tide is out, but the depth is every year diminishing, and will probably be soon too little to admit vessels at the same time the sea is encroaching on the land, and threatens soon to sweep away the present site of the town. Sea-going vessels in general anchor outside the bar, at the distance of about two miles from the town, and are much exposed to the sea and the weather. The cargoes are discharged into small boats, and so landed horses for exportation are made to swim to the vessels. The town is mean and dirty and has about 500 houses, built of mud, and each surmounted by a *badger* or small turret or fire, open on one side to the sea-breeze, which it sends downwards in the interior of the building, for the purpose of mitigating the excessive heat. It was formerly surrounded by a mud wall which is now so decayed that scarcely a vestige of it remains. Water can be obtained only by digging in the sand a little above high-water mark, and is so brackish as to be scarcely drinkable, inasmuch that the British vessels, when stationed here, were supplied from Kurrachee. The inhabitants live principally by fishing, and are exceedingly poor, except a few Hindus, who have the whole trade in their hands. The exports from Bombay are silk, cloths, iron, tin, steel,

copper, pepper, sugar, and spices from the Persian Gulf, dates and slaves from Sindh, coarse cotton cloths. The exports are horses, butter, wool, hides, oil, grain, dried fruits, and gum. In 1808 this place was burned by Arabian pirates, and the trade has much decayed since that time. Its traffic is at present much injured by the predatory Belooches, who interrupt the communication with the interior. The population is estimated by Carless at about 2,000 Lat. 24 27', long. 68 36'

**SONNELI**, in the territory of Gwalior, or possessions of Soundia's family, a town on the route from Oojain to Kotah, 85 miles N. of former 55 S. of latter. It is of considerable size, of square outline and has a rampart of stone. There are two broad streets, which cross each other at right angles, and at their intersection is a chauri or market-place. Lat. 24 20', long. 76 2'

**SONOREE**—A town of Bundalkund, in the native state of Duttach, 13 miles N. from the town of that name, and 30 miles S.E. by S. from Gwalior Lat. 25 50, long. 78 30'

**SONUH**, in the British district of Gurgaon, lieut. gov. of the N.W. Provinces, a town on the route from Delhi to Alwar, by Ferozpur, and 39 miles S.W. of the former. It is situate in a long valley stretching from south west to north-east, the bottom of which is quite level, and inclosed by chains of hills of quartzose or sandstone formation and from 300 to 400 feet high. Here is a hot sulphureous spring, of the temperature of 108 Fahrenheit. The water is received into a reservoir. It gushes from a shaft out of the solid rock and about thirty feet deep, in the centre of a basin, also cut in the rock and sixteen feet square, with steps leading down to the water, for the convenience of bathing. The whole is covered by a beautiful dome of ancient architecture and surrounded by apartments with open verandas, occupied by thirty or forty Brahmans, who levy small contributions on those who have recourse to the reservoir which is used as a warm bath, the inhabitants, Mussulmans and Hindus, every morning remaining immersed in it for several minutes. This bath is found very sensitive in leprosy and other cutaneous affections, in scrofula, chronic rheumatism, and liver complaints and is much frequented by the afflicted with such disorders, but Jaquemont considers its habitual use by the inhabitants of Sonuh as highly injurious to their health, as, notwithstanding the purity and salubrity of the air, they have all a thoroughly cachectic look. On a hill above the town is a sort of fortress, large enough to contain the inhabitants and their moveable property and built by them as a place of refuge from freebooters, who much infested the country previously to its conquest by the British. There is a bazar in the town, which is well supplied with water. The road on this part of the route is good.

the population amounts to 3,513 Lat 23 14, long 77 7

**SONUND**—A town in the British province of Sattara, presidency of Bombay, 81 miles E.S.E. of Sattara. Lat 17 15', long 75 18'

**SOOA** in the British district Bareilly, division of Pilibhit, hant.-gov. of the N.W. Provinces, a village on the route from Bareilly to Pataurgh and 76 miles N.E. of the former. It is situate on the right bank of the Gogra or Surju, about five miles below its exit from the mountains. Lat 29 4' long 80 10'

**SOOAL**, in the British district of Kumaon hant.-gov. of Agra, a small river rising close to Sheen Dee temple at an elevation of 6 780 feet above the sea. Lat 29 37' long 79 52'. It takes a south westerly direction flowing at the south-eastern base of the mountain on which Almora stands, four miles below which place it falls into the Kosia, on the left side, in lat. 29 33' long 79 39' after a course of about twenty miles. Webb who crossed it in lat. 29 36' long 79 46' and about ten miles from its source, found it between fifty and sixty feet wide and two feet deep with a stony bed

**SOOBATHOO**.—See **SUBATHOO**

**SOOBHAGDESI**.—A town in the Rajpoot state of Beekaneer, 87 miles E. by S from Beekaneer and 89 miles N from Ajmeer. Lat 27 44' long 74 44'

**SOOBHAMUNNY**—A town in the British district of South Canara, presidency of Madras 55 miles E. by S of Mangalore. Lat 12 40', long 75 40'

**SOOBU SHEREE**—A river rising in Tibet, in lat. 28 47' long 92 57' and flowing through Tibet, the territory of the Abor tribes, and Luckimpoor falls into the Booree Lohit river in lat 27 10' long 94 18'

**SOOE**, in the British district of Kumaon hant.-gov. of the N.W. Provinces, a village in a fine deodar-grove, on a ridge in the Sub-Himalaya, or mountain system south of the main range on the route from Champawut to Askoth, seven miles N. of the former. Lat. 29 28', long 80 7'

**SOOEBAUM**.—See **SOORBAUM**.

**SOOGANHULLY**.—A town in the British district of Bellary presidency of Madras, 18 miles N.W. by W of Bellary. Lat 15 17' long 76 46'

**SOOJABAD**, in the Punjab, a town about four miles from the east bank of the Chenab and 30 miles S. of Multan. Its site is considerable, and at a distance, with its lofty and irregularly-built fortifications, it has a striking and picturesque appearance. There is a good and well-supplied bazar. Its principal manufactures are cottons and wood turnery, the excellence of the latter is much celebrated. The gardens belonging to the town are extensive and luxuriant, and the surrounding country is fertile, as well as highly cultivated,

yielding great crops of sugarcane, cotton, grain, and indigo. Lat 29 33' long 71 21'

**SOOJAWULPOOR**, in the territory of Gwalior or possessions of Scindia's family a town situate on the right or east bank of the river Jambur. It is of considerable size, and consists of a walled post or fort, and, outside the rampart of a suburb, having a bazar and many good houses. There is a considerable market for muslins and other cotton fabrics, and for opium. The annual revenue, stated at 2 55 000 rupees, has been transferred to the British authorities, for the maintenance of the increased Gwalior contingent. Distant E. of Oojein 62 miles S.W. of Gwalior fort 215 Lat 23 21' long 76 42'

**SOOKKIT**.—See **SUKKIT**

**SOOKKEY SIR** in the Sude Sagur Doab division of the Punjab a town situated 27 miles S.E. from the left bank of the Indus, 96 miles S. by E. of the town of Peshawar. Lat. 32 33' long 71 59'

**SOOKHEE**, in Gurhwal, a village on the right bank of the Bhageerettee, as the Ganges is called near its source. It is situate on the western declivity of a lofty mountain and surrounded on all sides by rocky precipices of the Himalaya, crowned with snow. At the depth of about 1 000 feet below, the river rushes along foaming in a narrow channel. The village is now nearly ruined, and contains few inhabited houses. The scenery along the course of the river in this part of the route is very striking. A wall like precipices of compact granite bounding the river on both sides, to the immediate height of 2 000 or 3 000 feet. The elevation above the sea, of the mountain-top is 12 000 feet of the village, 8 889, of the bed of the river below it, 7 608. Lat 31' long 78 45'

**SOOKLY**—A town in Hyderabad or territory of the Nizam 14 miles N. from Mahur, and 88 miles S.E. from Ellichpoor. Lat 20 1, long 78

**SOOKREE RIVER** rises in lat. 25°, long 73 24 and flowing westerly for 120 miles, through Godwar and Jodhpoor falls into the Loonee river in lat. 25 2' long 71 41'

**SOOKSAGUR**.—A town in the British district of Nuddes, hant.-gov. of Bengal, 36 miles N. by E. of Calcutta. Lat 23 6', long 88 25'

**SOOLEEAY**—A town in the British district of South Canara, presidency of Madras, 44 miles S.E. by E. of Mangalore. Lat 13 34', long 75 27'

**SOOLGAUNA**.—A town in the native territory belonging to the Daung rajah, 86 miles W. from Malligam, and 65 miles S.E. from Suzat. Lat 20 33', long 73 39'

**SOOLOO**.—An island in the Malay Archipelago, situate in lat. 6°, long 121°. A treaty has been recently concluded by Sir James

Drinks on the part of the British government with the sultan of this place.

**SOOLBOON**—A town in the Mysore, 25 miles N.W. from Bangalore, and 58 miles N.E. from Srirangapatna. Lat. 18° 4', long. 77° 17'

**SOOLPAN MAHADEO**—A town in the British district Akramga, collectorate of Candesh 50 miles E by N from Broach, and 98 miles N.N.W. from Malligum. Lat. 21° 48' long. 73° 48'

**SOOLTANPOOR**—A town in the British district of Candesh presidency of Bombay 84 miles N by E. of Candesh. Lat. 21° 48', long. 74° 40'

**SOOLTANPOOR**—A town in the Rajpoot state of Kotah situate eight miles S.E. from the right bank of the Chumbul river and 31 miles E.N.E. from Kotah. Lat. 25° 18', long. 76° 20'

**SOOLTANPOOR** in BENARES, so called in contradistinction to Sooltanpoor in Oude, a town with bazar on the route from the city of Benares to Chunar, 13 miles S.W. of the former three miles N. of the latter. Here is a cantonment of cavalry. Supplies may be had in abundance, as well as water the place being situate on the left bank of the Ganges. Distant N.W. of Calcutta, by water, 687 miles or 564 if the Sunderbund passage be taken by land, by way of Benares, 433. Lat. 25° 11' long. 85° 37'

**SOOMAIRPOOR**, in the British district of Humnaspur, lieut.-gov. of the N.W. Provinces, a town on the route from Humnaspur to Bandah, 11 miles S. of the former. Lat. 25° 50', long. 80° 18'

**SOOMEYSBUR FORT**, in the British district of Sarun, lieut.-gov. of Bengal, 45 miles N.N.W. of Bettiah. Lat. 27° 22' long. 84° 21'

**SOONAMOOKEE**, in the British district of Bancoora lieut. gov. of Bengal, a town on the route from Berhampoor to Bancoora, 91 miles S.W. of former, 24 N.E. of latter. Lat. 23° 15', long. 87° 31'

**SOONA MUDAN**—A town in Nepal, situate on the right bank of one of the arms of the Ganduck river, and 126 miles N.W. by W. from Khatmandoo. Lat. 28° 37' long. 83° 38'

**SOONDA** in the British district of North Conart, presidency of Madras, a town, the principal place of a talook or subdivision of the same name. It is situate on the Soonda Nulla, a small river tributary to the Baidli Nulla, and was formerly a place of great extent, the outermost wall being thirty-eight miles in circumference. Within it are two other lines of fortifications the innermost, being a square of three miles, was once fully occupied by dwellings, and even when taken by Hyder Ali, of Mysore, in the middle of the last century, contained 10,000 houses. In

the spaces between the inner and middle inclosures, and between the middle and the outer, the houses were formerly dispersed in small groups, with gardens, groves, and orchards between them. The surrounding country is rather rugged, being intersected by many deep valleys and gorges, drained by rivulets. The entire talook or subdivision of Soonda is rough and mountainous, extending over the summit of the Ghats, here expanding into a sort of rugged table-land, traversed by the Baidli Nulla, the Cauty Kuddy and numerous small torrents. Those well watered dells are in the lower part fertile producing, in great perfection, betel nut betel-leaf, black pepper cardamoms, and plantains and capable of yielding a much greater quantity of these commodities, but that the country has not yet recovered from the desolation to which it was reduced by the Maharrattas and the troops of Mysore. The climate in the western part, towards the brow of the Ghats, is extremely wet during the monsoon but this excessive moisture distillates as the country recedes towards the east.

Besides Soonda, the only places within the talook which can be denominated towns, are Seral, Banawad, and Yelapur.

Soonda, called by the natives Sundha, and in Sanscrit Sudhapura, appears to be a place of very remote antiquity. Within the territorial division to which it gives name, there are traces of three several languages having followed each other in a succession commencing with a very early period. The tract formed part of the possessions of the Cadamba dynasty, which ruled as far as the eastern coast of the Peninsula, or that washed by the Bay of Bengal. Its subversion has been conjectured to have occurred in the second century of the Christian era, but neither history nor conjecture furnishes a cause. Thenceforward centuries of total darkness succeed. Probably the irruptions of the Patan sultans of Delhi extended hither but ultimately the territory formed part of the vast realm of Vijayanagar, remaining so until its total overthrow in A.D. 1565, by a great Muhammadan confederacy when its fate was decided under the general partitioning process that followed. In 1753 it was conquered by Fuzul Culla Khan, an officer of Hyder Ali, of Mysore, and the rajah, flying to the Portuguese at Goa, surrendered to them his possessions below the Ghats, in consideration of a fixed stipend. These possessions still form part of the Portuguese territory. The territory of the rajah of the country east of the culminating ridge of the Ghats, which became the prey of Hyder, on the overthrow of Tippoo, in 1799 was incorporated with the dominions of the East-India Company.

The town of Soonda is distant from Mangalore, N., 180 miles, from Bombay S.E., 318, from Bangalore, N.W., 230 from Madras, N.W., 390. Lat. 14° 45', long. 74° 52'.

**SOONDERBUNDE**.—See Sunderbunde.

**SOONDERPOOR.**—A town in the British district of Silet, lieut.-gov of Bengal, 87 miles S.W. of Silet. Lat. 24° 11', long. 91° 24'

**SOONDICOOPA.**—A town in the Mysore, 13 miles W N W from Bangalore, and 63 miles N E. from Seringapatam. Lat. 15°, long. 77° 27'

**SOONDOO RIVER,** a feeder of the Mahanuddy, rises in lat. 20° 12' long 82° 6' and, flowing northerly through Nowagudda and Berar for seventy three miles falls into the Mahanuddy in lat. 21° 4', long 81° 56'

**SOONDOOR.**—See SOUNDOOR.

**SOONDRA.**—A town in the Rajpoot state of Jodhpoor, 182 miles W by S. from Jodhpoor and 71 miles S.W. from Jessulmeer. Lat. 26° 9', long. 70° 15'

**SOONDRAPANDYPATAM.**—A town in the British district of Madras, presidency of Madras, 69 miles E. of Madras. Lat. 9° 51', long. 78° 10'

**SOONDURSEE.**—A town of Malwa, in the native state of Dewar, situate on the right bank of the Kallee Sunde river and 61 miles W from Bhopal. Lat. 23° 16', long. 76° 23'

**SOONDY.**—A town in the British district of Nellore, presidency of Madras, 31 miles S.W. of Ongole. Lat. 15° 11' long. 79° 45'

**SOONHYRUH,** in the British district of Mysore, lieut.-gov of the N.W. Provinces, a village on the route from the cantonment of Aligarh to that of Futtighurh and 50 miles N.W. of the latter. Lat. 27° 27' long. 78° 57'

**SOONKERODEPETTA.**—A town in the British district of Visagapatam, presidency of Madras, 106 miles S.W. of Ganjam. Lat. 18° 15' long. 84° 5'

**SOONPUT** in the British district of Pannepot, lieut.-gov of the N.W. Provinces, a town on the route from Pannepot to Delhi, 27 miles S. of the former. Soonput contains a population of 16,670 inhabitants. Lat. 28°, long. 77° 4'

**SOONTH.**—See SOAETH

**SOOPA,** in the talloek or subdivision of the same name, in the British district of North Canara, presidency of Madras, a town on the rugged plateau formed by the expansion of the Ghats towards the east. The talloek of which it is the principal place, has an average elevation of from 1,000 to 1,500 feet above the sea, and though in many places rugged and rocky, has several well-sheltered and watered valleys, producing rice, pepper, betel-nut, sugarcane, grain (*Oleria arundinacea*) sugar (*Cynosurus occanua*), and escame and the uncultivated parts are overgrown with noble forests of teak, palms, and various other trees. These forests may be easily traversed, in consequence of being free from underwood, but they are generally avoided, the atmosphere being very unhealthy and tigers and leopards being numerous and ferocious. The forests are

during the monsoon rains, so that timber can be floated down to Karwar and other places on the coast. The talloek has an area of 2,052 square miles, and a population of 88,254, indicating a relative density of eighteen to the square mile, but this is incredibly low, and so much less than that of the adjacent talloeks, under similar physical circumstances, that doubtless some error must have entered into the return. The town of Soopa is distant direct from Mangalore, N 170 miles, Bombay S.E. 280 Bangalore, N.W. 260, Madras, N.W. 410 Lat. 15° 16' long. 74° 35'

**SOOPHE.**—A town in the British district of Poonah, presidency of Bombay 88 miles E.S.E. of Poonah. Lat. 18° 30', long. 74° 20'

**SOOPHE.**—See CHAFER SOOPHE.

**SOOPOLE.**—A town in the British district of Bhagulpore lieut.-gov of Bengal, 71 miles N.N.W. of Bhagulpore. Lat. 26° 16', long. 86° 42'

**SOORADAH.**—A town in the British district of Ganjam, presidency of Madras, 45 miles N.W. by W of Ganjam. The seminary of which this town is the principal place having long continued in a state of violence and disorder was excepted, in 1836, from the operation of the general regulations, and its civil and criminal administration intrusted to an agent of the governor of Port St. George. Lat. 19° 45' long. 84° 30'

**SOORAHÉE,** in the British district of Hurriana, lieut.-gov of the N.W. Provinces, a village on the route from Delhi to Hissar, and 11 miles S.E. of the latter. Lat. 29° 3' long. 76° 12'

**SOORAJGUNG** in the British district of Mymensing lieut.-gov of Bengal, a town on the right or south western bank of the Konae, a great offset of the Brahmapootra. It is the principal mart of the district between 1,000 and 2,000 river craft of considerable size being usually anchored here, to receive or discharge cargoes. The principal exports are rice, butter, cattle, hides, and timber. Distance from the town of Nonesabad, S.W. 45 miles. Decan, N.W. 59 Calcutta, N.E. 153 Lat. 24° 28', long. 89° 45'

**SOORAJGURH,** in the British district of Monghyr lieut.-gov of Bengal, a town on the right or south bank of the Ganges, on the route from Dinapore to the city of Monghyr, 80 miles N.E. of former, 20 W. of latter. It is the principal place of a thana or station of a police division, but otherwise is insignificant. Distant N.W. from Calcutta, by Barhampoor and Patna, 318 miles, by the course of the Ganges 349 Lat. 25° 12', long. 86° 18'

**SOORAPOOR.**—See SHORAPUR.

**SOORAUNA.**—A town in the Rajpoot state of Jodhpoor, situate on the right bank of the Soekra river, and 97 miles S.W. from Jodhpoor. Lat. 26° 25', long. 72° 18'

**SOOREE**—A native state on the south-west frontier of Bengal. It is bounded on the north by the British district of Buxar and by Berar, on the east by Burghur on the south by Barungur, and on the west by Boota. It is fifteen miles in length from north to south, and ten in breadth. Its centre is about lat. 21° 58', long. 82° 58'.

**SOOREE**—A town in the British district of Beerbhoom, Haut.-gov. of Bengal, 169 miles N W by N of Calcutta. Lat. 25° 58', long. 87° 51'.

**SOORGAUM**—A petty district of Choan Rajpoots, in the north-western part of the province of Guzerat. It is bounded on the west by the Runn of Cutch, on the east by Baubier, on the north by Mow and on the south by Charchat. It is ten miles long and ten broad, and contains an area of sixty-four square miles. The country is flat and open, the soil is both sandy and saline, producing but poor crops, and those of the commoner grains. Ghuseya salt is produced on the Runn side in large quantities, the water is brackish, and not plentiful. The great road from Nuggur Parkur and Sinda across the Runn, passes through the district. The cold weather lasts during the months of November, December, January, and February; the heat is excessive during the months of April, May and June; the rains in July, August, and September are generally very light. No tribute is paid to any government. The population amounts to about 4,500.

The connection of Soorgaum with the British government first occurred in 1810, upon the expulsion by the latter of the numerous bands of plunderers from Guzerat; and a subsequent engagement was entered into in 1823. The policy observed towards it is that of non-interference with its internal affairs, but of control in its external relations. The district is divided amongst five petty chiefs, of the Choan Rajpoot caste, the principal of whom are Bugwanjee and Fasmajee, who succeeded their fathers in the authority which they possess, and which they will probably transmit to their sons. The town of Soorgaum is in lat. 24° 8', long. 71° 18'.

**SOORGUL**, in the hill state of Buleun, a lofty peak on a range connected with that of Chur. It is stated by Lloyd to have an elevation greater than that of Wartoo, which is 10,473 feet above the sea. Lat. 31° 8', long. 77° 58'.

**SOORLA**, a river of Bombay rises in lat. 18° 54', long. 73° 24', and flowing through the British collectorate of Tannaik west for thirty-five miles, and south for thirty-three, falls into the sea at lat. 19° 30', long. 73° 58'.

**SOORNAMOOKY**, a river of Madras, rises in lat. 13° 28', long. 79° 11', and flowing north-east for seventy-eight miles through North Arcot, and twenty-one through Nel-

lore, falls into the sea at lat. 14° 8', long. 80° 11'.

**SOOROODONGUE**—A town in the territory of Nagpoor 46 miles N N W from Bampur, and 176 miles E S E from Nagpoor. Lat. 20° 8', long. 81° 38'.

**SOORUL**, in the British district of Allahabad, lent.-gov. of the N W Provinces, a village on the route by the Sohajee Pass from Allahabad to Jubbulpore and 27 miles S E of the former city. Lat. 25° 7', long. 81° 48'.

**SOOBOW**—A town in the Rajpoot state of Jodhpoor situated on the right bank of the Sookree river, and 87 miles S W by S. from Jodhpoor. Lat. 25° 30' long. 73° 20'.

**SOORSAH**—A town in Oude, 57 miles N W by W from Lucknow, and 34 miles E from Futtahgurh. Lat. 27° 30', long. 80° 14'.

**SOORSUTTY**—A river rising in Sirmour a short distance south-east of Nahun, and about lat. 30° 30' long. 77° 29'. It takes a south-westerly direction, and after a course of about thirty miles it joins another torrent, the Kharakee holding nearly the same direction and then divides into two branches, the more easterly being called the Chittung, the more westerly the Soorsutty. In consequence of the evenness of the surface, and the great body of water sent over it in heavy rains, it sometimes unites with the Markunda, and even with the Guggur. The whole tract of country "observes Baker "with the exception of village sites, is liable to inundation from the Sub-Himalayan torrents, diffused over the surface by means of a network of natural and artificial watercourses, of which some are supplied from more than one of the rivers above named, others again flow from one river into another and during great floods all three (the Guggur, Markunda, and Soorsutty rivers) are frequently united." Having held a south-westerly direction for about thirty-five miles as far as Thanneear it there turns to the west, and seventeen miles lower down receives the Markunda, and after a further course of about forty miles, joins the Guggur, in lat. 29° 53' long. 76° 10'. Like the other streams of far kind, it is, unless during inundation merely a small thread of running water." It is regarded with great veneration by the Hindoos, being in their extravagant mythology considered identical with the Sarasvati, the consort of Brahma, and goddess of wisdom, fabled to pass under ground to the confluence of the Jumna and Ganges, and there to mingle her stream with theirs. "It is the famous Sarasvati, which comes out of the hills to the west of the Yamuna (Jumna), passes close to Thanneear, loses itself in the great sandy desert, and reappears at Prayag, humbly coming from under one of the towers of the fort, as if ashamed of herself. Indeed she may blush at her own impudence, for she is the goddess

**SOS** of the peninsula. It is bounded on the north by the District of Hallar, on the north east and east by that of Kastywar; on the west by Bahelwar, on the south and south-east by the Arabian Sea, and on the west by the districts of Burda and lies between lat. 20 41 — 21 36, long. 65 56—71 15. There is no official return of the area, but by probable approximation it may be stated at 2,300 square miles. Nearly the whole of this fine district is held by a Mussulman the nawab of Joonagadh, so called from his capital of that name, situate among the hills in the north-east part.

The principal places—Joonagadh the capital, Sonmath Patan, Mangrol, Korynagar Chorwar as well as Diu the Portuguese island and seaport lying off the coast—are described under their respective names in the alphabetical arrangement.

**SOSILLA**—A town in the Mysore, 21 miles S.E. by E from Seringapatam, and 88 miles N from Combatoor. Lat. 12 18, long. 76 59.

**SOTE**, or **YARWAFADAR**.—A river rising in the British district of Moradabad, Bent. gov. of the N.W. Provinces, about lat. 28 54, long. 78 33. It holds a south easterly course of about 150 miles, and falls into the Ganges on the left side, in lat. 27 41, long. 78 29. About thirty miles from its source, it is crossed by the route from Bareilly to Meerut, and is in that place fordable in the dry season, but during the rains becomes so swollen as to be passable only by ferry. A little lower down the route from Bareilly to Delhi crosses it by a bridge of isacones, and there it is ten yards wide, and very deep. Forster describes its waters as salubrious, and flowing in a beautifully winding course and mentions that the name Yarwafadar or "trusty friend," by which it is generally known in the lower part of its course, was given by Mohammed Shah of Delhi, in enthusiastic recognition of the advantages derived from it by his army during his invasion of Rohilound in 1746.

**SOTER**—A town of Eastern India, in the native state of Munseepoor, 28 miles E. by S. from Munseepoor and 102 miles E. from Silchar. Lat. 24 41, long. 94 27.

**SOUAR**, in the jaghree of Rampoor. Bent. gov. of the N.W. Provinces, a village on the north-eastern route from the town of Rampoor to Nungtama, and 18 miles N. of the former. Lat. 25 2, long. 79 6.

**SODAPULLY**—A town in the British district of Ouddapah, presidency of Madras, 73 miles S. by W of Ouddapah. Lat. 13 26, long. 78 45.

**SODRA**, in the Rajpoot state of Jessulmeer a village near the route from Roore, in Sindia, to the town of Jessulmeer and 11 miles N.W. of it. There are a few shops, and water is obtainable from wells. The road in this part of the route is stony. Lat. 26 57, long. 71 7.

**SOUNB** or **SUMBE**, a mountain torrent rising at the southern base of the Sewalik Mountains, in lat. 29 54, long. 77 28, and described by Colvin as "nearly dry except in rains, when it receives the drainage of the mountains south-east of Nahau, and of the plains east of its course nearly to the Jumna; from which, and a strong fall, its floods are most violent and sudden in their effects."

**SOUNDA**, or **SEUNDA**, in the native state of Duttasa, province of Budebund a town on the route by Koonah from Gwabor to Calpas, 73 miles W of the latter. It is situate on the right bank of the river Sindh which here has steep banks, sandy bottom, and usual depth of water during the dry season two feet. Here in the beginning of November 1817, were the head-quarters of the British army under the Marquis of Hastings, Governor-General, advancing towards Gwalior to intimidate Sunda. Lat. 26 9, long. 78 50.

**SOUNDA**—A town of Bundelcund, in the native state of Duttasa, 40 miles N.N.E. from Duttasa and 86 miles W from Jalonn. Lat. 26 10, long. 78 51.

**SOUNDOR**.—A town in the British district of Bellary, presidency of Madras, 24 miles W by S. of Bellary. A small portion of the district of which this town is the principal place, belongs to a native chief, styled the rajah of Soundoor. Lat. 15 5, long. 76 35.

**SOURUJPOOR**.—A town in Nepal, 118 miles W by S. from Khatmandoo, and 66 miles N from Goruckpoor. Lat. 27 30, long. 83 29.

**SOUSA**, in the British district of Muttra, Bent. gov. of the N.W. Provinces, a town on the route from Muttra cantonment to Komber, in Bhartpore, and 16 miles N.E. of the latter. Lat. 27 27 long. 77 37.

**SOUTHERN MAHRATTA JAGHIREES**.—By this name are indicated the following petty territories in the Southern Mahratta country—Hablee Jhunkundee, Koonwar, Meeraj (under two chiefs) Moodhole, Nurgound, Sangies, Savanore, and Sheddal. They are under the protection of the British government, and locally are within the limits of the Bombay presidency. The area of the whole is returned at 2,700 square miles, and the entire population is stated at 410,700.

The Sattara jaghires, dependences of the late raj of Bettara, and included within it, are named Akulkote, Bhor, Juth Ounda, Phul tun and Wyhee. With the state to which they belonged, they have passed under the British government. Most of the jaghires above mentioned are noticed separately in the alphabetical arrangement.

**SOUTH-WEST FRONTIER OF BEN GAL**.—This agency comprehends a large tract of country under the administration of an officer called the Political Agent for the South-west Frontier and who is also the commissioner of Chota Nagpore. He is aided in the

discharge of his duties by several European assistants. In addition to these, there is a native judicial establishment, consisting of a sadder ameen and nine mooniffs. The tract of country subject to the commissioner of Chota Nagpore, comprises that province, called also Lohardugga, Maunbhoo, Ramgurb or Hazaribagh, and Sambhalpore but the authority of that officer as political agent extends over several native states subject to British control, in most of which the government of the chiefs is of a very loose character, the land but imperfectly cultivated, and the people but slightly reclaimed from natural wildness. The principal of these native domains are Birgooja, Patna, Sonspore, Korra, Nowagurh Bora Samba, Sarungurb, Phootjee, Bombr, Bones, Gangpore Jushpore, Buckies, Ryegurb Burgum Kernul, Serickala Kurava, and Colehan. In these states the administration of civil justice rests with the chiefs, subject to an appeal to the political agent. In criminal matters, the rajahs may pass sentence to the extent of fourteen years transportation under the approval of the agent but sentence of death cannot be passed until the case comes before the British agent for trial. In minor cases, the rajahs and chiefs may carry out their own orders at once, but they are expected to make monthly reports, and transmit copies of all proceedings.

The places named in the course of this article will be found noticed in the alphabetical arrangement.

**SOWARA.**—See NUGGERABAD

**SOWDA**—A town in the British district of Candish, presidency of Bombay 108 miles ENE of Malligannu Lat. 21° 8' long 76°

**SOWLERGURH** in the British territory of Saugor and Nerbudda, lieut.-gov. of the N W Provinces a town on the route from Baitool to Iadoor 34 miles N W by W of the former Lat. 22° 7' long 77° 31'

**SOWNEE**, in the British district of Saugor and Nerbudda, lieut. gov. of the N W Provinces, a town the principal place of the pergunnah of the same name. It is situated on the route from Hoshangabad to Amseerghur 80 miles S W of former 111° W E. of latter It is described as one of the best-looking and cleanest towns in Central India with one very wide street of new and well built houses. Lat. 22° 28' long 77° 30'

**SOWRICK**, in the British district of Furruckabad lieut.-gov. of the N W Provinces, a town on the route from Furruckabad to Jaloun, 25 miles S by W of the former Lat. 27° 8' long 79° 34'

**SOWUREAH**, in the British district of Benares, lieut.-gov. of the N W Provinces, a village on the route from the city of Benares to Allahabad, 27 miles W of the former 47° E. of the latter Lat. 25° 16', long. 83° 58'

**SPANZEIK**.—A town of Burmah, situated on the left bank of the Irrawady river, and 184

miles S.W. from Ava. Lat. 20° 15', long. 94° 48'

**SPITI**.—A valley so called, situated in the north-eastern angle of the Punjab, it extends from lat. 31° 40'—35° 45', and from long. 77° 43'—78° 35' and is seventy miles in length from north to south, and forty-seven in breadth. The valley is traversed throughout by the river of Spiti, a feeder of the Beas. The mean elevation of the inhabited parts is stated to be 12,000 feet. In 1846, the district was leased by the British for three years to the rajah of Bumahir, and after the expiration of that period a revenue settlement was made with the cultivators, which is still in force.

**SPITI RIVER.**—See LX.

**SRAVANA BELGULA**, in the Mysore, a village, one of the few places in which the Jain sects and worship, formerly so prevalent over India, continue to hold their place. Here is a colossal image of Gomuta Raya, one of the great pastors or coryphees of the Jains, being regarded by them as deified on account of his merits. The statue represents the personage naked it is of very massive proportions, being seventy feet three inches in height, and consisting of one solid stone. Hence it is supposed to have been formed by hewing away the original mass of rock, until the statue alone remained.

Though the Jains have been nearly exterminated in this part of India, by the persecution of the Brahmins, the votaries of their faith in other quarters regard this place with high reverence, and lately an opulent Jain merchant of Seringapatam evinced his devotion by the construction here of a fine tank. Distance N W from Seringapatam 33 miles. Lat. 12° 51' long 76° 38'

**SREE MUTTRA**, or **SARMATHURA**, in the Rajpoot territory of Kerowly, a town near the western frontier towards the territory of Jeypore, 35 miles W of the town of Dholpore, 62 S.W. of Agra. Lat. 26° 51', long 77° 29'

**SREEVURDHUN** in the presidency of Bombay a town in the territory occupied by the Hublies, 62 miles S.W. by W from Poona, and 62 miles S. by E. from Bombay Lat. 18° 5' long 73° 5'

**SRI GARTH**—A town in the north-eastern quarter of the Punjab in the small reg. of Kullu situated 43 miles S.E. by S. of Sallanpore Lat. 31° 24' long. 77° 30'

**SRI KANTA**, in Gurwal, a lofty peak of that part of the Himalaya in the space lying in the great flexure of the river Bhagorettee, where it changes its direction from north-west to south-west. Fraser, who had a transient glimpse of this summit while temporarily free from clouds, designates it as an enormously lofty and sharp peak. It is visible from Soharunpore, in the plains of Hindostan, though many lofty ranges intervene, and the distance in a direct line is 104 miles. The

# SRI-SUB.

summit of Sri Kanta is 30,398 feet above the sea. Lat. 30° 57', long 75° 51'.

**SRI NAGAR**, in the British district of Cawnpore, Bent-gov of the N W Provinces, a village on the route from Allahabad to Calcutta, and 31 miles E. of the latter. Lat. 26° 9', long 80° 6'.

**SRI NUGUR**, in the British territory of Jaleun, in Madras, Bent-gov of the N W Provinces, a town on the route, by the Hira-poor Pass, from Saugor to Banda, 47 miles S.W. of the latter. It has a large bazar and water and supplies are abundant. Lat. 25 11, long 79° 50'.

**SRI RAMAPURAM**.—A town in the British district of Visagapatnam presidency of Madras, 54 miles S.W. by W. of Visagapatnam. Lat. 17 19, long 82 38'.

**STREEMUNGURH**.—A town in the Southern Mahratta Agency of Sangley, 47 miles S.E. by E. from Dharwar, and 89 miles W. from Ballary. Lat. 15 17' long 75 40'.

**STREEVY GOONDUM**.—A town in the British district of Tinnevely, presidency of Madras, 17 miles E.S.E. from Tinnevely. Lat. 8 39', long 77 59'.

**STRIMUSTRUM**.—A town in the British district of South Arcot, presidency of Madras, 31 miles S.W. of Cuddalore. Lat. 11 24, long. 79 28'.

**SUGARHI**, in the petty hill state of Kothar the remains of a fort on a high ridge situated in the Gumbur river. The supply of water is from a tank supplied merely by rain, as there is no spring within a considerable distance. Elevation above the sea 5 620 feet. Lat. 30 54', long 77 2'.

**SUBANRIKA**.—A river rising in the British district of Chota Nagpore about lat. 23 8', long 84 50'. It takes a direction north-east for fifty miles, and subsequently turning due east, becomes the boundary for thirty miles between the district of Chota Nagpore and that of Ramguri. At the end of that distance it takes a direction south, and for a like distance forms the boundary between the districts Chota Nagpore and Pacheta, and entering this last-named district, traverses it in a direction south-east for a distance of about twenty-five miles. Continuing in the same direction it for about six miles forms the boundary between the last-named district and Singhbhum, and then for nine miles the boundary between Barrabhoom and Singhbhum and for twelve miles between Barrabhoom and Poonah, through which it flows for fifty miles, and subsequently forms the boundary between it and the territory of Orissa for twenty-five more. Finally entering the district of Midnapore, it holds its course for eighty miles to the sea, discharging a few miles below Popy, in lat. 21° 35' long 87 23'. Its direction after entering district Midnapore is south-east its total length of course is about 317 miles. Stiffing styles is a "respectable

river," but its mouth is obstructed by a dangerous bar. It is called Popy or Piph river by Horsburgh, who mentions that Popy sand stretches three leagues from the shore, and in some part, four miles from land, is nearly dry at low water, and that there is on the east side of the bank a road where ships may anchor in five fathoms water.

**SUBATHOO**.—A fort and cantonment, the principal place of a small pergunnah of the same name, reserved by the East-India Company, on the settlement of the hill states at the conclusion of the Ghoorika war, in 1815 previously it was within the thakoori or lordship of Kenthal. The district is bounded on the west by Kothar and surrounded on all other sides by Burroulee. It is a sort of table land, having in its vicinity mountains varying in height from 4,600 to 8,000 feet above the sea but southwards, or towards the plains, it is rather open, and exposed to the winds blowing from them though overtopped by some high lands in that direction. The fort is situated on a high eminence rising about 1,100 feet from the right bank of the river Gumbur. The surrounding country is populous being studded with many villages, the number of which has continually been on the increase since the establishment of British supremacy, in consequence of the refuge afforded to persons oppressed in the neighbouring hill states, and the extended demand for labour and produce to supply the consumption of the British troops stationed there. Agriculture is carried on with great industry and skill, the sides of the mountains being formed into successive terraces, like huge steps. The level spots on the banks of the streams are irrigated and cultivated for rice, which is produced in great abundance, and of a quality superior to that of the adjacent plains. The other crops are wheat, barley maize, millet of various kinds, ginger, cotton opium, tobacco, oil-seeds, red pepper, hemp and a variety of excellent vegetables. The fruits are generally excellent, and among them are apricots, peaches, walnuts, a few apples, wild pears, raspberries, and melons the strawberries are small and without flavour. The high grounds in the immediate vicinity of the station are almost destitute of wood, except on their northern declivities, which are covered with pines. The climate is altogether agreeable, and very healthy, the mean temperature of the whole year being from 64° to 66° the heat in May and June is considerable, but not oppressive. The periodical rains are heavy commencing about the 20th of June and continuing to the close of September hoar frosts commence in November, and cease about the beginning of March. During December and January, in severe seasons, ice of considerable thickness is produced on standing water. Snow sometimes falls to the depth of four or five inches, but seldom lies above three or four days, as the direct rays of the sun are powerful. The

# SUB-SUP

supply of water for the cantonment appears to be sufficient only in ordinary seasons. During periods of drought, recourse must be had to springs three-quarters of a mile distant, and 400 feet below the level of the barracks. The old fort has been converted into a jail for delinquents convicted at the cantonment and at Simla. Sabathoo is in the Cus-Sunday division of the territories subject to the jurisdiction of the commissioner of the Punjab. The fort is distant N W from Calcutta 1 075 miles, elevation above the sea 4 500 feet. Sabathoo was some time since selected as the site for a sanatorium for troops. Its salubrity has been satisfactorily tested. The special committee appointed to inquire into the relative healthiness of different stations, having arrived at the conclusion that at least two soldiers die at stations on the plains for one on the hills. Lat. 30 58 long 77 3

**SUBBULGARH**, in the British district of Bhopur, lieut. gov. of the N W Provinces, a ruinous town and fort on the route from Nagbhat to Hurdwar and 10 miles N W of the former. It is described by Captain Hardwicke as "a very extensive line of fortification, inclosing the town both which exhibit little more than naked walls falling to decay. Much of the ground within the fort is in cultivation in the south-east curtain or face of the fort is a lofty brick built gateway. The high road leads along past the north-east bastion, and continues along the north face the whole length, within thirty or forty yards of the ditch." Lat. 29 44, long 78 16

**SUBHAPUR**, in the British district of Futtahpore, lieut. gov. of the N W Provinces, a village on the route from Banda to the town of Futtahpore, and 10 miles S W of the latter. It is probably identical with that called by Rennell Shahbaspur or falcons town. Lat. 25 56, long 80 38

**SUBTERMOKKEE RIVER**.—One of the mouths of the Ganges, discharging itself into the sea in lat. 21 34, long 88 26.—See **SUNDERBUNDS**.

**SUBULKA SAREE**, in the British district of Delhi, lieut. gov. of the N W Provinces, a town on the route from the city of Delhi to Rewaree, and 14 miles S W of the former. There is a good bazar and water is abundant. Lat. 28 35, long 77 10

**SUBZULOOTE**.—A town in the native state of Bahawalpore, situate 14 miles S.E. from the left bank of the Indus, and 76 miles N.E. by E. from Bulker. The town and district of Subzuloote were conferred upon the Khan of Bahawalpore in 1843, in reward of the support afforded by him to the British troops during the war in Sind and Afghanistan. Lat. 28 12, long 69 57

**SUCHANA**.—A town in the peninsula of Kattywar, province of Guzerat, situated in the prant or subdivision of Hallar, on the

southern shore of the Gulf of Cutch. Distance from Ahmedabad, S.W., 150 miles. Lat. 22 34, long 70 27

**SUCHEEN**.—A town with a small territory included within the limits of the British district of Surat, presidency of Bombay though in a great measure independent of the British government. It contains an area of 300 square miles with a population of 29,200. The chief styled the Nawab of Sucheen possesses, it is stated, seventeen villages and an annual income of 89 000 rupees. Loans to the Nawab, to enable him to discharge his Arab mercenaries and for other purposes, have been granted by the British government. These debts have not yet been liquidated, and it has been suggested that certain villages should be sold to relieve the chief from his embarrassments. The town of Sucheen is distant from Surat city S.E. 10 miles. Lat. 21 4 long 73 68

**SUCHENDRE**, in the British district of Cawnpore, lieut. gov. of the N W Provinces, a town on the route from Calpee to the cantonment of Cawnpore, and 14 miles W of the latter. It has a bazar and supplies and water are abundant. The population amounts to 5 441. The road in this part of the route is bad, the country partially cultivated. Lat. 26 25 long 80 14

**SUDDASHEEPET**.—A town in Hyderabad or territory of the Nizam, situate six miles S.W. from the right bank of the Mangera river, and 41 miles W N W from Hyderabad. Lat. 17 37 long 78

**SUDIYA**.—A town of Assam in the British district of Sudiya, 34 miles N.E. of Seebpur. The district, of which this town is the chief place forms one of the divisions of upper Assam, and contains (inclusive of Mitruck) an area of 6,942 square miles, with a population of 30 000. Lat. 27 50, long 95 42

**SUDJUN**.—A town in the British district of Tannah, presidency of Bombay, 86 miles N of Bombay. Lat. 20 10, long. 73 50

**SUDULPUR JEHUR**, in the British district of Bareilly, lieut. gov. of the N W Provinces, a village on the route from the town of Bareilly to Shahjehanpore and nine miles S.E. of the former place. It is situate near a large piece of water, in an open, level, cultivated country. Lat. 28 15, long 79 35

**SUDURKHANKAKOT**, in Sirhind, a village on the route from Ludiana to Ferozpur and 44 miles W of the former town. It is situate seven miles from the left bank of the Sutley in a level open country, partially cultivated. The road in this part of the route is generally good, but in some places heavy and muddy yet not so much as to have serious difficulties for guns or carriages. Distant N W from Calcutta 1,146 miles. Lat. 30 56, long. 74 39

**SUDFARGANJ**, in the territory of Onda, a town on the route from the cantonment of Gorakhpore to Lucknow, 127 miles W of the former, 39 E. of the latter. Here is an extensive  
233

ground on an extensive plain Lat. 26° 56', long. 81° 15'

**SUFED KOH**, or "THE WHITE MOUNTAIN," is a lofty range bounding the valley of the Kabool river on the south, as the Hindoo Kooch does on the north. These two ranges are about seventy miles apart, and this distance may be considered as the extreme breadth of the valley of the Kabool river. The Suferd Koh range runs nearly east and west along the parallel of lat. 33° 58', commencing eastward near Attock in long. 72° 15' and terminating westward in long. 69° 36'. Its western extremity sinks into a maze of hills, stretching like a network to the Kohistan of Kabool. The Suferd Koh is generally of primary formation consisting of granite, quartz, gneiss, mica-slate and primary limestone. There are three ranges running nearly parallel, and rising in height as they recede from the river the two lower are covered with pine-forests the highest and most distant has a very irregular outline, is steep and very rocky yet furrowed by many beautiful and fertile vales. The highest part is between the meridians of 68° 40' and 70° 30', and attains the elevation of 14,100 feet, being covered with perpetual snow. The Soorkh Road, the Kara Su, and many other shallow but impetuous streams, rush down its northern face, and are discharged into the river of Kabool, which conveys their water to the Indus. The Khyber mountains connect the eastern extremity with the Himalaya, as the Kurkutoha do the western and between them lies the plain of Jelalabad.

**SUFFERDUN**, in Surhind, a small town on the right bank of the canal of Ferousbah where it changes its direction from south-west to west. The vicinity formerly but slightly cultivated, has been much improved in consequence of the irrigation introduced by the repair and cleansing of the canal, which previously nearly useless, has now become a channel for conveying a large body of water from the Jumna to the south of Sirhind. Dist. N.W. from Calcutta 960 miles. Lat. 29° 24', long. 78° 44'.

**SUGEN**—A town in the native state of Banra, on the south-western frontier of Bengal, situate on the right bank of the Damruy river, and 61 miles N.E. by N from Sambalpur. Lat. 23° 12', long. 84° 30'.

**SUGGUR**—A town in Hyderabad, or territory of the Nizam, 124 miles S.W. by W from Hyderabad, and 95 miles S.E. from Sholapur. Lat. 16° 26', long. 76° 51'.

**SUGLA**, in Bessaur, a pass over the outer range of the Himalaya, forms a communication between Koonawar and Gurwal. The road through it is bad, but has the advantage of being practicable for six months of the year, and is profitable for loaded sheep and goats. Gerard ascertains its elevation above the sea at 14,300 feet. Lat. 31° 15', long. 78° 29'.

peak about three miles north-east of this pass was, in the great trigonometrical survey of the Himalaya, ascertained to have an elevation of 21,178 feet above the sea.

**SUGREE**, in the British district of Ainsgurb, lieut. gov. of the N.W. Provinces, a town on the route from Ainsgurb to Goruck poor, 18 miles N.E. of the former. Lat. 26° 7' long. 83° 23'.

**SUHAE**, in the British district of Muttra, lieut. gov. of the N.W. Provinces, a town on the route from Muttra to Delhi 16 miles N.W. of the former. Lat. 27° 38', long. 77° 35'.

**SUHAUNPORE**, a British district under the lieut. gov. of the N.W. Provinces, is bounded on the north-east by the Sewalik range dividing it from the British district of Dohra Dhoon, on the east by the Ganges, dividing it from the British districts of Garhwal and Bijnour on the south by the British district of Morarunggur and on the west by the Jumna, dividing it from Sirhind. It is about sixty-eight miles in length from north to south, and sixty in breadth from east to west, with an area of 2,185 square miles, and lies between lat. 29° 23'—30° 26' long. 77° 13'—78° 16'. The surface is in general remarkably uniform, sloping gently towards the south the numerous torrents which rush from the Sewalik range flowing generally in that direction and ultimately finding their way either to the Jumna or the Ganges. There is little elevation towards the base of the Sewalik hills, which rise precipitously from the plain, the level of which is scarcely broken except by two long ranges of sandhills running from north to south in some degree parallel with the Ganges and with each other and by another similar range near the western frontier, running in like manner from north to south in a line corresponding generally with that of the Jumna. Between the most easterly of these ranges and the Ganges, lies the Khadir or marsh land of that river amounting probably to one-sixth of the whole area of Suharunpore. It is thus described by Cantley—The low tract of country lying at the foot of the Sewalik hills and receiving the drainage which ultimately falls into the Ganges river, is that which is designated by the natives the Ganges Khadir. It consists of a triangular portion of the country bounded on the north-east by the chain of hills called the Sewalik, on the south-west and south by a high steppe or bank; and on the south and east by the Ganges river. The Sewalik on the north, and the high bank which lies on the south, terminate in an acute angle at the Shahjehanpore pass, in the former range, the bank increasing in abruptness up to this point, near which it is lost entirely. The Khadir receives the whole of the hill drainage from Harwar up to this angle, which may be considered as the water-head separating the valley of the Jumna from that of the Ganges. The extent of depression of the surface of the Khadir below

the highlands of Saharanpore, it is said, "varies, decreasing in depth from the south-eastern angle upwards, the extreme depth being eighty-four feet. This depression, however is not universal in the northern portion there is an isolated tract considerably elevated, on which are situated the towns of Khari, Imli, and numerous villages. This tract is much intersected and cut up by channels, and is separated, or nearly so, in its centre, by a large ravine receiving a portion of the Shah Munsoor drainage. In addition to this main insular tract of high land, there are other smaller mounds, upon which villages are built." The entire drainage of this tract is into the Ganges, by means of the Solani and Ratan the Pathri, and some torrents of less importance. The two ranges of sandhills already mentioned as rising to the west of the Khadir form the high land dividing the valley of the Ganges from that of the Jumna. The drainage of the latter is effected principally by the Hindon and its tributaries, the discharge of which is into the Jumna, on the left side. An approximate estimate of the elevation of the northern part above the sea may be formed from the ascertained elevations of the Padshahmahal, at the north-western extremity where the Jumna enters the plains, of Hurdwar, at the north eastern extremity where the Ganges enters the plains and of Saharanpore lying between them. Those elevations are respectively 1276, 1024 and 1013 feet. Baire, on the south-eastern frontier and probably the lowest part of the district, is 940 feet above the sea. The climate is cooler than that of the plain of Hindostan in general, in consequence of the higher latitude and greater elevation. From November, the weather becomes progressively colder until Christmas in March, a rapid rise takes place in the temperature and about the beginning or middle of April the hot winds begin to blow. Their effects are thus described by Jacquemont —

"The country which I had left two days before verdant and smiling had become covered with dust in a week the herbage will be entirely withered, and the trees have already a uniformly dull hue. Very near objects appear through the dusty air as if by the false and lurid light of the sun penetrating through storm-clouds, and also seem nearer than they actually are but at no great distance their outlines are quite effaced." The periodical rains commence in the middle of June, and terminate about the middle of September.

The soil is generally clayey, with a proportion of sand, having in many places a substratum of hard retentive clay and not unfrequently kankar, or lime in nodules, is imbedded in the earth. The very wide range of temperature gives a corresponding extent to the botany of Saharanpore, which, according to the season of the year assumes in the cooler the productions of the temperate, in the hotter, of the intertropical climates. The elephant, common in the Dhosi north of the Sewalik

range, may probably be found, and there are certainly tigers, leopards, lynxes, bears, the pig, a species of viverra (*Batales bellivora*), otters, jackals, stags, hog-deer spotted deer, antelope, wild hogs, and monkeys.

The crops consist of wheat, barley, oats, millet, peas, beans, vetch, taro, lentils, mustard and rape as oil-seeds, carrot, coriander, onion tobacco flax safflower, and muscovy. Almost all the esculent vegetables of Europe succeed well in the cold season hemp grows wild in great abundance and luxuriance. The autumnal crop consists of rice, cotton, indigo, maize, different kinds of millet. The government demand on the lands of this district has been fixed for a term of years, which will expire on the 1st July, 1857.

The means of extensive irrigation are supplied by the Doab Canal, which has its head water from the Jumna on the left side, a short distance above the Padshahmahal in lat. 30° 22' long 77° 39'. The construction of this canal is attributed to Ali Mardān Khan minister of the emperor Shah Jehan a nobleman to whose wealth and public spirit the execution of various great works is ascribed by popular tradition. The canal is conducted, with considerable knowledge of hydraulics, along the crest of the high ground between the Jumna and the Hindon so as to admit of its water being thrown, for the purposes of irrigation, over the country on both sides. There are, however, scarcely any traces of lateral effects or of bridges whence it has been supposed that the great difficulty of preserving it from the ruinous effects of torrents in the upper part of the course caused it as an early period to be allowed to lapse into ruin. Its general course is in a southerly direction, nearly parallel to the Jumna, and, on an average, about fifteen miles east of it. Near Delhi it flows into the valley of the Jumna, and passing partly through the grounds of a royal preserve, rejoins the Jumna opposite the city. The length of the main branch is 135 miles. It was, by direction of the supreme government, cleared out, put in thorough repair and reopened in the beginning of 1850, for the various purposes of irrigation, of affording water-power, and of navigation. Rafts of timber can thus be conveyed from the forests about the base of the Sewalik to Delhi, and boats of from four to eight tons burthen, and drawing two feet water, can also be navigated for the same distance. Another work of a similar character, but on a much larger scale, is in course of completion, with a view to the benefit of the eastern part of the Doab. It consists in the formation of a canal for purposes of irrigation, from the right side of the Ganges, at Kankhal, about three miles below Hurdwar to flow through the Doab.

The chief rivers of Saharanpore—the Ganges, Jumna, Hindon, Ratan Solani—are separately described in the alphabetical arrangement.

The population of the district is returned at

# SUR.

901,825. The following official return distinguishes the towns and villages of the district into classes according to their population —

Number with less than 1,000 inhabitants.	1,538
Do with more than 1,000 and less than 5,000	144
Do with more than 5,000 and less than 10,000	8
Do with more than 10,000 and less than 20,000	4

Total 1,694

On the dismemberment of the Mogal empire, subsequently to the victory gained by Ahmed Shah Durani the chief of Saharunpore was, about the year 1757 given by the conqueror to Najib-u-doula, a Rohilla chief. He was succeeded by his son Zabatakhan, on whose death, in 1785 the territory devolved to his son Ghulam Kaudir infamous for his cruelties at Delhi, when, a few years afterwards, he obtained possession of that city and of its miserable sovereign, whom, after subjecting to every insult which malice and insolence could devise, he deprived of sight by the point of his dagger, thus commencing a series of exactions, which a cautious historian has pronounced to be 'almost without parallel in the history of the world.' The Mahatta chief Scindia subsequently dispossessed the wretch of his conquest, and avenged the wrongs of the unhappy ruler of Delhi upon the person of his brutal enemy, for though Ghulam sought safety in flight, he was not destined to find it, being pursued and taken by the Mahattas, loaded with irons and exposed in a cage. Subsequently he was deprived of his eyes, nose, ears, hands, and feet, and thus horribly mutilated was ordered to be sent back to Delhi. He, however never reached the scene of his atrocities, having died on the road. Scindia could scarcely add to the calamities of the imperial prisoner but he still retained him in durance, making use of the emperor's name for his own purposes, till the English, by the capture of Delhi, deprived him of the custody of the pagenant prince. With the British government Scindia continued obstinately, though vainly, to contend. The vigorous policy of the Marquis Wellesley enforced by the extraordinary military ability which that profound statesman had at his disposal ultimately left the Mahatta no choice but submission, and in the sweeping conquests made by him to the British in 1803 by the treaty of Surjee Angangana, the district of Saharunpore was included.

**SU HARUNPORE.**—The principal place of the British district of the same name under the Regt. gov. of the N W Provinces. It is situated on the small river Dumoula, and about a mile E. of the Doab Canal, in an open, level country rendered fertile by the irrigation derived therefrom, though naturally rather sandy. The immediate environs are rendered pleasing by numerous groves of mangoes and palms, and inclosures of castles and euphorbia. Altogether the scene displays the results of care and intelligence not usual in this part of

India, and those agreeable features, with the dwellings of the British residents arranged about the town, give the place a European air. Jaquemont styles it one of the handsomest English stations in India. Here is a celebrated botanic garden belonging to the East-India Company, arranged and matured by the successive care of two eminent botanists, Dr Royle and Dr Falconer. The former thus describes the success attained in acclimating and cultivating the productions of various countries — 'We have collected in one place and naturalized in the open air the various fruit-trees of very different countries, as of India, China, Cabul Europe and America.' This variety of vegetation is attributed by Dr Royle to the great range of temperatures, which extends from the freezing point to about 100 combined with the influence of the periodical rains and from those causes he considers the botanical capability of this locality 'as being nearly the northern limit of the flora of India, as well as the southern boundary of that which is called the oriental or Persian region.' The choice of situation for the purpose of forming the garden was made with great judgment. The tropical situation of a botanical garden maintained at Calcutta was found, as might have been expected very unfavourable for realizing many of the advantages which it was established to promote. Saharunpore offered a more temperate locality and the comparative proximity of the Himalaya Mountains added greatly to the strength of its claims to selection, while an old endowment afforded means for making so hopeful an experiment at a reduced rate of cost. The garden was formed in 1817, in 1826 a medical garden was annexed to it, and a nursery in connection with it was formed in the adjoining hill district of Mussoorie, but a few years afterwards the charge for the medical garden was abolished, and sundry other reductions enforced by the minute frugality of Lord William Bentinck. The effect of this cutting down was subsequently found to be a diminution of the utility of the establishment. Lord Auckland manifested great anxiety for the success of the institution, and a strong desire to restore its efficiency, deeming this important, as well because the garden was an object of great interest to the inhabitants, as on the ground of its obvious tendency to the extension of knowledge, and to the promotion of the benefit both of Asia and Europe. Steam navigation was at this period beginning to display its advantages as a connecting link between Great Britain and her possessions in India, and thus were opened facilities previously unknown for the interchange of the seeds, plants, and trees of the two quarters of the world to the advancement of agricultural, horticultural, and botanical science, and to the probable increase of the comforts and gratification of the tastes of the inhabitants of countries widely separated by distance, thus making them mutually contributory to the wants of each other, and co-

# SUH-SUK

labourers in diffusing the elements of enjoyment, physical and intellectual. To effect the necessary improvements involved a small additional expense, but the representations of the Governor-General were effectual, and in 1840 the Court of Directors gave their sanction to the requisite measures for placing the establishment of the garden in such a state as should insure its efficiency for the purposes for which it was maintained. By this, and by retaining at home the services of Dr Royle to attend to the promotion by all practicable means of the development of the vegetable resources of India, an impetus was given to the very important objects in view which cannot fail to result in a large amount of benefit. The garden of Suharunpore 680 yards in its greatest length, and 470 in its greatest breadth, is an object of much beauty as well as utility being tastefully laid out with many delightful walks and carriage-roads.

At Suharunpore is a fort and also a military cantonment. It has also been selected as the locality for a government stud depot. Here in the great trigonometrical survey of the Himalaya, was the principal station, where all the most valuable observations, whether of latitude, longitude, or azimuth were made.

The population of the town is 37,968 as shown by official returns prepared in 1848 elevation above the sea 980 feet distant N W from Calcutta 1 007 miles. Lat 28 58 long 77 38'

**SUHAWARE** in the British district of Mynpoore, lieut. gov. of the N W Provinces, a town on the route from Mynpoore to Moradabad, 40 miles N of the former. Lat. 27° 48' long 78 56'

**SUHEELA** in the British district of Goruckpoor lieut. gov. of the N W Provinces, a town on the route from Goruckpoor to Khachi, 38 miles N by W of the former. Lat. 27° 13 long 83 16'

**SUHEESPOOR** in the British district of Bijnour lieut. gov. of the N W Provinces, a town on the route from Bijnour to Pilibesheet, 55 miles S.E. by E. of the former. Lat. 29 8, long 78 41

**SUHEESPOOR**, in the British district of Bijnour, lieut. gov. of the N W Provinces, a town on the route from Moradabad to Hurdwar and 23 miles N W from the former. It is a very filthy place, remarkably crowded with hogs. Davidson remarks, "Pork ought to be cheap, for the neighbouring fields, roads, ravines, and pools were covered with these filthy untutored animals." There is a bazaar, and water is plentiful. Subespoor contains a population of 6,443 inhabitants. Lat. 29° 7', long. 78° 41'

**SUHEESPOORA**, in the British district of Mirzapoor lieut. gov. of the N W Provinces, a town on the route from Mirzapoor to Patna, 27 miles E of the former. Lat. 25 7, long. 83 7'

**SUHPOO**, in the British district of Muttra, lieut. gov. of the N W Provinces, a town on the route from Muttra to Fattiygarh, 30 miles E. by N of the former. Lat. 27° 27', long 78 13'

**SUHUSWAN** in the British district of Badaco, lieut. gov. of the N W Provinces, a town on the route from Badaco to Reware, 23 miles W of the former. Lat. 28° 4', long 78 56'

**SUJNAIR**.—A river rising in the British district of Sangor and Nerbudda, in lat. 24 22' long 78° 35', a few miles south of the town of Sindwah, and flowing about sixty miles through the territory of Solinda, falls, on the left side, into the Jamna a feeder of the Betwa, in lat 25 8' long 78 43'

**SUKKET** in the British district of Mynpoore, the principal place of the pergunnah of the same name a town on the route from Allygarh to Mynpoore, and 24 miles N W of the latter. There is a bazar and water and supplies are abundant the country is flat, open and but partially cultivated. Immediately north and east of the town is an extensive waste plain, which would form an excellent exercising-ground for 20 000 men. The road in this part of the route is good. Lat. 27 26 long 78 50

**SUKHET**.—A native state in the north side of the Sutley which separates it from the Cis-Sutley hill states. It is about fifty two miles in length from east to west, and twenty in breadth having an area of 420 square miles, containing a population of 44 553 and yielding to the riyah a revenue of 80,000 rupees. Sukhet the principal place, is in lat. 31° 33', long 76° 56'

**SUKKRUND**.—A town in the British district of Hyderabad, province of Scinde, presidency of Bombay 60 miles N of Hyderabad. Lat 26° 7, long 68 24

**SUKKUR**, in Scinde, a decayed town on the west or right bank of the Indus and opposite Roree, on the eastern bank, the island fortress of Sukkur lying between them. It is situated where a low limestone range slopes down to the river's bank clothed in the neighbourhood of the town with luxuriant groves of date-palms. These groves combined with the ruined but picturesque town of Sukkur the river, the huge fortress of Bakkur and the town of Roree, situated on the bold precipices opposite, form a very noble landscape. In 1839 a British cantonment was made at Sukkur, which became converted from a scene of desolation and wretchedness to one of activity and prosperity. Sukkur has still several towers, mosques, and minarets standing. One minaret is in a state of considerable preservation, and, according to Kennedy, is 100 feet high, and may be ascended by a winding stone staircase, affording access to the summit, whence is a noble prospect. It is a heavy ill-proportioned column, without

# SUK--SUL.

onment. In a commercial point of view Sukkur is a position of some importance. With the view to the promotion and encouragement of trade, the British government, in 1851, resolved to establish commercial fairs in Sindh. Sukkur was selected as the site of one of these, which is appointed to take place annually on the 1st of January, and to continue for the space of forty-five days. Lat. 27° 40', long. 68° 54'.

**SUKRANEH**, in the British district of Furruckabad, lieut. gov. of the N W Provinces, a town on the route from Furruckabad to Jaloun, 30 miles S.S.W. of the former. Lat. 27°, long. 79° 29'.

**SUKREEA**.—A town in the British district of Shahabad, lieut. gov. of Bengal, 38 miles N.E. by E. of Ramerim. Lat. 25° 13', long. 84° 35'.

**SUKROUDUH**, in the British district of Saharanpore, lieut. gov. of the N W Provinces, a town on the route from Saharanpore to Hardwar, 18 miles E. of the former. Lat. 30° long. 77° 58'.

**SUKTEE**.—A small raj, computed by the political agent for the south west frontier of Bengal, within whose jurisdiction it is included, to be of the annual value of 4,000 rupees, the tribute is 240 the area is 268 square miles. Its centre is in lat. 21° 52', long. 82° 52'. It appears to be well managed, the tribute is regularly paid, and the people are represented to be quiet and contented. The population is about 12,000.

**SUKTESGURH**, in the British district of Mirzapore, a village with fort, 30 miles S.W. of Benares, 20 S.E. of Mirzapore. Lat. 24° 58', long. 82° 58'.

**SUKTHA**, a river of Malwa, rises in lat. 21° 38', long. 76° 18', and, flowing northerly for seventy miles through the territory of Souda, falls into the Nerbudda river on the left side, in lat. 22° 11', long. 76° 41'.

**SUKULDEAH**, in the British district of Benares, lieut. gov. of the N W Provinces, a town on the route from Chunar to Dinapore, 26 miles N.E. of the former 118 S.W. of the latter. Supplies and water are abundant. Lat. 25° 21', long. 83° 20'.

**SUKULPUR**.—A village on the right bank of the Goudak, in the British district of Bareilly, division of Pilibhoet, lieut. gov. of the N W Provinces. Lat. 29° 4', long. 79° 28'.

**SUKURTAL**, in the British district of Manikpur, lieut. gov. of the N W Provinces, a small fort and assemblage of dwellings, about half a mile from the right bank of the Ganges, which is navigable from the sea to this point, where, according to Foster, the channel shoals so as to become fordable. Adjacent to the place on the west are ruined fortifications, erected by Zabih Khan, a Pathan chief. Lat. 29° 29', long. 78° 3'.

**SUKUTPOOR**, in the British district of Furruckabad, lieut. gov. of the N W Provinces, a town on the route from Furruckabad to Jaloun, 31 miles S. by W. of the former. Lat. 26° 57' long. 79° 26'.

**SULANA**, in the territory of Indura, or possessions of Holkar's family, a town, the principal place of a district in the immediate possession of a petty Rajpoot rajah, descendant of a son of the Jodhpore family who, about the middle of the seventeenth century received an extensive grant of lands in this part of India from Shahjehan, the padshah of Delhi. The rajah is tributary to Souda. In 1819 some disputes respecting tribute having arisen between the parties, the British government interposed, guaranteeing an annual amount of 42,000 rupees to Souda, and non interference and freedom from molestation to the rajah. The administration of the territory has been intrusted to a regency during the minority of the present chief, and the country is said to be improving. Distant N.W. from Cojola 60 miles, S.W. from Gwahar fort 235. Lat. 22° 28', long. 74° 55'.

**SULE**.—A town within the dominions of Gholab Singh, the ruler of Cashmere, situated 136 miles E.S.E. from Srinagar, and 95 miles N.E. by N. from Kangra. Lat. 33° 14', long. 77° 9'.

**SULEEMPOOR**, in the British district of Panceput, lieut. gov. of the N W Provinces, a village on the route from the city of Delhi to Jhessand, and 40 miles N.W. of the former. Lat. 29° 5', long. 76° 56'.

**SULEKMPPOOR**, in the British district of Boondababur, lieut. gov. of the N W Provinces, a village on the route from Khaagun to Meerut, and 58 miles S. of the latter. Lat. 28° 30' long. 78° 1'.

**SULEMPOOR**, in the British district of Cawnpore, lieut. gov. of the N W Provinces, a town on the route from Cawnpore to Futtehpore 11 miles S.E. of the former. Lat. 26° 21', long. 80° 32'.

**SULEMPOOR**, in the British district of Goruckpore, lieut. gov. of the N W Provinces, a small town in the pergunnah of Selampore Mahabowli, situate on the right bank of the Little Gunduck. Its original denomination was Nagar which was changed to Islampoor in honour of a rajah who on his conversion to Mahometanism took the name of Islam Khan, and subsequently, by corruption, the name became Sulempoor. It contains only eighty houses, but Majholl, on the opposite or left side of the Gunduck, contains 360 and the two places are usually considered as forming one town, the former being the Mahomedan, the other the Hindu part. Distant 9 E. from Goruckpore cantonment 45 miles. Lat. 24° 15', long. 83° 57'.

**SULEYMPPOOR**, in the British district of Budaco, lieut. gov. of the N W Provinces, a town on the route from Budaco to Shahje-  
240

hanpoor 18 miles E. of the former Lat. 23° 1', long 79° 30'

**SULLMAN MOUNTAINS.**—An extensive and lofty range, forming the western boundary of the British empire in India. They may be considered to commence in lat. 33° 50', and from that quarter stretch due south in nearly the seventieth meridian of longitude, to the mountains about Hurrund and Kahun, and to lat. 29°, attaining their greatest height in lat. 31° 35' where the Takht-i Suliman or "Suliman's seat," called also Khassan Ghar is 11,000 feet above the sea. This summit does not enter within the limit of perpetual congelation, being devoid of snow during the height of summer. Of its geological structure scarcely anything is known. Vigue only states that "it consists of recent formations, principally sandstone and secondary limestone, abounding in ammonites and other marine exuviae, the strata being much shattered and contorted, and often overlaid by shingle." The eastern declivity dips rather steeply to the valley of the Indus, giving rise to numerous watercourses, which furnish the Derajat and are expended by absorption or irrigation. The western declivity is much more gradual, to the desert table-land of Sewestan. It is remarkable that no stream rising in this range is known to reach the sea in any direction, or by any channel except the Kurum, which discharges a scanty volume of water into the Indus, above Kala Bagh. The greatest dimension of the range is from north to south and is a little more than 850 miles. The Suliman range is generally considered the peculiar seat of the aboriginal Afghans. Nowhere is vegetation more vigorous and varied. The sides of the mountain nearly to the summit are clothed with dense and lofty forests, and the valleys overgrown with a great variety of indigenous trees, shrubs, and flowers.

**SULKEA.**—A populous suburb of Calcutta, situate on the opposite or western side of the river Hooghly. The government have here extensive godowns or warehouses for the reception of salt. Lat. 22° 24' long 88° 24'

**SULLAN**, in the Jetch Doab division of the Punjab, a town situated 18 miles S. from the left bank of the Jhelum 50 miles W.S.W. of the town of Gujrat. Lat. 32° 23', long. 73° 7'

**SULLIVAN'S ISLAND.**—One of the group forming the Mergui Archipelago, situate about 12 miles W. of the coast of Tenasserim. It is thirty-six miles in length and three in breadth. Lat. 10° 50', long 98° 20'

**SULOOMBUR** in the territory of Oodeypore or Mewar, a town on the route from Neemuch to Baroda, 94 miles S.W. of former, 176 N.E. of latter. It is of considerable size, is walled, and has a bazar. Elevation above the sea 876 feet. Lat. 24° 7', long. 74° 9'

**SULTANGUNJ** in the territory of Oode, a small town on the route by Shahabad from

Lucknow to Shahjehanpoor, 55 miles N.W. of the former. Tennant, who saw it at the close of the last century states, "The village of Sultangunge consists of mud houses wholly, but all neat, and in full repair. It is one of the few towns in India which does not exhibit marks of decay. Even here, however, are the ruins of far more durable and extensive cities, whose only vestige is to be traced by large mounds of brick-dust." It has a small bazar, and is well supplied with water. Lat. 26° 53', long 80° 15'

**SULTANKHANWALA**, in Sirhind, a small town on the route from Ferozpoor to Simla, and 11 miles W. of the former place. It is abundantly supplied with water from three good wells. The surrounding country is level, and has a rich soil, bearing luxuriant crops of grain in the few cultivated places. It belongs to a Sikh chief under British protection and control. The road in this part of the route is good. Distant N.W. from Calcutta, by Ludiana, 1,157 miles. Lat. 30° 55', long 74° 45'

**SULTANPOOR**, or **KULU**, in the north-east of the Punjab, and on the southern slope of the Himalaya, is the capital of the raj, or small state, of Kulu. It is situate on a triangular tongue of land between the river Beas and a feeder flowing into it on the right side. The southern or lower part, which is next the river contains the residence of the rajah, and north of this, and separated from it by a small bazar is the upper part of the town, consisting of the houses of traders, shopkeepers, and artificers. The principal imports are shinties, coarse cottons and woollens and the returns are made in opium and musk, the traffic being conducted by wandering mendicants, of whom great numbers arrive here on their route to various places of pilgrimage in the mountains. The place is, as Moorcroft observes, "of no great population or extent." Lat. 31° 57', long 77° 9'

**SULTANPOOR** in the British district of Agra, a village on the route from the city of Agra to Jeypore, and two miles W. of the former. The road in this part of the route is rather heavy the country well cultivated. Lat. 27° 10' long 78° 5'

**SULTANPOOR**, or **SULTANPOOR-OUDE**, in the kingdom of Oode, so named in contradistinction from Sultanpoor-Benares, the principal place of the district of the same name is situate on the left bank of the Gomtee river. It was formerly the capital of the Bhara, a tribe of low caste, who once possessed 'the whole tract from Gornakpore to Bundelcund and Raigar and the large pergunnah of Bhudoes, in Benares.' At that time it was named Kosbhawanpatt, was situate amidst an immense jungle, harbouring tigers and wild elephants, and had a rampart eight miles in circumference, strengthened by bastions. It was taken by one of the early Ghorian invaders of India, supposed by Bather

# SUL-SUM.

to have been Kai Kubad, who reigned from 1286 to 1289. The city with its walls, was destroyed on the ruins, now forming a shapeless heap of bricks, the conqueror constructed a fort, still remaining, but partially ruined, though containing habitable residences, occupied by the founder, or commandant of police, and his followers. North-west of the fort is an antique mosque, built by the sultan, and there are a few smaller mosques, built by Sayyids, reputed descendants of Mahomet, the founder of Islam. The town having neither trade nor manufactures, is decaying and consists for the most part of old brick houses, though there are a few new ones among others, a large residence built by the vakeel or envoy of the Lucknow durbar. The population is estimated by Buxtor at 1,600 including 1,000 Mussulmans. The British cantonment is on the right of the river, and communicates with the left bank by ferry, being, even in the dry season, 100 yards wide, four feet deep and navigable for large boats. Remote hydraulic action of the stream has excavated a small valley extending along its course, from ten to 100 feet in breadth on each side from the present banks, and with brows rising about ten feet above the height of the present stream when lowest, and half that height during the rains. The site of the cantonment is sixty feet above the brow of the valley, and preserved from malaria east and west by dry, barren, and undulating ground. On the north is the river, on the south cultivated ground, set off by a range of stone pillars. The station has the inestimable advantage of perfect drainage occasioned by its proximity to a great stream that never overflows the brows of the narrow valley down which it holds its course. There are, consequently, no marshes in the immediate vicinity, and none of any considerable size within such distance as to contaminate the atmosphere. The climate is generally characterized by dryness, comparative coolness and salubrity, with the exception of epidemic and contagious affections. In persons recently arrived from damper places, the excessive dryness produces catarrhs, toothache, sarache, acute rheumatism, chapped hands and feet, and elephantiasis, still, the station is free from all endemic diseases of an important nature and altogether is one of the healthiest localities in the plains of Hindoostan. The westerly winds, which prevail from November to June, produce dryness, accompanied by considerable cold, until March, and increasing in temperature for the remaining period of their prevalence, towards the close of which they are so sultry as to resemble the blast from a powerful furnace. Easterly winds prevail during the rainy season, from the latter part of June to the early part of October and are always loaded with damp, disagreeable to the sensations and oppressive to the spirits. For a few days at the close of the rainy season the air is so clear, that Dhaulagiri, one of the highest summits of the Himalaya, is visible,

though at the distance of nearly 300 miles to the north. The walls of the cantonment, from forty to seventy feet deep, are cut through firm kunkar at little expense, and yield good water, notwithstanding the calcareous nature of the soil, and the copious effluence of nitrate, carbonate, and sulphate of soda, which appears on the surface. Snakes are numerous, particularly the two deadly species karat and cobra di capello but the effects of their bites are generally found to yield to prompt treatment by brandy and laudanum. The communication by water by the course of the Gomtee, is easy, though tedious, with Lucknow, Ghazepore, Jaunpore, and Benares. The roads in every direction are very bad. The cantonment, originally built to contain an entire brigade, was occupied at the date of the last returns by a regiment of irregular cavalry distant 8 E from Lucknow 92 miles, N from Allahabad 59 from Calcutta, by Allahabad, 562 Lat 26 15', long 82° 8'.

**SULTANPOOR SIVALA**, in the British district of Saharanpur, lieut.-gov. of the N W Provinces, a town on the route from Saharanpur to Simla, 10 miles N W of the former Lat. 30 5' long 77 32'

**SULTANPORE**—A town in the British district of Purneah, lieut.-gov. of Bengal, 30 miles N by W of Purneah Lat. 25 10', long 87 25'

**SULTANWAH GAM**—A town in the Raypoot state of Jessulmeer 41 miles N from Jessulmeer, and 126 miles E. by S. from Bukkur Lat. 27 29' long 70 56'

**SUMBALKAH, or SUMALKA**, in the British district of Panscott lieut. gov. of the N W Provinces a small town on the route from the city of Delhi to Kurnal, and 45 miles N W of the former. It has a small bazar, and a large caravanserai, once a fine structure, but now much dilapidated. Water is obtained from wells. Lat. 29 14', long 77° 5'

**SUMBHUL**, in the British district of Moradabad, lieut.-gov. of the N W Provinces, a town on the route from Moradabad to Allypore 22 miles S.W. of the former Population 10,256. Lat. 28 35', long 78 38'

**SUMBULHERUH**, in the British district of Mussumnagar lieut. gov. of the N W Provinces, a town on the route from Mussumnagar to Moradabad, 18 miles S.E. by E. of the former Lat. 29 19', long 77 59'

**SUMBULPORE**, the chief place in the district of the same name is situated on the left bank of the Mahanuddy, in lat. 21 29' long 84 Little information is available as to this place; but it is stated to extend for about two miles along the bank of the river and to contain some pagodas and other buildings of solid character. There is a fort, which, when the place was visited by the British agent in 1844, was in ruins. There is little or no trade, though the river, affording the means of water-carriage to Cuttack and the sea, is open for

# SUM.

small boats throughout the year, and for large ones during six or eight months. The climate is said to be most fatal to the European constitution.

**SUMBULPORE**, formerly a raj, now a British district, within the range of territory subject to the control of the political agent for the south west frontier of Bengal. With the exception of two small detached portions, it is bounded on the north by the native states of Byghur and Gangpoor, on the east by Bonei and Bombra, on the south by Sonopoor and Patna, and on the west by those of Phooljee, Sarungbur and Burgurb. It extends from lat 21°—22° 5' long 83° 6'—84° 51' is 112 miles in length from east to west, and sixty in breadth, and it embraces an area of 4,693 square miles. The river Mahanuddy flows through it, and divides it into two unequal parts, the larger lying on the right bank of the river. The eastern portion of this district is mountainous and woody, the northern and western parts generally of a more level character, and at some places greatly depressed. The valley of Sumbulpoor, according to Dr. Royle's observations is only 410 feet above the level of the sea. The soil of this valley is alluvial, and produces in great abundance and perfection, rice, wheat, and sugarcane. The first of these productions is reported to be of the finest quality, and the latter two grow with a luxuriance not surpassed in any part of India. According to the natives, the soil is well suited to the cultivation of the poppy, and they allege that it was formerly grown with advantage. Indigo it is believed might be cultivated with success, as the wild plant abounds. Swamps and hills exist in this district, as in others within the limits of the agency to which it belongs. These become dry in April or May and fill again on the commencement of the rains. Stagnant water is not by the natives deemed injurious and so far from making drains for the purpose of carrying it off, they reserve it carefully for irrigation, and seem quite insensible to the disagreeable effluvia which it sends out. It is said that they do not suffer to any great extent from its effects and it has been suggested that the surface, being generally covered with plants, which give out a large proportion of oxygen, this provision of nature may tend to counteract the results which might otherwise arise from such deleterious accumulations. The hot winds begin to blow about the 20th March, and continue till the commencement of the rains, which in this district is usually about the 1st July.

The animal and vegetable productions of Sumbulpoor are similar to those of the adjacent districts. Extensive forests of teak furnish an abundant supply of that valuable wood. In minerals, the district does not appear to be rich, except in that production which in popular estimation ranks as the most valuable. Sumbulpoor has universally been celebrated for

the finest diamonds in the world. These gems are occasionally found in the bed of the Mahanuddy, and at the mouths of other rivers which terminate in it. Gold, but not in large quantities, is also found in the same streams. The quality of the diamond is characterised by a classification bearing the names of the four chief Hindoo castes, the most valuable being called a Brahmin. The diamond searchers are employed in their occupation from the month of November to the rainy season. They are said to be a very dissipated race.

The population of Sumbulpoor, including that of the hill forts, is estimated at 374,000. The great mass is composed of Hindoos of the lowest castes, but the chiefs and principal land holders claim the dignity of Rajpoots. There is no commerce worth notice. The raj was gratuitously conferred by the British government on a chief named Nahi without words of inheritance. It was, however, continued to two successors but on the death of the latter of them without male issue, in 1849 it was annexed to the British dominions. Measures were immediately taken for the abolition of the transit-duties, and for effecting other improvements.

## SUMBUR.—See SAMEHUN

**SUMBURPUR**, in the British district of Cawnpore, lieut. gov. of the N.W. Provinces, a village on the route from the cantonment of Futehgarh to that of Cawnpore and 18 miles N.W. of the latter. Lat. 26° 39' long 80° 15'.

**SUMDO**, in Dushahir, a village in the district of Koonawar is situated on a small level space near the south-eastern base of the Manserung Pass, and six miles distant from it. The village has been formed here in consequence of the pasture yielded by the ground, irrigated from the mounds above and the abundant fuel from a forest of brodiaea the highest in locality to be met with on the vast mountain range rising to the north west. Elevation above the sea 12,915 feet. Lat. 31° 52' long 78° 25'.

**SUMDUN** or **SUMJUN** in the British district of Farruckabad, lieut. gov. of the N.W. Provinces, a small town on the route from Cawnpore to the cantonment of Futehgarh and 18 miles S. of the latter. Lat. 27° 7' long 79° 45'.

**SUMJOK**—A town of Burmah 13 miles W. from the right bank of the Khyendwon river and 204 miles N.W. by N. from Ava. Lat. 24° 25' long 94° 40'.

**SUMMAH**—A town of Burmah, situated on the left bank of the Irawady river, and 70 miles N. from Prome. Lat. 15° 43' long 94° 56'.

**SUMMEE**, in Gassert, a town near the left bank of the river Saraswati. Its chief, a Mussulman, and member of the influential family of Babi being also chief of Radnipoor, is styled Nawab of Radnipoor and Summee.

# SUM—SUN

His annual income has been stated to be 1,50,000 rupees; and he yearly tenders a horse and clothes as acknowledgment of fealty to the Governor. Lat. 23° 40' long 71° 40'.

**SUMBEI KOTUM.**—A town of Burmah, situate on the left bank of the Irawady river and 61 miles W by S. from Ava. Lat. 21° 44', long 95° 5'.

**SUMNAPPOOR.**—A town in the territory of Nagpore, 91 miles N.E. by E. from Nagpore, and 39 miles E from Seem. Lat. 22°, long 80° 15'.

**SUMODUTTEE.**—A town in the British district of Belgaum, presidency of Bombay 41 miles E by S. of Belgaum. Lat. 15° 45', long 75° 11'.

**SUMPTER**, in Bundelcund, a small raj or principality under the political superintendence of the lieutenant-governor of the North West Provinces. It lies between lat. 25° 42'—25° 57', long 78° 51'—79° 11'. It is estimated to comprise 175 square miles, and was supposed in 1832 to contain seventy two villages, with a population of 28,000 souls. The revenue was then estimated at five lacs (50,000). and in 1837 at 4,50,000 rupees (45,000). This state maintains a disproportionate force namely 800 horse, forty five artillerymen, and 4,000 infantry. It was originally severed from the territory of Oorah or Tehree, but the time and cause of the event do not appear to be ascertained. The rajah, in compliance with his repeated solicitations, was in 1817, by treaty, placed under British protection. The town of Sumpter is situate, in lat. 25° 51', long 78° 45'.

**SUMBOO BEEGUM**—See BIRDHANA.

**SUMMER**, or **SONAIR**, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a village on the route from Delhi to the town of Meerut, and 15 miles N.E. of the former. Lat. 23° 44' long 77° 28'.

**SUNNA**, in the British district of Allypore, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allypore to that of Mysore, and 43 miles N.W. of the latter. Lat. 27° 25', long 78° 40'.

**SUNARSEE COTTAH.**—A town in the British district of Dinajpore, presidency of Bengal, 70 miles N. of Dinajpore. Lat. 26° 33', long 88° 25'.

**SUNDEEP.**—An island at the mouth of the Megna river. It is fertile, abounding with cattle, but free from tigers and other wild beasts which infest the neighbouring continent. Its length is about eighteen miles, and six broad. Lat. 23° 30', long 91° 35'.

**SUNDELLA**, in the territory of Oude, a town on the route from Lucknow to Shahjahanpore 30 miles N.W. of the former, 65 E. of the latter. It is situate on a level expanse, is half a mile in length, and has many brick built houses, and a small mud fort, little capable of resisting attack. The inhabitants

are principally Patnas. Lat. 27° 4' long 80° 54'.

**SUNDEBBUNDS.**—A maritime tract of British India, within the jurisdiction of the government of Bengal. This tract may be described as a crowded cluster of small marshy islands, separated by narrow channels, in some places containing brackish in others fresh water and generally under the influence of the tide. These islands have obviously been formed by the deposition of the enormous quantity of earth swept down by the Ganges during its periodical inundations. This alluvial archipelago, measured from the mouth of the river Hoogly the most western of the estuaries of the Ganges, in lat. 21° 40' long 88° 3' to the island of Habonabad, in lat. 22° long 90° 30' extends about 158 miles and thus defined, the Sunderbund district is bounded on the south by the Bay of Bengal on the east and north-east by the British district of Bankergunge on the north by the British districts Jessore and Baraset on the north west by the British district of the Twenty four Pargunnahs, and on the west by the estuary of the Hoogly. It is about seventy five miles in breadth, the area is 6,500 square miles. The principal channels by which the water of the Ganges at present reaches the Bay of Bengal, occur in the following order from west to east, from the Hoogly towards the Meghna, —1 The Moree Ganga, or channel creek 2 the Subarnonku or Sursoni 3 the Thakoman, Hulturi, or Jumerah 4 the Mutwari, 5 the Bangadum, 6 the Gurusah 7 the Roymungul, 8 the Melinchoo, 9 the Baypunga, 10 the Murjati or Kappa 11 the Pasmor, 12 the Bangarah 13 the Hooringottah 14. the Rabnabad channel. Though these channels are navigable for the largest craft used for inland navigation, they are in many parts so narrow that the rigging of the vessels plying through them is entangled in the branches of the trees growing on the banks. Though there is some fine timber the greater part of the wood is of small growth suitable only for building boats or for firewood and for making charcoal for the supply of Calcutta. As the islands are everywhere covered with woods, they afford covert to numerous tigers, wild buffaloes, wild swine, monkeys, and deer. Tigers are particularly numerous and daring, preying on the woodcutters and the Malungbees, or those employed in extracting salt from the seawater. The quantity of salt obtained in this way is very great, and supplies the demand of the lower provinces of Bengal. A large portion of these wastes is totally irreclaimable the soil being a loose sand, and the surface liable to be overflowed either by unusually high tides or the periodical inundations of the river. In 1823 the extensive island of Sanger was totally submerged by the effects of a prolonged and violent gale. However, notwithstanding many great obstacles, improvement is making a

steady though slow progress. The tract has been divided into estates to the number of 264, with an aggregate area of 2 800 000 acres, which, on certain conditions are granted to applicants by government. The first scheme for bringing the waste lands under cultivation was promulgated in 1825 this was superseded in 1830 by one more favourable to the grantees, but in 1863 the government came to the conclusion that 'the paramount object in devising rules for the disposal of lands in the Sunderbunds is to effect a clearance of that pestilent jungle in the shortest possible period, and to remove the stigma which most justly attaches to the existence of such a nuisance almost within sight of the capital.' Lying "the Governor-General adds, between the Bay of Bengal and the inhabited parts of the delta, its accumulated and perpetually exhalant malaria, urged by the south west monsoon spreads disease and death over the whole country the tract swarms with tigers and other wild beasts, whose ravages cause wide destruction both of life and property. The improvement of the revenue is an object of secondary importance. The home authorities concurred with the local government in regarding the clearing of the Sunderbunds as a most desirable object, irrespective of the improvement of the revenue. And a revised scheme is under consideration. The importance attached by government to the improvement sought, and the liberality which it is disposed to exercise, are shown by its renunciation of almost all immediate or proximate revenue, it being proposed on the conditions of clearance being duly fulfilled to subject the land to payments little more than nominal, for a period extending to within one year of a century. Rice is the staple article but one crop only in the year can be obtained. Besides this, the sugarcane and the indigo-plant have been introduced by the grantees and mulberry trees, for feeding silkworms, have been planted to some extent. Wild honey is produced in great quantities in this tract, and the markets of Calcutta are abundantly supplied with fish from the numerous channels and watercourses. The occupation of the fishermen is, however not devoid of danger from the vast number of large and fierce alligators.

**SUNDLER.**—A town in the Rajpoot state of Jodhpoor situated on the left bank of the Loonee river and 76 miles W S.W. from Jodhpoor. Lat. 25° 40', long. 72° 5'.

**SUNDLEEPOOR**, in the territory of Indora, or possessions of Holkar's family, a small town on the route from Barsool to Mow 96 miles N.W. of former, 59 S.E. of latter. It has a good bazar is provided with water from a well and a small stream, and supplies are abundant. Population about 1,500. Lat. 23° 32', long. 76° 57'.

**SUNDLIPUR**, in the British district of Moradabad, lieut. gov. of the N.W. Provinces, a village on the route from the town of Morad-

abad to Hurdwar, and 10 miles N.W. of the former. Supplies for troops are obtainable, and water from wells. Elevation above the sea 690 feet. Lat. 28° 58' long. 78° 45'.

**SUNDOOA**, in the British district of Hurrana, lieut. gov. of the N.W. Provinces, a village close to the southern frontier, towards Sheikhawutee. Lat. 23° 45' long. 76° 54'.

**SUNDRU** in Koonawar a pass across the Himalaya range, extending from east to west, in the southern part of that district. This pass is so difficult, that the adventurous travellers the Gerards could not induce any of the natives to guide them over it. 'The people represented it as crossing two ranges and said it was very seldom attempted, and was never open more than two months in the year, so it is probably little below 16 000 feet.' Lat. 31° 24' long. 78° 2'.

**SUNDUN SERAI**, in the British district of Moradabad, lieut. gov. of the N.W. Provinces, a village on the route from Alighur to the town of Moradabad and 32 miles S.W. of the latter. Lat. 28° 32' long. 78° 30'.

**SUNEH** in the district of Salon territory of Oude, a town near the right bank of the river Sae, 65 miles S.E. of Lucknow. The population is estimated by Butler at 6 000, of whom half are Mussulmans. Lat. 26° 5', long. 81° 24'.

**SUNERAMPUR.**—A town in the British district of Tipperah, lieut. gov. of Bengal, 46 miles N. by W. of Tipperah. Lat. 24° 5', long. 91° 2'.

**SUNEYA MUNDI**, in the British district of Bareilly division of Pilibhoet, lieut. gov. of the N.W. Provinces, a village on the route from Bareilly to Pitoragurh, and 64 miles N.E. of the former. There is a bazar here in the cool season between November and April, in which interval the mountaineers descend to exchange the products of the more elevated regions for those of the plains. Lat. 26° 54', long. 79° 58'.

**SUNGLA**, in Koonawar, a small town on the right bank of the Burpa. It has a fine appearance, and is built on a slope, with the houses rising one above the other the some being closed by the gigantic Bulding peaks towering behind. The town has about fifty families, and is a place of some business, being the mart for traders from Gurwhal and Choora, which districts send grain of various kinds, and receive in return salt from Chinese Tartary. Elevation above the sea 6,600 feet. Lat. 31° 25' long. 78° 19'.

**SUNGNUM**, in Buneshr, a small town of the district of Koonawar is situated on the left bank of the river Darbung at the confluence of a torrent (the Bonkueo) running from the north-east. These streams yield water for the abundant irrigation of the fertile dell in which the town is situated, and which, in consequence, is for the length of three miles one cultivated area, enlivened with groves and rows of apple,

# SUN—SUB.

walnut, and apricot trees, and vineyards yielding the finest grapes. The grape does not ripen farther north on this side the Sutlej and its maturity here is owing to the summer's heat, caused by the reverberation of the sun's rays from the mountains inclosing the dale on every side, except towards the south-east, where it is open, and slopes down to the Sutlej. Apricot-trees bear a profusion of fruit, which is, however, poor and acid, in consequence of the neglect of grafting. They are, however, collected in great quantities, and being dried in the arid air on the housetops of the villagers, form a considerable article of their winter stock of provisions, and the kernels yield, by expression, a large quantity of fragrant oil. *Sungum* is 9350 feet above the sea. Lat. 31° 48', long. 78° 31'.

**SUNGROOR**, in Sirhind, a village on the route from Hansee to Ludhiana, and 51 miles S. of the latter town. It is situate in a level, well-cultivated country, the road in this part of the route is in general good though, from the nature of the soil, in some places very during heavy rains. Distant N.W. from Calcutta 1,061 miles. Lat. 30° 14', long. 75° 55'.

**SUNGUM**,—A town in Hyderabad, or territory of the Nizam, situate on the left bank of the Manjira river, and 109 miles N.N.W. from Hyderabad. Lat. 18° 49', long. 77° 38'.

**SUNGUM**—A town in the British district of Nellore, presidency of Madras, 19 miles N.W. by W. of Nellore. Lat. 14° 35', long. 78° 49'.

**SUNGUMESHWAR**.—A town in the British district of Ratanagiri, presidency of Bombay, 31 miles N.E. by E. of Ratanagiri. Lat. 17° 9', long. 73° 36'.

**SUNGUMNEIR**.—A town in the British district of Ahmednuggur, presidency of Bombay, 49 miles N.W. of Ahmednuggur. Lat. 19° 35', long. 74° 14'.

**SUNGURH**.—A valley in the Daman division of the Punjab, about ninety miles W.N.W. of the town of Mooltan. Lat. 30° 44', long. 70° 5'.

**SUNJA**—A town in the Rajpoot state of Jodhpoor, situate eight miles W. from the right bank of the Loonee river, and 92 miles S.W. by W. from Jodhpoor. Lat. 25° 42', long. 71° 51'.

**SUNJAT**, in Madwa, a town in the native state of Jowar, situate on the small river Rithum. It is the principal place of a pergunnah containing forty-nine villages, held in jaghirs by Nawab Ghuzur Khan. Distance N. from Indore 115 miles, N.W. from Oojein 85, S.E. from Neemuch 27. Lat. 24° 18', long. 75° 15'.

**SUNJOLEE**.—A town in the British district of Farnesh, lieut.-gov. of Bengal, 12 miles S.E. of Farnesh. Lat. 25° 39', long. 87° 41'.

**SUNK RIVER**.—The name given to the Byetarnsee river during a portion of its course.

**SUNKAR**, a river of Arracan, rises in lat. 22° 10', long. 92° 40' and flowing seventy miles through the district of Chittagong, falls into the sea in lat. 22° 10', long. 91° 58'.

**SUNKAR NARAIN**—A town in the British district of South Canara, presidency of Madras, 51 miles N. of Mangalore. Lat. 18° 36', long. 74° 56'.

**SUNOUT**—A town in the British district of Behar, lieut.-gov. of Bengal, 39 miles S.W. of Behar. Lat. 24° 50', long. 85° 10'.

**SUNPOOR**.—A town in the British district of Ramgur, lieut.-gov. of Bengal, 17 miles N. of Hazaribagh. Lat. 24° 13', long. 85° 29'.

**SUNTA**, in Sirhind, a small town on the route from Karnal to Puteela, and 39 miles N.W. of the former place. It is pleasantly situate on the Umla nuddi or torrent, in a level fertile country but imperfectly cultivated and consequently much overrun with jungle. The road in this part of the route notwithstanding the level nature of the country is very bad, and scarcely practicable for guns or carriages. Distant N.W. from Calcutta 1,004 miles. Lat. 30° 10', long. 76° 44'.

**SUNTOUR GURH** in the British district of Dehra Doon, lieut.-gov. of the N.W. Provinces, a town on the route from Dehra to Koonawar eight miles N. of the former. Lat. 30° 25', long. 78° 5'.

**SUNWARRA** in the British district of Sangur and Nerbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Jubbul poor to Baitool, 18 miles S.W. by W. of the former. Lat. 23° long. 79° 49'.

**SUPL**, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, an extensive village on the route up the course of the river Surjoa from Almora fort to the Unta Dhura Pass, 33 miles N.E. of Almora. Abreast of the village is a ford over the river the elevation of the bed of which in that place is 6559 feet above the sea. Lat. 30° 4', long. 80° 1'.

**SUPPAHA**, in the British district of Ahgur, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Agra to Ahgur cantonment, and 27 miles N. of the former. Lat. 27° 38', long. 78° 7'.

**SUPHEE**, in the British district of Gorakhpoor, lieut.-gov. of the N.W. Provinces, a town on the route from Gorakhpoor to Baitool, 47 miles E. of the former. Lat. 26° 42', long. 84° 9'.

**SURAGONG**—A town in the British district of Sumbulpoor, lieut.-gov. of Bengal, 97 miles W.N.W. of Sumbulpoor. Lat. 22° 3', long. 82° 40'.

**SURAJA**, in the Roeehna Decab division of the Punjab, a town situated on the right bank of the Ravee, 90 miles S.W. of the town of Lahore. Lat. 30° 50', long. 73° 3'.

# SUR.

**SURAJPOOR**, in the British district of Boodundahutur, lieut.-gov. of the N.W. Provinces, a town on the route from Aligarh to Delhi, and 22 miles S.E. of the latter. It has a bazar and is abundantly supplied with water from wells. Lat. 28° 31' long. 77° 32'.

**SURAJPOOR**, in the British district of Futtehpore, lieut.-gov. of the N.W. Provinces, a town with bazar on the right bank of the Ganges, 117 miles by the river above Allahabad and 925 above Calcutta. It is described by Lord Valentia as "pleasantly situated on the right bank of the river with several Hindoo temples and ghats to the edge, for habitation, some of which were in ruins, but others were building." Viewed from the river, it has a pleasing yet ruinous appearance resulting not so much from actual decay as from the irregular style of building and fishing usual in many Indian towns. Distant 22 miles N.W. from the town of Futtehpore. Lat. 26° 9' long. 80° 33'.

**SURAKILLA**, or **SERIEKALA**, a ryotwari estate within Singbhoon, and subject to the political agent for the south-west frontier of Bengal. Its centre is in lat. 22° 46' long. 85° 55'. It was lately during the minority of the rajah in charge of one of the agent's assistants. The country is reported to yield 10,000 rupees, the people are said to be wild, and beyond this little is known.

**SURANDEE**—A town in the British district of Saran, lieut.-gov. of Bengal 33 miles S. of Bettiah. Lat. 25° 14' long. 84° 37'.

**SURANEE**—A town in the British district of Hyderabad, province of Souda, presidency of Bombay 67 miles S.E. of Hyderabad. Lat. 24° 30' long. 68° 53'.

**SURAT** the principal town of the British collectorate of the same name, presidency of Bombay, is situated on the left or south side of the river Tapias, here fordable when the tide is out, but at high tide navigable for boats of forty or fifty tons burthen. Sea-going vessels can only anchor off the bar fifteen miles lower down. The road outside the bar is very dangerous in the spring, when southerly and westerly winds prevail, and when such set in violently, it is expedient to run up the river should the draught be sufficiently small, or otherwise to stand out towards the west of the Gulf of Cambay where shelter may be obtained from the reef and island of Porim. The outline of the town is an arc nearly semicircular, the river forming the chord, and the circuit being about six miles. The castle is situated about the middle of the chord, and though small, has bastions, covered way and glacis. Surat is an ugly town, with narrow winding streets and high houses, constructed with frames of timber filled in with brick, and having the upper stories projecting beyond the base. It is surrounded by a wall in good repair with semicircular bastions and battlements. The house formerly occupied by the

nawab of Surat is a plain building of moderate size. Most of the houses of the British inhabitants are in the vicinity of the fort, and are usually of good use, with spacious enclosures. Without the walls of the city is the site of the old French factory, containing some handsome and commodious buildings now quite deserted, such also is the site of the ancient Dutch factory, once the most regular and best-built mansion about Surat. Surat, in the latter part of the eighteenth century stood high as a commercial, and, though in a less degree, as a manufacturing place. Then the bazar was "filled with costly merchandise, picturesque and interesting groups of natives on elephants, camels, horses, and mules, strangers from all parts of the globe in their respective costumes, vessels building on the stocks, others navigating the river, together with Turks, Persians, and Armenians, on Arabian chargers, the European ladies in splendid carriages, the Asiatic females in hackeries, drawn by oxen." That vivid and bustling scene has faded away before the great supremacy which Bombay has attained, alike in a political, commercial and maritime point of view, and the competition of British wares, cheaper than those of India, and the commerce of the port is now in a great measure confined to the export of cotton, and of grain for the supply of the less-productive Concan lying further south. Even now, however, Surat is a place of some importance, being the station of a considerable force, and of the civil establishment of the collectorate. Hence the British society is unusually numerous, and its tone agreeable. There is a very neat and convenient church as well as an extensive and picturesque burial ground, full of large ruinous tombs of the former servants of the East-India Company.

The city of Surat has suffered occasionally from the inundations of the river Tapias. In 1837 two of these visitations occurred, causing great damage to the city walls, public and private buildings and bridges. Some immediate preventive steps were taken to defend the town from the recurrence of such irruptions which were attributed to the combined effects of a supposed gradual elevation of the bed of the river, an alteration in its channel, and the obstruction of its mouth by a bar of sand. But the more recent reports of the engineer officers throw doubt upon this opinion, and the selection of final measures for affording to the town security from injury by inundation, has been postponed until more complete information shall have been attained. The irruptions drew attention to the general state of the town, and on the occasion last referred to authority was given for an annual expenditure of 40,000 rupees on the streets, draining, and public works connected with the health and convenience of the inhabitants. The population of the town in 1838 was 133,544. Surat has been conjectured to be a place of great antiquity, but this conclusion perhaps results from confounding the name of Sorth or Soutashtra,

## SUR.

a district of Guzerat, with Surat, the name of the town which is the subject of the present article. The earliest authentic notice respecting this town is probably the mention of its discovery and sack by the Portuguese in 1520 at which time it is described as "containing 10 000 families, mostly handicrafts. An army attempted defence outside the town, but quickly took to flight, and then the city was entered without any further resistance, and nothing left in it that had life or was of value. Then the city and some ships that lay in the arsenal were burned." In 1581 the town having in some measure recovered from this calamity, was again burned by the Portuguese.

In 1612, permission was granted by Jehangir to establish an English factory at Surat, and in 1657 all the possessions of the Company in the East Indies were placed under the control of the president and council of Surat, but from the subsequent acquisition of Bombay, the importance of Surat progressively declined until 1699 when the seat of the presidency was transferred. In 1664, Sir George Oxenden being governor Surat was plundered by Savajee the Mahratta leader, but the English successfully defended their factory and having also afforded protection to many of the citizens and their property, Arrangese, in recognition of that assistance granted the East-India Company exemption from the duties levied on others trading at Surat.

During the early part of the eighteenth century while the empire of Delhi was crumbling into ruins Surat fell into a state of utter confusion, there being within it a number of conflicting authorities,—Mogul, Mahratta, and others. The Bombay government, greatly interested in the restoration of order at Surat, were zealous to effect this object, either with or without the co-operation of the Mahrattas, but their designs were frustrated, sometimes by the feebleness and vacillation of their own counsels, sometimes by the difficulty of securing the fidelity and stimulating the exertions of the wayward and treacherous people to whom they looked for co-operation. At length taking courage to act vigorously for themselves, they in 1759 attacked the castle of Surat, and succeeded in gaining possession of it. Thenceforward, though order was preserved, a divided authority continued to exist in Surat, the English being charged with the defence of the place while a portion of the civil power was in the hands of a nawab, both parties professing to not recognise the authority of the emperor, though this authority soon became but a name, and the nawab, in fact, held his office at the pleasure of his British coadjutors. After a continuance of about forty years, a favorable opportunity occurred for terminating a state of things productive of many evils. On the death of the nawab, in 1799, the British government, with the earnest wishes of the inhabitants of Surat, assumed the entire administration, civil as well as military, con-

ceding to a relative of the deceased the title of nawab, with a large pensionary provision. This arrangement was settled by treaty concluded in 1800. In 1842 the titular dignity of nawab became extinct, by the death of its last possessor without male heirs but certain privileges have been continued to his family. An attempt, made on the part of the government, in 1847 to introduce a uniform system of weights and measures into this city, resulted in failure. The government directed that only mild and conciliatory means should be employed to overcome the aversion of the shopkeepers to the measure, and remove the obstacles to its introduction. Surat is distant from Bombay N. 150 miles, from Ahmedabad, S, 130 Lat. 21° 16', long 72° 52'.

The district of Surat of which this town is the principal place, is bounded on the north by the collectorate of Broach on the east by Guzerat on the south by Guzerat and the British collectorate of Tannah, and on the west by the Portuguese territory of Damaun and the Arabian Sea. It extends from lat 20° 15' to 21° 11', and from long 72° 45' to 73° 24', and contains an area of 1 629 square miles. The population is given under the article BOMBAY. Its boundaries were formerly more extended and comprised within their limits the contiguous collectorate of Broach, which, in 1848, was placed under a separate jurisdiction. The two districts bear a close resemblance to each other no less in their chief physical characteristics than in their statistical and social circumstances, and as minute details on these points are given in the article BROACH, which are generally applicable to Surat, the reader is referred to the former head for further information.

**SURAWALA**, in the British district of Bhuttiana, lieut. gov of the N W Provinces, a village on the route from Hansee to Bhutnahr and 14 miles E. of the latter. Lat. 29° 35', long 74° 35'.

**SURAWUL**, in the British district of Mynpoorie, lieut. gov of the N W Provinces, a village on the route from the cantonment of Alghurh to Futehghurh, and 49 miles N W of the latter. Lat. 27° 35', long 73° 59'.

**SURBURI SUBOREE**, in the Rajpoot state of Jodhpoor a village on the route from Balotra to the city of Jodhpoor and 21 miles N E. of the former. Lat. 25° 54', long 72° 48'.

**SURDA**, in the British district of Rayesha, lieut.-gov of Bengal, a town situated on a ridge of clay and kunkur, or calcareous conglomerate, on the left bank of the Pudda, of great eastern branch of the Ganges, in a country very populous, well cultivated, and as beautiful as verdure, shade, water and the splendid variety of Indian shrubs and trees can make it. Here was formerly an extensive flature, or silk-establishment, belonging to the East-India Company. Distance N from Calcutta,

# SUR.

by Barhampore, 152 miles. Lat. 24° 18', long. 85° 42'.

**SUR DEOTA.**—A peak near Subathoo, so called because sacred to Sur or Mahadeo. Elevation above the sea 5,419 feet. Lat. 81° 3', long. 77° 6'.

**SURDEHAUR**, in the peninsula of Kattawar province of Guzerat, a town belonging to a Rajpoot thakoor or chief, who once resided here, but removed to Rajkote, another town belonging to him. Distance from Ahmedabad, S.W., 118 miles. Baroda, W., 140. Lat. 23° 8' long. 71° 1'.

**SUREELA**, in Bundelcund, a small raj or principality, named from its principal place, is inclosed on all sides by the British district of Humeerpoor, and lies between lat. 25° 43'—26° 51', long. 79° 41'—79° 48'. It is "stated to comprise thirty five square miles, and to contain only eleven villages, with a population of 4,500 souls. Its revenue is estimated at 45,000 rupees (4,500£) per annum, and it maintains a force of twenty five horse and seventy five foot. The town is 25 miles S of Calpee, 45 N.W. of Banda. Lat. 25° 48' long. 79° 48'.

**SUREYA**, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a village on the route from Goruckpoor cantonment to Lucknow, eight miles W. of the former. 158 E. of the latter. Lat. 26° 45' long. 83° 15'.

**SURGONG**—A town in the territory of Nagpoor, 47 miles N.N.E. from Ryspoor and 91 miles S.E. from Ramgurb. Lat. 21° 50' long. 81° 58'.

**SURGOOR**—A town in the Mysore, situate on the right bank of the Cauvery river and 86 miles S.W. by S from Seringapatam. Lat. 12°, long. 76° 25'.

**SURELA**, in the British district of Banda, lieutenant-gov. of the N.W. Provinces, a village on the route from Allahabad to Kalleenjur, 104 miles S.W. of former, eight N.E. of latter. Lat. 25° 6' long. 80° 38'.

**SURHUCHEEA**—A town in the British district of Tirhoot, lieutenant-gov. of Bengal, 14 miles N.N.E. of Moorshiepoor. Lat. 26° 17' long. 85° 38'.

**SUREUD**—A town of Sude, in the presidency of Bombay, situate seven miles S.E. of the left bank of the Indus, and 46 miles N.E. from Bakkur. Lat. 28° 8', long. 69° 28'.

**SURJOO (EASTERN)**—A river tributary to the Ghogra. It rises in the kingdom of Nepal (where it is known by the name of the Relang) in lat. 28° 15' long. 81° 57' and flowing in a direction north-westerly for forty miles, it in lat. 28° 26' long. 81° 24', enters the plains of Oude. Its course is then generally from north to south for about 120 miles, when it falls into the great river Ghogra, on its left side, in lat. 26° 55' long. 81° 43'. At its mouth it expands into a sort of morass, at

Burraach forty five miles from its mouth, and in lat. 27° 24' long. 81° 40' it is described, rather indefinitely, by Tieffenthaler as 'a stone's throw in breadth, and in December [season of low water] two Indian sails deep' but he adds that it occasionally becomes fordable.

**SURJOO or SURJU (WESTERN)**, a considerable tributary of the great river Ghogra, rises in the British district of Kumaon, in a gorge on the southern face of the main range of the Himalaya. Eight miles from the source, according to Webb, the breadth of the Surjoo below Scopce is about fifteen yards, and at this time [early in May] may be forded in twenty inches water. The hills across [beyond] the river [or to the eastward] rise gradually to a lofty chain the summit of which is yet covered with snow and its eastern base is washed by the [Eastern] Ranguanga river." The great elevation of the source is indicated by the snow which lies about it so late in the year. At Scopce already mentioned, the bed of the river is 5,659 feet above the sea. A few miles lower down Webb forded it in two feet of water with a breadth of twelve yards, and a few miles still lower or about fifteen miles from its source, the same traveller found it, in the middle of May forty five yards wide, and twenty-seven inches deep. It holds a south-westerly direction, receiving many streams and one of considerable volume (the Phoocong) falls into it on the left side, thirty-one miles from the source and in lat. 29° 52' long. 79° 49'. Flowing five miles further in the same direction it, at Bagasar or Bagasarwar receives, on the right side, the Gaomutee, a considerable stream running from the north west. From that point it takes a south-easterly direction, receiving several small streams, and thirty five miles below the confluence of the Gaomutee it receives, on the right side, the Punar a considerable river flowing from the south west. About ten miles above this confluence sixty miles from the source and in lat. 29° 38' long. 80° 3', Webb found the average breadth about fifty yards, the drift four and a half to five miles per hour. The depth at present [probably in May] is about eight feet, but it becomes fordable about December." Flowing from the confluence with the Punar still in a south-easterly direction, it at Ramewar, three or four miles farther down, receives, on the left side, its greatest feeder the Ranguanga (Eastern) flowing from the north. This confluence is 1,500 feet above the sea, and as the elevation of the source of the Surjoo may with probability be assumed to be 7,000 feet, its average fall throughout its course to Ramewar, a distance of seventy four miles, will be above seventy feet in the mile. It is accordingly there a most impetuous and rapid torrent, dashing over the rocks with the greatest force, causing a deafening noise, and casting the spray about in all directions." Below the confluence it is indifferently called the Surjoo or

# SUR

the Rangunga. Near the confluence it is crossed by an iron suspension-bridge 180 feet in span. Continuing to flow in a south-easterly direction for twelve miles farther, it, at Pooheer, in lat. 29° 37', long 80° 18', falls into the Kales (Kashira), or principal head water of the great river Ghogra. Six furlongs above this confluence, Webb found the river fordable in the season of low water, 'the breadth of the stream about eighty yards, transparent, bed stony, depth of the ford about four and a quarter feet, drift of current four miles per hour or more.' The total length of course is between eighty and ninety miles. Herbert reckons the continuous courses of the Surjo and Kali or Ghoghra, from the source of the former river to the entrance of the latter on the plain of Hindostan, at Bhurn Deo, to be 143 miles. The united stream, more generally called the Ghoghra, but also known by the name of the Surjo throughout the whole length of its course to its junction with the Ganges, and under the kindred names of Sira, Siru or Sirjo, is repeatedly mentioned by Heber. In this river is found the highly esteemed fish the mahsur.

**SURKANDA**, in Garwhal, a high mountain near the southern frontier, and overlooking the Dehra Doon. It forms part of the ridge separating the Jumna from the Bhageseries, as the Ganges is called in the upper part of its course. There is a Hindoo temple on the summit the formation of which is characterized by Hodgson and Herbert as 'composed of a dull greyish stone coarsely granulated, and having a conchoidal fracture. It is semi hard. It was a station of the large series of triangles in the trigonometrical survey of the Himalaya. Elevation above the sea 9,271 feet. Lat. 30° 25', long 78° 21'.

**SURKARA** in the British district of Allahabad, lieut. gov. of the N W Provinces, a village on the route from the cantonment of Allahabad to Futtehpore, and 24 miles N W of the former. Lat. 25° 34', long 81° 35'.

**SURKUNDA**, in the British district of Futtehpore lieut. gov. of the N W Provinces, a town on the left bank of the Jumna, 18 miles S. of the town of Futtehpore. Lat. 25° 42', long 80° 58'.

**SURMALKE**.—A town and stockade in Nepal, 80 miles W from Jumla, and 46 miles E.S.E. from Almora. Lat. 29° 31', long 80° 28'.

**SURMOTI**.—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate 54 miles S.E. from Srinagar, and 81 miles E.N.E. from Jhelum. Lat. 33° 28', long. 74° 45'.

**SUROLI**, in the British district of Gorakhpur lieut. gov. of the N W Provinces, a village on the route from Alwar, by Ferozpur to Delhi, and 16 miles S.W. of the latter. Lat. 28° 28', long. 77° 8'.

**SURREY KONRAH**.—A town in Hyderabad, or territory of the Nizam, 31 miles S.S.E.

from Hyderabad, and 88 miles N.E. by N from Kurnool. Lat. 16° 56', long 78° 41'.

**SURROOL**, in the British district of Beerbhoom, lieut. gov. of Bengal, a town on the route from Burhanpoor to Barsoora, 55 miles S.W. of former, 60 N.E. of latter. It is situate two miles N of the north or left bank of the Aji river. Lat. 23° 40', long 87° 42'.

**SURRUKEPOOR** in the Raeccha Doosab division of the Punjab, a town situated on the right bank of the Ravee river 18 miles S.W. of the town of Lahore. Lat. 31° 27', long 74° 4'.

**SURRUNGURH**.—See SARUNGURH.

**SURSAWA**.—A town in the British district of Sumbulpore, on the south-west frontier of Bengal, 88 miles W of Sumbulpore. Lat. 21° 30', long 82° 40'.

**SURSEEA**.—A town in the British district of the Twenty four Pargannahs, lieut. gov. of Bengal, 26 miles S.S.W. of Calcutta. Lat. 23° 15' long 88° 16'.

**SURSODA**.—A town in the British district of Balasore, lieut. gov. of Bengal 54 miles S.W. of Balasore. Lat. 20° 56', long 86° 28'.

**SURSU DEBI** in Sirmoor a summit of the Sain range near its north western extremity rises from the right bank of the river Guree. It is surmounted by a small white temple a secondary station in the great trigonometrical survey of the Himalaya. Elevation above the sea 6,299 feet. Lat. 30° 51' long 77° 15'.

**SURTOONA**.—A town in Guzerat, or territory of the Guiswar 90 miles N.E. from Baroda, and 81 miles N.E. from Kaira. Lat. 23° 30', long 73° 39'.

**SURUGTHAL**, in the British district By near lieut. gov. of the N W Provinces, a village on the route from Moradabad to Hund war and 34 miles N.W. of the former. Lat. 29° 18', long 78° 56'.

**SURUMNAGAR**, in the territory of Onda, a small town on the route from Lucknow to Shahjehanpoor 103 miles N.W. of the former. It is situate on the left bank of the Lesser Gomtee, and has an old fort, described by Heber as 'pretty much like a large earl surrounded by a high brick wall, with round towers at the flanks, and two Gothic gateways opposite to each other.' Within is 'a narrow street of mud houses some looking like warehouses, and the whole having more the air of a place where the peasantry of a small district were accustomed to secure their stores, than the usual residence of any considerable number of people.' Outside are a little straggling bazar and a few huts, with a Hindoo temple, but no mosque. Lat. 27° 35' long 80° 2'.

**SURWANNEE SURAR**, in the British district of Benares, lieut. gov. of the N W Provinces, a town with a bazar on the route from the city of Benares to Jounpoor, nine miles N.W. of the former, 29 S.E. of the latter.

# SUR—SUT

Supplies and water may be had in abundance  
Lat. 25° 25', long. 82° 57'

**SURWAR**, in the Rajpoot state of Kishen gurb, a town on the route from Goona to Nusserabad, 204 miles N W of the former 25 S E of latter It has a good bazar and water is abundant. Lat. 26° 5', long. 75° 8'

**SURWUN**.—A town of Malwa, in the native state of Rutlam, 20 miles N W from Rutlam, and 70 miles S. by W from Neemuch Lat. 23° 29', long. 74° 49'

**SURWUN**.—A town in the British district of Mongheer, lieut. gov. of Bengal, 60 miles S. of Mongheer Lat. 24° 30' long. 86° 20'

**SUSOLAR**, in the British district of Humnaspore, lieut. gov. of the N W Provinces, a town on the route from the town of Banda to that of Humnaspore, 15 miles N of the former Lat. 25° 40' long. 84° 19'

**SUSRAL**, in the Sindh Sagur Doab division of the Punjab a town situated 18 miles W from the right bank of the Jhelum, 118 miles N N W of the town of Lahore. Lat. 33° 12', long. 73° 33'

**SUSTWAR**, in Basahir, a village in the pergunnah of Pekha and hence sometimes called by that name. It is situate in a delightful country in many places well wooded and in general carefully and successfully cultivated Lloyd observes, "Many of the women were very handsome their complexions are fair and blinding." Elevation above the sea 8,700 feet. Lat. 31° 15' long. 73° 3'

**SUTGARH** in the British district of Kumaon lieut. gov. of the N W Provinces, a village on the route from Potoragurh to Askoth, six miles N E. of the former Lat. 29° 40' long. 80° 19'

**SUTI**.—A town within the dominions of Ghulab Singh the ruler of Cashmere, situate on the right bank of the Kishengunga river and 57 miles N from Srinagar Lat. 34° 50', long. 75° 1'

**SUTJORA**.—A town in the British district of Sarun lieut. gov. of Bengal, 30 miles N by E. of Chupra. Lat. 25° 10' long. 84° 50'

**SUTLUJ**.—The most easterly of the rivers of the Punjab, 'the rise of which in the holy lakes of Manasarovara and Rawan Hrad, has been satisfactorily ascertained by the adventurous journeys of Captain H. Strachey and Lieut. R. Strachey.' Its most remote sources are the eastern feeders of the lakes, in lat. 30° 8', long. 81° 53'. Moorcroft, in his journey to Manasarovara, seems to have approached near to the source, having come upon the Sutoodra or Sutluj. It subsequently issues from the north-western extremity of this lake, being there in the dry season thirty feet broad, and takes a north-westerly course of about 188 miles through a country of awful and even terrific sublimity, as far as Khab, in lat. 31° 48', long. 75° 40'. Close to this it receives the river of Spiti from the north-west. Above

the confluence, the Sutluj is seventy-five feet wide, its bed 3,600 feet above the level of the sea. Gerard observes, "It is not easy to form an estimate of the water contained in the Sutluj for although the breadth can be determined, yet within the mountains there is scarcely a possibility of sounding it on account of its great rapidity. The depth at this spot must be very great, as the volume of water is considerable even eighty miles farther up, where, at Lang the river is too broad to admit of a rope-bridge, and is crossed by one of iron chains the breadth thereabouts being 120 yards, the depth, at the lowest season one foot and a half the rapidity seven or eight miles an hour; the impetus of the stream such as that it can be forded only by yaks or Tartarian kine, if the depth exceed two feet. The bed of the river, a short distance below Lang, is 10,792 feet above the sea. Here the river is by the natives called Langshing-Khampa, or the river of Langshing lower down, Mukung than, Saapoo lower still Zeng tee lower down, Sumedrung in Busehar, Sutoodra, or 'hundred-channelled,' whence the names Zedardus and Hesardus of the classical writers, lower down, it is generally called the Sutluj, by which name it is also known up to its source. Though the river is in the upper part of its course a raging torrent, falling in several places 100 or 150 feet per mile, with a clamorous noise and displaying heaps of white foam, yet so severe is the climate, that for 400 miles it is completely frozen for two months every winter. Where not fordable, it is crossed either by a sango, or wooden bridge by a jhoola, or rope-bridge, which the traveller passes on a seat suspended by a loop made to slide along the rope by means of a long string, pulled by men stationed on the further bank or by means of a surum or foot-bridge, formed of cables, stretched parallel to each other. These frail suspensions bridges sometimes give way and the passengers are dashed to pieces. There are also a few chain bridges. At the confluence of the Spiti and Sutluj the scene is described as awfully sublime according to Lloyd and Gerard, the character of the gulf is certainly one of the wonders of the world." The Lee or river of Spiti issues forth from a rocky channel, so narrow and deep as almost to seem subterranean, with a calm, blue deep current. The Sutluj is muddy, and breaks violently on the rocks with a tremendous roaring. The Spiti has probably a larger body of water than the Sutluj. The former river averages from 250 to 300 feet in breadth, the latter a short distance above the confluence is seventy-five feet broad. Below the confluence, the stream is so deep and rapid that no bottom could be found with a ten-pound sounding-lead. From this remarkable point its general course is south-west, with a very rapid declivity. At Kiamptoo the height of its bed is 8,220 feet, its breadth 100; at Wangtoo (lat. 31° 33', long. 78° 1') the height of its bed is 5,900 feet, the breadth is ninety

# SUT-SWA.

two, at Bilsapoor (lat.  $31^{\circ} 36'$ , long.  $77^{\circ} 40'$ ), the height of the bed is 3,860, the width 211. These measurements were made at the narrowest places, where bridges have been constructed, but in other places it is 180 yards wide. From Bilsapoor to Bilsapoor in lat.  $31^{\circ} 21'$ , long.  $76^{\circ} 48'$  its course is generally west-south west. Forster, who crossed it here, describes it as a very rapid stream, about 100 yards broad. A short distance below this it makes a sudden sweep to the north west, and then back again to the south-east to Royur, in lat.  $30^{\circ} 58'$ , long.  $76^{\circ} 35'$  where it makes its way through the low sandstone range of Jhagwan, and enters the plain of the Punjab. It is here thirty feet deep, and more than 600 yards wide in its season of greatest fulness, and is crossed either in boats or on floats of inflated buffalo-hides. As is the case with all the rivers descending from the Himalaya, it is far fullest in June, July, and August. At the ferry of Filor or Faloor, in lat.  $31^{\circ} 1'$ , long.  $75^{\circ} 50'$ , it was found, in the season when lowest, to be 200 yards wide, seven feet deep, and moderately rapid. Burnes, who crossed it here in August, when fullest, found it 700 yards wide, with a depth where greatest of eighteen feet, but on an average of only twelve. Up to this point it is navigable at all seasons for vessels of ten or twelve tons burthen. Its confluence with the Beas is a little above Hiraakee, and in lat.  $31^{\circ} 11'$ , long.  $75^{\circ} 4'$ . According to Macartney the Beas has the larger body of water. The whole length of the river, from the point where it issues from Lake Manasarovar to its junction with the Beas, is 550 miles. Below this confluence, as far as the confluence with the Chenab, a distance of 360 miles, the united stream bears the name of Ghara. Thenceforward the aggregate body of water until its confluence with the Indus, bears the name of Purnud, a name derived from its conveying the accumulated waters of the Beas, Sutlej, Ravee, Chenab, and Jhelum. As before mentioned the Sutlej is considered to be the Zaradrus, Zadrus, or Menandrus of the ancients, and the Hypsads mentioned by Strabo.

SUTNA, or SUTANI, a small river rising in Bundelkund, on the southern declivity of the Panna range of hills, about eight miles south-east of the town of Panna, and in lat.  $24^{\circ} 42'$ , long.  $80^{\circ} 23'$ . The elevation above the sea, of its source, cannot be much less than 1,100 feet, as at Sohawal, forty miles to the east, or down the stream, the elevation is 1,059 feet. About that place the course turns rather to the south-east, and twelve miles lower down it falls into the Tapa, on the left side, in lat.  $24^{\circ} 30'$ , long.  $80^{\circ} 56'$ . The route from Allahabad to Fungor crosses "the Sutnee close under Sohawal—bed fifty yards wide stream two and a half feet deep, banks rather steep." The passage here was formerly defended by a fort, now in ruins.

SUTRALI, in the British district of Ku-

maon, lieut.-gov. of the N.W. Provinces, a village with a temple on the route from Almora fort to Juvahar Pass or Unta Dhara, and 17 miles N. of Almora. Lat.  $29^{\circ} 46'$ , long.  $79^{\circ} 44'$ .

SUTTAL, a town of Bundelkund, in the native state of Pannah, 39 miles W. from Pannah, and 84 miles N.E. from Saugur. Lat.  $24^{\circ} 42'$ , long.  $79^{\circ} 40'$ .

SUTTALUREE—A town in the British district of Backergunge, lieut. gov. of Bengal, 126 miles E. of Calcutta. Lat.  $23^{\circ} 40'$ , long.  $90^{\circ} 11'$ .

SUTTEHGEERKE—A town in the British district of Belgaum, presidency of Bombay 39 miles E.N.E. of Belgaum. Lat.  $16^{\circ} 1'$ , long.  $75^{\circ} 7'$ .

SUTTICUL—A town in the British district of Coimbatore, presidency of Madras, 89 miles N. by E. of Coimbatore. Lat.  $12^{\circ} 15'$ , long.  $77^{\circ} 15'$ .

SUTULANU—A town in the Rajpoot state of Jodhpoor, situate on the right bank of the Loonee river and 24 miles S.S.W. from Jodhpoor. Lat.  $26^{\circ}$ , long.  $73^{\circ}$ .

SUTWARAH—A town in the native state of Indore, or territory of Holkar 65 miles S. by E. from Indore, and 16 miles S.E. from Kurgoon. Lat.  $21^{\circ} 44'$ , long.  $75^{\circ} 59'$ .

SUTWAR—A town in the native state of Gwalior or territory of Scindia's family 70 miles S.E. from Oojein, and 76 miles W.S.W. from Hoesungabad. Lat.  $23^{\circ} 29'$ , long.  $76^{\circ} 37'$ .

SWALI in the collectorate of Surat, presidency of Bombay, a small town at the entrance of the river Taptée. A spot denominated by our sailors Swallow Point, and projecting north from the town, is the northern point of the entrance of the Taptée, or road of Surat, from which city it is distant by water 18 miles west. During the early part of the seventeenth century, when Surat was the seat of the presidency for managing the affairs of the East-India Company in Western India, Swali was a place of considerable importance, and the scene of some actions between the ships of the English company and those of their rivals the Dutch. Distance N. from Bombay 150 miles, S. from Baroda 90 S. from Ahmedabad 185. Lat.  $21^{\circ} 4'$ , long.  $73^{\circ} 44'$ .

SWAN, a river of the Punjab, rises in a subordinate range of the Himalaya, west of Cashmere, and in lat.  $33^{\circ} 45'$ , long.  $73^{\circ} 7'$ . It holds a south westerly course of 120 miles, and falls into the Indus on the left side about ten miles below Mukkad, and in lat.  $33^{\circ} 1'$ , long.  $71^{\circ} 46'$ . Kiplingstone, who crossed it in lat.  $33^{\circ} 37'$ , long.  $73^{\circ} 5'$  and about thirty miles from its source, describes it to be, where forded, a large rivulet, which, though only up to our horses' girths was so rapid as to be scarcely fordable. Several of our camels were swept down by the stream." Hough, who crossed the Swan when the water was low describes it as having "a stony bed, not broad

and one foot of water " Burnes, who crossed this stream in lat 33° 6', long 73° 13', found it there "rapid, red, and swollen, and stirrup-deep.

**SYARA**—A town in the Rajpoot state of Jodhpoor 42 miles E.N.E. from Jodhpoor and 59 miles W from Ajmeer Lat. 26° 29', long 73° 48'

**SYDARAD**, in the British district of Allahabad, lieutenant gov of the N.W. Provinces, a town on the route from the city of Allahabad to that of Benares, and 18 miles S.E. of the former. It is four miles from the left bank of the Ganges, has a bazar, and water and supplies are abundant. Lat. 26° 22', long 82° 10'

**SYDAPPOORUM**—A town in the British district of Nellore, presidency of Madras, 25 miles S.W. of Nellore. Lat. 14° 11', long. 79° 49'

**SYDOPUR**, in the British district of Ghaseepoor, lieutenant gov of the N.W. Provinces, a town with a bazar on the route from Benares to the cantonment of Ghaseepoor 23 miles N.E. of the former, and as many W. of the latter. It is situated on the left bank of the Ganges, near the confluence of the Gomtee, which last river is traversed by the route from Benares by means of ferry during the rains, and during the rest of the year by bridge of boats. Distant N.W. from Calcutta, by water, 641 miles. Lat. 25° 30' long 83° 18'

**SYJERAH**, in the Baree Doob division of the Punjab, a town situated nine miles from the right bank of the Sutley 85 miles S.E. by S. of the town of Lahore Lat. 31° 6', long 74° 30'

**SYLHET**—See **SILHET**

**SYMBRAMKUM**, in the British district Chingleput, presidency of Madras, a town close to a tank twenty miles in circuit formed by an embankment between two natural ridges of ground and irrigating an extent of land giving employment to 5000 cultivators. Distance from Madras, W, 17 miles Lat. 13° 4', long 80° 3'

**SYNJUNA**, in the British district of Shahjehanpore, lieutenant gov of the N.W. Provinces, a village on the route from Bareilly to the cantonment at Futehgurh, and 43 miles S.E. of the former. Lat. 27° 48' long 79° 45'

**SYREE**, in that portion of the hill state of Koonseer bestowed upon the rajah of Puteesala, is the name of a pass over a ridge between Subathoo and Simla, and 12 miles N.E. of the former post. Here is a small village with a good house, built for the accommodation of travellers by the British authorities. Elevation above the sea 4,971 feet. Lat. 31° 6', long 77° 6'

**SYRIAM**—A town in the British province of Pegu, situated on the right bank of one of the branches of the Irrawaddy river, and 11 miles E.N.E. from Bangoon. Lat. 16° 59', long 96° 28'

T

**TAAKLY**—A town in one of the recently sequestered districts of Hyderabad or dominions of the Nizam, 53 miles S.W. from Ellishpore Lat. 20° 38', long 77° 8'

**TAHNAO**—A village of Gurwah, on the right bank of the Jumna, here about 100 feet wide, and crossed by a sango or wooden bridge. The houses, narrow, gloomy and covered with slabs of schist, reminded Jaquesment of those of the Upper Alps. He considered that he could trace a resemblance between the architecture and sculpture of some ruined temples in the village and those of the sacred buildings of Benares. Tahnao is 4,753 feet above the sea. Lat. 30° 49' long 78° 19'

**TAHNOOT**—A town in the native state of Keral, on the south west frontier of Bengal 41 miles N.W. by N from Keral and 109 miles W.S.W. from Sumbulpore Lat. 20° 49' long 82° 30'

**TAHLEPOOR**, in the British district of Moradabad, lieutenant gov of the N.W. Provinces, a village on the route from Allypore to the town of Moradabad, and eight miles S.W. of the latter. Lat. 28° 44' long 78° 47'

**TAIMEAH**—A town in the territory of Nagpore, situated on the left bank of the Wurda river and 62 miles S. by W from Nagpore Lat. 20° 16' long 79° 1'

**TAINGAPATAM** in the territory of Travancore, under the political superintendence of the presidency of Madras, a town on the coast of the Indian Ocean. It is situated on the mouth of a river of the same name. The population here and in the neighbourhood comprises many native Christians of the Syrian church or that of St. Thomas and some of these ancient churches may be observed at intervals along the shore from this place to Cape Comorin. Lat. 8° 14', long 77° 14'

**TAJPOOR**, in the territory of Gwalior or possessions of Scindia's family, a small town on the route from Gooms to Gooms. It has a bazar. Lat. 28° 12' long 75° 58'

**TAJUL**—A town of Sude, in the state of Ali Moored, 52 miles S. from Bukkar and 118 miles W from Jessulmeer Lat. 26° 58', long 69° 4'

**TAK**, in the Daman division of the Punjab, a town situated 24 miles from the right bank of the Indus, 156 miles S.S.W. of the town of Peshawar. Lat. 33° 7', long 70° 30'

**TAKAL**, in the Peshawar division of the Punjab, a town situated on the left bank of the Bahrah river, three miles W.S.W. of the town of Peshawar. Lat. 33° 59' long 71° 35'

**TAKALLY**—A town in the territory of Nagpore, situated on the left bank of the Wurda river, and 60 miles S.S.W. from Nagpore Lat. 20° 21', long 78° 50'

# TAK-TAM.

**TAKAM.**—A town in Nepal, situate on the right bank of one of the branches of the Gunduck river and 186 miles W N W from Khatmandoo Lat 28 36, long 82° 48'

**TAKRA.**—A town in the British district of Sibsut, lieut.-gov of Bengal, eight miles S. of Sibsut. Lat 24 48, long 91 51

**TAKRA.** is the British district of Baraset, lieut.-gov of Bengal, a village on the right bank of the Jamuti, a large offset from the Jangas, and close to the southern frontier towards the Sunderbunds. Distance E from Calcutta, by Baraset, 50 miles. Lat. 23° 58', long 89°

**TAKMHALL.**—A town in Hyderabad, situate on the left bank of the Manjira river, and 51 miles N W from Hyderabad Lat. 17° 58', long 78 8'

**TAKWARAH.** in the Daman division of the Punjab, a town situate 36 miles from the right bank of the Indus, 155 miles S S W of the town of Peshawar Lat. 32, long 70 36'

**TALABURA.** in the British district of Budeon, lieut.-gov of the N W Provinces, a village on the route from Allypore to Moradabad and 36 miles S W of the latter Lat. 28 29, long 78° 28'

**TALAK.**—A town in the British district of Aracan, lieut.-gov of Bengal, situate 68 miles S.E. of Aracan, on the banks of the river of same name, navigable thus far for boats of considerable burthen Lat. 20 2, long. 94 6'

**TALA KHAR.** in Basahir a river of Koonawur falls into the Sutley on the left side, in lat. 31 40, long 78 32' It rises in Chinese Turkey, about lat. 31 36 long 78° 54 and has a course of about thirty miles generally westerly It is described by Gerard as a large stream.

**TALAMANOH.**—A town in the British district of Nellore, presidency of Madras, 11 miles N of Nellore. Lat. 14 37' long. 80 3'

**TALOHERR.**—A town giving name to a Cuttack mahal on the south-west frontier of Bengal It is situate on the right bank of the Bramny river and 61 miles N W from Cuttack Lat. 20 53', long. 85 9'

**TALIGRAM, or TALIGRAM,** in the British district of Ferozkabad, a small town on the route from the cantonment of Etawa to that of Fettehgurh, and 24 miles S W of the latter Lat. 27° 2' long 79° 48'

**TALIKOTE.**—A town in the British district of Sholapur presidency of Bombay 80 miles S.E. of Sholapur This place obtained celebrity from the battle fought in its vicinity in 1544, when the power of the Brahminical realm of Bhanagar was destroyed by a confederacy of the Mussulman kings of the Deccan Lat. 16 27', long 76 23'

**TALKA KONEE.** in the British district of Mirzapoor lieut.-gov of the N W Provinces, a town on the route from Mirzapoor to Pala-

now 71 miles S.E. of the former Lat 24° 24', long 83 24'

**TALKHAIR.**—A town in Hyderabad, or territory of the Nizam 19 miles N E from Bheer, and 90 miles E. by N from Ahmed nuggur Lat. 19 11', long 76 7'

**TALKONAH.**—A town in the British district of Mymensing, lieut. gov of Bengal, 31 miles N N W of Jumalpoor Lat. 25 17' long 89° 51'

**TALCONDEE.**—A town on the south west frontier of Bengal in the native state of Bomra, situate on the left bank of a branch of the Bramny river, and 45 miles E from Sum bulpoor Lat. 21° 30' long 84 41

**TALL.** in the territory of Jowra, in Malwa, a town, the principal place of a pergunnah containing forty two villages a population of 12 808, and yielding an annual revenue of 5 328 rupees to the nawab of Jowra, son of the Patan chief Ghufur Khan, to whom it was in 1818 secured by the British government, by treaty with Mulhar Rao Holkar The town contains 641 houses and 2,648 inhabitants. Distance N W from Oojain 44 miles Lat. 23 42', long 75° 22'

**TALLAJA.** in the peninsula of Kattywar province of Guzerat, a town in the district of Gohilwar It is situate at the base of a conical hill on the river Setroonjee called also the river of Sultanpoor from a seaport distant six miles south-east from Tallaja. Distance from Serat W 59 miles. Lat. 21 20', long. 71 59'

**TALLAKAD.**—A town in the British district of Malabar presidency of Madras 79 miles S.E. of Cannanore Lat. 10 53', long 76

**TALLAMALLA.**—A town in the British district of Coimbatore presidency of Madras, 45 miles N of Coimbatore Lat. 11° 38, long 77 4

**TALLAPOOLA.**—A town in the British district of Cuddapah presidency of Madras, 42 miles W S W of Cuddapah. Lat. 14 13', long. 78 18

**TALMONDA.**—A town on the south-west frontier of Bengal, in the British district of Sumbalpoor, 42 miles N E by N of Sumbalpoor Lat 22°, long 84 20'

**TALNERR.**—See THALNERR.

**TALWUNDEE NOURAHAR,** in Sirhind, a village on the route from Lodiana to Ferozpur, and 45 miles W of the former place Distant N W from Calcutta 1,147 miles. Lat. 30 57', long. 75 13'

**TAMBA.**—A town in the British district of Sholapur presidency of Bombay 45 miles S of Sholapur Lat. 16° 59', long 76 8'

**TAMBARAVARI,** in the British district of Tinnevely presidency of Madras, a river rising on the western frontier on the eastern declivity of the Eastern Ghats, and in lat.

# TAM—TAN

**8° 52', long 77° 30'** It holds a tortuous course in some parts eastwards, in others south-eastward, the eighty miles, and falls into the Gulf of Mannar in lat. 8° 38', long 78° 10' close to the small town of Punnakottai. It has a bar at its mouth, preventing the entrance of shipping, and thirty-five miles higher up it is crossed by a fine bridge, connecting the towns of Tinnevely and Palankottai. It receives on the left side in lat. 8° 48', long 77° 5', the Chetura torrent, of considerable size.

**TAMBUR.**—A river of Nepal rising on the southern face of the Himalayas, and flowing first in a southerly direction for about sixty-five miles, during which course it receives the Yangma, Kumbachen, Yalioong, Khahil, and Hinwa rivers, and afterwards in a westerly direction for thirty miles, falls into the Coosy in lat. 26° 57' long 87° 1'.

**TAMOILAH.**—A town in the British district of Barraboom, Bent. gov. of Bengal 143 miles W by N of Calcutta. Lat. 22° 52', long 86° 13'.

**TAMPER.**—A town in the Rajpoot state of Jodhpore situate on the right bank of the Loonee river and 150 miles S.W. from Jodhpore. Lat. 24° 52', long 71° 28'.

**TAMSA.**—A town in Hyderabad or territory of the Nizam 40 miles S.W. by S from Mahur and 153 miles N.W. from Hyderabad. Lat. 19° 23', long 77° 39'.

**TANASSEHIM.**—An island forming one of the Mergui Archipelago. In coming from the sea, the hills upon it have the appearance of separate islands. Its centre is about lat. 12° 35' long 97° 57'.

**TANBENGGOONG.**—A town of Burmah situate on the left bank of the Khyendwin river and 174 miles N.W. by N from Ava. Lat. 24° 2', long 94° 47'.

**TANDA, or TARAH,** in the British district of Bareilly, lieut. gov. of the N.W. Provinces, a station on the route from Bareilly to Almora, 62 miles N. of the former and 68 of the latter. It is situate close to a brook, and in a small cleared place in the Terai or marshy forest, the air of which, during the hot season, is so deadly as to cause a fearful loss of life among travellers, as well as those more permanently located in connection with the police station here. The supply of water here appears to be the only inducement to retain it as a station. The road in this part of the route is good. Lat. 29° 5', long 79° 30'.

**TANDAH,** in the territory of Oude, a town on the route from the cantonment of Goruckpore to that of Sultanpore 87 miles S.W. of the former, 63 N.E. of the latter. It is situate three miles from the left bank of the Ghaghra. Butler states the population at 6,000, of whom 4,000 are Mussulmans, chiefly weavers, this being the seat of the largest manufactories of cloth in Oude. Lat. 26° 54', long 82° 46'.

**TANDAULL,** in the district of Aldemur,

the territory of Oude, a town near the north-eastern frontier towards the British district of Goruckpore. The population, according to Butler is 3,000, but was formerly double that amount, until diminished by the flight of inhabitants, through dread of the oppression of the government. Lat. 25° 34', long. 83° 28'.

**TANDENKY.**—A town in the British district of Masulipatam, presidency of Madras, 23 miles N.W. by W. of Masulipatam. Lat. 16° 24', long 80° 57'.

**TANDI,** in the Punjab, a village of the district of Lahori, is situate at the point where a considerable feeder of the Chenab falls into that river which, immediately below the confluence is 200 feet wide, with a steady current. Buckwheat is the principal crop though barley and wheat are cultivated but the great elevation probably exceeding 8,000 feet, and consequent lowness of temperature, frequently render the crops of these two last sorts of grain abortive. Lat. 32° 35', long 77°.

**TANDOOR.**—A town in Hyderabad, or territory of the Nizam, 24 miles W. from the right bank of the West Gunga river, and 141 miles N.N.E. from Hyderabad. Lat. 19° 11', long 79° 28'.

**TANDOOR,** a river of Hyderabad, rises in lat. 17° 3', long 77° 58', and flowing westerly for eighty-five miles, falls into the Beemah river, in lat. 17° 1' long 76° 58'.

**TANDUEH,** in the British district of Meerut, lieut. gov. of the N.W. Provinces, a village on the left bank of the Jumna. Lat. 29° 16', long 77° 13'.

**TANGAN** in the district of Balaswara, territory of Oude, a town nine miles N.E. of the left bank of the Ganges, 55 R. of Lucknow. Butler estimates the population at 8,000 all Hindoos. Lat. 26° 8', long 81° 20'.

**TANGNO,** in Bessahir a valley on the south side of the great range of the Himalaya, bounding Koonawur on the south. It is well wooded with pines and oaks, and contains five villages. Elevation above the sea 8,500 feet. Lat. 31° 20' long 78° 8'.

**TANGON RIVER.**—One of the numerous watercourses traversing the district of Dinajpore. It rises in lat. 26° 43', long 88° 31' and flowing in a southerly direction for 140 miles, falls into the Mahananda, in lat. 24° 57', long 88° 14' having in its course thrown off numerous offshoots right and left.

**TANGREAH.**—A town in the native state of Kemyur, on the south-west frontier of Bengal, 80 miles W. by N. from Balasore, and 118 miles E. by N. from Sumbulpore. Lat. 21° 44', long 86° 49'.

**TANJORE.**—A British district in the presidency of Madras, named from its principal place. It is bounded on the north-west by the Coleroon, separating it from the British districts of South Arcot and Trichinopoly on the east and south-east by the Bay of Bengal.

on the south west by the British district of Madura, and on the west by the British district of Madura, the native state of Poodoosetha, and Trichinopoly. It lies between lat. 9° 52' and 11° 23', long. 78° 55'—79° 55' is 120 miles in length from north-east to south-west, and seventy five in breadth, the area, according to official return, is 8 900 square miles. Its seacoast extends 165 miles, from lat. 9° 52' to 11° 23' but from its southern extremity to Point Calymere, in lat. 10° 16', long. 79° 54', a distance of seventy five miles, the coast cannot be visited by ships of any considerable burthen, in consequence of the shoalness and dangerous nature of Palk's Bay which washes it. There is, however, much coasting trade carried on by the small craft of the country. The coast, which from its southern extremity to Calymere has a direction either north-east or east, at that point turns due north which direction it continues to hold to the northern extremity of the district. Point Calymere is low, sandy and covered with coconut trees, but from projecting so far into the sea, has much of the advantage of an insular situation and the air being refreshed and cooled by the sea-breezes, it is frequented as an agreeable retreat during the hot season. Farther north, in lat. 10° 45', long. 79° 55', lies Negapatnam: it has no port capable of receiving ships, being situate at the mouth of a small branch of the Cauvery, admitting only country boats of inconsiderable burthen. From Negapatnam to the mouth of the Coleroon, the great northern branch of the Cauvery, the shore of the delta of that river extends, and though there are many estuaries and inlets, there is no haven capable of receiving ships of any considerable burthen. The best is Nagore, which, having eight feet of water on its bar at spring tides, has belonging to it vessels of from 200 to 300 tons, which ply to the Eastern Archipelago and to places on the eastern shores of the Bay of Bengal. At Tranquebar (formerly a Danish now a British possession), in lat. 11° 1' long. 79° 55', ships must anchor in the open sea in six or seven fathoms water, the inconsiderable branch of the Cauvery at the mouth of which it is situate, admitting only small coasting craft. Through its whole extent the coast is low and sandy the sea shoaly, and the difficulty of communicating with the shore heightened by the violent surf which incessantly beats on it. The Coleroon river, the principal estuary of the Cauvery, and terminating the coast-line of this district towards the north, has at its entrance a bar, dry at low water from which proceeds a shoal, projecting four or five miles into the sea south-eastward, an impediment which is not, however, without use, sheltering from the southerly winds the anchorage of Porto Novo farther north. The extensive delta of the Cauvery is almost entirely comprised within this district, of which it forms the northern and larger part. This district, besides the moisture derived from the rains of

the north-east monsoon receives the benefit of the superfluous waters of the river Cauvery, which swelled by the heavy rains precipitated by the south west monsoon on the remote ghats and the table land of Mysore, rolls down an abundant volume of water, to irrigate and fertilize the low level, alluvial region of Tanjore. The inundation of this great torrent is at its height about the middle of July, when it is a mile wide above the head of the island of Seringham, where it parts into two great branches the northern and larger branch, called the Coleroon, forms the north western boundary of Tanjore for eighty miles, falling into the sea by an estuary of no great size, near Chillumbarum, in lat. 11° 22', long. 79° 45', the other branch, continuing to be denominated the Cauvery takes a south east direction, and is subdivided into a great number of watercourses, traversing and fertilizing the district, until most of them disappear from the effects of absorption and evaporation a few only reaching the sea by small and nearly imperceptible outlets. The principal of these channels is the Vennar which sends off several large watercourses to the southern part of the district, the next in importance are the Kodamurti and Verashalen. The channel of the Coleroon becomes in its progress far more depressed than that of the Cauvery, and vast embankments have been formed to prevent the water of the more elevated channel from deserting it and making its way into the lower. At various intervals there are vents, that allow the water of the Cauvery to escape into the lower parts of the delta, and, if redundant, to pass into the Coleroon. Considerable expense has been incurred, and much ingenuity shown, in the construction of the works requisite for dispensing this extensive and intricate system of irrigation. Altogether probably this district is excelled in fertility and productiveness by none in India, and equalled by few except some rich tracts in the valley of the Ganges. The population is given under the article MADRAS. Little appears to be known concerning the political existence of Tanjore before the middle of the seventeenth century. About the year 1678, Venoysee, a Maharatna chief, and brother of the famous Sevayee, obtained possession of the province and it is from him that the present rajah is descended. From this period a tolerably connected history of the country can be obtained, but it is barren of any information concerning its political relations with other states, its strength, and comparative importance. In 1749 a British expedition was despatched into this principality and this was the first instance in the career of the English being engaged against the forces of a native prince. The object of the expedition was the restoration of a deposed rajah of Tanjore who had applied for assistance to the governor of Fort St. David, promising as a reward the absolute possession of Devd Cottah, exempt from the payment of

tribute. The attempt to restore the exiled rajah proved unsuccessful but the British government, thinking it dangerous to be under the reproach of defeat, undertook a second expedition, which was attended with better results. The reigning prince consented to buy off the invaders by confirming them in the possession and granting the immunity which his rival had promised, and engaged to make a small provision for the person whose real or supposed wrongs had given rise to the war, the English undertaking for his peaceable behaviour. From the time of the conquest of the country by Vencjee, to the reign of Rajah Pretaub Sing, in 1764 the descendants of the former personage appear to have exercised authority uncontrolled by the nabob of the Carnate, and altogether independent of him. During the reign of Tooljajee, the son and successor of Pretaub Sing Mahomed Ali the nabob of Arcot, laid claim to tribute from the state of Tanjore. In the prosecution of this claim he was supported by the Madras government, who commenced hostilities on his behalf took the fort of Tanjore in 1772 and having removed the reigning prince from the throne delivered over the country to the management of the nabob. The home authorities did not approve the measures adopted by the Madras government, and directed the reinstatement of Tooljajee on the throne of his ancestors on the condition of his engaging to pay the tribute claimed by the nabob together with a stipulated sum of money for the maintenance of a subsidiary British force in the fort of Tanjore. On his undertaking to comply a treaty was concluded between the British government and the rajah in 1781 by which the latter was bound to pay annually the sum of 114 286 star pagodas as a tribute and 400 000 as subsidy. This was the first alliance entered into by the British with the rajah of Tanjore. On the death of Tooljajee, there were two claimants to the throne,—the one Ameer Sing the half brother of the deceased rajah, the other Serfojee the son of a distant relative who had been adopted by Tooljajee a short time before his death. The governor of Madras thereupon proceeded in person to Tanjore and there laid the claims of the rival candidates before twelve pundits versed in Hindoo law. They unanimously gave it as their decision that the adoption of Serfojee, to the exclusion of Ameer Sing from the throne, was at variance with that law and that the claim of Ameer Sing was just. The British government determined to act on this decision, and in April, 1787 Ameer Sing was placed on the throne, and invested with regal authority. A treaty was concluded between him and the British government, augmenting the tribute and subsidy and containing provisions for securing a regular payment of the same. After a reign of twelve years, it was said to be discovered that the decision given in 1787, by the assembled pundits, was wrong, that the claims then urged by Serfojee, the

adopted son of Tooljajee, were supported by the principles of Hindoo law, and consequently that Ameer Sing had no right to the throne. Thereupon, in 1788, he was deposed, and Serfojee elevated in his place. In the following year another treaty was concluded, by which Serfojee gave up the country to the permanent possession of the East-India Company, on condition of receiving annually the sum of a lac of star pagodas, or 8 50,000 rupees (which was to be considered the first charge on the net revenues of Tanjore) and a proportion of one-fifth, to be calculated on the remainder of the net revenue. The reasons for the new arrangements under this treaty, were the misgovernment of the country the inability of the state to liquidate the enormous debts contracted by Ameer Sing which were therefore transferred to the Company with the territory on the security of which they were contracted. Under the treaty the rajah had no right of interference with the revenue, or judicial administration of the country. He possessed sovereign authority only in the fort of Tanjore, though by sufferance, it was subsequently extended to a small degree. Serfojee died in 1832, and was succeeded by his only son Sevrajee, whose conduct manifested little of either prudence or regularity. Sevrajee died in 1855, without leaving a son by birth or adoption and there being no law or usage under which the daughter of a Hindoo rajah had any right of succession to the raj, the dignity of the rajahs of Tanjore was declared to be extinct. The extent of Tanjore was formerly greater than at present, parts of the original kingdom having been alienated from it at dates long antecedent to that at which the larger portion of the remainder was transferred to the British.

Negapatam with Nagore ranked among the possessions of the Portuguese, from whom they passed to the Dutch in 1660 and were held by the latter till 1781 when they were taken by the British. The transfer of Devi Cottah to the British has been already noticed. The small seaport of Tranquebar formerly a part of the Tanjore state and four villages adjacent to it, were purchased from the reigning rajah in the year 1616 by the Danish East-India Company subject to the payment of an annual tribute of about 4 000 rupees. In 1624 this territory was surrendered by the purchasers to the king of Denmark, subject to the payment of the tribute, and by him ceded to the British government in 1846, for a pecuniary consideration. The district of Karikal, situate between Tranquebar and Negapatam, was purchased by the French in 1789 from the rajah, and still remains in their possession free from tribute.

TANJORE, a town, the principal place of the British district of the same name, under the presidency of Madras, is situate in an extensive plain, and on the banks of a branch of the river Cauvery. It consists of two forts,

## TAN

the greater and the less, and several suburbs the greater "fort," which is about four miles in circumference, is surrounded by a lofty fortified wall, and a ditch, in some parts dry in others half full of stagnant water. The streets within this fort are irregularly built, and there are various alleys and courts in every direction, without any regard to arrangement a wide space has, however, been left between the ramparts and the houses. The fort contains also numerous pagodas, elevated considerably above the surrounding buildings. The houses of the respectable portion of the inhabitants are substantially built of brick and chunam, and in many cases are tastefully decorated. These of the poor are built of mud, which from the tenacious quality of the soil is well adapted for the purpose, and are tiled. The villages outside the fort are, with but few exceptions built of mud, and thatched the streets being narrow and irregular. Adjoining is the smaller fort a mile in circuit, very strong, with lofty walls built of large stones, a broad ditch excavated out of the solid rock, and a well formed glacis. Within it is the great pagoda, considered to be the finest of the pyramidal temples of India. In the front is a colossal figure of a bull in black granite, regarded as being one of the finest specimens of the arts as practised under the direction of the Brahmins. A fine view of the pagoda and image is given by Daniell, who, however is alleged in some particulars to have deviated from perfect accuracy. Within the old fort is the palace of the rajah, a spacious structure, inclosed by a high wall, and though of ancient date never finished. The durbar or hall of audience, of the Chola family, the primitive dynasty which preceded that at present ruling, is in good preservation being however, held to be unlucky it is now never used for the purpose for which it was destined but, though unoccupied, it far exceeds in splendour the actual residence of the rajah. The roof formed of vast slabs of black stone, is supported by lofty massive pillars of the same material. The musnud, or throne, is a huge mass of black granite, eighteen feet long, sixteen feet broad, and two feet thick. It is elevated three feet above the floor of the apartment.

The barracks for the small force of native infantry stationed here, are situate on an open, dry and elevated piece of ground a mile south-east of the fort. The population of the town of Tanjore is estimated at 80,000 persons. The inhabitants for the most part use water from wells that from the river being so impregnated with iron as to be unfit for domestic purposes. Tanjore is a place of considerable business, having manufactures of silk, muslin, and cottons. Distance from the town of Trichinopoly, E. 30 miles, from the town of Madurai, N.E. 90, from the town of Coimbatore, E. 150, from Bangalore, S.E. 180, from the city of Madras, S.W. 180. Lat. 16 47, long. 79 12.

**TANK POORRERA**, in the territory of

Gwahor or possessions of the family of Scindia, in the ancient province of Malwa, a small town on the route from Gooon to Mow 187 miles S.W. of former 48 N.E. of latter. It is situate on the south west or left bank of the river Lukunda. Lat. 23 7, long 76 11.

**TANKARIA**—See **TURKAKIA**

**TANKETSE**—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate 163 miles N.E. from Chamba and 188 miles E. from Birmagar. Lat. 34 2, long 78 19.

**TANLADY**—A town in the British district of Amherst one of the Tenasserim provinces, 20 miles E.N.E. of Moulmein. Lat. 16 87, long 97 59.

**TANNAH**—A collectorate of the presidency of Bombay. Including its sub-collectorate of Colaba, it is bounded on the north by the Portuguese territory of Damara, the collectorate of Surat, and the territory of the Guicowar, on the south by the collectorate of Rutnagerry on the east by the collectorates of Ahmednuggur and Poona, and the territory of Sattara, and on the west by the Arabian Sea. It extends from N lat 17 56' to 20 20' and from E long 73 42' to 78 48'. Its greatest length from north to south is 175 miles, and its greatest breadth from east to west sixty five miles. The area comprises 5,477 square miles.

The great Bombay and Agra road intersects this collectorate from Colicete ferry, opposite the island of Bombay, to the Tall Ghaut, a distance between sixty and seventy miles, as does likewise the road from the north connecting the capital of Bombay with Surat and Baroda. The district is also traversed by the Indian Peninsular Railway the first section of which, extending to the town of Tannah, was opened on the 16th April, 1853. The population is given under the article **BOMBAY**.

The district in 1844 was the scene of extensive gang-robberies and daring outrages. Vigorous measures were rendered necessary for their suppression and these being taken by the government, the country has now for some years continued in a state of order and tranquillity. Tannah the chief town, is distant 24 miles N.E. from Bombay. Ten years ago its population was estimated at about 9,000 but an increase has doubtless taken place since the completion to this town of the railroad from the city of Bombay. Lat. 19° 10', long. 73 8.

**TANNOOR**, in the British district of Malabar, presidency of Madras, a town and seaport at the mouth of a small river falling into the Arabian Sea. In the year 1782 the British army, under the command of Colonel Humberstone, acting against the forces of Hyder Ali, took refuge here from a storm and rain of five days continuance, which dispersed the boats, spoiled the provisions and damaged the ammunition of the expedition. It was formerly a prosperous place, but is now much decayed.

## TAN—TAR.

Distance from Calcutta, S.E. 23 miles, Mangalore, 170, Bombay 546 Lat. 10 53, long. 75 56

**TANWAR**, in the jaghure of Jajhar heat. gov of the N W Provinces, a village on the route from Hannee to Neemuch, and 98 miles S. of the former. There are a few shops here, and there is good water from wells. Lat. 27 52' long 76 10'

**TAOOROO**, in the British district of Goozon. Heat. gov of the N W Provinces, a town on the route from Rewaree to Boondshuhur 20 miles E. of the former Lat. 28 12' long 77

**TAPOO**—A town in the Rajpoot state of Jodhpoor or Marwar 40 miles N by E from Jodhpoor, and 80 miles S from Beekaneer Lat. 26 55' long 73 15'

**TAPTEK**—A river rising within the Saugor and Nerbudda territory. Its source is near Mooltaee, 22 miles S.E. of the town of Barool, in about lat 21 46' long 78 21. It takes a circuitous but generally westerly direction of 180 miles, to the western boundary of the district, where, in lat. 21 27' long 76 50', it passes into the territory of Gwalior or the possessions of Scindia. Following a south-westerly course along the southern base of the Satpore range, it flows by the city of Boorhaunpoor where it has a mean width of 300 feet, and during the periodical rains acquires a great volume of water but in winter and spring it is easily fordable, the depth seldom exceeding one foot. At that season, the alligators with which it sometimes swarms, take refuge in the deep pools in the river channel. At the distance of about 161 miles from its source, and in lat 21 17' long 76 20' it passes from the territory of Gwalior and forming for forty miles the boundary between the Nizam's dominions and the district of Candesh, through which it pursues a westerly course and subsequently flowing through the southern portion of the Guicowars dominions and the British district of Surat, it falls into the Bay of Cambay in lat. 21 3' long 72° 42' having a total length of course of 441 miles. It can scarcely be deemed a navigable stream, as at Surat, seventeen or eighteen miles above its mouth, it is fordable when the tide is out, and only small craft of about forty or fifty tons burthen can ascend so far from the sea. It is said to be navigable in the dry season for boats of light draught throughout its whole extent in Candesh. The mouth is obstructed by numerous shifting sands and a bar, through which, according to the latest accounts, there is but one channel, which at low water spring tides is so shallow as to allow the passage of only small boats and even they frequently touch the bottom. Outside the bar is the anchorage, called Surat Roads, at no time very safe, but particularly dangerous in April and May, when south winds prevail. Serious loss of life and property has sometimes been occasioned by the

overflow of the river. In 1837, sixty-nine villages are stated to have been ruined, the majority of them being entirely swept away, 2,204 houses destroyed, 112 lives lost, and agricultural stock and property carried off to the value of 2,19,622 rupees, or 21,963*l*.

**TARA**, in the Rajpoot state of Jodhpoor, a village on the route from Pokhura to Balmoor, and 29 miles N of the latter Lat. 26 8, long 71 12'

**TARA**, in the British district of Moradabad, Heat. gov of the N W Provinces, a village on the route from the town of Moradabad to Almora, and 30 miles N of the former Lat. 29 15' long 79

**TARA**.—See CHILLARYARA.

**TARAGARRH** in the hill state of Hindoor a hill fort on the ridge which, rising from the left bank of the Sutley has a south-easterly direction until it joins the Sub Himalaya. During the Goorkha war in the operations preparatory to the investment of Malown, Lieutenant Lawrie succeeded, after vast toil and perseverance, in bringing battering-guns over the rugged surface, and the defences being quickly demolished, the Goorkha garrison evacuated the fort, which was found to be one of the strongest places in the country. Distant N W from Calcutta 1,090 miles. Lat 31 16' long 76 50'

**TARA GHAT** in the British district of Mirzapoor Heat. gov of the N W Provinces, a pass on the route from the town of Mirzapoor to Rewa, and six miles S.W. of the former. Here an excellent road made under the superintendence of British engineers, crosses the brow of the Tara, a low range of sandstone hills rising above the alluvial valley of the Ganges, and forming in that direction the first or lowest buttress of the succession of plateaus constituting the elevated tract of Bhogoleund. Elevation of the crest above the sea 510 feet. Lat 25 5, long 82° 54

**TARAGURH**, in the Baree Doab division of the Punjab, a town situated on the right bank of the Chakri river 110 miles N.E. by E. of the town of Lahore Lat. 32° 25', long 75 59'

**TARAGURH**.—See AJMER.

**TARAKOTE**—A town in the British district of Cuttack, Heat. gov of Bengal 42 miles N.E. by N of Cuttack. Lat. 20 55', long. 86 15'

**TARAPPOOR**, in the collectorate of Tannah, presidency of Bombay a town situated on the south side of a small bay and north west of a mountain called the Peak of Terrapora, which is surmounted by rugged rocks, resembling at a distance a huge fortress. North-west of the town is anchorage, but not very good the bottom being full of rocks. It was strongly fortified by the Portuguese. In 1789 it was stormed by the Mahrattas, who, having blown up the defences by mines, encountered a desperate resistance until nearly the whole garrison

# TAR-TAT

was slaughtered, the few who remained asking and receiving quarter. Distant N from Bombay 60 miles. Lat. 19° 50', long 72° 45'

**TARAPPOOR**, in the British district of Meerut, West-gov. of the N W Provinces, a town on the route from Meerut to Rhyoor, 27 miles N E by E. of the former. Lat. 26° 14', long 78° 8'

**TARAPPOOR**—A town in the British district of Sholapoor, presidency of Bombay, 27 miles W of Sholapoor. Lat. 17° 40', long 75° 53'

**TARECHER** in Bundelcund, a small town in the district of Tehree, on the route from Banda to Gwalior, 110 miles W of former. S.E. of latter. Lat. 25° 25', long 78° 58'

**TARGAON**—A town in the British province of Sattara, presidency of Bombay, 10 miles S.E. of Sattara. Lat. 17° 30', long 74° 18'

**TARIWALA**, in Sirhind, in the British district of Ferozpoore, a village situated on the left bank of the Sutley, which at this point divides itself into two channels, the main stream making a great circuit to the north-west, and sending a branch to the left, nearly west, thus insulating a space of ground about eight miles long and two wide. Tariwala is distant N W from Calcutta 1,145 miles. Lat. 31° 2', long 76° 14'

**TAREKAGHAT**—A town in Nepal, situated on the right bank of the Marshangdi river, and 71 miles W N W from Khatmandoo. Lat. 28°, long 84° 13'

**TARLA**—A town in the British province of Sattara, presidency of Bombay 18 miles E. of Sattara. Lat. 17° 30', long 74° 1'

**TARLA**—A town in the native state of Kolapoor, 23 miles S W from Kolapoor and 53 miles N W from Belgaum. Lat. 16° 27', long 74° 4'

**TAROLI**—A town in the British province of Jhanssee, territory of Bundelkund, situated on the right bank of the Betwa river and 26 miles E N E from Jhanssee. Lat. 26° 34', long 79° 3'

**TAROOB**—A town in Hyderabad, or dominions of the Nizam, situated on the left bank of the Godavery river, and 150 miles N E. by E from Hyderabad. Lat. 18° 39', long 80° 20'

**TARRA**, in the north-east of the Punjab a town in the British district of Lahore, 72 miles N.E. of Kangra. Lat. 32° 43', long 77° 13'

**TARSAON**—A town in the British district of Belgaum, presidency of Bombay, 85 miles N of Belgaum. This town was the chief place of a jaghree of the same name, which a short time since lapsed to the British government. Lat. 17° 2', long 74° 40'

**TASSANGSUDEN**—A town in the native state of Bhootan, situated on the right bank of a branch of the Sittoung river, and 145 miles

N W by N from Durrung. Lat. 27° 34', long 91° 17'

**TASSISUDEN**—A town with citadel in the native state of Bhootan situated on the right bank of the Goddada river and 127 miles N W from Gualpara. Tassissuden is the capital of Bhootan, and the residence of the Deb rajah. Lat. 27° 30', long 89° 23'

**TATARPOOR**, in the British district of Ahmurb, West-gov. of the N W Provinces, a village on the route from the city of Agra to Bareilly and 42 miles N E. of the former. Lat. 27° 34', long 78° 35'

**TATTA**, in Sindh a town formerly very famous, but now much decayed, is situated about three miles west of the right or western bank of the Indus, and four miles above the point where the Buggeur or western and the Seta or eastern branches of the river separate. Its site is consequently close to the vertex of the delta of the Indus, the channel of which is here about a mile and a quarter wide, with a muddy stream, in the low season occupying only a third of this space. The present city is built on a slight eminence, composed of the rubbish of former buildings, in an alluvial valley at the foot of the Mukhal hills. It is in consequence exceedingly unhealthy. The British troops stationed here in 1859 suffered dreadful loss from diseases, resulting from the pestilential air and bad water which last is not only unwholesome but fetid and offensive to the senses. The town appears to have been formerly insulated by the water of the Indus, and is still nearly so during the season of inundation when this passes away, it leaves numerous stagnant pools which infect the air. Dr Burnes states that it was once thirty miles in circuit, judging no doubt from the vast space in the vicinity overgrown by tombs and ruins but these are with much probability considered by Wood to be the relics of successive cities, built on various but contiguous sites, to avoid the ravages, or take advantage of the navigation, of the shifting currents of the Indus. These extensive ruins are scattered from Peer Puttah, about ten miles south of Tatta, to Sami-Nuggur, three miles north-west of it. The ruins of the great fortress of Kulacote show it to have been constructed with much labour and skill, in a massive style of building. "The vast cemetery of six square miles," observes Kennedy, "may not contain less than a million of tombs—a rude guess but the area would admit of four millions." In these ruins the masonry and carving, both in brick and stone, display great taste, skill, and industry the bricks especially are of the finest sort, nearly equalling porcelain. Kennedy observes, "The finest channelled stone could not surpass the sharpness of edge and angle, and accuracy of form." Tatta, viewed at some distance from the outside, presents a very striking and picturesque appearance, as its lofty houses rise over the numerous acacias and other trees, everywhere interspersed, and

# TAU-TAV

which, says Kennedy "formed altogether as fine a picture of city totemy as I remember to have seen in India." But this illusion is dispelled on entering the town where the houses are everywhere falling into ruin to which they are prone being constructed for the most part of a timber framework, on the outside of which are nailed laths, which are plastered over with mud of a gray colour, so as when new to have the appearance of a solid wall of masonry. These structures are sometimes three or four stories high, and covered with flat roofs of earth. From the fragility of the materials, they can last but a short time and the work of ruin is continually in progress in the town. All the houses are surmounted by *badgers* a sort of ventilator built somewhat in the shape of a windmill, and conveying even in the most sultry weather, a current of cool and refreshing air. The streets are deserted, the houses in ruins, and everything indicates depression and poverty the inhabitants are dirty squalid, and of unhealthy appearance. The only building worth notice is the brick built mosque of Shah Jehan itself crumbling into ruins. Of the decayed manufactures of Tatta, the principal is that of *loonges*, a thick rich, and variegated fabric, having a warp of silk and a woof of cotton, with (in the more costly kinds) much gold thread interwoven. The silk is imported from Persia, Kabul and Turkistan the cotton from Eastern India. Coarse cotton fabrics, both plain and coloured, were formerly manufactured in considerable quantity but have lately been superseded by those of England. British woollens are greatly prized. It is said that in 1742 when Nadir Shah entered this city at the head of his army there were 40 000 weavers, 20 000 other artisans, and 60 000 dealers in various departments. Alexander Hamilton who visited Tatta in 1699, calls it a very large and rich city about three miles long and one and a half broad, and states that 80 000 persons had, within a short time previously, died of the plague, and that one-half of the city was uninhabited. This would lead us to the conclusion that previously to that calamity the population was above 150 000. The present population is variously estimated—at below 2,000 at less than 10 000 at 12,000, 15 000 18,000, 20 000, and 40 000. The number of artisans and traders ascertained (as mentioned above) by Wood, affords grounds for estimating the population at about 10,000. Tatta has been supposed to be the Pattala of the ancients. Pottinger states that the earliest mention he has found of it is in the ninety second year of the Hagra, but he does not give any reference to the place of such mention. Burnes says, the antiquity of Tatta is unquestioned. Outram assigns its foundation to 1445, but does not cite his authority. Macanudo states, from native authorities, that it was founded 900 of the Hagra, or A.D. 1522. In 1855 it was pillaged and burned by some Portuguese

mercenaries. In A.D. 1000 it was, according to this last authority again destroyed in the Mogal invasion by Akbar and never completely recovered. In 1768 a British factory was established there, and withdrawn in 1776 in 1799 an abortive attempt was made to re-establish it. In the beginning of 1869 the house belonging to the factory was occupied by a British garrison. Tatta is in lat. 24° 44', long 68°.

**TAUDAMURRY**—A town in the British district of Bellary presidency of Madras 79 miles S.E. by E. of Bellary. Lat. 14° 39', long 77° 57'.

**TAUDAPURTEE**—A town in the British district of Bellary presidency of Madras, 79 miles E by S. of Bellary. Lat. 14° 54', long 78° 8'.

**TAUNDLA** in the territory of Jabooah in Malwa, a town near the west frontier towards Guserat. It is represented as a considerable place, distant 50 miles W. of Dujain. Lat. 23° long 74° 32'.

**TAUNGINE**—A town in the British district of Amherst, in the Tenasserim provinces, 16 miles N. of Moulemein. Lat. 16° 42', long 97° 41'.

**TAUNSA** a river of the British district of Tannah rises on the western face of the Western Ghats, in lat. 19° 41' long 78° 29', and flowing westerly for fifty-eight miles, falls into the sea at lat. 19° 30', long 78° 50'.

**TAURSA**—A town in the territory of Nagpoor 19 miles E.N.E. from Nagpoor, and 57 miles S by W from Seoni. Lat. 21° 15', long 79° 38'.

**TAUSRAH** in the British district of Kara, presidency of Bombay a town on the route from Neemuch to Baroda, 38 miles N. of the latter. Distance S.W. of Nedunuch 156 miles, E. of Kara 40. Lat. 23° 48', long 78° 18'.

**TAVOY**—One of the Tenasserim provinces. It is bounded on the north by Amherst, on the south by Mergu on the east by Siam, and on the west by the Bay of Bengal. It extends between lat. 12° 44' and 14° 50' has an average breadth of about fifty miles, and an area of about 4 920 square miles. Its general character is mountainous, intersected by valleys, through which flow numerous streams. Some of the mountains attain considerable height the range which separates the low lands round Tavoy from the interior in some parts reaches a height of 3 000 feet the highest range is about thirty or forty miles from the coast. Thick forest and impenetrable brushwood cover the mountains, and jungle exists over a great part of the province.

Rice is the staple production of the province, and the country is well calculated for its cultivation. A failure in the crops is unknown. By more care and attention than is at present given to the subject, and by converting the swamps and overgrown wilderness into paddy-lands, that commodity might be made an im-

# TAV-TEE.

portant article of export, and a source of revenue. The cotton-plant is cultivated, but not to any considerable extent. The same may be said of tobacco and indigo both of which are of good quality. Yams are in great abundance, also potatoes, red pepper, ginger, oranges, limes, citrons, tamarinds, pine-apples, plantains, are good but scantily produced. The teak, the mango, the papaya, and palms of all kinds, are found in great abundance.

Tavoy is the most valuable of all the Tenasserim provinces in regard to mineral productions. Of all the iron-ores, says Dr. Hailor, 'that of Tavoy is the most important.' It is found in many parts of the province, but the best, in point of quantity and quality is that at a short distance to the north of the town. It occurs there in two forms "Octohedral, common magnetic iron ore, massive, in granular concretions, crystallised, splendid, metallic, highly magnetic, with polarity." Though the existence of the ore has been known to the Burmese, it had not been worked. The locality of these mines is unrivalled with respect to advantageous situation, being a few miles from a part of the river which is accessible to vessels of 200 tons burthen. The province is also rich in tin-ore, which is found generally in hills, or at the foot of mountains.

The population in 1841, of the province and town inclusive amounted to 37,354 souls, the greater part consisting of Burmese and Talains, the remainder being Siamese, Chinese, Malays, &c.

**TAVOY** the principal place of the province, is situated on the eastern bank of the river of the same name, about thirty five miles from its mouth and though inaccessible for vessels of large burthen within some miles of the town its course being obstructed by shoals and sand banks, it can be reached by ships of 120 tons. It is in the midst of a rich alluvial plain which is bounded on the west, three miles distant, and on the east at six miles, by a range of precipitous and thickly wooded hills, varying in height from 200 to 400 feet. The valley is subject to inundations during the wet season and rice is cultivated extensively in the vicinity of the town. Notwithstanding, however, this great moisture, which is in most other cases the frightful cause of disease, the place is considered very healthy, and is proved to be so by the few deaths which occur among the troops stationed here, as well as the natives. The shape of the town is that of an irregular square. It is surrounded on three sides by a ditch, the other facing the river a deep nullah runs through the midst. The town consists of two parts the inner, which is inclosed by a wall fifteen feet high, and the outer, which is surrounded by one eight feet high, and now partially in ruins. There is a good bazaar from which any description of provision may be procured at a cheap rate. The streets are open, and in good order. The population in 1847

was upwards of 10,000 souls consisting chiefly of Chinese Malays, Malabars, and Burmese. There is a trade carried on between this place and the ports on the Mergui Archipelago. Lat. 14° 7', long. 98° 18'.

**TAVOY ISLAND** extends from lat. 12° 55'—13° 15', long. 98° 23', twenty miles south of Tavoy Point. It is of moderate height, six leagues in length, and two miles in breadth. It is the most northern of the chain of islands forming the Mergui Archipelago. There is a pagoda at the south end. In the driest weather fresh water is procurable on its eastern shore.

**TAVOY RIVER** has its source in some hills about lat. 14° 50', long. 98° 30' and runs in a southerly direction for a course of about 100 miles, entering the sea in lat. 13° 30', long. 98° 20'. The upper part is much interrupted, but it is navigable for boats of large burthen fifty miles above the town of Tavoy, and at that place ships of 120 tons burthen can approach. It is here 300 yards broad, but in its further progress is swelled by so many streams that at its mouth it exceeds a mile in width. In its lower course it is studded with numerous islands which however much they may add to the beauty of the scenery greatly detract from its commercial advantages, as they materially impede the navigation. There is a good harbour ten miles from the entrance but the approach to this is rendered intricate from the above-named causes.

**TAWRUGERRI**—A town in one of the recently sequestered districts of Hyderabad, or territories of the Nizam, 17 miles S from Moodgal. Lat. 15° 46', long. 78° 20'.

**TEBBHEE**, in the Baree Doob division of the Punjab a town situated on the right bank of the Sutlej river, 121 miles S W by S of the town of Lahore. Lat. 30° 6' long. 72° 55'.

**TEOTOVA**—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam 52 miles S E from Ellah poor. Lat. 20° 36', long. 78° 4'.

**TEGOOLA**—A town in Hyderabad, or territory of the Nizam, 37 miles N E by N from Hyderabad, and 159 miles N W from Gustoor. Lat. 17° 48', long. 78° 56'.

**TEGURN**, in the territory of Nepal, on the eastern boundary of the British district of Kumaon a village on the left bank of the river Kales, on the route from Askot to the Beas Pass, 18 miles N E. of Askot. Lat. 29° 55' long. 80° 38'.

**TEKKREE**, in the British district of Delhi a village on the route from Delhi to Hansae, and 16 miles W of the former. The road in this part of the route is good. Lat. 28° 40', long. 77° 1'.

**TEKKREE**—A town in the British district of Meerut, Hunt-gov of the N W Provinces, a town situate 27 miles N W of the city of Meerut. Population 2,332. Lat. 29° 14' long. 77° 25'.

TEE—TEH.

**TEEMBA**.—A town in Gussarat, or dominions of the Guikowar situate on the left bank of the Taptee river and 73 miles S from Baroda Lat 21 11, long 78° 10'

**TEENJINNA**.—A town in the British district of Chota Nagpore lieut. gov of Bengal, 55 miles S. of Lohadugga. Lat. 23° 40', long. 84° 46'

**TEENMOHONRE**.—A town in the British district of Jessore, lieut.-gov of Bengal, 53 miles E.N. E. of Calcutta. Lat. 23° 54', long 89° 10'

**TEERA** in the Damam division of the Panjab a town situated 21 miles from the right bank of the Indus, 46 miles S by W of the town of Peshawar Lat. 33° 21' long 71° 29'

**TEERAH**.—A town in the native state of Cutch, situate 25 miles S W from the Great Western Runn and 50 miles W by N from Bhogj Lat. 23° 21' long 69°

**TEEREE**, in Gurkwal, the principal place of that raj and residence of its rajah. It is situate on the left bank of the Bhagerettie, as the Ganges is called in the upper part of its course and just below the confluence of the Bhilling which falls into it on the left or eastern side. Webb, who visited this locality in 1808 describes Teerree as a village and when Moorcroft passed, in 1819 it contained only the residence of the rajah, a very humble man, and the dwellings of his followers. The Bhilling abounds in a sort of fish called a trout by Moorcroft, which is snared in great numbers. Elevation above the sea, of the town, 3228 feet, of the level of the Bhagerettie, below it, 2278. Lat 30° 23' long 78° 31'

**TEERNER**, in the British district of Allahabad, lieut.-gov of the N W Provinces, a village on the route by Rajapoor ferry from the cantonment of Allahabad to Banda, and 22 miles W of the former Lat. 25° 24', long 81° 58'

**TEESGAUM**.—A town in the British district of Ahmednuggur presidency of Bombay 23 miles E.N.E. of Ahmednuggur Lat 19° 11, long 75° 6'

**TEESTA** a great river traversing part of Bengal, rises, according to the account of the Nepalese, in Tibet, and as is conjectured, in about lat 27° 59' long 88° 50'. Flowing westward for twenty miles through Tibet, and southward through Sikkim for ninety seven miles, it then forms for ten miles the boundary between Bhutan and Sikkim, and for twenty three miles that between Bhutan and Darjeeling passing eastward of the sanatorium of the latter place. Subsequently dividing the British district of Dinajpore from Bantan for ten miles, it enters Dinajpore and thirty miles below that point divides into two branches of nearly equal size one, proceeding south westerly, is denominated the Atree the other flowing with-easterly continues to be called the Teesta. About five miles below the point of divarication, it passes into a projecting por-

tion of the territory of Cooch Behar, through which it flows eight miles farther, and then passing into the district of Rungpore, proceeds through it in a south-easterly direction for 110 miles to its confluence with the Brahmapootra, on the right side, in lat. 25° 14' long 89° 41', its total length of course being 318 miles. The gorge east of Darjeeling by which the Teesta flows from the mountains, is one of the two passes from Bengal into Sikkim, and is denominated the Sabak Gola Pass. The river is deep enough in this gorge to be navigated upwards five or six miles. The body of water is very great, and on reaching the plain, the channel is 700 or 800 yards wide but the navigation is difficult and precarious from the rapids, and from numerous rocks and large stones in the bed so that it is available only for floating timber and for canoes, used for guiding it. However, as high up as Puharpore, fifteen miles above the divergence of the Attree, it is at all times navigable for craft of six or seven tons, and during the monsoon rains for those of forty or fifty tons. Though the Teesta, or south eastern branch of this great stream, is now the larger formerly the Attree or south western branch had a much superior volume of water and discharged the great drainage of the Snowy Mountains of Sikkim and of Dootan as well as of the plain at their base, into various tributaries of the Ganges. For the last fifty years, however the drainage has taken an easterly direction to the Brahmapootra, into which it is discharged principally by the channel of the Teesta.

**TEETABURHAUT**.—A town of Amam, in the British district of Seebpoor, 40 miles S.W. of Seebpoor Lat 26° 36', long 94° 10'

**TEETLAKOT** in the British district of Kumaon lieut. gov of the N W Provinces, a stockade formerly held by the troops of Nepal. It is situate two miles W of the right bank of the Kali, on a spur of mountains running southwards from the main range of the Himalaya, on the route from Askot to the Beema Pass, 24 miles N.E. of Askot. Lat. 29° 58', long 80° 40'

**TEETROUN** in the British district of Suharanpore lieut gov of the N W Provinces, a town on the route from Suharanpore to Panceput 26 miles S.W. by S. of the former Lat. 29° 40' long 77° 25'

**TEGHOOR**.—A town in the British district of Dharwar presidency of Bombay 13 miles W.N.W. of Dharwar Lat. 15° 33', long 74° 54'

**TEGRA**.—A town in the British district of Mongheer lieut gov of Bengal, 33 miles W by N of Mongheer Lat. 25° 27', long. 86°

**TEHARA**, in Surhind, a small town on the route from Ludiana to Ferozpoor, and 23 miles W of the former. It is situate close to the left bank of the Sutlej, and exhibits ori-

# TEL--TEL.

denoe of former importance, its present mud houses being built amongst numerous ruins of edifices constructed substantially of burnt brick. It, with the adjacent territory, was conquered by Ranjess Singh, who conferred it on the Allowalla chief, by whose defection during the Lahore war it has passed into the possession of the East-India Company. Distant N W from Calcutta 1,333 miles. Lat. 30° 57', long 75° 25'.

**TEHER**, in the Barce Doceh division of the Punjab, a town situated 10 miles from the right bank of the Sutlej, 86 miles S of the town of Lahore. Lat. 30° 26', long 73° 51'.

**TEHREE** in Bundelkund, a town of late years generally the residence of the rajah of Oorcha, thence frequently styled the rajah of Tehree. It is on the route from Agra to Bampur, 201 miles S.E. of former, 72 N W of latter. Garden styles it "a large walled town," but according to Sleeman it "is a wretched town, without one respectable dwelling house tenanted, beyond the palace, or one merchant, or even shopkeeper, of capital and credit. There are some tolerable houses unoccupied and in ruins, and there are a few neat temples, built as tombs or cenotaphs, in and about the city." On an adjoining height is a fort. Water and supplies for troops are abundant here. Lat. 24° 42', long 78° 53'.

**TEHERWARA**.—See **THEWARA**.

**TEIMBOORNEE**.—A town in the British district of Sholapoor, presidency of Bombay 58 miles W.N.W. of Sholapoor. Lat. 18° 1', long 75° 18'.

**TEINGHA**, in the territory of Oude, a village on the route from Lucknow cantonment to Partabgarh 95 miles S.E. of the former, 15 N.W. of the latter. Lat. 26° 7', long 81° 45'.

**TEKRAH**, in the territory of Oude, a small town on the route, by the Nanamau Ghat or ferry, from Futtiegarh to Lucknow 66 miles S.E. of the former 45 W. of the latter. It has a bazar. Lat. 26° 51', long 80° 24'.

**TEKERAPURRA**.—A town in the Rajpoot state of Jeypoor 86 miles N.E. by E. from Jeypoor, and 103 miles W. by N. from Ganjam. Lat. 19° 35', long 83° 34'.

**TEKKERE**.—A town of Malwa, in the native state of Dhar, situated six miles S of the left bank of the Nerbudda river, and 37 miles S from Dhar. Lat. 22° 2', long 75° 27'.

**TEKMAH** in the British district of Assamgarh, lieut. gov. of the N.W. Provinces, a village on the route from the town of Assamgarh to that of Jounpore 21 miles S.W. of the former, and 22 N.E. of the latter. It has a small bazar, distant 40 miles N. of Benares. Lat. 25° 58', long 83°.

**TEK MYOO**.—A town in the British district of Aracan, 26 miles S.W. by W. of Aracan. Lat. 20° 13', long 92° 46'.

**TEK NAAF**.—A town standing on a low

point of land at the entrance of the Nnaf river, in the British district of Aracan, lieut. gov. of Bengal, 63 miles W. by N. of Aracan. Lat. 20° 49', long 92° 23'.

**TEKRA**, in the Rajpoot state of Jeerulmeer a village on the route from the town of Bikaner to that of Jeerulmeer and 76 miles N.E. of the latter. Lat. 27° 10', long 73° 2'.

**TELIAPUR**, in the British district of Moradabad, lieut. gov. of the N.W. Provinces, a village on the route from the town of Moradabad to Muzafferpore, and 16 miles W. of the former place. Distant N.W. from Calcutta 902 miles. Lat. 28° 54', long 78° 36'.

**TELL RIVER** rises in lat. 19° 54', long 82° 41', and flowing north west for 120 miles, through the native states on the south-west frontier of Bengal, falls into the Mahanuddy river in lat. 20° 55', long 84° 9'.

**TELLICHERY**, in the British district of Malabar presidency of Madras, a seaport town and British military station. Abreast of the fort is a ledge of black rocks between which and the land small craft may anchor, being in some degree sheltered from the sea, but large ships touching here, when 'there is a chance of unsettled weather, should anchor well out in seven or eight fathoms for H.M.S. *Sperdy* of seventy four guns was lost at Tellicherry in November 1781. The fleet having anchored in five and five and a half fathoms, a heavy sea began to roll which made that ship strike on the *Sickles* s anchor she being moored inside the *Sperdy*. A double light is exhibited from the flagstaff all night throughout the year. For moderate-sized vessels the anchorage is one and a half or two miles off the town with a bottom of soft mud. The site of the town is very beautiful, open to the sea on the west, and on the opposite side backed by wooded hills interspersed with valleys, and watered by a fine river. The neighbouring country is highly productive the low lands producing annually two, and in some places three, crops of rice in the year. The coconut-tree also grows in great abundance and perfection, and is applied to various uses the trunks are worked up for small boats, and frames and rafters for houses, the leaves are used for thatch, mats, and baskets the nut affords food and oil, and in its unripe state an agreeable beverage, and the sap drawn off by incision into the trunk, on fermentation, is converted into the intoxicating beverage toddy, which, when distilled, yields the spirit called arrack. The citadel or fort, in which are situated the jail and hospital, is built on a rising ground close to the sea, and about forty feet above its level. It is of an oblong shape, being 117 yards in length and thirty four in breadth, its length runs parallel to the sea-shore. The whole of the north-west side of the citadel is occupied by a lofty building the upper part of which is appropriated to the criminal court and offices, and the lower part forms the jail, which is calculated to contain

200 persons. The climate, though very wet during the monsoon, the average annual fall of rain being from 120 to 140 inches, is found healthy. On account of its salubrity, it has been denominated the Montpellier of India. The houses of the majority of the population are of unburnt brick, and thatched, but those of a better sort are built of laterite, of which there are great quantities in the neighbouring hills. The population is estimated at 20 000, the majority of whom are Moplahs or Muslims, the rest Brahmmins, with a few Christians. In the year 1783 it was besieged by the forces of Hyder Ali and relieved upon the arrival of a British force under Major Abington. At that time it was a place of much importance. In the year 1790 it is described by Bartolmeas as a city belonging to the English, where they have a considerable settlement, a council, and an arsenal. They employ this city as a military post, where they collect troops brought from Bombay, in order to keep in subjection the inhabitants of Malacca. A brisk trade is carried on at Tellicherry pepper forms one of the principal articles of commerce, the other exports consist of cardamoms, ginger, arrow root, cinnamon, sandalwood, and other Malabar productions, which they transport to Bombay, and thence to England." Distance from Serlingapatam, S W, 95 miles Madras, S.W, 340 Lat. 11 45' long 75 33'

**TELTAREE**—A town of North Eastern India, in the British district of Goalpara, 44 miles W.S.W. of Goalpara. Lat. 26° 52' long 90

**TEMI**—A town in the native state of Sikkim, situated on the right bank of the Teesta river and 18 miles N.E. from Darjeeling Lat. 27° 14' long 88° 30'

**TENASSERIM**.—The provinces of Tenasserim, comprehending Amherst, Tavoy Ya, and Mergui, extend along the eastern coast of the Bay of Bengal, between lat 10 43—18 25' long 96 55—99 30' The length is about 500 miles, the breadth is very irregular, varying as the coast approaches the range of mountains forming the landward boundary of the territory or recedes from it, probably it nowhere exceeds eighty miles. The area may be estimated at 80,000 square miles. The area of these provinces has been recently enlarged by the annexation of that portion of the territory acquired from the Burmese in 1852, which lies to the east of the Sitang river and their northern frontier has thus been extended from the Salween river to the Sitang on the east they are bounded by the Shansee range of mountains, whose height varies from 3 000 to 5,000 feet, on the south by the river Pak Shan, and on the west by the sea. These provinces are under the immediate jurisdiction of the supreme government.

The soil, though of great extent, presents little variety of character. It is generally bold and rocky, and in many places bordered by numerous islands. Towards the south,

opposite Mergui, are a cluster differing in size, shape, and height, bearing the name of the Mergui Archipelago. The coast is indented by numerous creeks and small streams, several rivers of some magnitude also empty themselves into the bay, affording good anchorage and harbourage for ships of large burthen. With the exception of the deltas of such rivers, which furnish many acres of alluvial soil, peculiarly fit for rice-cultivation the coast vegetation is confined in a great degree to vast forests and almost impenetrable jungle. Between Ye and Tavoy the coast consists of large tracts of swampy land, called Sandarbunds, where the mangrove, and other trees which thrive in brackish water, grow luxuriantly and in abundance.

The physical aspect of this territory is much diversified. It may be characterised generally as a mountainous country but having also large plains or valleys, intersected by many fine and fertilising rivers. The mountains are clothed from the base to the summit with thick forests and brushwood, the valleys are appropriated to the cultivation of the various productions raised within the provinces. Towards the north, the country is more level, consisting of vast alluvial plains, highly fertile being watered by the Salween and the Sitang, further to the south the aspect changes to that of a more elevated country. Here the mountains run in three parallel ridges, in a direction from north-north west to south-south east, varying in height from 3,000 to 4 500 feet, and gradually diminishing as they approach the shore, till their elevation does not exceed 500 feet. In the lower parts of the province, the interior still continues mountainous, but less elevated and towards the shore terminates in low plains or swamps and the only communication here is by boats, which navigate the nullahs and creeks.

The principal rivers have tides flowing a considerable distance up the country, they are all wide and generally deep at their mouths and though their navigation is sometimes intricate and interrupted, all can be safely traversed. They are subject to annual inundations which render the proximate soil amazingly fertile. But besides fertilising the soil, these rivers afford great facilities for foreign and internal trade and the villages in the provinces being for the most part situated on their banks the transit of merchandise from one to another is easily effected by canoe. The chief rivers are the Salween, Sitang, Attaran and Tenasserim which will be found described under their respective names.

Almost all the ground that is not subject to inundations is occupied by dense forests, containing gigantic and valuable timber. They occupy it is said, two-thirds of the whole extent of the provinces one-fifth only is under cultivation, and when the British first became possessed of the country it presented a complete wilderness. Rules for the grant of uncleared lands, framed with the utmost

moderation and liberality, were in due time drawn out.

One of the most important mineral productions is coal the quality has been described as excellent, and the quantity considerable. The localities in which it exists, it has also been said present advantages of transport. "Iron," says Helffer "is found in one or the other form almost everywhere." It occurs in beds, in veins, and in rocks it is most abundant between Ye and Tavoy approximating the seacoast. In the territory between the Salween and Gyne rivers, it is found in sandstone hills, which vary from forty to 200 feet in height. Its quality improves towards the south, near Tavoy and this situation would be very advantageous for works, being only four and twenty miles from the river which distance might be traversed by a canal or rail road. The ore found here would, Dr Helffer asserts furnish from seventy four to eighty per cent. of raw iron. Mines are nowhere at present worked, in several places, however, are to be found the remains of furnaces and pits long neglected. Next to iron, tin is the metal most generally diffused through the province. It is confined, however in a great degree to the southern parts. The richest mines exist near the Pakkahan river, which forms the southern boundary of the province.

The range of mountains in which the tin-ore is found is a continuation of the Siamese tin territory of Rinowag. The tin is found in the debris of primitive rocks, like in all other parts of Tenasserim but the grains or crystals are much larger, and the soil in which they are buried yields eight to ten feet of tin, while at Tavoy the utmost is seven feet." At Mergui also tin is very prevalent, the hill on which the town stands containing much ore in the form of black sand and oxide. At some remote period, it is evident that the ore has been extracted in considerable quantities, as a large extent of surface remains upturned in the localities where it exists. The Burmese method of working is very rude and unscientific. Gold is frequently to be met with in various parts of the province, but nowhere in any considerable quantities. When found it is generally in the sands of rivers but its primary source has not been discovered. It is supposed to lie on the foreign side of the mountain-chain as it is most prevalent in the streams which flow into Tenasserim from the eastward. An analysis of sundry particles found in the streams of the Tavoy district was considered so satisfactory as to induce the government to order an examination of the rocks in the vicinity of the auriferous streams. Copper has lately been discovered in two islands of the Mergui Archipelago viz., Bal Ivan's Island and Collagkank, in the former in veins of quartz, in the latter in gneiss. Lead and antimony have been met with in some parts of the Amherst territory, but in very small quantities.

The only manifestation of the existence of

volcanic agency appears in the numerous hot springs to be met with in many parts of the country. On the Attaran river, and near Amherst, these exist in great numbers they are sometimes as much as fifty feet in circumference, and near their banks thirty five feet deep. The quality of the water is that of a sulphurous mineral, tinged slightly with chalybeate.

The year is divided into the wet and dry season, the former commencing with the approach of the south west monsoon about June and lasting till October, when the latter sets in. The natives on the coast divide the year into three seasons, viz., the hot, the rainy, and the cold the first commencing in February the second in June, and the third in October. The temperature, however, hardly varies sufficiently to justify the adoption of this division. The greatest heat prevails during the month of April, and then the thermometer is sometimes above 100 and the weather very oppressive. Notwithstanding these provinces extend over a distance of seven degrees of latitude, there is little diversity of temperature throughout, and when a difference is perceptible, it is occasioned more from disparity in the fall of rain than any other cause. In the northern parts, the monsoon makes its appearance with great violence and continues till the end of October or beginning of November. During the five or six following months, no rain takes place. In Mergui, on the contrary the monsoon comes in mildly and though it rains more at one time than at another showers are common all the year. The climate was considered a subject of such importance that, by order of government, a report was made to parliament concerning the health and mortality of her majesty's troops serving in these provinces, and this investigation has led to the knowledge of the fact that there is less sickness and fewer deaths here, among both Europeans and sepoy than in almost any other part of the territories of the East-India Company. This appears the more remarkable from the prevalence of that active generator of disease, excessive moisture, caused by the abundance of marshes, jungle, and dense forests which exist in the vicinity of the most populous districts. But clear and undeniable facts are adduced in proof of the healthfulness of the provinces and it is said that the exhalations, instead of proving pernicious consequences, tend to cool the atmosphere, and promote its salubrity. So beneficial," says this report, "has the climate of this coast been deemed for invalids, that in November 1823 in consequence of the favourable results of some previous experiments, the commander in chief gave instructions to the medical board at Madras for the establishment of a sanatorium either at Moulemein or at Amherst." The complaints that are most common and dangerous are fevers of the intermittent type, inflammation of the lungs and liver, catarrh,

and dysentery. These at times prove fatal but in the majority of cases are subdued by timely care and attention and from a table appended to the above-mentioned report, it is shown that during the ten years from 1827 to 1836 inclusive, out of 10 819 admissions into the hospitals at Moulemein 306 deaths only occurred.

Cotton is grown to a small extent, but it is not indigenous and was probably introduced from the continent of India. The plantations are generally situated on the banks of rivers but little attention is paid to the culture and the quality of that produced is not high. Dr. Helfer thinks that the Manila plant, and also the Egyptian might succeed better. Rice is one of the most important productions, but its cultivation is confined in a great measure to the northern districts, where the alluvial soil is so general. Sugarcane, though it thrives well throughout the provinces, is cultivated to a very limited extent, being almost confined to gardens but there is every reason to suppose, from the character of the soil and climate, that an extension of this branch of agricultural industry would amply remunerate any person undertaking it. Tobacco is in very common use among the natives and not only men, but women and children either smoke or chew it. Much care is bestowed upon its culture, but it is raised only for home consumption. It is also imported from Cheduba. The betel flourishes in some parts, especially about Mergui where it is extensively produced. The plantations resemble those of hops in England the young plants require to be placed in a rich soil, where they must be treated with much care and be screened from the scorching rays of the sun. The planting takes place in March, April, and May and five or six months after the leaves may be gathered continuously for fifteen months. Fifty from each vine can be collected monthly. The production of the areca-nut is confined to the southern provinces, commencing about the latitude of Tavoy, and flourishing vigorously in Mergui. The coconut is found to thrive well especially near the seacoast, and yet its cultivation is not carried to the extent which its importance would justify, and the natives," Dr. Helfer observes, "have a great reluctance to plant it. This reluctance may be attributed to the circumstance of its not yielding fruit for eight years after it is planted or perhaps, the people may suspect, that as the Burmese considered coconut-trees the property of government, the English would take the same view. It is largely imported from the Nicobar Islands. Coffee is not grown but the soil and climate are both suited for it. The *Nauclaea Gambir*, or Terra Japonica, occurs chiefly on the banks of the Tenasserim river, where it attains the height of six feet. It is uncertain whether or not it is indigenous the natives chew it, as well as the betel. The fruits are the pineapple, mango, orange, shaddock, lime, citron, nasein, guava, and guava.

The vast forests which cover the greater part of the provinces, and clothe the mountains from their base to their summit, contain an immensity of trees. Dr. Helfer estimates the number of trees in the provinces at 638 000,000. The same author says that there are no less than 277 different species, each at least attaining a diameter of seven inches. The heights are greater in proportion to the circumference than those in Europe. The wood has the character of being firm and elastic. Teak forests abound in the upper course of the Attaran river and yield an inexhaustible supply of timber which is exported in large quantities. On these possessions coming into the hands of the British prompt steps were taken for rendering the forests a source of revenue, licenses to cut timber were offered but private speculators appeared to decline engaging in the business government thereupon led the way by an experiment upon a very small scale. As a pecuniary speculation it failed, as such matters in the hands of government usually do but the object probably having been rather to call attention to the forests than to realise profit it may be considered as having been to some extent successful. Private parties took up the trade, which it was clear government could not pursue beneficially many tons of teak wood were exported within a few years, and by 1839 shipbuilding had made some progress at Moulemein. In that year the receipts of government from the forests were 13 467 rupees, in 1845-46, they had risen to 1 07 048 rupees. The advance, however had not been regularly progressive, but had fluctuated considerably. Great abuses, moreover had existed, and various plans for their suppression had been adopted with more or less success. Numerous disputes and squabbles grew out of the attempt to enforce rules on the one hand, and the desire to evade them on the other and even yet it cannot be said that they are at an end. Besides the teak, there are several other forest-trees. Bamboo grows naturally and in great profusion the best occurring between Tavoy and Ya, in the interior and on the slopes of the elevated ridges. The jack grows both to the north and south. It is one of the most valuable trees in the province. Every part is applied to some use the fruit for food, the wood is excellent for furniture, the leaves wholesome for cattle from the bark crudes a species of caoutchouc the sawdust, when boiled, yields a yellow dye, and from the kernel oil can be extracted. The sapient-tree is also very valuable, but its growth is confined to the country east of Mergui, near the Siamese frontier. It is felled in August, and floated down the river in rafts. Sandal-wood occurs in the southern parts, and on some of the islands in the Mergui Archipelago. The wood oil tree grows to a good size. There are other oil-yielding plants the acemannum is the most common, which all classes use for culinary purposes. Caoutchouc is produced from many trees

in the country, and ought to become a source of revenue, as the quality is good and it exists in abundance. The camphor-plant, the gaul, jeng, and the catnip plant all occur. Spices of all descriptions—cloves, cinnamon, nutmeg, pepper—grow in abundance.

From the extensive forests which abound throughout the province, and the vast tracts of land unexplored and uncultivated it might be expected that the number of wild animals would be large, and their variety great. Elephants are numerous, and of great size, occupying more particularly the tracts near the eastern frontier. The inhabitants but seldom hunt them, but a few gain a livelihood by catching these animals. This operation is performed by two men, mounted on a trained elephant, and carrying a spear and a lasso. The work is attended with much danger not only from the elephant sought to be ensnared, but also from tigers, who frequently carry off the elephant-hunters while watching in the jungle. Several species of the rhinoceros exist and these are hunted by the natives for their horns, which form an article of exportation.

At the period when the British became possessed of Tenasserim the population it has been said, did not exceed 30 000 souls, it has been estimated indeed as low as 10 000. More recently, these numbers have been regarded as greatly below the fact, and the people at the time of the British conquest estimated at 90 000. It is probable that all these estimates are though the more liberal may be regarded as being nearer the truth but however that may be, the numbers certainly increased under the occupation of the British, and in 1839 exceeded 112,000. In 1847 the population was given at 150 415, and by the latest returns it appears to be 191 476. The people who were the first inhabitants has not been clearly ascertained. The Talians, according to a recent authority, now form the larger portion of the population. This, however, seems open to doubt. Another portion sometimes supposed to be the original occupants of the country are called Kareans. To judge from the Kareans inhabiting the interior," says Mr. Helfer, "who seem to have outlived all recollections of the successive conquests, and following analogy, whatever inhabitants there were, they seem to have belonged to Mongolian races. Burmah, as well as Siam and Cambodia, seem to have been originally peopled from the north and it is very improbable that the inhabitants of Tenasserim were ever mixed with Malay blood. The comparatively late arrival of that race from Menamabo, in Sumatra, in the Malay peninsula, in the districts of Jahor Malacca, and Quenda, where they formed colonies, is now almost universally adopted as a fact approaching to certainty, and if so, they had no time to disperse themselves towards the north." The province has undergone many changes with regard to its inhabitants, each conqueror being followed by new settlers. All the villages are built either on the sea-

shore or on the banks of rivers. There is a headman to each, whose duty it is to collect the revenue, to superintend the police force, and to decide all petty disputes. The language adopted in the courts of law and in all public transactions, is the Burmese but that of the Tahan inhabitants (sometimes said to form a majority) is their own vernacular tongue and which is very different from the language of Burmah.

The chief pursuits of the people are hunting and husbandry the women weave a species of cloth, and assist in beating out the rice, by means of mills, for daily use. Both men and women are fond of music and dancing, and a species of stage performance somewhat resembling the earlier attempts of Europe in the drama, is highly popular. Athletics games and amusements are also practised, as football wrestling pugilistic encounters, and boat-races. In the month of April, which is the commencement of the year by their computations, there are great festivities and rejoicings. The most popular amusement consists in throwing water from vessels over each other. Marriage is considered quite a civil contract and can be annulled without much difficulty the ceremony observed is that employed by the Burmese. The parents of a youth desirous of forming an alliance employ friends to gain the consent of the girl's relations who then fix upon the time and the parties are allowed to see each other. On the day of the ceremony the bridegroom goes to the house of his intended with his relations and friends, and takes his seat on the right of the party there assembled, the bride being on the left. The ceremony is then performed which is thus described by Captain Low — "The elder now gives the bride a nosegay and makes her repeat some Burm sentences, first directed to her father again to her mother, next to the parents of the bridegroom and lastly to her husband. The bridegroom goes through the same ceremony beginning with his parents and relatives, but does not address the bride. The elder then takes the flower from the bride and places it on the wall of the house she takes a little rolled up betel-leaf and presents it to the bridegroom who exchanges the flower for it. They then both sit on one mat, the bridegroom on the right, a feast ensues, and they finish the ceremonies by eating out of the same dish. A newly married couple do not proceed to the husband's house, but remain for a period of from one to three years in that of the father and mother of the bride. The results are said to be protective of the rights of the wife, but rather unfavourable to the authority of the husband. The dead are generally burned with the exception of persons under seventeen years of age, who are buried. It is the custom, if a woman die in childbirth, to burn the body on the bank of a river. The obsequies of a phoenice or priest are attended with much display the corpse, clothed in finery and placed upon a richly ornamented

coffin, is laid on the pile, which is fired by rockets, and ritually consumed.

The Buddhist religion is the faith universally held by the Burmese and by the Thakans, but they are not such faithful or rigid observers of its precepts as the Peguers and Siamese. The priests are numerous; they live generally in monasteries, and employ a portion of their time in teaching the children to read and write. The Kareans have no prescribed form of worship; they entertain a faint idea of the existence of one supreme being but do not seem to have any notion of a future state. They are said to have some traditions of the creation of man, his fall, the deluge, the subsequent peopling of the earth and the growth of idolatry amongst its inhabitants, which appear to have a Mosiac origin. They have a strong dread of a set of supernatural beings somewhat resembling fairies, a belief in whose existence and powers extends also to other classes. The habits of this race are said to be extremely filthy, and they have an almost superstitious aversion to the use of water for the purpose of ablution. Another tribe, called Tongiboon, are found in Amherst; they differ in many respects from all the other classes of inhabitants, but little appears to be known of them except that they are the best cultivators in the province. The attempts made to introduce Christianity have not been altogether without success. A great difficulty existed from the indifference of the natives on the subject of religion generally, but the American Baptist Missionary Society have built churches and established stations throughout the province, through which they have been able to effect considerable improvement in the moral condition of the people.

The courts of justice, which, during the sway of the Burmese, were open to corruption and bribery and tended more to the perversion than the administration of justice, are now under the jurisdiction of officers appointed by the government of Bengal, who are under the control and superintendence in civil cases of the court of Sadder Dewanny Adawlut, and in criminal cases of the court of Nizamut Adawlut. These functionaries consist of a commissioner, two assistant-commissioners, and some other officers.

The history of Tenasserim till the commencement of the eighteenth century is involved in obscurity. The country appears always to have been in a state of disorder and agitation and subject to frequent changes in its possessors, at one time belonging to the Siamese, at another subject to Pegu, and at another to the Burmese. In the year 1700, the last-mentioned nation gained a firm and, comparatively speaking, lasting possession, retaining it under their harsh and impetuous yoke until the termination of hostilities with the British, when, by the treaty of Yandaboo, it was ceded to the last-named power. When first occupied the province presented a truly deplorable aspect. The inhabitants were

few, it yielded no revenue, and in every respect offered nothing but discouragement. Its rapid growth to its present improved condition, therefore, is in the highest degree satisfactory and calculated to awaken the deepest interest for its future welfare. The fact, however, is unquestionable, that there is still great room for improvement. The advantages which these provinces enjoy over many others of the British possessions in the East are manifold. Nature, with overflowing bounty, has bestowed on the land vast and varied powers of production, the rice fields yield an increase unrivalled in India, the rivers, besides fertilizing the soil by the periodical inundations, and offering great advantages for commerce, afford large supplies of fish which furnish an article of food for the inhabitants; the climate is salubrious. The vast amount of physical capabilities, then, are manifest, but with all these advantages the population is so scanty that it is clear for the proper development of these resources, an increase is necessary. It is also requisite that such increase should comprise men of vigour and enterprise, possessed of capital, and able to command labour. The greater part of the land is in the hands of government, and from the progress which has already been made, it may be anticipated that by its judicious efforts, the country may be brought to the condition which it evidently is capable of attaining.

**TENASSERIM TOWN** — Formerly the capital of the province so called, but now a place of no importance, containing only 100 houses and 400 inhabitants. It is situated on the river of the same name, at the confluence of the Little Tenasserim. The river is navigable up to the town for vessels of 120 tons burthen. The town was once surrounded by a brick wall which is now so much in ruins that its remains can be traced only at intervals; it also had two or three pagodas. It is about forty miles from the town of Mergal by the river, and in lat. 13° 6' long 99° 6'.

**TENASSERIM RIVER** — The most considerable and important river in the province so called. Its source is supposed to lie in the mountains to the north-east of Tavoy between the fourteenth and fifteenth degree of latitude. For some distance it has a course due south; it here bears the name of the Kamaun Khiesang river. Upon arriving at the village of Metamka, in lat. 14° 15' it is joined by the Bang Khiesang, and the united streams are called the Tenasserim River, which then takes a southeasterly direction, but turns afterwards to the south again, till it reaches the old town of Tenasserim, where it receives the Little Tenasserim. From this it takes a north-westerly direction, and empties itself into the sea by two mouths which form an island, on which the town of Mergal is situated. The upper part of its course is through a wild and uncultivated tract, sometimes between high

# TEN-THA

and perpendicular banks, at others through a low and barren country. It afterwards opens upon extensive alluvial plains, which are in some places highly cultivated. On many parts of its banks exist forests of fine teak, and the valuable aspen wood, and some districts have been found to contain minerals and coal. It receives many feeders but they are generally insignificant, with the exception of the Little Tenasserim, the Baing-Khaung and Kamaung-Khaung. There are few villages on its banks, and none of the slightest importance but Metamio and Tenasserim.

**TENDUKHERI** in the British district of Sangor and Nerbudda, a town situate at the base of a remarkable conical hill of trap, the summit of which was once crowned by a cluster of grayish green basaltic columns, which now lie overthrown about the base shattered probably by the shock of an earth quake. Close to this place are rich mines of iron-ore, which are worked to considerable extent, and furnished the metal of which a suspension bridge 300 feet span was constructed at Sangor cantonment. In the vicinity is an extensive forest, in which lions have been recently killed. Distant S from Sangor 50 miles, N from Nagpore 108. Elevation above the sea 1,338 feet. Lat. 23 10', long 78 53.

**TENDWARRA**, in the British district of Banda, lieut.-gov of the N W Provinces, a village on the route from the town of Banda to Rowah, four miles S. of the former. Lat. 25 25', long 80 25'.

**TENGA PANEE**, a river of Upper Assam, rises in lat. 27° 38' long 95° 20', and flowing westerly for forty five miles through the district of Sudiya, falls into the Brahmapootra river in lat. 27° 46', long 95° 49'.

**TENGERICOTTA**.—A town in the British district of Salem, presidency of Madras, 23 miles N E by N of Salem. Lat. 12° 1', long 78° 28'.

**TEPPEIN**.—A town in the British district of Amherst, in the Tenasserim provinces, 42 miles N of Moulmein. Lat. 17° 6', long 97° 40'.

**TERDUL**.—A town in the Southern Mah ratta jaghire of Sangley, situate on the right bank of the Kistnah river and 59 miles N.E. from Belgaum. Lat. 15° 30' long 75° 9'.

**TEREN TAREN** in the Barce Doob division of the Punjab, a town situated 25 miles from the right bank of the Beas river 35 miles E. by S of the town of Lahore. Lat. 31° 23', long. 74° 57'.

**TEREPUNYTHORAY**.—A town in the native state of Travancore, presidency of Madras, 110 miles N.W. from Trivandrum, and 84 miles S.W. by S. from Coimbatore. Lat. 9° 56' long. 73 23.

**TERHA**, in the district of Bainswara, territory of Oude, a town five miles N.E. of the left bank of the Ganges, 40 S.W. of Lucknow.

Butter estimates the population at 8,000 including 100 Mussulmans. Lat. 26° 24' long. 80° 23'.

**TERHA**, in the British district of Agra, lieut.-gov of the N W Provinces, a village on the route from the city of Agra to that of Gwalior, and 12 miles S of the former. It has a bazar. Lat. 27°, long 78° 1'.

**TERIKOT**.—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate 47 miles E.S.E. from Jammu and 44 miles N.W. by W from Kangra. Lat. 32° 26', long 75° 45'.

**TERRAON**.—See TIMOWAN.

**TERRUVUMPET**.—A town in the British district of Madura, presidency of Madras, 47 miles E. by S. of Madura. Lat. 9° 51', long 78° 51'.

**TESSUNAH**.—See THMOOA.

**TETOWLEE**, in the British district of Musaffurnugur, lieut.-gov of the N W Provinces, a village on the route from Kmrani to Meerut, and 25 miles S.E. of the former. Lat. 28° 26', long 77° 20'.

**TEWAREEPOOR**, in the British district of Cawnpore, lieut.-gov of the N W Provinces, a village on the route from the cantonment of Cawnpore to Futtahpoor and 18 miles S.E. of the former. Lat. 26° 15', long 80° 34'.

**TEWREE** in the Rajpoot state of Jodhpoor, a small town on the route from Pokhran to the town of Jodhpoor and 24 miles N.W. of the latter. Lat. 26° 23' long 73°.

**TEZGONG**.—A town in the British district of Dacca, lieut.-gov of Bengal, five miles N.W. of Dacca. Lat. 23° 48', long 90° 23'.

**TEZPORE**.—A town of Assam in the British district of Durrung, 45 miles E. by N of Durrung. Lat. 26° 35' long 92° 45'.

**THADGAON**.—A town in the territory of Nagpore, 41 miles S. from Nagpore, and 118 miles E.S.E. from Ellichpore. Lat. 20° 33', long 79° 18'.

**THADZENG**.—A pass through the range of mountains separating the district of Aracan from the province of Pegu, 16 miles W.S.W. of Baman. Lat. 16° 35', long 94° 38'.

**THAIMAH** in the British district of Seoni, territory of Sangur and Nerbudda, lieut.-gov of the N W Provinces, a town on the route from Seoni to Rangurb, 51 miles E.N.E. of the former. Lat. 22° 20', long 80° 23'.

**THAIR**.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, 50 miles N.E. from Sholapoor. Lat. 18° 20' long 76° 13'.

**THAIRNA**.—A river of Hyderabad, rising in lat. 18° 29' long 75° 54' and flowing easterly for 100 miles, falls into the Maragur river, in lat. 18° 4' long 77° 2'.

**THAKIL**, in the British district of Kanaua, lieut.-gov of the N W Provinces, a mountain in the bifurcation formed by the rivers Kalas

and Saryoo, and about five miles N W of their confluence. Its summit consists of bluish-black slate rock, in some places flinty, in others compact, and cropping out from beneath limestone, with which the localities are covered. Elevation above the sea 8,221 feet. Lat. 29° 31', long 80 15'

**THAKOOR**.—A town of Assam, in the British district of Durrung, 62 miles E.N.E. of Durrung. Lat. 26° 44', long 92 58'

**THAKOORDWARA**.—A town in the British district of Moradabad, lieut.-gov. of the N W Provinces. Lat. 29 12', long 78° 55'

**THALNEIR**.—A town with fort in the British district of Candesh presidency of Bombay 64 miles N E by N of Mallikarjuna. The place was ceded to the British by Holkar in 1818, under the treaty of Mundisore but resistance being offered by the killedar upon receiving a summons for its surrender, the fort was taken by storm by a force under Sir Thomas Havelock. Lat. 21 18', long 75 6'

**THALOO**.—A pass through the range of mountains which separate the Aracan and Pegu districts, 48 miles S.S.W. from Proma. Lat. 18 6' long 94 50'

**THALWAN** in the Jalandar Dooh, a village on the right bank of the Sutley which is here crossed by a ferry affording a much frequented communication from Sirhind with the Punjab. It is distant 21 miles W from Ludiana. Lat. 31, long. 75 35'

**THAMBA** in the British district of Allahabad, lieut. gov. of the N W Provinces, a village on the route by Rajapoor ferry from the cantonment of Allahabad to Banda, and 29 miles W of the former. Lat. 25 26', long 81 30'

**THAMEIN**.—A town of Burmah, situate on the left bank of the Irrawady river and 196 miles N by E. from Ava. Lat. 24 38' long 96 58'

**THAN**.—A town of Burmah, situate on the left bank of the Irrawady river, and 33 miles N from Ava. Lat. 23 20', long 98 4'

**THANA**, in the state of Boondoe, in Rajpootana, a village on the route from Nusserabad to Boondoe, 74 miles S E. of former, 18 N W of latter. Here is the fortress of the feudatory of the place, a small but strong structure of masonry on the crest of a low hill. Lat. 25 34', long 75 29'

**THANA BAOHAN**, in the British district of Saharunpoor lieut.-gov. of the N W Provinces, a town on the route from Saharunpoor to Delhi 28 miles S.S.W. of the former. Lat. 29° 45', long 77 30'

**THANA CHOWKEE**, a police-station in the British district of Shahabad lieut.-gov. of Bengal, 31 miles S.S.W. of Bessoran. Lat. 24° 34', long 83 50'

**THANAPOOR**, in the British district of Cawnpore, lieut.-gov. of the N W Provinces,

a village on the route from the cantonment of Etawa to that of Cawnpore, and 38 miles W of the latter. Lat. 26° 31', long 79° 53'

**THAN MAU**.—A pass through the range of mountains separating the district of Aracan and the province of Pegu, 37 miles S.W. by S. of Bassein. Lat. 16 30', long 94° 30'

**THANNESUR**.—See THONNESUR.

**THANOT** in the Rajpoot state of Jeaulmeer, a small town in the desert, 54 miles N E. of the city of Jeaulmeer. Lat. 27° 41', long 70 41'

**THARAWADDY**, one of the divisions of the province of Pegu, having an area of 1,950 square miles, and a population of 68,139

**THARET KONG**.—A town of Burmah, 48 miles S E from the left bank of the Irrawady river and 26 miles E.S.E. from Ava. Lat. 21 45' long 96 24'

**THAUT**, in the Rajpoot state of Jodhpoor, a village on the route from Nusserabad to Beekanoor and 41 miles N W of former. It contains twenty houses and ten wells. Lat. 26° 34', long 74 22'

**THEE BO**.—A town of Burmah, 88 miles E from the left bank of the Irrawady river and 94 miles E.N.E. from Ava. Lat. 22° 20', long 97 26'

**THEKA VULLIOR**.—A town in the British district of Tinnevely, presidency of Madras 25 miles S by W of Tinnevely. Lat. 8 22', long 77 40'

**THELLAR**.—A town in the British district of North Arcot, presidency of Madras, 70 miles S.W. of Madras. Lat. 12 34' long 79° 36'

**THENKAUSHEE**.—A town in the British district of Tinnevely presidency of Madras, 80 miles N W by W of Tinnevely. Lat. 8 55' long 77° 22'

**THEOG**.—A small fort on the route from Simla to Kotgurh, and by the winding mountain road 14 miles E. of the former post. During the occupation of the country by the Goorkhas, this post was held by one of their garrisons. It gives name to a small thakoorai or lordship tributary to the state of Keonath containing eight pergunnahs, and having a population estimated at 4,423 persons. Elevation above the sea 8,018 feet. Lat. 31° 5', long 77° 26'

**THERAI**, in the British district of Agra, lieut. gov. of the N W Provinces, a town 10 miles S. of the city of Agra. Lat. 27 2', long 78 7'

**THERWARRA**.—A small district inhabited by Coolies, on the north western part of the province of Guzerat. It is bounded on the north by Doodur on the south by Bahadurpore on the east by Kankrej and on the west by Bamber. It is about ten miles long and eight broad. The country is flat and generally open, but with patches of low jungle. The population is about 800. Therwarra page 971

# THI--THU.

no tribute to any state, but looks for protection to the British, with which government its connection commenced in 1812, upon cessation of the expulsion of the bands of plunderers from Guzerat. A subsequent agreement was entered into in 1836. The policy observed towards it is that of non-interference with its internal affairs, but the maintenance of control in its external relations. The town of Thetwara is in lat. 24° 8', long. 71° 35'.

**THINDOOA.**—A town in the territory of Oude, situate on the right bank of the Ohowka river, and 87 miles N by W from Lucknow. Lat. 28° 6', long. 80° 50'.

**THOHA.**—A town in the Rajpoot state of Jodhpoor or Marwar 80 miles N from Jodhpoor and 100 miles W by N from Ajmeer. Lat. 26° 44', long. 73° 10'.

**THOBAL.**—A town of Eastern India, in the native state of Munnepoor, 13 miles S.E. from Munnepoor, and 81 miles E. by S. from Silchar. Lat. 24° 39', long. 94° 7'.

**THOGAON.**—A town in the territory of Nagpore, 104 miles S by E from Nagpore, and 176 miles N.N.E. from Hyderabad. Lat. 19° 41', long. 78° 34'.

**THONGHOO.**—A town of Eastern India, in the British district of Aracan, 139 miles S.S.E. of Aracan. Lat. 18° 55', long. 94° 18'.

**THOOMIEOLKHOOLK.**—A town of Eastern India, in the native state of Munnepoor, 23 miles N from Munnepoor and 81 miles W.S.W. from Silchar. Lat. 25° 9', long. 94° 4'.

**THOREE.**—A town in Nepal, 47 miles S.W. by W from Khatmandoo, and 40 miles N from Bettiah. Lat. 27° 20', long. 84° 40'.

**THORLA.**—A town in the British district of Tipperah, lieut. gov. of Bengal, 18 miles N.W. of Tipperah. Lat. 23° 40', long. 90° 59'.

**THOUNG YIN MYIT.**—A river rising in lat. 16° 10', long. 99° 9' and flowing north west for 160 miles, separates the British district of Amberst from the native state of Siam, and falls into the Thaluayn Myeset river in lat. 17° 35', long. 97° 43'.

**THOURRE.**—A town in the territory of Oude, situate on the right bank of the Goomtee river and 60 miles E.S.E. from Lucknow. Lat. 26° 25', long. 81° 59'.

**THREE PAGODAS.** in the British district of Amberst, one of the Tenasserim provinces, 32 miles S.E. by E. of Amberst. Lat. 15° 20', long. 98° 48'.

**THULASEEREE.**—A town in the British district of Tannah, presidency of Bombay, 79 miles N of Bombay. Lat. 20° 4' long. 75°.

**THULENDI.** in the district of Balasore, territory of Oude, a small town on the route from Allahabad to Lucknow, 85 miles N.W. of the former, 42 S. of the latter. It has a bazar. Lat. 25° 28', long. 81° 1'.

**THULLEE.**—A town in the Rajpoot state

of Jeypoor, 24 miles S. from Jeypoor, and 79 miles E. from Ajmeer. Lat. 26° 35', long. 75° 37'.

**THUNDOD BHOWANI.** in Sirmor a summit of the Sain range, and near its south-eastern extremity. It is crowned by a small Hindoo temple, which was a secondary station in the great trigonometrical survey of the Himalaya. Elevation above the sea 5,700 feet. Lat. 30° 40' long. 77° 26'.

**THUNNESIR.** in Sirhind, a town on the route from Kurnal to Ludiana, and 23 miles N of the former place. It is situate on the left bank of the Sarsooty, in a level, fertile, well-cultivated country abounding in groves of mango-trees. The site is a great irregular mound, formed of the ruins of the former city over which, amidst crumbling walls, are scattered the present habitations. Most of these are wretched huts, but the natives in easy circumstances have handsome houses, on the walls of which are depicted in gaudy colours and of large dimensions the grotesque figures of their monstrous idols. The place is surrounded by a ruinous wall, formerly of considerable height connected with it is a disparted fort with numerous towers, there is also a large tank, and a temple of Mahadeo. Outside the town is a ruinous Musulman tomb of considerable height and octagonal form having a turret at each angle, and being surmounted by a large and very elegant opus of white marble. Its appearance is rendered more striking by its picturesque situation amidst palm trees, embosomed in a thick mango-grove. Notwithstanding the ruinous state of the buildings, the environs are represented as very pleasing. We had our tents pitched," says Lloyd "to the north of the town, upon a green turf shaded by lofty trees. It was a delightful spot, and the tanks, musolems, and ruins formed a beautiful picture before us." At a short distance from the town is the lake of Khoorket, famous and revered among the Hindus on account of a great battle, which, according to the Mahabharat, was fought on its banks in the mythological period of the Hindoo records. This lake is thus described by Lloyd — "As well as I can judge, it is about one mile in length, and half a mile in width. In the centre is an island 235 paces in breadth, connected with the shore on each side by two ancient bridges 235 paces in length each which, I was informed, are during the rainy season covered with the water of the flooded lake. There is a third bridge also, which leads to the island, and to have been built by Arungzeb, but it is now useless and broken. There are no temples here, but at the most hallowed spots fights of steps run down to the water's edge, for the convenience of those desirous of performing the usual ablutions." The district of which Thunnesir is the chief town contained ninety nine and a half villages, and was estimated to have an area of 2,336 square miles, with a population of

# THU—TIG.

496,743, and an annual revenue of 7 600l. sterling. A moiety of the territory ceded to the British government in consequence of the failure of the Marathas in 1818 and 1851, and the remaining portions have been confiscated, in consequence of the failure of the chiefs in their allegiance. In 1811 Mahmood of Ghuznee crossed the Indus, with the avowed intention of destroying Thunnessur though his ally, the rajah of Lahore, offered, in case the town were spared, that the amount of its revenues should annually be paid to the invader in addition to all the expenses of the expedition, besides fifty elephants and a large amount of jewels. Regardless of the intercession and the proffered gifts, Mahmood continued his march, and took and sacked Thunnessur and, destroying the idols, sent the fragments of Jugsoma, the principal one, to Ghuznee to be there trodden under foot. Ferriah relates that on this occasion the Mahomedan army brought to Ghuznee 200 000 captives and much wealth so that the capital appeared like an Indian city no soldier of the camp being without wealth or without many slaves." The population has been returned at 12,103 Thunnessur is distant N W from Calcutta 988 miles. Lat 29° 58', long 76 54

**THURORA**.—A town in the territory of Nagpur, 58 miles E N E. from Nagpur and 46 miles S E by S from Seoni Lat. 21 27', long 80

**THUROWLEE**, in the British district of Gorakhpur, lieutenant-gov of the N W Provinces a town on the route from Gorakhpur to Khasi 42 miles N N W of the former Lat. 27 14, long 83 9'

**THURRAUD**.—A petty independent state on the north western frontier of Guzerat, bordering on the Ruin north of the river Bunnas It extends from north to south about thirty five miles, and from east to west about twenty five, and has an area of 600 square miles. It is bounded on the north by the Marwar district of Sakhore on the south by that of Baubier and that of Therwarra, on the east by Pahlunpore, and on the west by the petty state of Wow Thurraud pays no tribute The territory appears to have been badly administered and at the request of its chief it has been taken under British management. The chief town is in lat. 24 25', long 71 38'

**THUTHA**, in the Sindh Sagur Doab division of the Punjab, a town situated 18 miles S.E. from the left bank of the Indus river, 52 miles S.E. of the town of Peshawar Lat. 33 34, long 72 25'

**THUTERA**, in the British district of Furruckabad, lieutenant-gov of the N W Provinces, a town near the southern frontier towards Cawnpore, and on the right bank of the river Roon, a short distance to the left of the route from Etawa to Lucknow, by Nannow Ghat. Lat. 26 55 long 79° 58'

**THYLOOSA**.—A town in the British district of Northern Cachar, lieutenant-gov of Bengal, 60 miles E of Jyntepore. Lat. 26 11', long 93°

**THAOTATY**.—See AIKOSA.

**THAGUR**.—A town in the British district of South Arcot, presidency of Madras, 46 miles W of Cuddalore. Lat. 11 45', long 79 8

**TIBBEE**, in the Daman division of the Punjab, a town situated 11 miles from the right bank of the Indus, 77 miles N W of the town of Mooltan Lat. 30° 57', long 70 39'

**TIBEE**, in the British district of Bhutiana, lieutenant-gov of the N W Provinces, a village on the route from Hanees to Bhutanai, and nine miles E. of the latter Lat. 29 35', long 74 32

**TIDONG** in Bumahir a river, or rather large torrent, of Koonawur, rises on the south-east frontier, towards Garwal, and about lat. 31 23 long 78 42' and holding a north-westerly course along the north eastern base of the huge Roldung range, falls into the Sutlej in lat. 31 35 long 78 29' The valley, or rather ravine down which it flows, is a singular scene of savage grandeur being in closed generally by mountains of slate, of a vast height, bare and of shattered outlines. A fearful pathway proceeds along the course of the river. In some parts of the road there were flights of steps, in others framework of rude staircases, opening to a gulf below and embracing ruin from above. In one place is a construction still more dreadful to behold, it is called a rapese, and is made with great difficulty and danger. I never saw anything of the kind to such an extent. It consisted of six posts driven horizontally into the clefts of the rocks, about twenty feet distant from each other and secured by wedges upon this giddy groundwork a staircase of fir spars was formed of the rudest nature twigs and slabs of stone connected them together just as in the sangas. There was no bar or support of any kind on the precipitous side, which was deep and perpendicular to the Tidong, a perfect torrent. For six or seven miles the fall of the stream is 300 feet a mile, and in some places nearly double where it displays an entire sheet of foam and spray thrown up and showered upon the inclosing rocks with loud consciousness, echoed from one side to the other with a noise like thunder

**TIERRO** in the Sindh Sagur Doab division of the Punjab, a town situated nine miles from the left bank of the Indus, 69 miles N.W. by S. of the town of Mooltan Lat. 29 30', long 70 53'

**TIGGAREAH**, or **TIGOREAH**.—One of the Cuttack Mahals, on the south-west frontier of Bengal it pays a tribute of 826 rupees to the British government, and the mahal contains

tain a force of 300 cavalry and infantry. Its centre is in lat.  $30^{\circ} 30'$ , long.  $85^{\circ} 25'$ .

**TIGHURA**, in the district of Purna, in Bundelkund, a village on the route from Allahabad to Saugor, 325 miles S.W. of former  $88^{\circ} 15'$  N.E. of the latter. It is situated on the river Cane, here crossed "by a rocky ford, bed 160 yards wide, stream thirty, and two and a half feet deep banks steep." Elevation above the sea 1093 feet. Lat.  $24^{\circ} 17'$ , long.  $80^{\circ} 1'$ .

**TIGREE LUTTERA** in the British district of Moradabad, lieut.-gov. of the N.W. Provinces, a village on the route from the town of Meerut to that of Moradabad and 34 miles S.E. of the former place. It is situated near the left bank of the Ganges, in an open and partially cultivated country. Distant N.W. from Calcutta 883 miles. Lat.  $28^{\circ} 50'$ , long.  $78^{\circ} 14'$ .

**TIHANAGANJ** in the British district of Aunghur, lieut.-gov. of the N.W. Provinces, a small town on the route from the town of Aunghur to that of Ghaseepoor 10 miles S.E. of the former  $84^{\circ} 15'$  N.W. of the latter  $80^{\circ} 15'$  N.E. of Benares. Lat.  $25^{\circ} 57'$ , long.  $83^{\circ} 14'$ .

**TIHLURA**, in the British district of Jounpore, lieut.-gov. of the N.W. Provinces, a town on the route from Jounpore to Futehpoor, 27 miles W. of the former. Lat.  $25^{\circ} 45'$ , long.  $83^{\circ} 20'$ .

**TIJARA**, in the territory of Alwar, under the political superintendence of the Governor-General's agent in Rajpootana, a town 55 miles S.W. of Delhi. The district within which it is situated was overrun by the Maharrattas at the close of the last century, and by one of their chiefs considered on the adventurer George Thomas, who burned the town, to chastise some predatory aggressions of the inhabitants. In the course of the Maharratta war the town and district came into the possession of the British government, by which power in 1803 they were, with other pergunnahs, granted to the rano-rajah of Alwar. On the death of that prince in 1815, the succession was contested, the competitors being Benese Singh a nephew and Bulwant Singh an illegitimate son of the deceased rajah, both minors. The difficulty was temporarily evaded by an extraordinary arrangement, under which the nephew was to enjoy the dignity of rajah, and the son to possess the power and revenues of the state. A few years afterwards, on the approach of the nephew, Benese Singh, to manhood, he seized the entire authority, and made his cousin a prisoner. An attempt to assassinate the guardian of Bulwant Singh, while on a visit to the British Resident at Delhi, was attributed to the instigation of the rival party at Alwar and by the interference of the British government, the uneasy arrangement by which it had been sought to reconcile the pretensions of the rival claimants was brought to an end. The nephew

of the late rajah was permitted to retain the authority of which he had possessed himself, but he was compelled to provide for Bulwant Singh, partly in territory, and partly in money, an equivalent for Tijara and other districts bestowed by the British government on that person's father. The territory and property thus ceded, to descend to the heirs of the body of Bulwant Singh only, and not to any adopted son, but to revert to the principality of Alwar on the failure of natural descendants. Tijara is reported to have been badly administered since its severance from Alwar. The town is situated in lat.  $27^{\circ} 56'$  long.  $78^{\circ} 55'$ .

**TIKAPAR**, in the territory of Saugor and Nerbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Hoonseegabad to Jubbulpore, 66 miles E. by N. of the former. Lat.  $22^{\circ} 58'$  long.  $78^{\circ} 44'$ .

**TIKAREE**.—A town in the British district of Behar lieut.-gov. of Bengal, 24 miles N. of Shergotty. Lat.  $24^{\circ} 54'$  long.  $84^{\circ} 54'$ .

**TIKERI**, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the route by the Kutra Pass from Allahabad to Rewa, and 35 miles S.E. of the former city. Lat.  $25^{\circ} 10'$  long.  $82^{\circ} 17'$ .

**TIKHUR**, in Bussahir a small fort on a mountain projecting eastward from the ridge connecting Waria with the Chur. It is garrisoned by a British detachment from the cantonment of Kotgarh. Elevation above the sea 7735 feet. Lat.  $31^{\circ} 11'$ , long.  $77^{\circ} 41'$ .

**TIKOOREE**, in the British district of Budaon, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Agra to Bareilly and 29 miles S.W. of the latter. It is situated in a well watered, fertile, and well cultivated country. Lat.  $28^{\circ} 11'$  long.  $79^{\circ} 9'$ .

**TIKOOBI FORT** in the native state of Rewah in Bundelkund, 46 miles S.W. by S. from Rewah, and 51 miles N.W. by N. from Sohagpoor. Lat.  $28^{\circ} 57'$ , long.  $81^{\circ} 1'$ .

**TIKREE** a village in the British district of Bareilly lieut.-gov. of the N.W. Provinces, on the route from Pilibheet to Beesulpore and 16 miles S. of the former. Lat.  $28^{\circ} 23'$ , long.  $79^{\circ} 51'$ .

**TIKREERAI JILL**.—A town in the native state of Cutch situated on the Great Western Runn, and 26 miles N. from Bhooj. Lat.  $23^{\circ} 42'$ , long.  $69^{\circ} 52'$ .

**TILBEGUMPOOR**, in the British district of Boondahshur lieut.-gov. of the N.W. Provinces, a town on the route from Boondahshur to Delhi, 14 miles W.N.W. of the former. Lat.  $28^{\circ} 29'$ , long.  $77^{\circ} 42'$ .

**TILOREE**, in the British district of Bareilly, lieut.-gov. of the N.W. Provinces, a village on the route from Bareilly to Seestapore and 39 miles S.E. of the former. Lat.  $28^{\circ} 11'$ , long.  $80^{\circ} 3'$ .

**TILHUR**, in the British district of Shahjahanpoor, lieut.-gov. of the N.W. Provinces, 974

# TIL—TIN

a town on the route from Shahjehanpur to Bareilly 12 miles W N W of the former Lat. 27° 58' long 79° 49'

**TILJUGA**.—A river of Nepal, rising in lat. 26° 51', long 85° 39' and flowing in an easterly direction for forty miles, falls into the Coosy on the right side, in lat. 26° 40', long 87° 12'

**TILLAUH**.—A town in Nepal, 129 miles W by S. from Khatmandoo, and 54 miles N by W from Gornakpoor Lat. 27° 28', long 83° 15'

**TILOI**, in the district of Salon territory of Oude, a town 55 miles S.E. of Lucknow It is the property and residence of a Hindoo chieftain styled rajah of Tiloi, the lineal representative of the ancient kings of Oude, and the head of a family which, as late as the middle of the last century held the whole of the south eastern part of Oude, from Faysabad to Manikpoor The rajah lives in the town, in an ancient mud fort, having within its inclosure many good buildings of masonry Butter estimates the population at 10 000, of whom a third are Mussulmans. Lat. 26° 8', long 81° 30'

**TILOTHOO**, in the British district of Shahabad, hant.gov of Bengal a town a mile N W of the left or north west bank of the river Soné It is described by Buchanan as a good country town containing 700 houses Tilothoo is in lat. 24° 47' long 84° 8'

**TILWARA**, in the Rajpoot state of Jodhpoor, is situated on the left bank of the Lones, between Balmeer and the town of Jodhpoor, and 65 miles S.W. of the latter place. Bollean, who was ferried over the river here in the beginning of July during the rainy season found the Lones rushing down with a fierce turbid stream a quarter of a mile wide, but not very deep. Annually about the time of the vernal equinox, a great fair is held here, principally for the sale of live stock and on such occasions it is said that 8,000 people are collected The road in this part of the route, between Balmeer and Jodhpoor is overflowed in the rainy season, and becomes unsafe for travelling Lat. 25° 52', long 72° 8'

**TILWARA**, is Sirhind a village on the route from Lodiana to Ferozpoor, and 30 miles W of the former town It is situated on the left bank of the Sirlej, in a level open country, with a sandy soil partially cultivated. Distant N W from Calcutta 1,122 miles. Lat. 30° 57' long. 75° 25'

**TILWUN**.—A town in the British district of Oandesh, presidency of Bombay, 30 miles W of Mallagum. Lat. 20° 34', long 74° 8'

**TIMBOONREE**.—A town in Malwa, in the native jaghire of the same name, 59 miles N W by W from Baitool, and 42 miles S.W. from Hoonnagabad. Lat. 23° 21', long 77° 14'

**TIMBOORNEY**.—A town in one of the

recently sequestered districts of Hyderabad, or dominions of the Nizam, 66 miles S.E. from Ellichpoor Lat. 20° 25', long 73° 10'

**TIMERY**.—A town in the British district of North Arcot, presidency of Madras, six miles S. of Arcot. Lat. 12° 49', long 79° 29'

**TIMLA FORT** in the British district of Almora, hant.gov of the N W Provinces, a town on the route from Almora to Khyrsgurh, 43 miles S.E. of the former Lat. 28° 9', long 80° 10'

**TIMLA GURHI**, in the British district of Kumaon, hant.gov of the N W Provinces, a stockade, now in ruins, on the most southern or outer range of the Himalaya, rising over the plain of Pilleebhoost Elevation above the sea 5,821 feet. Lat. 28° 9', long 80° 9'

**TIMLI**, a village of the British district of Dehra Doon, is situated on the north-eastern declivity of the Sewalik range Elevation above the sea 2 569 feet. Lat. 30° 21', long. 77° 46'

**TIMLI PASS**, so called from the village of that name about a mile north of it, leads from Saharunpoor to Dehra, over the Sewalik Mountains, bounding the Dehra Doon on the south west. Elevation above the sea 2,339 feet. Lat. 30° 20' long 77° 46'

**TIMMAPOORAM**.—A town in Hyderabad, or territory of the Nizam 112 miles E N E. from Hyderabad, and 123 miles N by W from Guntoor Lat. 18° 1', long 80° 8'

**TIMMERYCOTA**.—A town in the British district of Guntoor presidency of Madras, 69 miles W by N of Guntoor Population about 3 000 Lat. 16° 38', long 79° 30'

**TIMMBROWN**.—A town in the native state of Bhopal, situated on the right bank of the Nerbudda river and 88 miles E by S from Bhopal Lat. 23° 3' long 78° 42'

**TINARA** in the British district of Seoni, territory of Sangur and Nurbadda, hant.gov of the N W Provinces, a town on the route from Jubbalpoor to Seoni 20 miles N E. by N of the latter Lat. 22° 15', long 79° 50'

**TINDEVANUM**.—A town in the British district of South Arcot presidency of Madras, 38 miles N N W of Cuddalore Lat. 12° 14', long 79° 41'

**TINNEVELLY** in the presidency of Madras, a British district, named from its principal place It is bounded on the north, north-east, and north west, by the British district of Madras on the east and south-east by the Gulf of Manar, dividing it from Ceylon, and on the west and south west by the raj or territory of Travancore. It lies between lat 8° 8' and 9° 55', long. 77° 15'—78° 25' its greatest length from north to south is 122 miles, its greatest breadth from east to west twenty four miles the area is estimated at 5,700 square miles. Its ancient name was Cannakpoor, lat. 8° 8', and proceeds, in a direction generally north-east, for about ninety

five miles, to Vainabur, forming the north-west side of the Gulf of Manasar. It is the place of any note in a maritime point of view. The coast is generally low and level; the sea near the shore is shoaly and unsafe, and in the north-east part abounds in dangerous reefs and rocks. Proceeding north-east, the navigator discerns, seventeen miles from Cape Comorin, a headland, called East Cape, having on its east side the Bay of Kovolam, and twenty seven miles farther north-east, Munakpanad, a point on which is situate a town, at the south side of the estuary of the river Nant, but in a situation dangerous for shipping. Further north-east is the small town of Pinnacoll, the approach to which from the south is also dangerous, from an extensive reef stretching from it in that direction, but affording shelter to small vessels between the town and the reef. North-east of Pinnacoll twelve miles is Tutu corn, the most considerable place on the coast abreast of it, with a channel between them and the mainland are several islets, forming a petty archipelago, extending from north to south about eight miles, and there is a safe roadstead, with good anchorage, in which vessels can ride at all seasons of the year. A pearl fishery is carried on along this part of the coast, but it is not very productive. The western part of Tinnevely is the most elevated, as the surface rises thence towards the Ghats, attaining in the vicinity of Courtallum an elevation of 4,300 feet above the sea. At the base of the mountains, the elevation of the country is estimated at 500 feet, and eastward it descends to about 200 the average elevation of the fields of Tinnevely. The mountains are stated to consist of hypogene schists, penetrated and broken up by outbursts of plume and trappean rocks. The general slope of the surface is eastward as indicated by the courses of the rivers the chief of which are the Tambaravari, the Chittaur the Viper. These principal streams are joined right and left by numerous feeders during the monsoons, when the country is in many parts laid under water, and everywhere in the plains contains innumerable small lakes or ponds. That part of the district to the north of the river Tambaravari is the more level and fertile, and is very productive, being extensively irrigated by canals from that river the south-eastern part is barren having a light stony soil. The soil throughout the district is generally of a deep red or rusty colour from the presence of iron, and contains a large quantity of sand, forming a friable mould. In the maritime tract on the south-eastern coast, are extensive salt-marshes, liable to spread greatly during the rainy season. The climate along the seacoast, and generally in the eastern and southern part, is characterized by aridity and heat, the thermometer having been registered at 115° some say that they have observed it at 130°. This state of weather prevails in the latter part of summer and throughout autumn, when the coast of Malabar experiences all the violence

of the south-west monsoon, which is intercepted by the Ghats, and thereby prevented from affecting the Coromandel coast or the plains of Tinnevely. During the north-east monsoon "that is, from October to March," the wind blows from the Bay of Bengal, and moderates the temperature, and at that season Tritchin-door, on the seacoast, is found to be remarkably salubrious. Courtallum on the western frontier towards Travancore, presents perhaps greater advantages in point of climate than any part of the Carnatic. There the mountains are of much less elevation and breadth than in other parts, and the chain being divided quite across by a narrow pass, leading from the Carnatic to Malabar, the south west monsoon finds admission through the opening, and agreeably modifies the climate of Courtallum, and of the neighbouring parts. Early in June, when the south-west monsoon sets in, it brings with it to this tract thick clouds and strong winds, so that the rays of the sun are intercepted, and the air put in violent motion, from which causes, combined with the heavy fall of rain, the temperature is lowered much below the standard in the adjacent tracts.

In regard to the zoology of Tinnevely, little information is on record. Wild elephants appear sometimes to occasion annoyance, as in 1842 the collector was authorised to grant rewards to persons assisting in the destruction of a large herd of these animals which infested the district.

The natural vegetation in this favoured tract comprises timber-trees of enormous size, date-palm and mango-palm, various twiners, such as the Cocculus indicus, pepper-vine ferns of enormous magnitude comprehending the total number of species within the indigenous flora. Many valuable intertropical productions, such as clove, nutmeg, cinnamon, have been introduced, and have thriven well, though it does not appear that in a commercial point of view they have afforded any adequate return. Of all the products of the district, cotton is the most important but the cultivation is restricted to the native plant of India. The government experiments for the introduction of the American species commenced in Tinnevely, but the planters were not satisfied with the soil and climate and in the following year they were removed to Coimbatore. Rice is the principal alimentary crop, but it sometimes fails to a considerable extent, when the amount of rain is below the usual average. The population of the district of Tinnevely is given under the article MAHAR.

Tinnevely, the principal town, Palamcottah, and Tugueer, the only places of note in the district, are described under their respective names in the alphabetical arrangement.

TINNEVELLY, the principal place of the British district of the same name, is situate near the left bank of the river Chindinthoora, over which is a good bridge, forming a com-

munication with the town and military station of Pallamootah, near the opposite bank. Here were formerly a jail and an hospital, which have been removed to Pallamootah but this place is still the station and residence of the revenue collector. The population according to the official return, is about 20 000. Distance from Madras, S. 86 miles from Madras, S.W. 350 Lat.  $8^{\circ} 44'$ , long.  $77^{\circ} 45'$

**TIOKLA.**—A town in the British district of Amherst, in the Tenasserim provinces, 23 miles N of Moulmein Lat.  $16^{\circ} 50'$  long  $97^{\circ} 41'$

**TIPPACANDRA.**—See MOYAR RIVER.

**TIPPACHATTRAM.**—A town in the British district of Nellore, presidency of Madras, 29 miles S.S.E. of Nellore. Lat.  $14^{\circ} 4'$  long  $80^{\circ} 11'$

**TIPPERAH**, including Bulloah, a British district of Bengal, bounded on the north west by the Megna river separating it from the British districts Dacca and Mymensing on the east by those of Sylhet and Chittagong and by the native territory of Tipperah, on the south by the Bay of Bengal, and on the west by the British districts Backergunge and Dacca. Enclosing the islands at the mouth of the Megna it is 110 miles in length from north to south and sixty-eight in breadth it contains an area of 4 850 square miles, with a population of 1,466,930

**TIPPERAH**—A town in the British district of Tipperah 48 miles E.S.E. of Dacca. Lat.  $23^{\circ} 28'$ , long  $91^{\circ} 10'$

**TIPPERAH (Independent)**—An extensive tract of mountainous country bounded on the north by the British districts Sylhet and Cachar, on the east by the territory of Burmah on the south by Burmah and Chittagong, and on the west by the British district of Tipperah. It is 130 miles in length from east to west, and eighty in breadth, and contains an area of 7 623 square miles. In 1850 during outrages were reported to have been committed by the hill tribes upon the British population occupying the frontier of this state. It was proved, however, upon inquiry that these outrages occurred within the territory of the rajah, and that the violence offered was to persons not subject to the British government. The late rajah dying in 1856, was succeeded by his son, who has declined to accede to the decision of the arbitrators appointed to fix the boundary-line between independent and British Tipperah.

**TIRA, or SHAH JEHANPUR**, a town and stronghold, in the north-east part of the Punjab is situate on a rock of sandstone, several miles in circumference and flat at top. The Beas flows along its base on one side, and on every other it is surrounded by precipitous eighty or 100 feet high. It was formerly the residence of Bazar Chand, the independent rajah of Kotoh. After the death of Bazar Chand, his descendants were dispossessed by

Burjeet Singh who took possession of Tira, and annexed it to the Punjab. Lat.  $31^{\circ} 34'$ , long  $76^{\circ} 28'$

**TIRHOOT**—A British district in the presidency of Bengal, bounded on the north by the dominions of Nepal on the east by the British district of Bhaugulpore, on the south east by Monghyr on the south by the Ganges, dividing it from Patna on the south west and north-west by the district of Sarun. It lies between lat.  $25^{\circ} 26'$ — $26^{\circ} 42'$  long  $84^{\circ} 58'$ — $87^{\circ} 11'$ , is 140 miles in length from east to west, and ninety-five in breadth the area is 7 402 square miles. Though containing no mountains, the surface of the country is considerably varied by undulations, and its general aspect beautiful, from the groves, orchards, and woods which abound, especially on the banks of the lakes and rivers. The drainage of that part of the Himalayas situate to the north, passing through this district is its course to the Ganges, gives rise to numerous rivers and watercourses. Of these, the principal are the Ganges, Gandak, and Bagmati

The climate of Tirhoot is characterized by mildness and moisture. In December 1833, the mean of the maximum of temperature through the first half of the month was found to be  $72^{\circ}$ , through the second half  $63^{\circ}$  the mean of the minimum during the first half  $57^{\circ}$  during the second  $48^{\circ}$ . In the succeeding June, the mean of the maximum for the first half of the month was  $102^{\circ}$ , for the second half  $95^{\circ}$  the mean of the minimum for the first and second divisions of the month was  $79^{\circ}$ . The average means for the whole year were, maximum  $87^{\circ}$ , minimum  $49^{\circ} 1'$  the general mean for three years was  $75^{\circ}$ . For Europeans, the climate is undoubtedly one of great salubrity, which is attributed to the moderate range of the thermometer and to exemption from the extreme and sultry moisture of Bengal, and the parching dry heat of the upper provinces. For natives, however, who have not the same sanative means at command, the climate is unhealthy from malaria, especially in the vicinity of Jhils. The southern part of the district, in the vicinity of the Tural, or swampy forest at the base of the Sub-Himalaya, is the most unhealthy. The results of the malaria are usually dysentery, cholera, fever, ague, bilious affections. The soil is rich, especially in the low grounds, when the inundations have retired, but in some parts it is so saturated with murate of soda or culinary salt, sulphate of soda, sulphate, and some other mineral salts, as to be barren and white, as if covered with snow. These salts are extracted through the means of simple but effectual processes by the natives, who drive a considerable trade in them and the application of European capital and skill would doubtless greatly increase the beneficial results from this source of commerce. The natives are industrious and persevering cul-

## TIR.

vators, though not remarkable for skill they however raise good crops of wheat, rice, barley, maize, millet, ginger, turneris, sweet potato yam oil-seeds, and in the cool season the esculent vegetables of Europe. Sugarcane, tobacco, and cotton are produced to considerable extent, and indigo so largely that it may be regarded as the staple commercial crop of the district. The following are enumerated as the fruits—Mango, grapes (green and black), litchi, loquat citron shaddock, lemon, lime, guava, plantain custard-apple, koranda, wampee or Brazilian currant, love-apple, melon, pine-apple strawberry, coconut, jack, bala, tamarind, sola or soap-nut, pumpkin.

The manufacturing industry is rude and of small extent it is principally directed to producing fabrics of coarse cotton and woollen, making ropes earthen utensils extraction of saltpetre and other mineral salts, indigo, sugar-boiling and lime-burning. The population is given under the article **BIRHOOT**.

Tirhoot at a period of remote antiquity was denominated Maithala, and probably formed part of the kingdom of Magadha or Behar, the monarchs of which are said to have been paramount rulers of India long previously to the Christian era. The towns—Muzaffarpore the capital Karnal, Darbhanga, Hajepore, Mowah, and Singbah—are noticed under their respective names in the alphabetical arrangement. The principal routes are, 1st, from south-east to north-west, from Monghyr, through Muzaffarpore, to Bettah, in the district of Sarun, 2nd, from north to south, from Mulliyah, through Muzaffarpore and Hajepore to Gaya. According to Stewart it was first invaded by the Mussulmans about 1225 under the command of Ghayas-ood-deen Balban, sovereign of Delhi. The same writer mentions that about 1240 it was invaded by Toghlan Khan who ruled Bengal under Mamud, sovereign of Delhi, and adds, that in 1324 it was, by Ghayas-ood-deen Toghlan, sovereign of Delhi, subjugated, and incorporated with that realm. During the weakness of the empire of Delhi, consequent on the invasion of Tamerlane Nurrit Shah, an ephemeral sovereign of Bengal, seized Tirhoot but it was again, in 1533, subdued, and brought under the rule of Humayun, padshah of Delhi. The right of the East-India Company appears to have accrued from the grant which, in 1765, Shah Alum made of the provinces of Bengal and Orissa.

**TIRPUNAITORAI**, in the raj or state of Cochin a town about two miles N.E. of the Backwater, an extensive shallow lake, the reservoir of numerous streams flowing from the Western Ghats. Barloomeo states, in A.D. 1787, that it was the residence of the rajah of Cochin, and it probably continues to be so at present. Distant from Cochin, S.E. seven miles from Calicut, S.E. 106, Bangalore, S.W., 303. Lat. 9° 57', long. 76° 34'.

**TIRIT**—A town within the dominions of

Gholab Singh, the ruler of Cashmere, situate 153 miles E. by N. from Srinagar, and 167 miles N.E. by N. from Chamba. Lat. 34° 34', long. 77° 42'.

**TIRJOOGA RIVER**, rising in lat. 26° 59', long. 86° 38' in the Terai of Nepal, through which it flows for eighteen miles, to the boundary of the British district of Tirhoot, and thence pursuing a course generally south-easterly for sixty miles, during which it bounds or intersects the districts of Tirhoot, Bhagalpore, and Mongheer, falls into the Gogorie on the left side, in lat. 25° 41' long. 86° 29'.

**TIRMIUM**.—A town of Madras, in the native state of Poodoocottah or Rajah Tondiman a country situate 40 miles S. from Trichinopoly and 60 miles N.E. by E. from Madura. Lat. 10° 15' long. 78° 50'.

**TIROHA**.—See **TIROWAN**.

**TIROOA**, in the British district of Furruckabad heat-gov of the N.W. Provinces, a town on the route from Furruckabad to Cawnpore 33 miles S.S.E. of the former. Population 5,865. Lat. 26° 59', long. 79° 51'.

**TIROURI** in Surhind, or territory of the protected Sikh states, a town on the route from Kurial to Thunesur eight miles N. of former, 16 S. of latter. In A.D. 1198 Muhannad Shahabuddin sultan of Ghor and of Ghuznee invading India, was here encountered by Prithi Rajah, sovereign of Delhi and Ajmer. After a desperate conflict, the Hindus were defeated with great slaughter, and Prithi Rajah being made prisoner was put to death after the battle. Lat. 29° 47' long. 77°.

**TIROWAN** or **TURAON**, in Bundelkund, a small state, or rather jaghire, granted by the East India Company to a Chamba descendant of one of the proprietors of Callinger who received it by treaty on the surrender of the last-named place in 1812. It is situate within the district of Banda, its centre being in lat. 25° 12' long. 80° 55' and is estimated to comprise only twelve square miles, five villages and a population of 2,000. The annual revenue is given at 10,000 rupees (1,000 l.) and the native force amounts to about fifty men. Tirowan the principal place, is situate on the river Pyawnee, on the route from Allahabad to Callinger, 33 miles N.E. of the latter, 74 S.W. of the former. It is rather a considerable place, with a large bazar. Lat. 25° 14', long. 80° 53'.

**TIROWAN**—A town in the British district of Banda, in Bundelkund. In 1816, a tract of land situate near this town was granted by the British government to Maharyah Imrit Rao, an independent jaghire. Bemaik Rao, son of Imrit Rao, died in 1855 and the jaghire lapsed to the paramount authority. The town is in lat. 25° 15', long. 80° 55'.

**TIRPAVAUNIUM**—A town in the British district of Madura, presidency of Madura, 10

# TIR—TOL.

miles S.E. by E of Madura. Lat. 9° 50', long 78° 17'

**TIRUPUR.**—A town in the British district of Coimbatore presidency of Madras, 28 miles E. by N of Coimbatore Lat. 11° 4', long 77° 34'

**TIRSOON** in the British district of Boudahur lieut.-gov. of the N W Provinces, a village on the route from Khasanj to Meerut, and 49 miles S. of the latter Lat. 28° 21' long 78°

**TIRUKOVALUR**—A town in the British district of South Arcot, presidency of Madras, 83 miles W N W of Ouddalore. Lat. 11° 57', long 79° 20'

**TIRU VADI.**—A town in the British district of South Arcot, presidency of Madras, 18 miles W N W of Ouddalore. Lat. 11° 47', long 79° 39'

**TIRUVALUR.**—A town in the British district of Tanjore, presidency of Madras, 84 miles E of Tanjore. Lat. 10° 47', long 79° 41'

**TISAR**, in the British district of Muttra, lieut. gov. of the N W Provinces, a town near the south-east frontier towards the British district Mynpooree. Lat. 27° 25', long 78° 29'

**TISSOOA**, in the British district of Bareilly lieut. gov. of the N W Provinces, a village on the route from the town of Bareilly to Futehgurh, and 18 miles S.E. of the former Here, in 1774 the British army under Colonel Champion and supporting the cause of Shupahuddawiah, nawab of Oude utterly defeated a far more numerous force of Rohilla Pathans, and broke the power of that people A village four miles south-east of this place was named Futehgunge or Victory Market, by the nawab who kept aloof during the action and was then probably posted there. The engagement is also sometimes called the battle of Outterah or Kuttra, from a small town of that name a few miles to the south-east, and sometimes, the battle of St. George." Tissooa is in lat. 28° 8', long 79° 40'

**TITALIYA** in the British district of Dinapore lieut.-gov. of Bengal, a small town on the route from Furruck to Darjeeling, 72 miles N E. of former 45 E. of latter It is situate on the left bank of the river Mahananda, here having a channel 300 yards wide but with a small body of clear water in the dry season, and during the rains navigable only for osows, in consequence of its varying depth Craft, however, of from twenty to thirty tons burthen can ascend to within a few miles of the town. The site of the town is a level country, about twenty five miles south of the south base of the Sub-Himalaya, or first range of mountains. Here was formerly a British cantonment, abandoned in 1829 in consequence of the alleged insubordination attributed to malaria from marshes

situate east, south, and south-west of the place. The country to the north is, however, salubrious, and provisions are abundant and excellent population 2,500 An annual fair is held at this place the establishment of which is officially stated to have been eminently successful. Elevation above the sea 275 feet distance from Dinapore, N, 69 miles from Burhampoor, by Dinapore, N, 359, from Calcutta, by Burhampoor and Dinapore 477 Lat. 26° 27', long 85° 20'

**TITULLA.**—A town in the British district of Sumbulpoor on the south west frontier of Bengal, 59 miles W N W of Sumbulpoor Lat. 21° 44', long 83° 10'

**TOCHKE**, or **GOMBELA.**—A river rising on the eastern slope of the Suliman Mountain, in lat. 32° 53' long 70° 1' and, flowing through the Damsara for ninety miles, falls into the Indus river, in lat. 32° 38', long 71° 20'

**TODA**—A town in the Rajpoot state of Jeypoor 63 miles S. by W from Jeypoor, and 65 miles E.S.E. from Ajmeer Lat. 26° 4', long 75° 29'

**TODDICOMBIT**—A town in the British district of Madras, presidency of Madras, 39 miles N N W of Madras. Lat. 10° 27' long 78° 1'

**TOGA**, in the district of Peshawar, division of the Punjab, a town situated 11 miles from the right bank of the Indus 36 miles E.S.E. of the town of Peshawar Lat. 33° 30', long. 71° 38'

**TOHANUH** in the British district of Hurrana, lieut.-gov. of the N W Provinces, a town on the route from Haseer to Loodiana, 43 miles N by E of the former Lat. 29° 41', long 75° 58'

**TOHREE FUTEHPPOOR**, in Bundelcund a town on the route from Banda to Jhansi, 85 miles W of the former and 40 E. of the latter It is the principal place of a jaghire or feudal grant, which contains an area of thirty six square miles, fourteen villages, and a population of 6 000 souls. It yields a revenue of 6 850 and the chief maintains twenty horse and 250 foot, with a few artillerymen This jaghire was made "subject to a tributary payment of 2,650 rupees, or 265, conditionally on relinquishment by Jhansi of the village Keelipoora, resumed by that state." It is held of the East-India Company by ann and or grant, dated April, 1823. Tohree Futehpoor is in lat. 25° 37' long. 79° 10'

**TOKA.**—A town in the British district of Ahmednuggur presidency of Bombay 41 miles N N E. of Ahmednuggur Lat. 19° 37', long 75° 2'

**TOKSELGHAT**—A town in Nepal, situate on the left bank of the Ban Coos river and 61 miles E.S.E. from Khatmandoo. Lat. 27° 24' long 86° 12'

**TOLA**, in the British district of Kumaon, 979

# TOL-TON

Hent. gov. of the N W Provinces a village in the Bhojia subdivision of Jwahir. It is situate on the left bank of the river Gori, 400 feet above the stream, and on the route to Hrudas by the Jwahir Pass, from which it is distant 30 miles S. Elevation above the sea 1123 feet. Lat. 30 20', long. 80 15'.

**TOLJAPOOR.**—A town in one of the recently reconstituted districts of Hyderabad or dominions of the Nizam, 35 miles N E from Shalapur. Lat. 18, long. 76 10'.

**TOTA.**—A town in the British district of Jessore, Hent. gov. of Bengal, 30 miles S E. of Jessore. Lat. 22° 44', long. 89 20'.

**TONDHIMAN'S COUNTRY.**—See PODOCETAE.

**TONGANUR.**—A town in the British district of South Arcot, presidency of Madras, 61 miles W N W of Cuddalore. Lat. 12° 6', long. 79.

**TONGDE.**—A town within the dominions of Gholiab Singh the ruler of Cashmere, situate 124 miles E S E from Srinagar, and 88 miles N E. by N from Chamba. Lat. 33° 32', long. 77° 8'.

**TONGHO.**—A town of Eastern India, in the British territory of Pegu and formerly the capital of an independent kingdom, which was subdued by the Peguers, and subsequently annexed to Ava. It is situate on the right bank of the Sittang river, 33 miles E. by N from Prome. A British officer, describing the place upon its acquisition by the English in 1802, observes, 'A few ruined pagodas, scattered over a vast quadrangle, inclosed by a massive wall and surrounded by a broad ditch, are all that now remain to tell of the former magnificence of ancient Tongho.' Since its occupation by the British, great improvements have been made, and there is every prospect that in a few years 'Tongho will surpass in wealth and importance all the glories of a barbaric age.' The district of which this place is the chief town has an area of 3,950 square miles, and a population of 34,957 inhabitants. Lat. 19°, long. 96 18'.

**TONGLO.**—A mountain of Sikkim, having an elevation of 10,000 feet. Lat. 27° 8', long. 88 8'.

**TONGSO.**—A town in the native state of Rhatan, situate on the left bank of the Obangpanette river, and 100 miles N N W from Gualpara. Lat. 27 30' long. 90 0'.

**TONE.** In Rajpootana, a town in a small district forming one of the possessions of the family of the Patan freebooter Ameer Khan. It lies on the route from Delhi to Mhow, 218 miles S.W. of the former 289 N of the latter, and on the right bank of the river Banas, here crossed by ford, the water being usually only about two feet deep. The town, which is of considerable size, is surrounded by a wall, and has a mud fort. A mile south of it was the site selected for his residence by

Ameer Khan, noted during the latter part of the eighteenth century and the early part of the present, for his restless activity, and distinguished no less by talents for intrigue and war than by treachery and disregard of human life and suffering. Born in an humble station at Sumbhal, in Rohilund, this notorious freebooter commenced his career in the service of the state of Rhoval, about the year 1794. Soon after he joined the ex-chiefs of Bagoorgh who were subsisting by plunder and subsequently he attached himself to the fortunes of Jawant Rao Holkar, who, in 1806 granted to him Tonk, with its territory wrested from the rajah of Jeypore. Having made it his place of abode, the ameer embellished it with various public buildings. He had previously in 1798, received from Holkar the grant of Seronje. In 1817 he held, in addition to these territories, Perawa and Chupra, in Malwa, with Nimbara and some other parganahs in Mewar. All these possessions were in that year by treaty guaranteed to Ameer Khan by the East-India Company and the fort and district of Rampoor were added as a free gift by the British government. The area of the whole amounts to 1,864 square miles. The population has been estimated at 133,673 the revenues at 8,20,000 rupees, or 82,000*l.*, derived from six provinces, in the following proportions.—Tonk, including Rampoor, 2,00,000 rupees, Chappra, 1,00,000 Perawa, 1,00,000 Allygurh, 80,000 Seronje, 2,00,000 Nimbara, 1,40,000. Total 8,20,000. These scattered territories are separated from each other at distances varying from 100 to 250 miles. The reigning chief who succeeded his father Ameer Khan in 1834 has contracted debts of large amount, for the payment of which he has mortgaged several districts, together with an annuity of 15,000*l.* granted to Ameer Khan by the British government as indemnity for the revenue of Fulwul a district which had been conferred upon the ameer for two generations. The town of Tonk is in lat. 26 10' long. 75 50'.

**TONERWUTTEE.**—See TOORAWUTTEE.

**TONS (SOUTH-WESTERN),** a river rising in the native state of Myber in the territory of Sangar and Nerbudda, lat. 24, long. 80° 30'. The elevation of the source must considerably exceed 900 feet, as at a cascade ninety five miles to the north-east, or down the stream the elevation of the waterway is 890 feet. Here the river flowing through a ravine in the Kutra range, is precipitated over a fall 200 feet in depth. It continues its course north-westerly over the more depressed tract in that direction. Fifty miles below the fall, it passes through the Tara range into the valley of the Ganges, and twenty miles farther, in the same direction, falls into that river on the right side, between the villages of Runpa and that of Surra, in lat. 24° 10', long. 82 5', having held a total course of 166 miles. The route from Jabulpore to Allahabad lies along

# TON—TOO

its left bank for a distance of twenty-six miles from its source, and then crosses the stream at the town of Myhor lat. 24° 16', long 80° 50'. Garden says of this point, "Cross the Tense by an indifferent ferry, bed 250 yards wide, stream in dry season sixty yards wide, and from one to two feet deep, right bank steep, left shelving." At a place twenty four miles north east of this, fifty from the source of the river and in lat. 24° 30' long 80° 53' it on the left side receives a small stream called the Satni or Satna, and five miles lower down, the route by the Kutra Pass from Allahabad to Saugor crosses it, "close under Puttrahut, by a bad rocky ford bed 200 yards wide, and stream during the dry season, about thirty yards wide, and knee-deep." Jacquemont assigns to the bed the inferior width of 150 or 180 feet, but adds (on this point corroborating the former account), that it was not without water even when he passed in the latter part of January, the driest season of the year. Below this sixty miles, still to the north-east, in lat. 25° 2', long 81° 44' the river is crossed by the route leading from Allahabad to Jubulpore by the Sohag Pass, the passage being made by ford and here the bed is rocky and the banks steep. Its course from this point to its junction with the Ganges is very sinuous, but generally in a north eastern direction it is about fifty miles in length. About a mile above the mouth it is crossed between the villages of Panassa and Sirna, by the route from Allahabad to Mirzapore and, according to Garden the bed of the Tense at the Panassa ferry is about 400 yards wide and the stream in the dry season usually runs under the left bank, and is 150 yards wide. He describes the left bank as steep and the right as sloping. Besides the Satni falling into it on the left side, the Tense receives on the right side the following tributaries, in the order down the stream in which they are here enumerated—the Behar Mahana, Sooti and Belun.

In the march from Allahabad to Chunar the Tense was crossed probably at Panassa, by the army of Baber who describes it under the name of Taa, as 'a muddy, swampy river' which it doubtless is near its mouth. It is the Tonsse of Hensell's map.

**TONS (NORTH EASTERN),** a stream of the territory of Oude, is a large offset of the Ghogra or Deocha leaving that river on the right side, about ten miles above the city of Oude, and in lat. 26° 47', long 82° 1', it takes a south-easterly direction and about twenty five miles from its commencement sends northward an offset, by which it communicates with the original stream. During the dry season, the stream is in many places embanked, to collect the water for irrigation, and the stagnation thus produced causes extensive malaria. Proceeding in a south-easterly direction, it passes the town of Aumuck, and uniting with the Surjan, another offset of the Ghogra, the joint stream falls into the Ganges on the

right side, in lat. 25° 41' long 84° 11', its total length of course being about 240 miles. It is navigable upwards from its mouth as far as the town of Aumuck, a distance of about 120 miles, but its volume of water is represented as on the decline. By Buchanan, it is called the Sota, or branch; by Baker, Tonsia.

**TONSE, or SUPIN** a river of Gurhwal, rises in lat. 31° 2', long 78° 35', at the north of the Jumnotri peaks, and but a few miles from the source of the Jumna, flowing from the southern base of the same mountains. The source of the Tense appears to have been first ascertained in October, 1819 when it was visited by Herbert, who found the stream to issue thirty-one feet wide and knee-deep, from a snow bed 12,784 feet above the sea, and extending as far as the eye could reach. The course of the river is generally westerly for thirty miles, to the confluence of the Roopun, on the right side, in lat. 31° 3', long 78° 10', and at an elevation of 5,300 feet. The declivity of the channel in that distance must be above 250 feet per mile so that the stream is almost a cascade. It is from its source to this confluence with the Roopun called the Supin, but downwards the united stream is called the Tense. The Supin is the larger of the confluents, though the Roopun is described by Jacquemont as deep, nearly fifty feet wide, furiously rapid and rushing along with a tremendous roaring. The united stream called the Tense is about 120 feet wide. It holds a south westerly course of about nineteen miles to the confluence of the Fabur on the right side, in lat. 30° 56' long 77° 54'. The Fabur is a large stream though somewhat inferior in size to the Tense. From the confluence, the united stream still called the Tense leaves Gurhwal and takes a generally southerly direction, forming for the rest of its course the line of division between the British pergunnah of Jaunpur and the hill states of Jacobal and Sirmoor. Thirteen miles below the confluence of the Fabur the Tense receives the Shalwee, a considerable stream, which flows into it on the right side, in lat. 30° 48' long 77° 49'. It thence flows about forty miles, in a course generally southerly, but very tortuous through a succession of rugged ravines of limestone to its junction with the Jumna, in lat. 30° 30', long 77° 53' and at an elevation of 1,836 feet above the sea. As its total course is about 100 miles, it has the enormous fall of above 110 feet in a mile. Though below the junction the united stream bears the name of the Jumna, the volume of the Tense is much the greater as, when surveyed by Hodgson and Herbert, it discharged 2,827 cubic feet in a second of time, while the amount discharged by the other river was only 1,045.

**TOORKEBAUGRA**—A town in the British district of Balloah, West. gov. of Benpul, 20 miles N W of Balloah, Lat. 25° 10', long. 90° 37'.

**TOODUEPOOR**, in the British district of Bareilly, division of Pillaishhet, lieutenant gov. of the N. W. Provinces, a village on the route from Bareilly to Potehar, and 45 miles N. E. of the former. Lat. 28° 47', long. 79° 55'

**TOOLA RAM SENAHPUTTEE'S COUNTRY**, bounded on the north by the British district of Nowgong, on the south-east by the territory inhabited by the wild Naga tribes, and by that of the Munespoor rajah, on the south by Cachar, and on the west by Cachar and Nowgong. It is seventy-three miles in length from north to south fifty in breadth contains an area of 2,000 square miles, with a population of 80,000 its centre is in lat. 25° 35', long. 93° 18'. Upon the recovery in 1884 by Rajah Govind Chunder of the throne of Cachar, of which he had been deprived by the prince of Munespoor, Toola Ram resisted the authority of the restored prince. In order to terminate the contest and secure the pacification of the country, Govind Chunder was induced to bestow upon Toola Ram the hill territory of which the latter held possession. Subsequently when Cachar was annexed to the British dominions, the hilly tract assigned to Toola Ram formed an exception, and a small stipend was assigned to its chief. The government having been badly administered both by Toola Ram and his successors, an intimation was made to the chiefs in 1862 that unless the conditions of the treaty were fulfilled, they would not be allowed to retain the country. The warning failed to have the desired effect, and the administration of the country has been assumed by the British government.

**TOOLAVA**.—See **CANARA**.

**TOOLSEA**.—A town in the British district of Bhagulpore, lieutenant gov. of Bengal, 41 miles N. of Bhagulpore. Lat. 25° 46', long. 87° 8'.

**TOOLUMBA**, in the Barce Doosh division of the Punjab, a town situated on the left bank of the Ravee, 60 miles N. E. by E. of the town of Mooltan. Lat. 30° 32', long. 73° 18'.

**TOOMADY**.—A town in the British district of Masulipatam, presidency of Madras, 18 miles N. N. E. of Masulipatam. Lat. 16° 24', long. 81° 19'.

**TOOMBEGEE**.—A town in the British district of Sholapoor, presidency of Bombay, 81 miles S. S. E. of Sholapoor. Lat. 16° 34', long. 74° 21'.

**TOOMBUDRA**.—See **TUMBUDRA**.

**TOOMCOOR**.—A town in the Mysore, 70 miles N. N. E. from Seringapatam, and 44 miles N. W. by W. from Bangalore. Lat. 13° 30', long. 77° 8'.

**TOOMSOOR**.—A town in the territory of Nagpoor, situated on the right bank of the Weir Ganga river, and 48 miles E. N. E. from Nagpoor. Lat. 21° 35', long. 79° 46'.

**TOOMULLAGOODIUM**.—A town in Hy-

derabad, or territory of the Nizam, 33 miles E. from Hyderabad, and 118 miles N. W. by W. from Guntoor. Lat. 17° 20', long. 79° 7'.

**TOOMULTHULPOOR**.—A town in the British district of Nellore, presidency of Madras, 21 miles W. S. W. of Nellore. Lat. 14° 18', long. 79° 46'.

**TOONER**.—A town in the British district of Rajahmundry, presidency of Madras, 38 miles N. E. of Samulkottah. Lat. 17° 21', long. 82° 35'.

**TOONGA**, in the Rajpoot state of Jeypore, a town situated 22 miles S. E. of the city of Jeypore. Lat. 26° 41', long. 76° 16'.

**TOONGA**, or **TUM**.—A river of the Mysore territory, rising in lat. 15° 15', long. 75° 14'. It holds a tortuous but generally northward course for forty-five miles to Hallanutta, in lat. 13° 40', long. 76° 16', whence it flows north-east fifty miles to its confluence with the Budra, in lat. 14°, long. 75° 43'. Below the confluence, the united stream bears the name of Toongabudra. It is merely a great torrent, having a scanty stream during the dry season and in the monsoon rushing along with vast volume and great rapidity.

**TOONGABUDRA**.—See **TUMBUDRA**.

**TOONGHAWALA**, in the Reesha Doosh division of the Punjab, a town situated 40 miles from the right bank of the Ravee 40 miles N. W. by N. of the town of Lahore. Lat. 32° 7', long. 73° 55'.

**TOONGLA**.—A town in the native state of Bhotan, six miles from the right bank of the Monas river, and 80 miles W. N. W. from Durrung. Lat. 26° 56', long. 90° 54'.

**TOONGROO**, in Bussahir, a peak in the range stretching between the Waru and Char mountains. From its western side the river Gini takes its rise, and from its north-eastern feeders pass off to the Fabar. It was one of the stations of the large series of triangulation in the trigonometrical survey of the Himalaya. Elevation above the sea 10,102 feet. Lat. 31° 8', long. 77° 41'.

**TOONNOOR**, in the territory of Mysore, a city, once of great extent, subsequently reduced to a few temples and a small number of dwellings and now again growing into importance. Here is a vast tank or reservoir called the Yadav Nadi, formed by damming up the lower extremity of a rocky valley by means of a mound seventy-eight cubits high 150 cubits long, and 250 thick at the base. In A.D. 1798, Tippoo Sultan caused an opening to be made in the mound, and the great rush of water so enlarged the passage as to sweep away a large portion of the mound, and drain the whole reservoir. As the final and successful invasion of the British was then imminent, it has been supposed that he was impelled to this extraordinary act by a desire to deprive the invaders of the supply of water. Others attribute the step to an ambition of bigotry, which was his ruling

# TOO—TRA.

**peasion** The lake is generally by Mussulmans called *Motetalah*, or *Peari-tank* a name which, on account of its beauty it received from Nasir Jung when in A.D. 1746 he advanced to Mysore to enforce payment of arrears of tribute. After the overthrow of Tippee Sultan the reservoir was repaired by order of the British authorities. Distance from Seringapatam N.W., 10 miles. Lat. 12° 33' long 76° 44'.

**TOORAVAKIRA**.—A town in the Mysore 51 miles N from Seringapatam and 63 miles W by N from Bangalore. Lat. 13° 10', long 76° 44'.

**TOORAVANOR**.—A town in the Mysore 136 miles N from Seringapatam and 60 miles S.W. by S from Ballary. Lat. 14° 22', long 76° 30'.

**TOORAWUTTEE** or **BUTEESSEE**.—A district of the Rajpoot state of Jeypore the management of which during the distracted state of Jeypore was assumed by the British who however, in 1837 again restored it to the rajah of Jeypore. Its centre is in lat. 27° 42' long 75° 58'.

**TOORKEIRA**.—A town in the British district of Candesh presidency of Bombay 64 miles N by E of Malhgaum. Lat. 21° 27' long 74° 43'.

**TOOSHAM** in the British district of Huriana, lieutenant gov. of the N.W. Provinces, a town on the route from Hissar to Rewaree 23 miles S.E. by S of the former. Lat. 26° 51' long 76°.

**TOOTOO** in the Rajpoot state of Jessulmeer a village on the route from the town of Bokneser to that of Jessulmeer and 55 miles N.E. of the latter. Lat. 27° 12' long 71° 49'.

**TORA**, in the district of Peshawar division of the Punjab a town situated 20 miles from the right bank of the Indus, 30 miles N.E. of the town of Peshawar. Lat. 34° 9' long 72° 8'.

**TORAGUL**.—A town in the British district of Belgaum presidency of Bombay 43 miles E. by N of Belgaum. Lat. 15° 55', long 75° 17'.

**TORBELA**.—A small town in the north of the Punjab, and on the left or eastern bank of the Indus, a little below where it issues from the mountains and flows over the plain in a broad and shallow, yet still very rapid current. Below Torbela, and between it and Attock, are the five fords of the Indus. These are dangerous at all times, from the icy coldness and extraordinary rapidity of the stream, and in summer they are, in consequence of the swell of the stream, totally impracticable. The river is here smooth rapid, and about 300 yards wide. Lat. 34° 7', long 72° 50'.

**TORRE**.—A town in the Rajpoot state of Jeypore 52 miles S.S.W. from Jeypore and 56 miles E by S from Ajmeer. Lat. 26° 16', long 75° 34'.

**TORRE**.—A town in the British district of Rangpur, lieutenant gov. of Bengal, 46 miles W.S.W. of Hazaroolagh. Lat. 23° 40', long 84° 46'.

**TORRESHA RIVER** rises in lat. 26° 57', long 89° 14', in the territory of Bhotan, and, flowing south thirty eight miles through Bhotan and forty miles through Cooh Behar falls into the Duriah river in lat. 26° 55' long 89° 31'.

**TORIORE**.—A town in the British district of Trichinopoly presidency of Madras, 23 miles N.N.W. of Trichinopoly. Lat. 11° 9', long 78° 39'.

**TORRA**.—A town in the territory of Nagpur 152 miles E. from Nagpur, and 132 miles S.S.E. from Ramguri. Lat. 21° 5', long 81° 30'.

**TORRES**.—Two islands in the Mergui Archipelago situate 72 miles from the coast of Tenasserim. They are about lat. 11° 47', long 97° 36'.

**TOUDAN**.—A town of Eastern India, in the British territory of Pegu situate on the right bank of the Irrawady river and 30 miles N. by W from Promé. Lat. 15° 12', long 94° 56'.

**TOUNGHOO**.—See **TOWGO**.

**TOUTOULI**.—A village in the British district of Rohilkut lieutenant gov. of the N.W. Provinces. Lat. 28° 58' long 76° 37'.

**TOUVERAMCOORCHY**.—A town in the British district of Madras, presidency of Madras, 20 miles N.E. by N. of Madras. Lat. 10° 20' long 78° 27'.

**TOWANG**.—A town in the native state of Bhotan situate on the left bank of the Demree river and 77 miles N. by E from Durrang. Lat. 27° 30', long 92° 19'.

**TOWARUM**.—A town in the British district of Madras presidency of Madras, 58 miles W. of Madras. Lat. 8° 55', long 77° 20'.

**TOWRA**, in Surhind a village in the British district of Umballa, on the route from Kurnal to Patnala, and 45 miles N.W. of the former place. Distance N.W. from Calcutta 1,011 miles. Lat. 30° 14' long 76° 40'.

**TOWRAJ** a river of Hyderabad rises in lat. 18° 27' long 75° 18' and, flowing easterly for thirty five miles, falls into the Manjara river a feeder of the Godavery in lat. 15° 22', long 76° 44'.

**TRANDA**, or **TURANDA**, in Buzmahur, a village in the district of Koonawar, is situate near the left bank of the Sutley and at the confluence of the Ohosda torrent. Elevation above the sea 7 089 feet. Lat. 31° 35', long 77° 55'.

**TRANQUEBAR**.—A town within the limits of the British district of Tanjore, presidency of Madras. There is a slight curvature in the shore here concave towards the sea, 993

so that a small bay is formed, causing the surf to be less violent here than in the more exposed part of the coast. It is surrounded by walls, and protected by the fort called Danaberg, which, being white, as well as most of the houses, the place is conspicuous when viewed from the sea. Besides the defence of the fort, the town is surrounded by a wall with bastions. Of public buildings, the most remarkable are a few Lutheran churches, a Roman Catholic place of worship, and the fort, containing the offices of government. The territory extends six miles from north to south and three miles inland, and has an area of fifteen square miles. The soil is in general under cultivation, though in some places marshy, and throughout impregnated with salt. The greater part produces rice, and much of the remainder is planted with fruit-trees, especially the coconut-palm, and other species of palm the mango and jak. The climate is considered healthy, in consequence of the prevalence of sea-breezes, which moderate the temperature, so that the thermometer is stated not to range higher than 100° its lowest limit being about 70°. The settlement of Tranquebar was ceded to the British government in 1845 by the king of Denmark, for a pecuniary consideration. The town, with its district, was stated in 1844 to contain 23,426 inhabitants, of whom 166 were Europeans and their descendants. No later census of the population is available but the superiority of British over Danish administration is attested by the growing prosperity of the district, and the large increase in the amount of the government revenue. Distance from Negapatam, N 18 miles Tanjore, E, 51 Madras E., 147. Lat. 11° 1', long 79 55.

**TRAVANCORE.**—A native state in the south of India, under the political superintendence of the presidency of Madras. It is bounded on the north by the territory of Cochin and the British district of Coimbatore, on the east by the British districts of Madras and Tinnevely, and on the south and west by the Indian Ocean. It lies between lat. 8° 4'—10° 21', long 76 14—77 38° it has an area of 4,722 square miles. The most marked physical feature of the country is furnished by the Western Ghats, or Saksham, as that great range is called in its northern part. Divided from the northern part by the great gap or valley of Palghat, it expands into a many group, overspreading the country to the eastward, and attaining in some places an elevation of 7,000 feet above the sea. The formation of these mountains is such as is referred by geologists to the earliest periods—hypogeochemical, penetrated and broken up by prodigious outbursts of plutonic and trappean rocks. With these occur occasionally granite, gneiss, and hornblende, the primitive rocks being in some places overlaid extensively with laterite. The termina-

tion of the Western Ghats in the bold hill near the Amboli Pass, a little above Cape Comorin, is stated to be of granite. The line of waterheads forms, with little exception the boundary to the east and north-east, and the drainage is effected by a great number of torrents, passing to the south-west, the west, and the north-west, which discharge their contents either into the Indian Ocean or into the Backwater, as the British denominate an extensive series of shallow lakes running parallel with the coast, and communicating with the sea at certain places. The Periyar the most considerable of the torrents above mentioned rises on the eastern frontier of Travancore, in a deeply secluded and nearly unexplored part of the Western Ghats, and about lat 9 15 long 77 20. Its course is very tortuous but generally in a direction north west, and ultimately expanding into a broad estuary communicating with the Backwater, it is discharged into the sea, in lat. 9 58', long 76 18', its total length of course being about 140 miles. After it has reached the plain country, it is called the Alwy, and is subject to enormous floods so that though the channel is broad, it has been known during the monsoon to rise sixteen feet in twenty four hours and continue at that height for some months. Its mouth, called by seamen Oranganore river or Aycoote river flows between the south west boundary of the territory of Cochin and north west boundary of Travancore. The latter state has here a very short line of seacoast detached from the remainder lying further southward. This detached piece of coast extends about four miles, to lat 10° 10' where commences the seacoast of a detached portion of the territory of Cochin, which continues towards the south-east for about twenty five miles, to Undarally. There the seacoast of Travancore recommences, and stretches in a south-easterly direction for 155 miles, to Cape Comorin, where it turns to the north-east for six miles, and then terminates at Cannanapoor. Throughout this whole extent of coast, there is no safe harbour for ships of any burthen, the shore is in general low, sandy and covered with trees, but there are several roads having safe anchorage in favourable weather. The principal resorts of shipping along the coast are Aulapoly or Aleppi, which, though a small place, carries on a considerable trade in teak, coconuts, oar or coconut-fibre, betel-nut, and pepper but there being no harbour, ships of any considerable burthen must anchor in the open sea, four miles from the shore. Porca or Porcaud, a town exporting timber, oar and pepper, where ships may anchor two miles from the shore, in six fathoms water. Iviker or Aflika river, an estuary by which the Backwater communicates with the sea, but so shallow (there being but five or six feet on the bar at high water) that only boats can pass, large ships being compelled to anchor three miles off shore. Quilon, a town the north side of a small bight

open to the south and south-west, but on other points sheltered by land and a projecting reef. Anyango, where there is merely an open road, in which ships may anchor two miles off shore but their boats are seldom available, on account of the violent surf, and consequently communication with shore is effected by means of the country boats. Pondera, a small town, where the land is bold to approach, so that large ships can anchor near the shore. Tangapatnam, at the mouth of a river of the same name, which in consequence of a bar, is accessible to none but small boats, except in the rainy season but within the bar the navigation is practicable at all times, and is of considerable extent. Cuddaspatnam, having no unsafe anchorage between the shore and two rocky islets, a short distance from the shore. Cape Comorin is the next place deserving notice, but it is entitled to this distinction only as being the most southern point of India. It is a low, sandy spot. The whole extent of coast is indeed generally low nowhere presenting anything more aspiring than a few cliffs of slight elevation, and this adds to the striking effect which the Ghats, about fifteen or twenty miles inland, must under any circumstances produce from their extent and grandeur. The trading stations along this coast are little frequented during the south west monsoon which commences late in May, or early in June, and prevails till September. During June and July there is a succession of severe squalls, accompanied with heavy rain, and on the coast by high seas but the weather rather moderates towards the end of the latter month. The violence diminishes in August, and still more in September though the weather in that month is often cloudy and threatening, and heavy showers of rain sometimes descend. The fair season succeeds, when the weather is occasionally rather close. In November the north-east monsoon sets in with far less intensity than that from the south west, but still bringing rain and cooling the air. March, April, and May are the hottest months of the year, and also the most unhealthy. In December, January, and February the nights are comparatively cool and the days are heavy exposure to them is dangerous, being apt to produce fever.

Notwithstanding the nearly equatorial position of Travancore, the high lands, in consequence of their great elevation, enjoy a moderate temperature and even the lower part of the territory is cooled by the great fall of rain, and by the proximity of the mountains and of the sea. The thermometer at Trivandrum seldom rises above 90° in any season, nor above 75° during the south-west monsoon. In a series of observations made at Quilon during the years 1836 and 1836, the highest range of the thermometer was 88, and the lowest 69°, the former in April and May, in the afternoon, the latter in December and January immediately before daybreak. The climate is moist, and the average fall of rain considerable. Though to European constitutions somewhat

severe, it is not considered positively unhealthy. As there is never any cold bracing weather, the recovery of invalids is usually slow, and in rheumatic cases, or where there exists a tendency to pulmonary disease, the dampness of the atmosphere is decidedly injurious.

Notwithstanding the great mountain masses, and the prevalence of primary or early rock formations in Travancore, its mineral resources appear to be very scanty no metal of importance except iron being reported to be found in it. Its zoology is varied and important. Elephants are very numerous among the wooded valleys and table lands of the Ghats, where tigers of enormous size are also common, as large as chickens abound the wild buffalo, the wild swine, the elk the leopard, the black leopard and the ant-bear are found monkeys exist in great numbers and variety the antelope, the civet cat, the jackal, the hare, the ichneumon or mongoose the otter, and a seal of diminutive size, are also to be reckoned among the animals known in Travancore. Of birds, there are the hawk, the raven, the vulture, the peafowl, the jungle-fowl (*Gallus gallinaceus*) the pied bird of Paradise (*Ptilinopus orientalis*), parrots and paroquets innumerable, and extremely destructive to the crops and lastly aquatic birds of divers species and in great numbers. Of reptiles, there are snakes, various in kind and numerous in quantity many of them of deadly venomous character, scorpions and centipedes alligators of great size swarm in the rivers and lakes and are very voracious and destructive human beings, as well as inferior animals, occasionally becoming their prey. Their principal food, however is fish of which there is great abundance in the rivers and lakes, in addition to that afforded by the sea.

The soil on the more elevated surfaces is light and gravelly but in the low grounds it is a deep black mould, formed either by deposits from inundations or decayed vegetation. In such soils rice of excellent quality is produced in great plenty the sugar-palm thrives well, and yields an excellent product. Many plantations of mulberry have recently been made by the rajah in the hope of producing silk on a large scale. A great variety of vegetables congenial to the climate are cultivated; and many European esculents may by care be brought to maturity.

The communication between the lower parts of the territory is much facilitated by inland navigation through the backwaters, and a trifling outlay in their improvement would open a channel from Trivandrum, the capital, to Trichoor a distance of 200 miles. The rajah of Travancore some years since formed on his eastern frontier towards Timorelly a double line of works extending from a place on the seashore, about half a mile to the west of Cape Comorin in a northerly direction, to a point where the Western Ghats become impassable for an army Horsburgh viewing this work,

thus notices it — "The low country seems divided by a wall or trench stretching from the shore to the mountains, and fortified by mounds of earth." The same rajah also constructed a line of works on his north-western frontier as a northern boundary towards Calicut, running east and west from a point of the hills [the Western Ghats] deemed inaccessible chiefly behind or south of a river which discharges itself into the estuary" falling into the Indian Ocean between Kodungaloor and Ayacotta. In 1789 "this miserable wall," as it is styled by a military writer, was forced and partially destroyed by Tippoo Sultan and as the rajah was under British protection, the aggression gave rise to the war with Mysore in the same year. As the whole country is now subject to British supremacy those feeble defences have been left to the natural but speedy progress of decay.

The population of Travancore consists of Brahmmins, Mussulmans, and Christians, besides a few Jews. Its amount is returned at 1,011,824. Brahmmins are very numerous and are either settlers from other countries or Nam buris, considered to be aboriginal Brahmmins, highly regarded by the rest of the Brahmmin population over whom they have a more powerful influence than even in other parts of India. The most numerous and important class are, however, the Nairs, who, although of the Sudra or labouring caste by descent, are at present found engaged in various occupations and from among whom the rajah's troops are recruited. As is the case with the Nairs elsewhere, they do not marry but select a young girl, and having performed the idle ceremony of tying a band round her neck and making her some small present, send her back to reside in the house of her father or brother where she is at liberty to live in licentious intercourse without restraint. The Namburis are said to be the most-favoured lovers of the women placed in these extraordinary circumstances. The male portion of the Nair population live in a course of profligacy similar to that followed by the women, and as none know their own offspring, they regard their sisters children as their heirs. The rajah appears to belong to this singular class. The Mussulmans comprise the Moplahs, descendants of Arabs settled on this coast, and the Lubbis, a mixed race between the Arabs and Hindoos, besides a few of Pathan descent. Christians probably form a more numerous proportion of the population here than in any other part of India, if the Portuguese dominion of Goa be excepted. They are of three classes: first, the ancient Christians of St. Thomas, or of the Syrian or Jacobite church, who regard the patriarch of Antioch as their spiritual head. These Christians are perpetually at war among themselves, and have appealed to the British government, which has, however, declined to interfere in their disputes; second, Romanists, descendants from Christians of the last mentioned denomination, but fiercely made so acknowledge the supremacy of the pope

third, Portuguese Romanists, and descendants of heathen natives, converted by missionaries of that nation. The pope is of course acknowledged as the head of the followers of the Church of Rome, the chief local authority being exercised by a vicar-apostolic residing at Verapoli. The Christians in the aggregate are stated to amount to an eighth of the whole population, and in sailing close to land, their churches may be observed occurring at short intervals along the shore of Travancore. Besides the denominations of Christians already mentioned, there are a few Protestants, descendants of converts made by the Dutch and now under the spiritual care of a British missionary. According to a clerical authority, who appears to have given much attention to the subject, the number of Syrian Christians in Travancore is about 70,000 that of the Roman or Papal Christians about the same and the entire number of professed Christians, including the Protestants, about 180,000.

In the secluded parts of the mountains is a wild race, extremely rude and savage in their habits, but not ferocious, living on game or the spontaneous produce of the forest. Slavery no longer exists in Travancore. By the introduction and general promulgation of well defined regulations, the law upon the subject has been placed on precisely the same footing as that on which it stands in British India. There is now no compulsory service, which is the essence of slavery: the courts of justice no longer recognise that status, nor can anything be lawfully done to any one on the ground that he is a slave, which cannot lawfully be done to a free person. Thus it will be seen that, owing to the unremitting exertions of the British government, a recognition has been obtained of the right of slaves to be dealt with as human beings.

The higher ranks of the people of Travancore are stated to be intelligent, especially the Nairs, "who have a quick apprehension, are admirable accountants, and perform the operation of writing with a rapidity and adroitness quite peculiar to themselves." They are however in general a restless, uncompassioned race, little characterised by atrocious criminality (except in regard to one branch of the moral code), but addicted to lying, and from their depraved actions respecting the union of the sexes, steeped in the grossest licentiousness. Such a course of life as might be expected, attended by the diseases which are its usual penalties and which nowhere are more general or more virulent than in Travancore.

There are two passes through the hills to Tinnevely, lying to the east of the Western Ghats. Of these, the Aringol Pass, situated in lat. 8° 55', can be traversed only during the rains, from June to December, without incurring great hazard of contracting deadly fever. The Aramboli Pass, seventy miles farther south, is considered to be perfectly safe at all times. The principal places, Travandrum the capital, Qmion, Arutka, Aul-

pehly or Alppee, and Anjengo, are noticed under their respective names in the alphabetical arrangement.

The early history of Travancore is too obscure and too unimportant to justify the bestowal of any notice upon it except in a work purely antiquarian. Its first political or commercial relation with the East-India Company was in 1674 when that great corporation, by permission from the government of Travancore, established a factory at Anjengo, on the seacoast. During the prolonged warfare waged by the British with Hyder Ali and his son Tippoo Sultan the British invariably found the rajah of Travancore a steadfast ally and in that relation he was, in 1784 included in the treaty between the East-India Company and the sultan of Mysore. In 1789 Tippoo Sultan, under the double impulse of resentment and ambition, attacked the rajah of Travancore, and after a smart repulse, forced the lines which had been erected for the defence of the country on its northern frontier towards Oochin, overrunning and cruelly devastating the Travancore territory. Lord Cornwallis, then Governor-General, regarding this attack on an ally as an act of hostility against the British government, commenced military operations, which ended in Tippoo Sultan being deprived of half his dominions, and compelled to restore all that he had wrested from the rajah of Travancore. In 1797 the rajah concluded with the East-India Company a treaty, by which he engaged to pay an annual subsidy adequate to maintain three battalions of native troops, with proportionate artillery to be stationed within his territory. By a subsequent treaty in 1805 the rajah agreed to pay annually, in addition to such subsidy, a sum adequate to maintain one regiment of the East-India Company's native infantry, and in case an additional force should be required for the defence of his territory against attack or invasion, to contribute jointly with the Company towards the discharge of the increased cost such a sum as should appear, on an attentive consideration of the rajah's means, to bear a just and reasonable proportion to his net revenues. It was further agreed, that in case the Governor General in Council should consider that there were grounds for apprehending failure of funds to defray the expense of the permanent military force, or the extraordinary charges that might arise under the terms of the treaty he was to have the power to introduce at his discretion such regulations and ordinances, fiscal or otherwise, as might appear necessary for the due administration and government of the state under the management of the servants of the East-India Company and after due notice, such portions of territory as might be required were to be placed under the exclusive authority and control of the said officers. It was however provided that the rajah's actual receipt from his territorial revenues should not be less than two lakhs of rupees, together with one-fifth of the

net revenues of the whole of his territories, the Company engaging to secure the said amount, and cause it to be paid for the rajah's use at all times and in every possible case. The rajah was to hold no communication with any foreign state without the previous knowledge and sanction of the Company, nor without such to admit any European foreigner into his service nor to suffer any European to remain within his territories. This treaty although declared to be binding on the contracting parties 'as long as the sun and moon shall endure,' failed in securing permanent amity and good faith the ill government of Travancore was extreme, and the financial position of the state deplorable retrenchment was indispensable and to relieve the treasury during the time necessary for performing it effectually the payment of half the additional subsidy was remitted for two years. No adequate reform, however, took place, the rajah would take no effective steps for reducing his expenditure, a part of the arrears of subsidy was tardily liquidated, but a very large portion still stood undischarged all power was centred in the hands of a corrupt minister and the remonstrances of the British Resident were unheeded alike by him and his master. At length it became evident that something more than what, in more modern times, has been called "passive resistance" was intended. Preparations for direct hostility were made almost without an attempt at concealment, and so serious did the state of affairs appear to the government of Madras, that two bodies of troops were ordered to be put in motion for Travancore. These vigorous measures were, however suddenly suspended in order to try the effect of negotiation which proceeded in the usual style of oriental diplomacy till broken off by an attack on the house of the British Resident, and an attempt to murder him. That functionary succeeded in escaping on board a British ship which fortunately arrived just in time to afford the means of his deliverance. Nearly coincident in time with the attack on the Resident was an atrocious outrage committed on a small party of British soldiers who being on board a vessel which put into Alleppey for water were treacherously induced to land and then brutally murdered. An attack on the subsidiary force stationed at Quilon seems to have determined the Madras government to substitute arms for negotiation, which latter had been persevered in even after the attempt to assassinate the Resident. The war thus tardily commenced, was, however, vigorously carried on, and consequently was but of brief duration. The dawn fled, and after wandering for some time, subjected to much privation and suffering, terminated his life by his own hand. His brother, who was involved in the guilt of the murders at Alleppey, was apprehended and publicly executed. This took place early in 1809. On the restoration of peace, the British Resident, at the solicitation of the rajah, assumed the entire

management of the state, as provided in the treaty of 1805, and exercised the power so judiciously, that in a few years its finances were freed from embarrassment, and various useful reforms effected. A feeble attempt to destroy the British authority was made in 1812, but immediately suppressed. Soon afterwards an infant rajah succeeded to the throne, to the full enjoyment of the rights of which he was admitted on the completion of his sixteenth year. The country being surrounded by British possessions, excepting that portion bounded by the sea, was considered safe from external attack and internal peace appearing to be firmly established, the continued presence of the subsidiary force was deemed unnecessary. It was accordingly withdrawn and in 1832 the entire responsibility of preserving the peace of the country was intrusted to the rajah, but the British government is still bound to afford protection and assistance, should occasion demand its interposition. The rajah died in 1846. During the last few years of his administration the country was allowed to deteriorate, notwithstanding the vigorous remonstrances of the British Resident. Extravagance wasted the accumulations of former years of careful management, and a decreasing revenue, coincident with a lavish expenditure, led to the neglect of nearly all public works, however important or necessary. The roads and bridges were left to go to decay and even the works for irrigation, so essential to the prosperity of the people, and so closely connected with the immediate interests of the revenue, were not kept in repair. The rajah last mentioned was succeeded by his brother, the Eliah rajah, who, under the able administration of his deewan corrected the improvident expenditure of his predecessor. This improved system however prevailed only for a time a passion for expense of an alleged religious character misled the mind of the prince, and has been indulged to an extent which has called forth repeated remonstrance from the Resident.

**TRAVANCORE, or TERAVANKODE,** in the territory of Travancore, a decayed town, formerly the capital of the state, and giving name to it, but nearly deserted since the rajah has transferred his residence to Trivandrum, on the seacoast. Lat. 3° 14', long. 77° 19'.

**TRIBENNEE.**—A town in the British district of Jessore, Beng. gov. of Bengal 40 miles N. of Jessore. Lat. 23° 42', long. 89° 9'.

**TRICHANGODE.**—A town in the British district of Salem, presidency of Madras, 29 miles S.W. of Salem. Lat. 11° 22', long. 77° 52'.

**TRICHINOPOLY.**—A British district under the presidency of Madras, named from its principal place. It is bounded on the north and north-east by the collectorate of South Arcot, on the south-east by the river Coleroon, which separates it from Tanjore, on the south

by the native state of Poodocottah (Rajah Tandman's territory), and by the British district of Madura on the west by Madura and Coimbatore, and on the north-west by the British district of Salem. It lies between lat. 10° 57'—11° 31', long. 78° 13'—79° 57' and is ninety-four miles in length from north to south and sixty in breadth. The area is, according to official return 8,248 square miles. It is a flat tract, the surface being diversified only by some high ground to the south of the town of Trichinopoly, and in many places by granite rocks, some tabular, others with rounded summits, which seldom rise to any considerable height. The rock on which the fort of Trichinopoly stands is an exception, rising to an elevation of between 500 and 600 feet, and in the same part of the district there are some other large rocks of similar character. Besides those of granite there are rocks of secondary trap and greenstone. The granite has externally a dark or dull earthy colour internally it is variegated and contains a large proportion of felspar with some quartz and mica. It is a hard and very durable stone forming an excellent building material. Quarries of it are worked by the natives. It is hewn out into pillars, and steps for staircases, and the walls of the forts and gateways are built of it. In the high tract to the south of the town of Trichinopoly the soil is sandy or gravelly and generally barren and uncultivated, but with this exception, the cantonment is surrounded by rice-lands several square miles in extent. In the low grounds along the courses of the rivers, the sub-soil is a stiff, tenacious red coloured clay, with an intermixture of sand, from which excellent bricks and tiles are made. The overlying cultivable soil is a deep black mould, very fertile, and, under proper management, producing two crops annually. The mean annual fall of rain is considerable, though not excessive amounting to from thirty to forty inches, still the district is characterized by aridity and without the irrigation effected by means of the rivers and torrents flowing from the Ghats and Mysore, the country would be a parched desert. A steady high temperature, cloudless sky, a dry and close sultry atmosphere, with much glare and intense radiation of heat, are the characteristics of the climate of Trichinopoly. The heat, drought, and glare are often very intense for months together, the hot weather is, however, a good deal broken and varied by high westerly winds, and whirlwinds, often accompanied by clouds of sand and dust, occur at short intervals, often for a week or two at a time. The high winds and dusty weather, which prevail chiefly during May, June, and July, render those months the most disagreeable part of the year, the atmosphere being obscured during the day by clouds of dust. The monsoons are not well marked, except by a change in the direction of the wind. The climate of this part of the southern division may, with tolerable accuracy, be divided into three seasons, viz., the hot and dry, the

hot and windy, and the cool and showery or more sunny, into eight months hot and dry, and four showery. March, April, and May are always exceedingly sultry with much thunder and lightning and occasionally heavy thunder-showers occur but from nine A.M. until four P.M. it is always disagreeably hot, June and July are also hot, although in a less degree, the heat being generally at its maximum about the middle of May. When the westerly wind sets in, the heat is moderated, but when accompanied by dust, it is, as already remarked, particularly unpleasant. Thunder-showers occasionally occur during a week or two in the months of August, September, October and November which are cool, cloudy and pleasant. December, January, and the greater part of February are dry, cold in the mornings and evenings, but sultry and close during the forenoon. Fogs and dews are rarely known in the months of March, April, and May when the country presents the appearance of a vast desert. The rivers and tanks become dried up, the trees shed their leaves, and vegetation is completely at a stand, the respiration of animals at this time panting and oppressed,—in short, all nature both animal and vegetable seems to droop and shrink from the raging mid-day heat. When the rains succeed nature soon revives, vegetation bursts forth with new life and vigour and the eye is relieved from the oppressive glare and barrenness. The soil being so arid and sandy there are scarcely any fogs, vapours, or noxious exhalations and in this respect the climate is salubrious, the atmosphere being seldom damp or humid.

The Cauvery the principal river enters the district at its western extremity in lat. 10 53 long 78 15 and flows through it in an easterly direction to Seringham three miles north of the town of Trichinopoly in lat. 10 53, long 78 44 near which locality it divides into two branches the northern, called the Coleroon the southern retaining the name of the Cauvery. The principal feeders of the Cauvery are the Bhavani the Noyel, and the Ambawutty, flowing from the Western Ghats, the Nalgherry group, and the table land of Mysore and the Jyar which, descending from the eastern declivity of the Eastern Ghats, falls into the principal stream on the left side just at the head of the island of Seringham. The Cauvery having its principal feeders close to the Western Ghats, is fully under the influence of the south-west monsoon, and conveys, to fertilize the Carnatic, an abundant portion of the rains driven from the ocean by that vast aerial current. The Cauvery is generally nearly empty during March, April, and the early part of May towards the close of which a scanty stream frequently comes down, about the middle of June, the regular periodical inundation, caused by the south west monsoon, reaches Trichinopoly and by the beginning of July the volume of water is sufficient not only to fill all the tanks and

canals, but to afford a redundancy of water, which finds its way to the sea by the two channels, the Coleroon and the Cauvery. At the height of inundation, the Cauvery is a vast torrent, for miles wide. The river continues to have a considerable quantity of water during August, but in the two months succeeding becomes very low, until replenished in the course of November by the rains of the north-east monsoon. During winter it continues to fall, and by March, as already observed, is generally nearly dry. After the divergence of the Coleroon, the Cauvery sends forth on its right or south side a great number of branches, which traverse and intersect the delta of Tanjore. Of these branches, the most important is the Vannar which diverges about eight miles below the town of Trichinopoly. The Cauvery is used to a considerable extent at certain seasons, as a means of communication and traffic, when cotton piece-goods, saltpetre, and some other wares are floated down from the British districts Coimbatore and Salem, and conveyed to the towns on the seacoast. The communication however, is only practicable during the inundations, even then it is hazardous and uncertain and can be effected only by means of circular baskets, ten or fourteen feet in diameter and covered with buffalo-hides. As soon as these rude craft have reached their destination, the wicker is abandoned, having been previously stripped of the hides, which are transported back either by human labour or on bullocks.

Of the zoology of this district there is scarcely any authentic information. Its general aridity and barrenness are probably unfavourable to the multiplication of animals. The dry ground is infested with great swarms of white, black, and red ants, and other destructive insects, which commit great ravages both in the fields and in houses. Water-snakes are very common in rice-fields, and scorpions the cobra de Manilla and cobra de capello are occasionally met with common striped squirrels are very numerous now, and troublesome, frequenting the roofs of houses, and plundering the gardens. Frogs swarm in the pools and tanks after heavy showers, and at night cause great annoyance by their loud and incessant croaking. *Cyrtops* and mosquitoes abound, especially after rain.

There are plantations of coconut-trees, made principally on account of the oil obtained from their fruit, but the chief alimentary crops are rice, ragi (*Echinozizone coracana*), various kinds of millet, maize, and plantains. Sugarcane is little cultivated, but tobacco is grown in considerable quantities and of very fine quality. Everything in husbandry depends on irrigation manure being scarcely used. Cotton is a product of some importance. The population is given under the article MADRAS. The language spoken in the district is the Tamil. The military station of the district is at the fort of Trichinopoly the force stationed at which furnishes detachments to Negapatam, Tanjore,

Combaconum, and Combatore. The district is divided into eight talooks. The principal routes are—1st, from north-east to south-west, from Madras, through the town of Trichinopoly to Madura and Palamcottah, 2nd, from east to west, from Tanjore, through the town of Trichinopoly, to Combatore, 3rd, from east to west, from Combaconum to Trichinopoly. The principal places (Trichinopoly and Seringham) are described under their respective names in the alphabetical arrangement. Trichinopoly was included in the territory styled the Carnata, the civil and military government of which was vested in the British government, under the provisions of the treaty with the nabob, dated in 1801.

**TRICHINOPOLY**—The principal place of the British district of the same name, under the presidency of Madras, a town, with a celebrated fort. The rock on which the fort is built is of alenite estimated to be 600 feet above the alluvial plain from which it rises, and is a very striking object viewed from a distance at any point of the compass, and commands a very extensive and fine prospect over the surrounding country including the island of Seringham with its numerous pagodas, and the meanderings of the Cauvery and its branch the Coleroon. The fort is situated on a part of the rugged declivity of the rock, and two furlongs from the right bank of the Cauvery which is embanked but from want of skill, or of adequate expenditure on the works, they sometimes give way, thus admitting the inundation to lay the neighbouring country under water. The fort, with its strong and masonry walls, constructed of solid masonry (which are in general still in a good state of repair though in some parts rather dilapidated), bears the appearance of having been strongly and regularly built. The walls, which are in some places double, are from twenty to thirty feet in height, of very considerable thickness, and upwards of two miles in circumference. Within them is a very extensive petty or native town. The houses and huts are generally of the ordinary Indian construction being low small, and very closely huddled together with small courts in front of them. They are without windows, and almost all present to the eye the appearance of being sickly dark, ill ventilated and according to English notions, extremely uncomfortable, being what they cannot fail to be, decidedly unhealthy with little prospect of improvement. They are however, arranged in tolerably straight, wide and regular streets, which are usually crowded at all hours of the day with multitudes of passengers, carriages, bullocks, and cattle of various kinds. Most of the streets have bazars, for the sale of native goods and wares of every description. The flagstaff is placed on the summit of the rock, and there is an easy access to it by means of a spacious flight of stone steps, which, about halfway up, passes through the site of an old magazine, accidentally blown up in 1772. On

the rock is a pagoda, forming a very striking object, and regarded with deep reverence by the Brahmmins. The fort contains the arsenal, commissariat, ordnance stores, medical stores, pay-office, garrison hospital, and jail. It has been observed, that from the crowded streets, numerous buildings, and the proximity of the rock, the temperature of the fort is generally higher than that of the immediate neighbourhood or cantonment. The jail erected in 1806 was in a confined situation near the eastern extremity of the fort, and has been replaced by one of recent erection in which due provision has been made for the separation of the several classes of prisoners, as well as for ventilation, drainage, and cleanliness.

The natives of this town are famed for their skill in the manufacture of hardware, cutlery and jewellery, their harness and saddlery are also excellent in workmanship and materials, and very moderate in price. Large quantities of cheroots are manufactured from tobacco of superior quality grown in this and the neighbouring districts.

The cantonment, in which the troops composing the garrison are quartered, is at the distance of from two to three miles south-west of the fort, on an extensive open plain studded with masses of granite. It is very extensive, its various buildings and establishments being scattered over an area of not less than from six to seven miles in circuit. Many of the bungalows or lodges occupied by the civil and military officers are spacious and well constructed, and have large and well stocked gardens. The troops there are generally one regiment of native cavalry one company of European foot artillery one regiment of her Majesty's foot, and four regiments of native infantry, forming a force of between 4 000 and 5,000 men the native infantry corps furnishes detachments to several British military stations. The cantonment is healthy and has abundance of excellent water from a considerable branch of the Cauvery which flows through it. In a central part of the cantonment are public rooms, built and supported by voluntary subscription they contain a reading-room and good library. In the south of the cantonment, and three miles from the fort, is Saint John's Church a handsome building affording ample accommodation for the European inhabitants and troops. In the western part of the cantonment there is a small Romish chapel, at which a Portuguese priest officiates. In the fort is a large missionary chapel.

The mean annual temperature of Trichinopoly is about 85°, the maximum in the shade being 102° the minimum 58°. The population, exclusive of the troops and other government establishments, is estimated at 20 000, of whom about a fifth are Mussulmans.

Trichinopoly figures rather conspicuously in the history of India during the early part of the eighteenth century. Its Hindoo rajah died without issue in the year 1752. Three wives survived him, two of whom dutifully submitted to con-

flagration, the remaining one preferred to live, and succeeded to the government. A party being raised to oppose her pretensions, she solicited the aid of the Musulman nabob of Arcot, who sent a force to her assistance, commanded by his son with whom was associated a man named Chunda Sahib, who occupies a distinguished place in the records of that period. The ranees were sufficiently well acquainted with the average character of the good faith of Indian princes, to entertain some misgivings as to the ulterior designs of those whose aid she had been compelled to invite, to allay them, Chunda Sahib took an oath on the Keran, as it was believed, that the foreign troops should be employed for no other purpose but the establishment of the ranees authority and that when that should be secured they should be withdrawn. To avoid profanation of the holy volume of the Muhammedans, it is usual to wrap it in a covering when used for the administration of an oath. When Chunda Sahib thus solemnly attested the pure intentions of himself and his master the covering was such as was usually employed but it enveloped only a brick and the deponent did not feel his conscience bound by an engagement made on so vile a material accordingly the first use he made of his power was to subvert the authority of the ranees, and subject her to imprisonment. This distinguished service seemed to entitle Chunda Sahib to the office of administering the government of the place which he had so honourably won, and he was without hesitation appointed thereto. But Chunda Sahib had enemies in the court of his master which, like all other eastern courts, was a hotbed of intrigue. Failing in their endeavours to prejudice the nabob against one of his favourite servants these persons had recourse to the Mahrattas who, ever on the watch for opportunities to acquire either wealth or power readily assented to do the work of those who envied Chunda Sahib's good fortune, but in reality as on all other occasions, were bent only on performing their own. The result was the alienation of Trichinopoly from the rule of the nabob of Arcot, under which it had so recently been brought, the Mahrattas succeeding in reducing the fortress, and making its injured conqueror prisoner. This event took place in 1761. The Mahrattas did not long retain possession of Trichinopoly, and throughout the wars waged between the English and French for supremacy in India, this place continued to be a frequent object of attack or intrigue. One of the latest and most memorable events connected with its history, is the march of Captain Calliaud to its relief when besieged by the French in 1787. Captain Calliaud was before Madras, which he was preparing to attack, when he was informed of the danger of Trichinopoly which had then sustained bombardment for several days, an assault being hourly expected to follow. He did not receive the news till three o'clock in the afternoon of the 31st May, and at six he

was on his march, which movement was commenced without tents, baggage, or artillery. The men bore their own food a few bullocks only were taken, and these were laden with ammunition. At six o'clock in the evening of the 31st, the relieving force was within twelve miles of Trichinopoly, having advanced thus far without annoyance but the great difficulty,—that of entering the town, remained to be overcome. The march of Captain Calliaud was not unknown to the enemy and troops had been so disposed as to command every line by which, under ordinary circumstances, the place could be approached from the direction of the expected relief. It was discovered also, that some spies had mixed with the English troops, for the purpose of ascertaining the precise route which would be taken. This precaution devised for his destruction, Captain Calliaud converted into the means of safety. The spies were suffered to exercise their office undisturbed and apparently unsuspected until the commander had apparently fully made up his mind as to the route by which he would seek admission to the town, and having pursued it undeviatingly for about six miles, the spies dropped off to communicate the information of which they thought themselves possessed to their employers. Thus rid of these persons, Captain Calliaud, as soon as such a step could with safety be taken, changed his track for another which, being naturally regarded as unlikely to be selected had been left by the enemy altogether unguarded. This extraordinary route for the passage of troops lay across rice fields under irrigation which were thereby converted into one continuous morass. Every step had to be taken knee-deep in mud and water. The march occupied seven hours, although the distance was less than that number of miles thus was occupied the night. By break of day firmer ground was obtained, and the labours of the troops were rewarded and cheered by the sight of the city and fort of Trichinopoly at no great distance. A part of the garrison was drawn out, accompanied by two field pieces to protect the reinforcement, if any attempt were made to intercept them but the only duty to which they were called was to give welcome to their deliverers, who marched into the fort amidst universal shouting. Captain Calliaud's attention had been required at so many points during this extraordinary night march that he had undergone more fatigue than any man among those whom he commanded, and he was in a state of perfect exhaustion. Notwithstanding this, however, he marched at the head of his troops when they entered the fort, though obliged, from weakness, to be supported on each side by a grenadier. The enemy continued anxiously to watch for the approach of the English party by the expected route till a triumphant salute assured him of their being beyond the reach of his arms. The immediate consequence of this admirably-performed movement was the precipitate retirement of the French from before the place.

Distance of Trichinopoly from Madras, N E, 75 miles Coimbatore, E. 130 Tanjore, W 23, Bangalore, S E., 165 Madras, S.W., 190 Lat. 10° 50', long 78 46'

**TRICHGOOR**, in the territory of the native state of Cochin under the political superintendence of the presidency of Madras, a town, the principal place of a talook or subdivision of the same name. Of the towns in the territory it is next in importance to Cochin the site is advantageous being close to the eastern coast of the Backwater an extensive estuary or shallow lake, by which it communicates with Changat and the city of Cochin, but by land the only route is that proceeding north-east to Palghat, and being a defile through jungles infested with wild elephants and other dangerous animals, and very unhealthy from November to March. Among the Brahmmins it is much celebrated for its sanctity. The fortifications which formerly encompassed the town have been destroyed and excellent barracks, with an hospital, stores, and magazines, have been built. The sepoy of whom there are about 150 have dry airy and commodious dwellings, and the station is considered very healthy. There are here a native police-station, a court, and jail. Distance from the city of Cochin, N 41 miles Bangalore S.W., 180. Lat. 10° 32', long 76 16'

**TRICOLUM**.—A town in the British district of Malabar, presidency of Madras, 69 miles S.E. by S. of Cannanore Lat. 11 2', long 75 58'

**TRICOTA**, a lofty mountain in the north of the Punjab, and on the south of the valley of Cashmere, has such an elevation as to be covered with snow the greater part of the year. North of it is a remarkable spring, from which the water gushes at very short and regular intervals, as if expelled by pulsations, and is received into a spacious reservoir. During December January, and the beginning of February, the water is too warm for the hand to bear immersion in it, but at other times cold. According to Von Hügel, this is caused by the water produced by the melting of snow on the heights cooling that yielded by the fountain, which being heated by subterranean fire, has thus a naturally high temperature during the winter months, when the snows and ice-bound streams withhold their cold admixture. This natural wonder causes the place to be considered holy by the Hindoos, and consequently to be venerated as a place of pilgrimage. Lat. 33° 58', long 74 32'

**TRILOKNATH**.—A town within the dominions of Ghazib Singh, the ruler of Cashmere, situate on the left bank of the Chandra river, and 140 miles S.E. from Srinagar Lat. 33° 45', long. 76° 45'

**TRIMALBOYENPATAM**.—A town in the French territory of Karikal, situate within the British district of Tanjore, presidency of Madras, 47 miles E. by N of Tanjore Lat. 10° 53', long 79 53'

**TRIMBUE**.—A town in the British district of Ahmednugur, presidency of Bombay 16 miles W by S. of Nasik. Lat. 19° 53', long. 73 32'

**TRIMUNGALUM**.—A town in the British district of Madras, presidency of Madras, 11 miles S.W. of Madras. Lat. 9° 50', long. 78 5'

**TRINOMALEE**, in the British district of South Arcot, presidency of Madras, a town at the base of a hill surmounted by a lofty pagoda, which commands all parts of it. Here in the year 1767 a British force under Colonel Smith defeated an army far superior in numbers and artillery commanded by Hyder Ali and Nizam Ali. It was besieged in the year 1791 by Tippoo Sultan and obliged to surrender in consequence of the cross-fires from a neighbouring hill which commanded it. At present Trinomalee is a considerable and rather well built place, having a numerous population, including a large proportion of Brahmmins. Distance from Cuddalore, N W 58 miles Madras, S.W., 103 Lat. 12 14, long 79 7'

**TRIPATOOR**.—A town in the British district of Madras, presidency of Madras, 36 miles E.N.E. of Madras. Lat. 10 7, long 78 40'

**TRIPETTY**.—A town in the British district of North Arcot, presidency of Madras, and the seat of one of the most celebrated Hindoo temples south of the Kistnah river situate 51 miles N by E. of Arcot. Lat. 13 33, long 79 29'

**TRIPPATUR**.—A town in the British district of Salem, presidency of Madras, 63 miles N.N.E. of Salem Lat. 12° 29' long 78 36'

**TRIPUNAITORAI** in the raj or state of Cochin a town about two miles N.E. of the Backwater an extensive shallow lake, the reservoir of numerous streams flowing from the Western Ghats. Bartolomeo states in the year 1787 that it was the residence of the rajah of Cochin, and it probably continues to be so at present. Distance from Cochin, S E, seven miles, Calicut S.E., 105 Bangalore, S.W., 302. Lat. 9° 57', long 76 24'

**TRISUL GUNGA**, a river, called in the upper part of its course the Bori Gunduk, rises in the Himalayas, in lat. 28° 57' long 85° 43' and, flowing in a south-westerly direction, forms a junction with the Gunduk in lat. 27° 31', long 84° 5'

**TRITGHINDOOR**.—A town in the British district of Tinnevely, presidency of Madras, 35 miles E.S.E. of Tinnevely Lat. 8° 30', long 78 10'

**TRITRAPUNDI**.—A town in the British district of Tanjore, presidency of Madras, 40 miles E.S.E. of Tanjore. Lat. 10° 43', long 79 45'

**TRITTANY**.—A town in the British district of North Arcot, presidency of Madras,

# TRI-TUL

26 miles N.E. of Arcot. Lat. 13° 10', long. 76° 30'

**TRIVALUM**.—A town in the British district of North Arcot, presidency of Madras, eight miles N.W. of Arcot. Lat. 13° 59', long. 76° 15'

**TRIVANANELLUR**.—A town in the British district of South Arcot, presidency of Madras, 29 miles W.N.W. of Cuddalore. Lat. 11° 52' long. 79° 24'

**TRIVANDRUM** in the territory of Travancore under the political superintendence of the presidency of Madras, a town situate a mile and a half N.E. of the shore of the Indian Ocean, and on the right bank of a small river or torrent flowing from the Western Ghats. The town is of considerable size, having its greatest length north and south. At the southern extremity is the fort, about half a mile square, without a ditch, with walls of mud lined with stone at some parts of the north and west faces. It is for the most part an ugly, ill built pile, but the rajah's palace, within its precincts, is a large handsome edifice in the European style. At the north of the town are the barracks and the old cantonment formerly occupied by a regiment of native infantry and a detachment of artillery and at present the headquarters of the Nair brigade. On an eminence outside the town, and 195 feet above the level of the sea, the rajah in the year 1837 built an observatory. Elevation of the town above the sea 185 feet. Distance from Cannanore, S.E. 255 miles Madras, S.W. 395. Lat. 8° 28' long. 77° 2'

**TRIVATOOR**.—A town in the British district of North Arcot, presidency of Madras, 23 miles S.E. of Arcot. Lat. 13° 39' long. 79° 36'

**TRIVELLORE**.—A town in the British district of Chingleput, presidency of Madras, 25 miles W. of Madras. Lat. 13° 8' long. 80°

**TRIVUR**.—A town in the British district of Masulipatam, presidency of Madras, 79 miles N.N.W. of Masulipatam. Lat. 17° 8' long. 80° 40'

**TROMBAY**.—An island, named after the town of that name, situate between the island of Bombay and the mainland of the British district of Tannah. The town is nine miles N.E. of Bombay and in lat. 19° 1', long. 73°

**TRUNULVAUSEL**.—A town in the British district of Tanjore, presidency of Madras, 57 miles N.E. by E. of Tanjore. Lat. 11° 13', long. 79° 56'

**TSAGAING**.—A town of Burmah, on the right bank of the Irrawaddy river, and three miles N.N.W. from Ava. Tagaing or Chagain, was formerly the seat of imperial residence. It is situate "partly at the foot and partly on the side of a rugged hill, the top broken into separate eminences, and on the summit of each stands a spiral temple." Lat. 21° 53', long. 96°

**TSALENG**.—A town in the native state of

Bhotan, 101 miles N.W. by W. from Durrang, and 73 miles N. from Gaspota. Lat. 27° 10', long. 80° 40'

**TSOMORIRI**.—See CHAMORIRI LAKE.

**TSINGUH MYO**.—A town of Burmah, situate on the left bank of the Irrawaddy river, and 49 miles N. from Ava. Lat. 23° 34', long. 96° 2'

**TSALONTSEIK**.—A town of Burmah, situate on the left bank of the Khyawwen river, and 69 miles W.N.W. from Ava. Lat. 23° 14', long. 95° 4'

**TUAVEE**, in the British district of Musnufurngur, lieutenant-gov. of the N.W. Provinces, a village on the route from Kurnal to the town of Musnufurngur, and 39 miles S.E. of the former. Lat. 29° 28' long. 77° 36'

**TUBAH**.—A town in the hill seminary of Jeypoor, in Orissa, 50 miles S. by E. from Jeypoor, and 69 miles N.W. by W. from Vinsgapatam. Lat. 18° 20' long. 83° 38'

**TUDRI HARBOUR**.—See CANARA.

**TUDURU** in Mysore a village on the river Tunga, 14 miles S.E. of Bednora. Lat. 13° 39', long. 75° 14'

**TUGRA**.—A town in the British district of Backergunge, lieutenant-gov. of Bengal, 100 miles E. of Calcutta. Lat. 23° 59', long. 90°

**TUKHT I SULIMAN**, or "Solomon's Seat," in Cashmere, a lofty hill close to the city of Srinagar or Cashmere, on the eastern side. Its rocks are of trap. On the summit is a massively built Buddhist temple, having every mark of extreme antiquity. It is now converted into a mosque. Elevation above the sea 6950 feet. Lat. 34° 4' long. 74° 59'

**TUKHWA**, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Cawnpore to that of Futtahgurh, and 38 miles S.E. of the latter. Lat. 26° 53', long. 80° 3'

**TULEHGAON**.—A town in the British district of Poona, presidency of Bombay, 22 miles N.E. by E. of Poona. Lat. 18° 46', long. 74° 10'

**TULLAGAON**.—A town in Hyderabad, or the Nizam's dominions, situate on the left bank of the Godavary river and 126 miles N.W. by N. from Hyderabad. Lat. 18° 56', long. 77° 41'

**TULLAJA**.—See TALLAJA.

**TULLEGAON**.—A town in Nagpur, situate on the left bank of the Warda river, and 61 miles W. from Nagpur. Lat. 21° 5', long. 78° 15'

**TULL GHAT**.—A pass in the mountains dividing the Tannah and Ahmednuggur districts, through which is a road leading from Bombay to Nasik, and continued thence to Agra. The pass is 65 miles N.E. by N. of the town of Bombay, and in lat. 19° 43', long. 73° 30'

# TUL-TUN.

**TULLODA.**—A town in the British district of Candesh, presidency of Bombay, 76 miles N by W of Maligaum. Lat.  $21^{\circ} 38'$ , long.  $74^{\circ} 14'$

**TULLODEE.**—A town in Nagpoor, situate on the left bank of the Vagh Gunga river and 110 miles S.S.E. from Nagpoor. Lat.  $19^{\circ} 41'$ , long.  $79^{\circ} 48'$

**TULLUCK**, in the Mysore, a town, the principal place of the talloek or subdivision of the same name, near the north frontier, towards the British district of Bellary. In the year 1790 it was stormed and sacked by the Mahrattas. Distance from Chitaldroog, N E, 25 miles. Lat.  $14^{\circ} 38'$ , long.  $76^{\circ} 44'$

**TULLUCKWARRA**, in Gujarat or territory of the Guicowar, a town on the right bank of the river Nerbudda, which is navigable to the sea. The place is rudely fortified. Distance from Baroda, S.E. 30 miles. Branch, N E, 43. Lat.  $21^{\circ} 58'$ , long.  $73^{\circ} 32'$

**TULSIPOOR**, in the territory of Oude, a town near the northern frontier towards Nepal, on the route from Goruckpoor to Kumaon, 80 miles NW of the former, 115 N E of Lucknow. Lat.  $27^{\circ} 30'$ , long.  $83^{\circ} 34'$

**TULWANDEE**, in the Beechna Dooab division of the Punjab, a town situated 18 miles from the left bank of the Chenab, 45 miles N of the town of Lahore. Lat.  $32^{\circ} 15'$ , long.  $74^{\circ} 12'$

**TUMACHARRA**, in the British district of Benares, lieut.-gov. of the N W Provinces, a village on the route from the city of Benares to Allahabad, 66 miles E. of the latter. Lat.  $25^{\circ} 16'$ , long.  $82^{\circ} 45'$

**TUMBONG KHA.**—A town of Burmah, 47 miles E. from the left bank of the Irrawaddy river, and 197 miles N E. by N from Ava. Lat.  $24^{\circ} 12'$ , long.  $97^{\circ} 44'$

**TUMBUDRA.**—A river of the Mysore territory, formed by the junction of the rivers Teonga and Budra, in lat.  $14^{\circ}$ , long.  $75^{\circ} 43'$ . Thence it flows sinuously but generally in a northern direction, for forty-five miles, to Headagatty, in lat.  $14^{\circ} 36'$ , long.  $75^{\circ} 42'$ , whence it turns to the north-east, and flows in that direction for fifteen miles, to Hurry hury, in lat.  $14^{\circ} 30'$ , long.  $75^{\circ} 52'$ . There it again takes a course generally north (but not without many sinuosities) for forty-five miles, to the confluence of the Wurda, which joins it on the left side, in lat.  $14^{\circ} 55'$ , long.  $76^{\circ} 45'$ . From that confluence it turns north-east, and subsequently west, and then flows for 220 miles, to its junction into the Kistnah, on the right side, in lat.  $15^{\circ} 53'$ , long.  $78^{\circ} 19'$ , having a total course of 325 miles. The length of the course of the Budra, the longest of the feeders of the Tumbudra, is ninety-five miles, so that the course of the continuous stream from the source of the Budra to the mouth of the Tumbudra is 420 miles. Ritter, quoting

Oudem, states the confluence to be 332 feet above the sea. On the banks of the Tumbudra are teak forests, the timber of which might, if rendered more buoyant by floats of bamboo, be sent down the Kistnah during the monsoon floods. The river at all times contains water, but in the dry season, the channel being full of rocks, will not admit floats. In the rainy season it swells prodigiously, and is said to be in most places eight or ten feet higher than the top of the rocks. Its stream is there exceedingly rapid and muddy, and filled with large trees swept away by the flood, while in some places rocks come very near the surface. There is reason, however, to think that those great obstacles to navigation are only in the upper part of its course.

**TUMLOOK**, in the British district of Midnapore, subject to the lieut. gov. of Bengal, a town on the right bank of the river Cosmyn, in this part of its course called the Boopmarayn. The site and vicinity are low, and protected by embankments, with a view to security from inundations which, however, notwithstanding these precautions, sometimes occur, and cause much injury. Tumlook is the head-quarters of an agency for the manufacture of salt on government account. According to Wilford, it was originally called Tamraliptas, and was the capital of a realm of some note. There does not appear to be any direct route from Calcutta to this place the absence of such accommodation being probably attributable to the nature of the intermediate country which is marshy and cut up by watercourses. The direct distance is thirty-five miles, circuitously, by water down the river Hoogly and up the Boopmarayn, or lower part of the Cosmyn, 48 travelling distances from Midnapore, E., 40 miles. Lat.  $22^{\circ} 13'$ , long.  $87^{\circ} 59'$

**TUMLOONG.**—A town in the native state of Sikhim situate on the left bank of the Teesta river, and 22 miles N E by N from Darjeeling. Lat.  $27^{\circ} 24'$ , long.  $88^{\circ} 37'$

**TUMOO.**—A town of Burmah, 19 miles W from the right bank of the Khyadwan river and 191 miles NW by N from Ava. Lat.  $24^{\circ} 8'$ , long.  $94^{\circ} 26'$

**TUNGARLA**, in the British district of Broach, presidency of Bombay a town on the northern side of the estuary of a small river falling into the Gulf of Cambay, distance from Baroda, S.W. 43 miles. The Guicowar has it in contemplation to connect his capital of Baroda by railway with this town. Lat.  $21^{\circ} 59'$ , long.  $73^{\circ} 40'$

**TUNDA**, in the British district of Dumch, territory of Sangoor and Nerbudda, lieut.-gov. of the N W Provinces, a town on the route from Dumch to Hoomungabad, 61 miles S W by W of the former. Lat.  $23^{\circ} 34'$ , long.  $78^{\circ} 40'$

**TUNGABUDRA.**—See TUMBUDRA.

# TUN—TOT

**TUNGER**, in the district of Peshawar division of the Punjab, a town situated on the left bank of the Landye river, 30 miles N of the town of Peshawar Lat. 34° 18, long 71° 45'

**TUNGEUNG**, in Buzahr, a pass in Kozanwar over a lofty ridge separating the valley of the Bessa from that of the Taglakhar. Elevation 13,729 feet above the sea. Lat. 31° 33', long 73° 32'

**TUNGUDA**.—A town in the British district of Guntoor, presidency of Madras, 49 miles N W by W of Guntoor Lat. 16° 40', long 79° 54'

**TUNGUL**.—A town in the native state of Sikkim, situate on the left bank of the Teesta river, and 60 miles N N E from Darjeeling Lat. 27° 52', long 88° 37'

**TUPOOKRA** in the territory of Alwar district of Tijara, under the political superintendence of the Governor-General's agent in Rajpootana, a town 44 miles S W of Delhi. At the close of the last century when this region was overrun by the Maharrattas, Tupookra with its vicinity was, along with some other districts, granted by one of their chiefs to the adventurer George Thomas and at the close of the war in 1803 was by the British government transferred to the Rao rajah Lat. 26° 7' long 76° 54'

**TUPPUL** in the British district of Allypore, lieutenant-gov of the N W Provinces, a town on the route from Allypore to Rewaree, 81 miles W by N of the former Lat. 23° 2', long 77° 39'

**TUPURANUH**, in the British district of Muscat, lieutenant-gov of the N W Provinces, a village on the route from Kutnal to Maerut, and 24 miles S E of the former Lat. 29° 29' long 77° 19'

**TURANNA** in the territory of Indore, or possessions of Holkar's family a town on the route from Goona to Oojein, 129 miles S W of the former 23° N E of latter It is situate on the east or right bank of the Chota Kalas Sindh river Population about 10 000 Lat. 23° 18' long 76° 5'

**TURAOIN**.—See TIRGAW

**TURIVAKARAY**, in the Mysore, a town the principal place of a talook or subdivision of the same name Here is a fortress consisting of an outer and an inner fort strongly defended by a ditch and mud wall the town is uninclosed There is here a very fine tank, built, according to tradition, with a treasure, the concealment of which was pointed out by the divinity Ganesh. Distance from Seringapatam, N W, 84 miles. Lat. 13° 10' long 77° 44'

**TURKANAMBI**.—A town in the Mysore, 46 miles S by E from Seringapatam and 53 miles N by W from Coimbatore Lat. 11° 48', long 76° 51'

**TURKOD**.—A town in the British district

of Dharwar presidency of Bombay 13 miles N W by N of Dharwar Lat. 15° 36', long 74° 59'

**TURKOOAH**.—A town in the British district of Midnapore, lieutenant-gov of Bengal, 34 miles S of Midnapore Lat. 21° 56', long 87° 28'

**TURKOOOLWA**, in the British district of Gorakhpore, lieutenant-gov of the N W Provinces, a town on the route from Gorakhpore to the Sarun district, 34 miles E by S. of the former Lat. 26° 35' long 83° 55'

**TURMA**.—A town on the south west frontier of Bengal, in the native state of Khenjur 81 miles E. by N from Sumbulpore and 90 miles N W by N from Cuttack. Lat. 21° 35', long 85° 16'

**TUROWLEE**.—A town in the British district of Muttra, lieutenant-gov of the N W Provinces. Lat. 27° 40' long 77° 39'

**TURPOONGY**.—A town in the territory of Nagpore 160 miles E. by N from Nagpore, and 98 miles S S E from Ramguth. Lat. 21° 30', long 81° 35'

**TURRAH**, in Guzerat, or the territory of the Guccowar, a town near the right bank of the river Bunas, in a rugged, ill-cultivated country thinly inhabited by Bhels, Coolies, and similar semi-barbarous tribes. Distance from Ahmedabad N W 85 miles Lat. 23° 55' long 71° 43'

**TURRANNA**.—A town in the native state of Indore, or territory of Holkar's family, situate on the right bank of the Chota Kalas Sind river and 44 miles N E. from Indore Lat. 23° 17' long 76° 4'

**TURROCH**.—See OTRACH

**TURRYE**.—A town in the British district of Hyderabad, province of Scinde presidency of Bombay 53 miles S S E. of Hyderabad Lat. 24° 40', long 68° 45'

**TURRY KAIRA**.—A town in the Mysore, 52 miles E. by S. from Bednore, and 107 miles N W by N from Seringapatam. Lat. 13° 45', long 75° 53'

**TURYA**.—A town in the territory of Nagpore 180 miles E. by N from Nagpore, and 106 miles S S E. from Ramguth. Lat. 21° 21', long 81° 36'

**TURYA SOOJUN** in the British district of Gorakhpore, lieutenant-gov of the N W Provinces, a town on the route from Gorakhpore to the district of Sarun, 56 miles E. of the former Lat. 26° 36' long 84° 17'

**TUTICORIN** in the British district of Tinnevely presidency of Madras, and the only important port in the district, is situate on the north-west coast of the Gulf of Mannar. It has a safe roadstead, with good anchorage, sheltered on the west, north, and south by the mainland of Tinnevely, and on the east by a group of islets, extending about eight miles from north to south The trade of this place

was once considerable the exports having formerly in one year amounted to 865 000L, subsequently a decrease appears to have taken place, but latterly the increased briskness in the cotton trade has caused a great improvement. No fewer than 8 000 bales of cotton have been in less than fifteen months shipped from it to England direct, 3 000 more intended for the China market, were sent from it to Madras by coasters, to be finally shipped there, while 1 000 were sent by land from Tinnevely for transmission to England. The measures adopted for deepening the Pann beam passage, through the reef between Ceylon and the mainland, have vastly increased the traffic of this port, by opening a direct passage for shipping between it and the Bay of Bengal, thus obviating the tedious and hazardous voyage round the island of Ceylon. Pearl banks exist in the vicinity of the town, which the government have authorised to be examined. Distance from Tinnevely E 33 miles, Madras, S W 325 Lat. 8 48 long 78 12'

**TUTTARAB.**—A town in the British district of Rangpur, lieut gov of Bengal, 56 miles W by N of Rangpur Lat 23° 51', long 84 40'

**TUTWAS.**—A town in the Rajpoot state of Jodhpoor or Marwar, 66 miles N by E from Jodhpoor and 54 miles S. from Beekneer Lat. 27 14, long 78 19'

**TUWARA.**—A town in the native state of Gurhwal, situate on the right bank of the Bhageruttee river, and 53 miles N E from Dehra Lat 30 51 long 78 41

**TUZEIGUNG.** in Bussahir, a village of Koonawar at the northern base of the lofty Fergul, hence sometimes called the Tuzhigung mountain Lat 31 50' long 78 48'

**TWENGNGAGE.**—A town of Barmah, situate on the left bank of the Irrawady river, and 83 miles N from Ava. Lat. 28 4', long 96 1'

**TWENTY FOUR PERGUNNAHS.**—A British district under the lieut gov of Bengal. Its name is derived from its formerly containing twenty four divisions called pergunnahs in the vernacular language. It is bounded on the north east by the British district Baraset on the east, south-east, and south by the Sunderbunds, on the south west and west by the river Hoogly separating it from the British districts of Hoogly and Hidgees. It lies between lat. 21 59'—23 48' long 88 6'—88 43' it is sixty miles in length from north to south, and thirty two in breadth the area, according to official return, is 1 186 square miles. The whole country is throughout a plain, little elevated above the level of the sea, and traversed by numerous streams and water courses. The river Hoogly considered by the Brahmins as the revered Ganges of mythological celestials, touches on the district at its north west corner, at Pultia Ghat, and flowing

southward ten miles, is the boundary between the British district Hoogly and this district, into which it passes at that distance, and taking a course tending to south-west for twenty miles through the district flows by Calcutta. Passing out of the district at Bhujbhuy it continues to flow southward for twenty four miles, to the mouth of the Roopnarain in lat 23° 14 long 88 8' for that distance forming the boundary between this district and Hoogly. At the confluence of the Roopnarain, the Hoogly turns south-eastward and for twenty four miles forms the south western boundary of the district, passing finally away from it in lat. 22 long 88 12'. Throughout the whole course of seventy eight miles for which the Hoogly is connected with this district, it is navigable for the largest ships as far as Calcutta. The Pali a watercourse connecting the Salt Lake, in the environs of Calcutta, with the inlets of the Sunderbunds, extends about ten miles in a direction from west to east and though rapid and deep yet does not appear to be navigated. A considerable offset from the Hoogly immediately south of the city of Calcutta, takes a direction south east and flowing through this district twenty eight miles to Badurtulla, passes the eastern frontier into the Sunderbunds, through which it winds, and subsequently by very sinuous channels, opens a communication with the main stream of the Ganges, in the vicinity of Commercolly. This navigation, though arduous and tedious being 177 miles longer than that directly upwards through the Hoogly is very important being at all times navigable for large craft, and affording a route by water to the North Western Provinces when the more direct channel can scarcely be navigated by small boats.

In this district there are three seasons, as in other parts of Bengal. The hot season commences in the early part of March and during its continuance the temperature is very high in some instances reaching 112 in the shade, and 140 in places exposed to the direct rays of the sun. The hot season is terminated early in June by the periodical rains brought by the south west monsoon, and which continues to the middle of October. The annual rain fall is considerable amounting frequently to eighty inches. In November the weather becomes clear settled and comparatively cool, though the days are often rather warm. December January and the early part of February constitute the most agreeable and salubrious part of the year though the weather in the close of the last month becomes variable, and sometimes rather unpleasant from warmth.

There is a considerable quantity of jungle in the eastern part of the district, harbouring tigers, tiger-cats, hyenas, wild swine, wild buffaloes, and deer jackals are everywhere numerous. The domestic animals are chiefly small horned cattle sheep, and goats. Horses are not numerous and are probably for the most part imported. Bullocks are generally

# TYO UJE.

used by the natives both for draught and for bearing burthens

The cocoanut-palm is cultivated to considerable extent, as well as the toddy-palm, from the fermented sap of which a spirit is obtained by distillation. Of other fruits, there are the mango, the jak (*Artocarpus integrifolia*), guava, tamarind, mulberry custard-apple, and many others indigenous, besides a variety introduced from foreign countries.

The articles of commerce are native cotton cloths and coarse silk cloths, a small quantity of cotton, hemp, coir or rope made of cocoanut-fibre, cocoanuts, betel nuts, teak and some other timber, ginger, turmeric, yams, sugar and molasses obtained by insuinating the sap of palms, honey, wax, oil of mustard seed, rice, a small quantity of indigo, hides, salt-fish, sugar and rum. The amount of population is given under the article BENGAL. Barrackpore, a cantonment of native troops, is situated within the district as is also Dumdum formerly the head artillery station for Bengal Calcutta though included locally within the limits of the district is a separate and exclusive jurisdiction. Alipore, where the civil establishment is located, Kidderpore as well as Barrackpore and Dumdum, are noticed under their respective names in the alphabetical arrangement.

The district of the Twenty four Pergunnahs was the earliest territorial possession of any considerable extent obtained by the East-India Company to whom it was granted in the year 1757 by the Nabob Jaffer Ally Khan.

TYOOR.—A town in the Mysore, situate on the right bank of the Canavery river and 18 miles S.E. by S. from Seringapatam. Lat. 12° 13', long. 76° 53'.

## U

UBDOOLPOOR, in the British district of Ghazepore, lieutenant-gov. of the N.W. Provinces, a town with a population of 6,684 inhabitants, 20 miles N. from Ghazepore. Lat. 25° 50', long. 83° 44'.

UBHOO, in the British district of Bhutteeana, lieutenant-gov. of the N.W. Provinces, a village near the north western frontier. Lat. 30° 9', long. 74° 10'.

UCHARA.—See OCHETRA.

UCHARA.—A town in the native state of Rewah or Baghelound 84 miles W. by S. from Hwah and 44 miles S.E. by E. from Pannah. Lat. 24° 23', long. 80° 51'.

UCHNERA, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a town on the route from the city of Agra to that of Bhutpore and 16 miles W. of the former. Lat. 27° 10', long. 77° 49'.

UCHRA.—See ACHRA.

UDELEE.—A town in the British district of Ahmedabad, presidency of Bombay, 78

miles S.S.W. of Ahmedabad. Lat. 22°, long. 72° 6'.

UDEPOOR, in the territory of Gwalior, or possessions of Scindia's family, a town situate at the base of a remarkable conical hill. There was formerly a fort on the hill, and its ruins, as well as those of very many others scattered around to a great extent, indicate that it was once a place of much greater importance than at present. Distance S. of Gwalior 160 miles. Lat. 23° 52', long. 78° 9'.

UDHUR, in the British district of Goergaon, lieutenant-gov. of the N.W. Provinces, a village on the route from Alwar by Ferozpoor, to Delhi, and 52 miles S.W. of the latter. Lat. 28° 6', long. 77° 5'.

UDIAMPER, in the territory of Cochin, under the political management of the presidency of Madras, a town celebrated as the place where, in A.D. 1599, Meneses the Portuguese archbishop of Goa compelled the Syrian Christians of St. Thomas ostensibly to conform to papacy and judicially burned their ritual and doctrinal books. Bartolomeo observes, that it has become a very poor place, which however retains a church of the Syrian Christians. Distance from city of Cochin, N.E. 10 miles. Lat. 10° 2', long. 76° 29'.

UDUMPOOR, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Almora, and 38 miles N. of the former. Lat. 28° 47', long. 79° 25'.

UETHAM, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village on the route from Fort Almora to the Juhawar or Unta Dhura Pass, 43 miles N.E. of Almora. It is situate close to the river Surjo on the left bank of which is encamping ground, and supplies are obtainable. Lat. 29° 57', long. 79° 57'.

UFZULGURH, in the British district of Bijnour, lieutenant-gov. of the N.W. Provinces, a fort and town on the route from Pilleebheet to Nagena, and 15 miles S.E. of the latter. Distance N.W. from Calcutta, and Moradabad, 938 miles. Lat. 29° 24', long. 78° 44'.

UGOOHULLY.—A town in the Mysore, 81 miles W.N.W. from Seringapatam, and 58 miles E. by N. from Mangalore. Lat. 13° 3', long. 75° 44'.

UHEAN.—A town in the British district of Amherst, one of the Tonassarim provinces, 20 miles S.E. by E. of Moulmein. Lat. 16° 20', long. 97° 57'.

UHEERA.—See HEURA.

UHROW, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Almora, and 35 miles N. of the former. Lat. 28° 46', long. 79° 28'.

UJEETPOOR, in the pargana of Rampoor, in Rohilcond, a village on the route from Bareilly 997

reilly to Moradabad, and 41 miles N W of the former Lat. 26 45', long 79 4'

**UJI**, in the British district of Gorakhpur, lieut.-gov. of the N W Provinces, a small town three miles N of the left bank of the Gogra. It contains 100 houses, and consequently allowing six persons to each a population of 600 Distant W of Gorakhpur cantonment 42 miles Lat. 26 44' long 82° 37'

**UKBURPOOR**, in the British district of Cawnpore, lieut. gov. of the N W Provinces, a town on the left bank of the Jumna, 24 miles E of Calpee Lat. 26 4' long 80 10'

**CKBURPOOR**, in the British district of Cawnpore lieut.-gov. of the N W Provinces, a town on the route from Cawnpore to Jalloun, 26 miles W S.W. of the former Lat. 26 23', long 80

**UKHALIYA**.—A town in Nepal, situate on the left bank of the San Coos river, and 116 miles E.S.E. from Khatmandou. Lat. 27 6', long 87

**UKHTA**.—A town in the British district of Barun, lieut. gov. of Bengal, 48 miles E by S. of Betnah Lat. 26 40', long 85° 20'

**UKLEEMPOOR**, in the British district of Goorgoon, lieut.-gov. of the N W Provinces, a village on the southern shore of an extensive fresh water jhil or lake. Distance S.W. from Delhi 50 miles Lat. 27 58', long. 77 2'

**UKPA** in Bussahr, a village in the district of Koonawar, on the right bank of the Sutlej along which the route proceeds, about a mile from the stream over a rocky surface, and amidst pine-forests. Ukpa is at the elevation of 8 450 feet above the sea. Lat. 31 35', long 78 28'

**ULAYI**, in the British district of Budaon the principal place in the pergunnah so called, is situate on the right bank of the Ganges. Lat. 27 51', long 79

**ULLAKE**, in the Rajpoot state of Jodhpoor a village on the route from Nagar to Beekaneer and 14 miles N W of the former It contains eighty houses, supplied with water from two tanks and three wells. Lat. 27 20' long 73 40'

**ULLAGAUVERY**—A town in the British district of Tinnevely presidency of Madras, 34 miles N of Tinnevely Lat. 9 18, long 77 41

**ULLAH BUND**, on the southern frontier of Sind a ridge of earth of slight elevation, thrown up by the earthquake of 1819 across the Phurraun or Poonoon branch of the Indus The name signifies the mound of God " and was given to it by the natives, in allusion to the fact of its not having been made by human efforts. It is thus described by Burnes The Ullah Bund which I now examined with attention was, however the most singular consequence of this great earthquake To the eye it did not appear more elevated in one

place than another, and could be traced both east and west as far as it could reach The natives assigned it a total length of fifty miles It must not, however, be supposed to be a narrow strip, like an artificial dam, as it extends inland to Ramooka Bazar, perhaps to about a breadth of sixteen miles, and appeared to be a great upheaving of nature Its surface was covered with saline soil, and I have already stated that it consisted of shells, clay, and sand " In 1826, a great inundation of the Indus poured such a stream over the desert, that it cut through the Ullah Bund forming a channel thirty five yards wide and about thirty feet deep and immediately below that bank expanded into a lake covering a surface of 2 000 square miles. This watery expanse received from Burnes the name of the Lake of Sidree being that of a small fort which it overwhelmed The place where the Ullah Bund was intersected by the Phurraun is in lat 24 21, long 69 11

**ULLEEGUNGE**, or **ALLEEGUNGE**, in the British district of Bareilly lieut.-gov. of the N W Provinces, a town on the route from the city of Agra to the town of Bareilly and 13 miles S.W. of the latter Supplies may be had here in abundance. Lat. 28° 20', long 79 19'

**ULLEEGUNGE**, or **ALLEEGUNGE**, in the British district of Farrukhabad lieut. gov. of the N W Provinces, a town on the route from the cantonment of Allypore to that of Futeahgurh, and 32 miles N W of the latter It is surrounded by a mud wall, and has a bazar water is plentiful from wells the town contains a population of 8,429 persons Lat. 27 29 long 79 14'

**ULLEHPOOR**.—A town in the British district of Bynour lieut. gov. of N W Provinces. Lat. 20 19 long 78 45'

**ULLYNUGGURH**—A town in the British district of Madras, presidency of Madras, 44 miles W by N of Madras. Lat 10 8', long 77 33'

**ULTAFGUNJ** in the territory of Oude, a village on the route from Azimgurh to Fyzabad, 56 miles N W of the former 30 S.E. of the latter situate two miles S.W. of the right bank of the Deocha or Gogra. Lat. 26 39', long 82° 28'

**ULTEAH**—A town in the native state of Kolapoor presidency of Bombay, 14 miles E.N.E. from Kolapoor and 66 miles N from Belgaum. Lat. 16 47, long 74 30'

**ULUKDEO**, in the British district of Bareilly division of Filibhset, lieut. gov. of the N W Provinces, a town on the route from the town of Filibhset to Nugana, and 40 miles N W of the former Lat. 28 59', long. 79 20'

**ULWAR**.—See **MACHERY**

**UMARAWUTTY**—A town in the British district of Guntoor, presidency of Madras, 20

# UMA--UNO

miles N of Guntoor Lat. 16° 34', long 80 26'

**UMARPOOR** in the British district of Myspoore, lieut. gov. of the N W Provinces, a town lying on the route from the cantonment of Aligarh to that of Futehgarh, and 47 miles S E. of the former. It has a bazar Lat. 27 42' long 78 48'

**UMBALLA** — A British district of Sirhind within the Cis-Sutlej division of territory its centre is in lat. 30 23 long 76 44 its area is stated at 1 832 square miles, and its population as amounting to 782,017 Umballa is one of those possessions which previously held by a Sikh sirdar has escheated to the East-India Company in default of rightful heirs This district was seized by Ranjeet Singh during one of his marauding expeditions to the left of the Sutlej and that aggression occasioned in 1809 the movement of British troops which resulted in the conclusion of a treaty with Ranjeet Singh by which he was required to withdraw his army from the left bank of the Sutlej and to relinquish his recent conquests in Sirhind The climate of Umballa is very hot in 1835 the thermometer reached 114° in the shade in June and in January of the same year it at no time fell lower than 33

**UMBALLA** — A town, the chief place of a British district within the tract of country called Sirhind It lies on the route from Kurmool to Loodiana, 55 miles N of the former 69 S E. of the latter It is a large walled town situate in a level and highly-cultivated country well supplied with water, and capable of furnishing abundant supplies. The houses are built of burnt brick but the streets are in general so narrow as scarcely to admit the passage of an elephant. The population of the town is given at 21 962 There is a fort at the north east of the town and under its walls the encamping ground of the British troops Height of the town above the sea 1 040 feet distant from Calcutta, N W by Lucknow Delhi and Kurmool, 1,040 miles. Lat. 20 24 long 76 49'

**UMBARI** in the British district of Dehra Doon, a village on the route from Dehra to Kalsi and 18 miles N W of the former place, situate close to the left bank of the Jumna. Lat. 30 27', long 77 52'

**UMBUD** — A town in Hyderabad, or territory of the Nizam, 17 miles S by W from Jaulnah, and 84 miles N E by E from Ahmednuggur Lat. 19 37', long 75 54'

**UMBURTUH**, in the British district of Saharanpoor lieut. gov. of the N W Provinces, a town on the route from Kurmool to Saharanpoor 16 miles W S W of the latter Lat. 29 51, long. 77 24

**UMILEA** or **UNULEA** in the British district of Cawnpore, lieut. gov. of the N W Provinces, a village on the route from the cantonment of Cawnpore to that of Futehgarh,

and 14 miles N W of the former Lat. 28° 36', long 80 16'

**UMIAH**.—A town of Malwa, in the native state of Bhopal, 38 miles W S W from Bhopal, and 78 miles E N E. from Indoor Lat. 23° 7', long 76 54

**UMLYALLA** in Guzerat, or the territory of the Guicowar a town situate on a small river tributary to the river Sabarmuttee distance from Ahmedabad, N E., 34 miles. Lat. 23 11 long 73 4

**UMMERAPOORA**—A town of Burma, situate on the left bank of the Irrawady river and nine miles N E from Ava Lat. 21 57' long 96 7

**UMMUREKUNTUK**.—See **AMARAKANTAK**  
**UMRAPOOR**—A town in Hyderabad, or territory of the Nizam, situate on the left bank of the Payne Gunga river and 90 miles S W from Ellchoopoor Lat. 20 23 long 76 30

**UMREYLEE**—See **AMREELI**

**UMROHAH**, in the British district of Moradabad lieut. gov. of the N W Provinces, a town on the route from the town of Moradabad to that of Meerutgur and twenty miles N W of the former place It is of considerable size, having a population of 72 677 inhabitants, and is situate in an open country, partially cultivated Distance N W from Calcutta 908 miles. Lat. 28 54 long 78 38'

**UMROUDA** in the British district of Cawnpore lieut. gov. of the N W Provinces, a village on the route from Calpee to Etawa, and seven miles N of the former Lat. 26° 13', long 79 51

**UMUR SAGUR**, in the Rajpoot state of Jeaulmer a village on the route from Roore, in Sindh to the town of Jeaulmer and two miles N W of the latter It contains about twenty shops, and water is obtainable from tanks. Lat. 26 55' long 70 57

**UMURGURH**—A town in the native state of Narbakh Cis-Buthing territory 40 miles W from Ambala, and 34 miles S E. from Loodiana Lat. 30 28, long 76 9'

**UMUREKHERRA**.—See **ANWULKHERRA**

**UNA** in the Julinder Doon division of the Punjab a town situate eight miles from the right bank of the Sutlej 45 miles E N E. of the town of Julinder Lat. 31 28 long. 76° 19

**UNAO** in the territory of Onda, a small town on the route from Cawnpore to Lucknow 10 miles N E. of the former 43 S W of the latter It has a bazar and is well provided with water Lat. 26 33, long 80° 33

**UNCHAGANW**, in the British district of Pilibheet, lieut. gov. of the N W Provinces, a village on the route by Nankamath to Roderpoor from the town of Pilibheet, 35 miles N W of the latter situate one and a half miles west of the right bank of the river Goula. Lat. 28 58, long 79° 36'

# UNC-UNT

**UNCHAPAHAR**, in the Rajpoot territory of Shekswatie, a fort five miles S.E. of the town of Seekar. The whole surface of the hills covered with jungle, chiefly of oak, except the summit, which is a platform or small table-land, about a mile in length and a hundred yards in breadth. Distance S.W. from Delhi 140 miles, N.W. from Jesspur 55. Lat. 27° 32' long 76° 20'

**UNCHAGAN**, in the district of Aldeman, territory of Oude a village three miles S.W. of the right bank of the Toms (North-eastern) 14 S. of Fyzabad. Butter estimates the population at 400 all Hindoos. Lat 26° 38', long 82° 9'

**UNDERA**, in the British district of Musaf furngur, heut. gov of the N.W. Provinces, a village on the route from Kurnal to Meerut and nine miles S.E. of the former. Lat. 28° 38', long 77° 9'

**UNDERSOOL**.—A town in the British district of Ahmednugur, presidency of Bombay 53 miles E. of Nasik. Lat 20° long 74° 38'

**UNGHA**.—A town in the British district of Behar heut. gov of Bengal 41 miles N.W. of Shergotty. Lat. 25° long 84° 28'

**UNGGOOL**.—See **ANGGOOL**

**UNGOTHA** in the British district of Agra, heut. gov of the N.W. Provinces, a village on the route from the city of Agra to that of Bhurtpore and 11 miles W. of the former. Lat. 27° 10', long 77° 57'

**UNJENGATUM**.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 14 miles W.S.W. of Ellichpore. Lat 21° 6' long 77° 21'

**UNJUNVEL**.—A town in the British district of Ratanagiri, presidency of Bombay, 39 miles N. of Ratanagiri. Lat 17° 31', long 73° 15'

**UNKARJEE MAHARAJ** or **UN DATTA**, in territory of Gwalior, or possessions of Solanki a family, a small town with bazar, on the south side of an island in the river Narbudda. Lat. 22° 13' long 76° 15'

**UNKOLA**.—The principal place of the subdivision of the same name in the British district of North Canara, presidency of Madras a town two miles from the coast of the Arabian Sea, or North Indian Ocean. It has a ruinous fort and a bazar but few inhabitants, as in this part of the country the population does not settle in numbers in any spot, but is dispersed in hamlets and farms. Distant from Mangalore, N. 130 miles, Bombay S., 310. Lat. 13° 40', long 74° 22'

**UNNOOSORA**.—A town in the British district of Pooree, heut. gov of Bengal 42 miles S.E. of Cuttack. Lat 18° 56', long 86° 11'

**UNGULA**, in the British district of Goruk pore, the principal place of the pergunnah of

the same name, a small town on the route from the town of Asimgurh to that of Gorukpore 48 miles N. of the former 13 S. of the latter. The road in this part of the route is much cut up the country level, much overrun with forest and jungle. It is situate near the river Amu the channel of which is in that part thirty or forty yards wide and even in the dry season filled from side to side with a deep though nearly stagnant, body of water. The route from Asimgurh to Gorukpore crosses it by a bridge. Distant N. of Benares 90 miles. Lat. 26° 32', long 83° 21'

**UNOWAH** in the British district of Allah abad, heut. gov of the N.W. Provinces, a village on the route from the cantonment of Allahabad to Futehpore and 33 miles N.W. of the former. Lat 25° 37' long 81° 29'

**UNRAWATTY RIVER**, a tributary of the Taptee, rises in lat. 21° 26' long 75° 39' and flowing for thirty three miles westerly through a portion of Holkar's territory and south westerly for thirty miles through the British district of Candeish, falls into the Taptee river in lat 21° 20', long 74° 55'

**UNTA DHURA** on the northern frontier of the British district of Kumaon heut. gov of the N.W. Provinces a pass on the northern frontier towards Hundas, or South western Tibet. It lies over a ridge, which is to the north of the main chain of the Himalayas, and though inferior as to its summit than the greater range, has such continuity of elevation as to render it necessary to ascend considerably in proceeding towards Hundas from the deep gorges of Kumaon. The crest forms the water line dividing the streams flowing southwards into the basin of the Ganges from those taking a northerly direction towards the Sutlej as the Lonka, a small river rising on the northern declivity of the pass, has a due northerly course, and the Gunka, rising on the southerly declivity proceeds southwards to the Gores, by which its water is conveyed to the Kales, and ultimately to the Ganges. The view towards Tibet is little striking the actual elevation is, however very great. Weller's observations by the boiling water point expating it to come out at 18,540 feet above the level of the sea. but he considers this to be probably a good deal in excess and Manson estimates it at 17,500. In the end of May Weller found a dreadfully cold wind blowing and was informed that it becomes awful at the end of the rains, sometimes sweeping down the precipitous numbers of the laden sheep and goats which are the beasts of burthen usually employed in the trade between Kumaon and Hundas. Even in the end of May in 1841, Batten found the pass closed by heavy snow, and encountered imminent danger in attempting it. Webb also found it completely closed with snow in the beginning of summer. It is sometimes called the Juwahir Pass as the route lying over it passes up the Juwahir valley by the courses of the rivers Gores and

**Gunka.** According to Garden there is "a camping-ground on the bank of a stream at the northern base of the Himalaya range a few stunted bushes to be found for firewood, no supplies. The Thibet frontier is distant four miles north, marked by a low wall." He adds, that snow lies on the pass eleven months in the year. Distant N from Fort Almora 156 miles. Lat. 30° 35' long 80° 17'.

**UNTOOR.**—A town in Hyderabad, or territory of the Nizam, 38 miles N from Dowlatabad, and 50 miles E from Malhagum. Lat. 20° 29' long 75° 16'.

**UPKOT** in the British district of Kumaon, lieutenant-gov of the N.W. Provinces, a village on the route by the course of the Surjo from Almora fort to the Unta Dhura Pass. It is situated on the right bank of the Surjo, 42 miles N.E. of Almora. Lat. 29° 57', long 79° 54'.

**UPNI** and **KILANSIR** in the Rajpoot state of Beekaneer two contiguous villages on the route from Rotungurh to the town of Beekaneer, and 45 miles E of the latter. They contain 170 houses, supplied with water from two wells 120 feet deep. Lat. 27° 54', long 74° 6'.

**UPPAEL** in the British district of Ghazee pore lieutenant-gov of the N.W. Provinces, a town with a population of 5,946 inhabitants, 37 miles N.E. of Ghazee pore. Lat. 25° 49' long 84° 10'.

**UPSUNG**, in Bussamir a stream of the district of Koonawar, takes its rise in lat. 31° 48' long 78° 48' on the western declivity of a lofty mountain running in a direction from north to south and forming the boundary between the British and Chinese empires, and after a very rapid course of about five miles, generally in a northerly direction falls into the Sutley on the left side. Gerard describes the ravine down which it flows as peculiarly wild and rugged. — Before is the abyss of the Oopung the rocks are grouped together and menace the traveller with horror and he expects to be annihilated at every step. The deep indentations, formed by rushing torrents, must be followed into their darkest windings, and it is in such situations, when the footpaths are tardy and insecure, that the frail outline of the cliffs presses on the imagination. The bed of the Upsung where crossed by Gerard about a mile above the confluence with the Sutley was found to have an elevation of 10,989 feet above the sea.

**URDAPOOR.**—A town in Hyderabad, or territory of the Nizam, eight miles from the left bank of the Godavery river and 151 miles N.W. by N from Hyderabad. Lat. 19° 17', long 77° 27'.

**URDUN.**—A town in the peninsula of Kattywar, province of Guzerat, 47 miles S. by E from Rajkote, and 63 miles N from Dru Fort and Island. Lat. 21° 39', long 70° 56'.

**URERREAL.**—A town in the British district of Purneah, lieutenant-gov of Bengal, 23 miles N by E. of Purneah. Lat. 26° 4', long 87° 39'.

6 K

**URIDACHELLUM.**—A town in the British district of South Arcot, presidency of Madras, 31 miles W.R.W. of Cuddalore. Lat. 11° 32' long 79° 23'.

**URJUNPUR**, in the British district of Mympoore, lieutenant-gov of the N.W. Provinces, a village on the route from the cantonment of Aligurh to that of Futehgurh, and 51 miles S.E. of the former. Lat. 27° 41' long 75° 52'.

**URKI.**—A fort of the hill state of Bhagal, situated amidst the steep and lofty ridges on the eastern frontier. It was garrisoned by the Gourkha army during the war between that power and the British, who acquired possession of it by the capitulation which preceded the treaty of 1816. Lat. 21° 9' long 77° 2'.

**URMULLA.**—A town in the British district of Balasore, lieutenant-gov of Bengal, eight miles W of Balasore. Lat. 21° 30', long 86° 53'.

**URNIA.**—A town in the native state of Indore or territory of Holkar, 47 miles N from Indore and 93 miles S.E. by S. from Neemuch. Lat. 23° 21' long 75° 44'.

**URBOUL**, in the British district of Cawn pore, lieutenant-gov of the N.W. Provinces, a town on the route from the cantonment of Cawnpore to that of Futehgurh, and 42 miles S.E. of the latter. In 1803 the British army encamped on the spacious plain around the town preparatory to the expedition under General Lake against the Maharrattas. Lat. 26° 54', long 80° 6'.

**UREUKTA**, in the hill state of Joobal, a mountain forming part of the great range connecting Wartsu peak with that of Chur. It is covered at the top with deep and lofty forests of pines, oaks, and sycamores, with which are intermixed birches, holies, and yews. The formation of the rock is much-alate mixed with veins of quartz. The route from Obepal to Deohra passes by a good mountain road over the crest of the mountain, between two summits, each about 11,000 feet. The highest point of the route has the elevation of 5,729 feet above the sea. The pass is styled that of Puthur Nulla in the trigonometrical survey. Lat. 31° 3', long 77° 44'.

**URRUNDE**, or **RIND** a small river of the Doab, rises in the British district of Mympoore about 35 miles N.W. of the town of that name, and in lat. 27° 37' long 78° 34'. Its headwaters are on the south west or Jumna side of the crest or slightly elevated tract which marks the interior of the Doab nearly equidistant from the Ganges and Jumna. The course is tortuous but generally in a south-easterly direction to its discharge into the Jumna on the left side, in lat. 25° 54', long 80° 37' after a total length of about 245 miles. It is fordable where crossed by the route from Etawah to Futehgurh, seventy-five miles from its source, measured along the river banks. Where crossed by the route from Calpee to Futehgurh 135 miles from its source, its channel is forty yards wide, with

# URB—YAI

steep banks, and in the dry season the stream is not more than knee-deep.

**URRUR**, in the native state of Travancore, a town near the coast of the Northern Indian Ocean, among the numerous salt-water lakes and islets in that part of the country. Distance from Cochin, S.E., nine miles. Travancore, N 122 Madras, S.W. 440 Lat. 9° 52' long 76° 22'

**URSEEMAREE**.—A town in the territory of Nagpore 56 miles N.E. by E. from Rattun poor, and 118 miles N.W. from Sumbulpore Lat. 22° 45', long 82° 48'

**URUBA**, in the Rajpoot state of Jodhpore a village on the route from Balotra to the city of Jodhpore and 80 miles N.E. of the former. The road in this part of the route is good, and lies through a level country, rather fertile and cultivated Lat. 26° 5', long 72° 45'

**URWUL**, in the British district of Behar, lieut.-gov. of Bengal, a small town on the right bank of the river Sone. Though an insignificant place, it has an indigo-factory, and good paper is manufactured here. It is the principal place of a thana or police-division, well cultivated in general, and producing largely opium and grain though a few parts have been impoverished by sand blown from the wide bed of the Sone. The thana contains 313 villages, and a population of 50,554 persons of whom the Brahmunis are three to one to the Musalmans. The town contains 194 houses, and a population of 1,000. Distant S.W. from Patna 41 miles, E. from Benares 103 Lat. 25° 11' long 84° 42'

**USABAD** in the British district of Agra, a village on the route from the city of Agra to Mynporee, and 29 miles E. of the former. The road in this part of the route is good. The country cultivated, and studded with small villages. Lat. 27° 8', long 78° 30'

**USEGAH**, or **ASKEGHA**, in the British district of Ghazee-poor lieut. gov. of the N.W. Provinces a town with a population of 7,807 inhabitants, 10 miles N.E. of Ghazee-poor Lat. 25° 53' long 84° 18'

**USHUN**, a small river of Kacothal, rises a few miles east of Simla, at the southern base of the mountain of Mahabau, in lat. 31° 6', long 77° 18', and holding a course first in a south-westerly and then in a south-easterly direction, falls into the Gorree, in lat. 30° 54' long 77° 17', after having run a distance of about twenty-five miles.

**USIL** in Gurwal, a village on the right bank of the Supun, here a powerful and amazingly rapid torrent. It was a secondary station in the great trigonometrical survey of the Himalaya. Elevation above the sea 8,936 feet. Lat. 31° 7' long 78° 25'

**USLANA**, in the British district of Dumoh territory of Sangor and Nerbudda, lieut.-gov. of the N.W. Provinces, a town on the route

from Dumoh to Tehree, 18 miles N.W. of the former Lat. 23° 57', long 79° 22'

**USNI**, in the British district of Futeh-poor lieut. gov. of the N.W. Provinces, a town on the right bank of the Ganges, nearly opposite Dalmau, and 15 miles N.E. of the town of Futeh-poor Lat. 26° 8', long. 81° 6'

**USUDPOOR** in the British district of Buddaon, lieut. gov. of the N.W. Provinces, a town on the route from Booldandshur to Buddaon, 42 miles W. by N. of the latter Lat. 28° 11' long 78° 32'

**USURI** in the Mysore, a town on the south-east bank of an extensive tank distance N.W. from Bangalore 52 miles. Lat. 18° 35', long 77° 30'

**USYA MUT**.—A town in the native state of Sawantwarree 29 miles N.W. from Sawantwarree and 59 miles S.E. from Rumnageriah Lat. 16° 14', long 78° 46'

**UTGHOR**, in the British district of Banda, lieut.-gov. of the N.W. Provinces, a village on the route from the town of Banda to Gwahor 11 miles W. of the former. Water is plentiful from wells. Lat. 25° 30' long 80° 18'

**UTREE**.—A town in the British district of Behar lieut.-gov. of Bengal 28 miles S.W. of Behar Lat. 24° 55' long 85° 20'

**UTTARI**, in the pargue of Belabghur lieut. gov. of the N.W. Provinces, a village situate near the right bank of the Jumna. Distance S.E. from Delhi 28 miles. Lat. 28° 18' long 77° 25'

**UTTUR**.—A town in the British district of Combaetoor presidency of Madras 64 miles N.N.E. of Combaetoor Lat. 11° 51', long 77° 20'

**UTURHUT**, in the British district of Banda, lieut. gov. of the N.W. Provinces, a village on the route by Chils Tara ghat, from Cawapore to the town of Banda, 18 miles N. of the latter Lat. 25° 40', long 80° 31'

## V

**VADARNEAM**.—A town in the British district of Tanjore presidency of Madras, 55 miles S.E. by E. of Tanjore. Lat. 10° 24', long 79° 54'

**VADASUNDOOR**.—A town in the British district of Madura, presidency of Madras 44 miles N. by W. of Madura. Lat. 10° 32' long 78° 5'

**VAIMBAUR**.—A town in the British district of Tinnevely presidency of Madras, 53 miles E.N.E. of Tinnevely Lat. 9° 6', long 78° 25'

**VAIPU**, in the territory of Cochin under the political superintendence of the Madras presidency a town at the southern extremity

# VAI—VED

of a long narrow island, bounded south west by the Arabian Sea, and on all other sides by the Backwater as the British denominate the extensive shallow lake or estuary formed by the streams flowing westward from the Western Ghats. Distance from the city of Cochin E. two miles, Cannanore, S.E. 145 Bangalore S.W. 225 Lat. 9 58 long 76 18

**VAIPUR.**—A river in the British district of Tinavelly presidency of Madras, rises near the western frontier on the eastern declivity of the Eastern Ghats, and in about lat. 9 25, long 77 20 Taking an easterly and in some places south-easterly course of about eighty miles, it falls into the Gulf of Mannar, in lat. 9°, long. 78 20

**VAIRAWULL.**—A town in the peninsula of Kattywar province of Guzerat, situate on the seacoast, 40 miles W by N from Dru Island, and 102 miles S by W from Rajkote. Lat. 20 55, long 70 21

**VALAL.**—A town in Hyderabad, or territory of the Nizam situate on the left bank of the Tandoor river and 58 miles W by S from Hyderabad Lat. 17 11, long 77° 40'

**VALAM.**—A town in the British district of Tanjore, presidency of Madras six miles W.S.W. of Tanjore. Lat. 10 45, long 78 7

**VALAMPUTTU.**—A town in the British district of Salem, presidency of Madras, 32 miles E by N of Salem Lat. 11 47, long 78 41

**VALENGOODY.**—A town in the British district of Madras, presidency of Madras, 40 miles N.E. by E. of Madras. Lat. 10 13 long 78 40'

**VALLARAPULLAI** in the territory of Cochin, under the political superintendence of the presidency of Madras, a town in a small portion of territory isolated amidst the dominions of the rajah of Travancore. Distance from the city of Cochin, N.E., 18 miles. Lat. 10 18 long 76 28

**VALOOCURRAY.**—A town in the native state of Cochin, 14 miles S from Trichoor and 26 miles N from Cochin. Lat 10 20 long 76° 18'

**VALOOR.**—A town in the British district of Salem presidency of Madras, 18 miles E.N.E. of Salem Lat. 11° 44' long 78 29'

**VALOOR.**—A town in Hyderabad, or territory of the Nizam, situate on the left bank of the Doodna river and 127 miles E by N from Ahmednuggur Lat. 19 29' long 76 39'

**VAMILAPOORA.**—An ancient town of Kattywar in the province of Guzerat, the ruins of which still exist. It is situate on the river Karree, not far from the town of Wallah, a considerable portion of which is built of materials brought from the ruins of Vamilapora. The site of the ancient town is about lat. 21 50, long. 71 55'

**VAMULOONDA.**—A town in Hyderabad, or territory of the Nizam 44 miles E from Hyderabad and 116 miles N.W. from Guntoor Lat. 17 28 long 79 11'

**VANDIVASH.**—A town in the British district of North Arcot, presidency of Madras, 84 miles S.E. by S. of Arcot. Lat. 12 30, long 79 40'

**VANIAMBADDY.**—A town in the British district of Salem, presidency of Madras, 78 miles N.N.E. of Salem. Lat. 12 41 long 78 40'

**VANKEELUPADU.**—A town in the British district of Guntoor presidency of Madras, 31 miles S.S.W. of Guntoor Lat. 15 55' long 80 17'

**VARDHA CHATRA.**—A town in Nepal, situate on the left bank of the Raa Coos river and 124 miles E.S.E. from Khatmandoo Lat. 28 57, long 87 4

**VARIGUNTAPADU.**—A town in the British district of Nellore, presidency of Madras, 41 miles W by N of Nellore. Lat. 14° 34' long 79° 28'

**VAULRAMPOOR.**—A town in the native state of Travancore 44 miles N.W. by W from Cape Comorin and seven miles S.E. from Trivandrum. Lat. 8 26 long 77 8'

**VAZIRGANJ** in the territory of Oude, a ruined town on the route, by Nasaman Ghat or ferry from Futeelghur to Lucknow, seven miles S.W. of the latter. According to Lord Valentia, who visited it in 1803, "Vazirganje consists only of the two gateways, and about three houses in the centre between them. It seems as if it had been built as an ornamental approach to Lucknow a large avenue extending thither from it." Tennant, however attributes its want of population to a frightful instance of despotic vengeance. The cause of its destruction is said to have been the refusal of the outwal (municipal magistrate) to deliver up some thieves who had molested passengers going through it. On being threatened with the nawab's vengeance, it, unluckily for the town, happened that some persons were again robbed there that same day. On the next, three battalions were ordered to ransack the town and destroy the inhabitants an order which they obeyed with such fatal exactness that not a single hut nor inhabitant was left within the walls. The distance between the two gates is more than a mile and that constituted the length of the principal street. The rows of trees on each side are still standing, having escaped the flames by which the houses were destroyed." Lat. 26 45, long 80 55'

**VEBOO.**—A town in the British district of Amherst, one of the Tanasserim provinces, 41 miles E of Moumeau. Lat. 16° 33, long 98 19'

**VEDAVATI.**—A name sometimes given to the river Hugry, which see.

# VEE—VEL.

**VEEJOVA.**—A town in the Rajpoot state of Godwar 83 miles S S E from Jodhpoor and 110 miles S W from Nussersbad. Lat. 25° 26' long 73° 26'

**VEERAGANNOOR** in the British district of Salem, presidency of Madras, 38 miles E. by S. of Salem. Lat. 11° 29', long 78° 50'

**VEERAJENDERPETTA**, in the British province of Coorg, presidency of Madras, a town situate on a small feeder of the Cauvery. It is the largest town in the district and is principally inhabited by native Christians. In the year 1834, a British column under command of Colonel Foulis, proceeding from Cannanore eastward after a succession of some days hard fighting in the defiles of the Western Ghats penetrated to this town and forming a junction with the eastern column under Colonel Lindsay who, proceeding from Mysore, had occupied Merkara, the capital, effectually subdued the country. Elevation above the sea 3399 feet distance from Merkara, S, 16 miles, Mangalore, S E. 80 Bangalore, S W, 120 Lat. 13° 18' long 75° 52'

**VEERAPULLY**—A town in the British district of Cuddapah, presidency of Madras, 22 miles S. of Cuddapah Lat. 14° 9', long 78° 58'

**VEERAVASANUM.**—A town in the British district of Rajahmundry, presidency of Madras, 36 miles S. by W of Rajahmundry Lat. 16° 31', long 81° 41'

**VEERAWOW**—A town in the British district of Hyderabad, province of Scinde, presidency of Bombay 153 miles E S E. of Hyderabad Lat. 24° 30' long 70° 41'

**VEERUMGAUM** in the British district of Ahmedabad, presidency of Bombay a town near the south eastern angle of the Rann or Great Salt Marsh. It is now a thriving place, though but recently revived from a state of great poverty and decay population 17,000 distance from the city of Ahmedabad 35 miles W Lat. 23° 7', long 72°

**VEESAWUDUR**—A town in the peninsula of Kattywar province of Guzerat, situate 74 miles S. from Rajkot, and 40 miles N N W from Dna Island and Fort. Lat. 21° 15', long 70° 45'

**VEESHALGURH.**—See VISHALGURH.

**VELAPOOR.**—A town in the British district of Sattara, presidency of Bombay 70 miles E. by N of Sattara. Lat. 17° 47', long 75° 3'

**VELLACOLL.**—A town in the British district of Coimbatore, presidency of Madras, 50 miles E. of Coimbatore Lat. 10° 57', long 77° 45'

**VELLARY KYEN.**—A town in the British district of Malabar, presidency of Madras, 124 miles S E of Cannanore. Lat. 10° 30', long 75° 33'

**VELLAUR.**—A river of the Madras presidency, rising in lat. 10° 25', long 78° 21', and,

taking an easterly direction through Madras, Poodocottah and Tanjore falls into the sea, in lat. 10° 5', long. 79° 17'

**VELLAUR.**—A river of the Madras presidency rising at the base of the Eastern Ghats, within the British district of South Arcot, and taking an easterly direction falls into the sea just below the town of Porto Novo in lat. 11° 29' long 79° 50' The river is small at its mouth, and admits only coasting craft. The waters of the Vellaure are economized for the purpose of irrigation, by means of a dam or sluiceway thrown across the river

**VELLORE**, in the British district of Arcot north division, presidency of Madras, a town with strong fort, on the south or right side of the river Palar. The fort is extensive with ramparts built of very large stones, and having bastions and round towers at short distances. Between the bastions is a covered way with embattled wall, and small projecting square towers, which have a striking and pleasing appearance. A deep and wide ditch cut in the solid rock surrounds the whole fort, and is filled with good clear water of considerable depth. Within the compass of the ramparts are barracks, hospitals, magazines, and some other buildings, occupied from time to time by state prisoners. East of the fort are some rocky hills, which so completely command it, that a six pounder could throw a shot over it. The town situate between the hills and the fort is rather clean and airy and has an extensive and well supplied bazar. The heat at Vellore is very great, as is thought from the radiation from the rocky hills in the neighbourhood yet the station is considered one of the healthiest in the Carnatic, and regiments arriving from unhealthy quarters in debilitated states have recovered here very quickly. The most remarkable public building at Vellore is a splendid pagoda, apparently dedicated to Krishna, whose adventures with the gopis or milkmaids are represented in a series of spirited and elaborate sculptures. On the inside of the gateway are numerous figures of Rama, the renowned king of Ayodhya or Oude with Hanuman, the martial monkey leader, and his numerous troop of monkey-shaped warriors. There are also numerous sculptures representing Nandi, the bull-shaped attendant of Shiva. The erection of a church within the fort was sanctioned by the British government in 1846.

Upon the fall of Srirangapatam, the fortress of Vellore had been chosen for the future residence of the sons of Tippon. The selection was injudicious as the neighbourhood swarmed with the adherents of the deposed family. On the morning of the 16th July 1806 the native troops rose against the European part of the garrison consisting of two companies of the 69th regiment. The attack was totally unexpected but upon the arrival from the cantonment of Arcot of Colonel Gillespie, with a party of the 19th dragoons, the mutineers were quickly overcome, and order re-established.

# VEL-VIN

in the fortress. The number of Europeans measured by the insurgents amounted to 113. Among them were Colonel Faucourt and thirteen other officers. Three hundred and fifty of the mutineers fell in the attack, and about five hundred were made prisoners. Two of the sons of Tippee were stated to be implicated in the revolt, and the family of that chieftain were forthwith removed to Bengal. The population is returned at 61,600. Vellore is distant from Madras, N 220 miles. Tanjore, N, 147. Bangalore E, 104. Arcot, W 18. Cuddalore, N W 94. Madras, W 79. Lat. 12° 55', long 79° 11'.

**VELUNGOOR.**—A town in the native state of Travancore, 114 miles N N W from Trivandrum and 14 miles E N E. from Cochin. Lat. 10° 8' long 76° 29'.

**VENCATIGERREY**—A town in the British district of North Arcot, presidency of Madras, 69 miles W by N of Arcot. Lat. 13° long 78° 32'.

**VENCATIGERREY**—A town in the British district of North Arcot, presidency of Madras, 73 miles N by E. of Arcot. Lat. 13° 55' long 79° 34'.

**VENCATIGHERREY DROOG**—A town in the British district of North Arcot, presidency of Madras, 75 miles N by E of Arcot. Lat. 13° 57' long 79° 31'.

**VENKATREDDYPOLLIAM**—A town in the British district of Cuddapah, presidency of Madras, 118 miles N by E of Cuddapah. Lat. 16° 3' long 79° 17'.

**VENKITAGHERREY**—A town in the British district of North Arcot, presidency of Madras, 36 miles N W by W of Arcot. Lat. 13° 11' long 78° 58'.

**VENTIPUR, or WANTIPUR,** in Cashmere a village containing ruins considered by some to be those of the original capital of the valley. It is situated near the right bank of the Jhelum, on the route from Srinagar to Islamabad, and 16 miles S E. of the former town. According to the chronicles of Cashmere it was founded about A.D. 876 by Avantivarman, king of the valley who after his own name, called it Avantipur. Here are the ruins of two great buildings, resembling in plan and character those described in the notice on Malian. The greater ruin is called Vencadati Devi, the less Ventimadati. They are in a state of extreme dilapidation yet, according to the detailed account of Moorcroft are still striking monuments of early architecture. Ventipur is in lat. 33° 54' long 75° 9'.

**VERERY**—A suburb of the city of Madras. —See MADRAS.

**VERABUDR DROOG**—A town in the British district of Kurnool, presidency of Madras, 30 miles N E by E. of Kurnool. Lat. 16° 3' long 78° 30'.

**VERALLIMALLI**—A town in the British district of Madras, presidency of Madras,

58 mil. S N E by N of Madras. Lat. 10° 35', long 78° 37'.

**VERAPOLI** in the territory of Cochin under the political superintendence of the presidency of Madras, a town on a small island in the extensive shallow lake or estuary called by the British the Back water. Here is the residence of the pope's vicar-apostolic for Malabar who superintends sixty-four churches, exclusive of forty five governed by the archbishop of Cranganore or Kotungur, and exclusive of the large dioceses of the bishops of Cochin and Quilon, whose churches extend to Cape Comorin and are visible from the sea. Verapoli is seven miles N E. of the city of Cochin, 220 S W of Bangalore. Lat. 10° 6', long 76° 20'.

**VERNAG**, in Cashmere, in the south eastern extremity of the valley is celebrated for a magnificent spring which rises with a great volume of water in a basin about 120 yards in circumference built by the order of the Mogul emperor Jehangir and forms one of the feeders of the Jhelum. Lat. 33° 25', long 75° 15'.

**VEYLOOR**—A town in Hyderabad, or territory of the Nizam 31 miles N by E. from Hyderabad and 140 miles N N E. from Kurnool. Lat. 17° 47' long 78° 37'.

**VEYUL**—The name given to the Jhelum in the upper part of its course.—See JHELUM.

**VICTORIA FORT** in the collectorate of Ratnagerry, presidency of Bombay near the town of Bankote. It is situated on a high barren hill, of reddish appearance on the south side of the entrance of the river Sawitri, formerly navigable for large ships but the sandbank at the mouth constantly increasing during the south west monsoon. It now only admits a passage for small vessels. This place is one of the early acquisitions of the East-India Company within the present limits of the presidency of Bombay, having been ceded in 1766 by the Marathas in exchange for Gheriah then recently taken by Admiral Watson. Distant S. from city of Bombay 65 miles, S W from Poona 65. Lat. 17° 55' long 73°.

**VIEHAVANDY**—A town in the British district of South Arcot, presidency of Madras, 28 miles N W by N of Cuddalore. Lat. 12° 8' long 79° 36'.

**VIJAYAP**—A town in the native state of Nepal, 184 miles S E by E. from Khatmandoo, and 80 miles N N W from Purneah. Lat. 26° 54' long 87° 14'.

**VIKKUR**—A town in the British district of Kurnool, province of Scinde, 60 miles S E. by S. of Kurnool. Lat. 24° 11', long 67° 10'.

**VINCHOR**—A town in the British district of Ahmednuggur, presidency of Bombay. Under the rule of the Peshwa, it was the jaghira or fief of one of the principal Mahatmas.

# VIN-VIS

chah, then styled the Vinchortur or Vinchor jagheeradar. This powerful chief also held in Malwa the five districts of Ashta, Ichawar, Shikar or Shikora, Donaba, and Devpooza, which being ceded by the Peshwa by the treaty of Poona, in 1817, were by the British government granted to the nawab of Bhopal as a reward for his zeal and fidelity. Vinchor is distant direct from Bombay, N E, 120 miles. Lat. 20° 8' long 74 12'

**VINDHYA MOUNTAINS.**—A chain of mountains crossing the peninsula of India from east to west, forming the northern boundary of the valley of the Nerbudda, and uniting the northern extremities of the two great lateral ranges (the Eastern and Western Ghats) forms as it were the base of the triangle which supports the tableland of Southern India. They extend from Guesarat on the west to the banks of the Ganges on the east, and are comprised between the twenty second and twenty fifth degrees of latitude. The geological formations are the granite and sandstone overlaid by trap rock. Under the Moguls the country north of the Vindhya range was called Hindostan, and that lying to the south the Deccan.

**VINGORLA**, in the collectorate of Rutnagerry presidency of Bombay a petty town and fort situated at the mouth of a small river of the same name. Abreast of it, and about two miles from the mainland, are the Vingoria rocks some of which are about twenty feet above high water mark, white, and remarkable when the sun shines while others are even with the water and very dangerous for shipping. The little bay of Vingoria is completely sheltered from every point of the compass, the south alone excepted. When it blows fresh from that quarter (a rare occurrence, and always of short duration) the little traders make a fair wind of it, and run to Malwan (eighteen miles north) where they remain until the wind changes. There is a road from Vingoria to the interior proceeding to Belgam, and thence diverging, one branch leading to Kullagee and Bogulcote, the other to Dharwar, Hecobhe, and thence to Sircy in the Madras territory, but for some distance from Vingoria it is but of an indifferent description. The evil however, has attracted the attention of both the local and the home authorities, and there is the fullest reason for believing that as soon as circumstances permit it will be remedied. Vingoria has been conjectured to contain about 5,000 inhabitants it has a tolerably good bazar, and an increasing number of merchants.

Vingoria was a retreat for the numerous sanguinary pirates who infested this coast, until, in 1812, it was ceded by the chief of Sawantwarree to the East-India Company. Vingoria is 215 miles S. of the town of Bombay in a direct line the travelling distance is about 280 miles. Lat. 15° 50' long 73 41'

**VINGUR.**—A town in the British district

of Hydrabad, province of Scinde, 102 miles S.E. of Hydrabad. Lat. 24° 20' long 69 25'

**VINJAN.**—A town in the native state of Ootch, situate 46 miles W by S from Bhooj. Lat. 23° 9' long 68 2'

**VINJORABE**, or **BINJORAI**, in the Rajpoot state of Jessulmer a town on the route from Balmer in Joudpore, to the town of Jessulmer and 80 miles S.E. of the latter. Lat. 26° 30' long 71 10'

**VINUKONDA**, in the British district of Guntoor presidency of Madras, a fort on an eminence of rock composed of quartz and mica. On this hill are two tanks, which afford an excellent supply of water all the year round. It has been supposed to be an extinct volcano but Hays observes that in no part of it can the slightest traces of lava be observed. Distance from the town of Guntoor, S.W., 52 miles, Madras, N, 206. Lat. 16° 4', long 79 48

**VIRAGHOTTAM.**—A town in the British district of Visagapatam, presidency of Madras, 72 miles N N E of Visagapatam. Lat. 18° 41' long 83 40'

**VIRDUPUTTY.**—A town in the British district of Tinnevely presidency of Madras, 62 miles N N E of Tinnevely. Lat. 9° 38', long 78 1

**VIRGNAJUNG** in the British district of Kumaon, lieutenant-gov of the N.W. Provinces, a town on the route from Almora to Tibet. Lat. 30° 10' long 80° 48'

**VIRSUNDA**, in the Peshawar division of the Punjab a town situated 16 miles from the right bank of the Indus. Lat. 33° 17', long 71 30

**VISHALGHUR.**—A jaghire or feudal dependency of Colapore the centre is in lat. 16° 52' long 73 50', situate in the Ghauts the country is jungly and rugged. The inhabitants are more hardy and warlike than their neighbours of the plains, and have not unfrequently shown that they participate in the disposition for plundering which marks the occupants of similar tracts in the vicinity. The revenue of Vishalghur is 1,28,000 rupees, the military force numbers about 170 men. The military service due from the jaghiredar to the government of Colapore has been commuted for a money payment. A proposal is under consideration for the transfer to the British government, of that portion of the possessions of this chief which is situated below the Ghauts.

**VISHNOO.**—A mountain torrent rising in the Himalayas, in lat. 31° 4', long 78° 38'. It flows in a southerly direction for a distance of forty-three miles, to its junction with the Doules at Vishnooprag, in lat. 30° 35' long 79° 38' whence the united stream is named the Aluknunda.

**VISHNOOPRAG** in the British district of Gurwhal, a town on the route from Sirumangur

to Tibet, 54 miles E.N.E. of the former Lat. 30° 34', long. 79° 39'

**VIZAGAPATAM.**—A British district named from its principal place, and forming part of the territory subject to the presidency of Madras. It is bounded on the west north-west, and north by the British territory of Orissa, on the north-east by the British district of Guntur, on the south-east by the British district of Rajamahendry, it lies between lat. 17° 15'—19° 5' long 82° 24'—84° and, according to official return has an estimated area of 7 650 square miles. The seacoast, which throughout has a direction north-east, is comprised within that large extent of shore generally denominated the Orissa Coast. It is remarkably contrasted with the Coromandel coast farther south which is with slight exception low and sandy the coast of this district being bold steep, and marked by a ridge of rocky hills which extends along it. The climate on the coast is hot, moist, and relaxing and more inland, equally sultry but drier the land winds, however so oppressive in many parts of the Carnatic, are here not felt, being intercepted by the vicinity of the hills. Iron is the only metal mentioned to be found in the district kankar or calcareous tufa, is abundant, and in many places the soil is largely impregnated with saltpetre. No information has been made public respecting the zoology or botany of the district. The manufacturing industry is scanty being confined principally to coarse cottons and a few less important branches, carried on at the town of Vizagapatam. The principal crops are rice, maize, millet, oil-seeds pulse of various kinds sugarcane indigo, and cotton. The Pallakonda talook a considerable portion of this district, has been leased by the government for a term of years to the European firm of Arbuthnot and Co.

The population is given under the article MADRAS. Vizagapatam occupies a portion of the territory known as the Five Circars the possession of which was fiercely contested about the middle of the last century by the French and English. They were obtained by the former in 1763, and retained by them until 1769 when they were transferred by Clive to the East-India Company, to whom they were confirmed in 1765 by the emperor of Delhi. The former prevalence and recent suppression of human sacrifices in this and the contiguous district of Ganjam, will be found noticed in the article GOOMSOOR. Certain portions of this district have in consequence of their disturbed state, been excepted from the operation of the general regulations, and placed under special supervision.

The military stations—Vizagapatam and Vizianagram—are described under their respective names in the alphabetical arrangement. The most important route of the district is that from north-east to south-west, from Cal

cutta, through Chilacole and Vingaputnam, to Madras. The cross-roads have recently been put into thorough repair.

**VIZAGAPATAM.**—The principal place of the British district of the same name, presidency of Madras a seaport on the Orissa coast, or western shore of the Bay of Bengal. It is situated in the centre of a spit of land projecting from the mainland into the estuary of the Vengapatnam river. The bar at the entrance of the river is passable by vessels of from 150 to 200 tons burthen having eight or ten feet of water at spring tides. South of the estuary the Dolphin's Nose a remarkable and bold rocky hill rises abruptly from the sea, and about 1 500 feet above its level. In the south-west monsoon ships anchor south of the Dolphin's Nose in the north-east monsoon, a safe anchorage is found one and a half or one mile and three-quarters from land where there is a bottom of sand and mud, with eight fathoms water. The fort, which is situated nearly in the extremity or south-western part of the spit of land, is now dilapidated its defences having been allowed to fall to decay and the rampart on the eastern side partly undermined by the sea. Within its precinct are the barracks for the European invalid soldiers, the arsenal the officers quarters, and various public buildings comprising those for the accommodation of the civil establishment. The pettah or native town immediately adjoins the fort on its north and west sides it contains many good streets, and numerous well built houses, but is much crowded, from the space on which it stands being shut in by a range of sandhills intervening between it and the sea, and by the extensive swamp already mentioned on the land side. The climate is considered unfavourable to the constitutions of Europeans, who often find it expedient to remove for the renovation of their health to localities more elevated and remote from the coast. Distance from Hyderabad, E. 320 miles Madras N.E. 580 Masulipatam, N.E. 180 Calcutta, S.W. 470 Lat 17° 41' long 83° 21'

**VIZAYROYE.**—A town in the British district of Masulipatam, presidency of Madras, 49 miles N of Masulipatam. Lat. 16° 50', long 81° 3'

**VIZIADROOG.**—See GHERIA.

**VIZIANAGRAM** in the British district of Vizagapatam, presidency of Madras, a military cantonment, situate on ground sloping gently to the north. It contains twenty six officers houses, barracks, hospital, and other suitable offices. Here is a fort, the residence of the semindar of Vizianagram, separated from the village by a large tank. The present semindar is a young man and the estate being large and burdened with debt, it has been deemed necessary to appoint a special agent to undertake its administration for a limited time. The inhabitants of the village are chiefly weavers and agriculturists. The surrounding country has a deep fertile and alluvial soil,

highly cultivated, and very productive in consequence, provisions are abundant and good. The roads about the stations are well laid down, and kept in good repair by private contribution. The climate is very salubrious from September to March, and many Europeans at that time repair thither to recruit their health, which may have suffered from the relaxing effect of the air on the coast. In April the weather becomes warm, and towards the middle of the month the thermometer sometimes rises as high as 100 throughout the whole night and day and seldom falls below 86. Towards the end of May rain falls and cools the air and early in June, after considerable atmospheric changes, the south west monsoon sets in, causing general coolness, though the nights are occasionally warm. A good deal of rain falls in September and October and towards the end of the latter month cold northerly winds commence. The weather during the rest of the year is cold to a degree which some find disagreeable. Distance from Hyderabad, E. 329 miles. Bellary, N E, 478. Bangalore, N E, 528. Masulipatam, N E, 200. Visagapatam N E 30. Madras N E 460. Calcutta, S.E., 438. Lat. 18° 7' long 83° 28'.

**VOICONDAN**—A town in the British district of Trichinopoly presidency of Madras 38 miles N N E. of Trichinopoly. Lat. 11° 20', long 78° 59'.

**VOODAGOONY**—A town in the Mysore, 144 miles N W from Seringapatam and 56 miles E from Hounahwar. Lat. 14° 20' long 75° 19'.

**VIJAYACURRAY**—A town in the native state of Travancore presidency of Madras, 34 miles N W by N from Trivandrum, and 83 miles S.S.E. from Cochin. Lat. 8° 52', long 76° 48'.

**VILLARAPULLAI** in the territory of Cochin, under the political superintendence of the presidency of Madras, a town in a small portion of territory isolated amidst the dominions of the rajah of Travancore. Distance from the city of Cochin, N E., 18 miles. Lat. 10° 18', long 76° 28'.

**VILLUPULUM**—A town in the British district of South Arcot, presidency of Madras 18 miles S W of Cuddalore. Lat. 11° 35', long 79° 40'.

**VIRAGHERY HILLS**—A range of mountains of Southern India, situate between lat. 10° 10'—10° 44', and long. 76° 31'—77° 52'.

**VOZEEERPOOR**, in the British district of Mysore, Lieut. gov. of the N W Provinces, a village on the route from Allypore cantonment to that of Futehgurh, and 42 miles S.E. of the former. Lat. 27° 45', long 78° 45'.

**WYGAH**, a river of the British district of Madras, presidency of Madras, rises in lat. 10° 17', long 77° 37', and flowing south-east

130 miles, falls into the sea, in lat. 6° 36', long 79° 4'.

**WYTURNA** a river of the British district of Poona, presidency of Bombay, rises in lat. 19° 44' long 73° 31', and flowing circuitously but generally in a south westerly direction, for seventy miles, falls into the sea, in lat. 19° 36', long 72° 55'.

## W

**WADONA**.—A town in Hyderabad or territory of the Nizam situate on the left bank of the Koon river. Lat. 20° 8' long 78° 45'.

**WAKE**.—A town in the British province of Sattara, presidency of Bombay, 20 miles N by W of Sattara. Lat. 17° 58' long 73° 59'.

**WAKE**—A town in the British district of Ahmednuggur presidency of Bombay, 62 miles N W by N of Ahmednuggur. Lat. 19° 50' long 74° 12'.

**WAGEIRA**.—A town in the native state of Poona province of Gujarat, 16 miles S from Poona, and 13 miles W by N from Kank. Lat. 20° 4' long 73° 31'.

**WAGOOLEE**.—A town in the British district of Poona, presidency of Bombay 10 miles N E by E of Poona. Lat. 18° 35', long 74°.

**WAGOTUN**—A town in the British district of Rutnagerah presidency of Bombay, 35 miles S by E of Rutnagerah. Lat. 16° 30' long 73° 30'.

**WAGRU**—A town in the British district of Amherst, one of the Tanassarim provinces, 34 miles S. by E. of Mouleau. Lat. 16°, long 97° 50'.

**WAHNI BUCHUR**, in the Sande Sagur Doab division of the Punjab a town situated 24 miles from the left bank of the Indus. Lat. 32° 23' long 71° 48'.

**WALAJAHBAD**, in the British district of Chingleput, presidency of Madras, a town with military cantonment 500 yards N of the north or left side of the river Falak. Distance from Madras, S.W., 38 miles. Lat. 12° 48', long 79° 53'.

**WALLABHIPOOR**—See VAMALPOORA.

**WALLAJANUGGUR**—A town in the British district of North Arcot, presidency of Madras, 16 miles E of Vellore. Lat. 12° 56' long 79° 25'.

**WALLANCHOONG**.—A town in Nepal, situate on the left bank of the Tamur river. Lat. 27° 44' long 87° 31'.

**WALLEE**.—A town in the Rajpoot state of Godwar, 74 miles S. by E. from Jodhpore. Lat. 26° 15', long 73° 21'.

**WALWA**.—A town in the native state of Kolapoor presidency of Bombay 49 miles N W by N from Belgaum. Lat. 15° 39', long 74° 18'.

# WAM—WAZ.

**WAMBOOREE**—A town in the British district of Ahmednuggur presidency of Bombay 14 miles N of Ahmednuggur Lat. 19° 19', long. 74 45'

**WANCANEER**—A town in the province of Guzerat, situate on the left bank of the Mhye river and 20 miles N by W from Baroda. Lat. 22 31, long. 73 10'

**WANDIPOOR**—A town in the native state of Bhotan situate on the left bank of the Bagnee river Lat. 27 25 long. 89 49'

**WANGA BAZAR**—A town in the British district of Hyderabad, province of Scinde, 74 miles S.E. of Hyderabad Lat. 24 39, long. 69° 19'

**WANGEE**—A town in the British province of Sattara, presidency of Bombay, 42 miles S.E. by S. of Sattara. Lat. 17° 12' long. 74 28'

**WANGTOO** in Koonawar a district of Bushahr, is a village on the left side of the Sutly here ninety two feet wide, and confined between banks of solid granite Lat. 31 32 long. 78 3'

**WANGUR**, in Koonawar, a district of Bushahr is a large torrent, formed by the junction of two others flowing from the eastern declivity of the Damuk Chu It falls into the Sutly on the right side, in lat. 31° 33' long. 78 10'

**WANJEE**—A town in the British district of Sholapoor presidency of Bombay 63 miles N W by W of Sholapoor Lat. 18 13 long. 75 11'

**WAPDAWAN**—A town within the domains of Gholab Singh the ruler of Cashmere situate on the left bank of the Wurdwan river Lat. 33 51 long. 75 42'

**WARI** or **SOONDUR WARREE**—The principal place of the small state of Sawunt Warree It was probably at no time a place of any great strength and when invested, in 1810 by the British forces was easily reduced Distance from Bombay S. 220 miles. Lat. 15 54 long. 73 54'

**WARI**—A river of Scinde, rises in lat. 24 10' long. 68 3 and flowing south for twenty five miles, falls into the sea, in lat. 23 51 long. 67 55'

**WARNA**.—See **WURNA**.

**WARNAIR**.—A town in the Rajpoo state of Jodhpoor, 167 miles S.W. from Jodhpoor and 192 miles E. by S from Hyderabad. Lat. 24 53 long. 71'

**WARRAGAUM**.—A town in one of the recently sequestered districts of Hyderabad Lat. 20° 32' long. 72 52'

**WARRAKUNCHAIRY**—A town in the British district of Malabar presidency of Madras, 65 miles S.E. of Calicut. Lat. 10° 27', long. 76° 32'

**WARSA**.—A town in the British district of Caudish presidency of Bombay 47 miles N W by W of Malgaum. Lat. 20° 54', long. 73° 54'

**WARUNGUL**, in Hyderabad, or the territory of the Nizam, a town, the ancient capital of Telingana, of which little now remains to denote its former grandeur save the four gateways of the Temple of Siva, which still continue in a state of tolerable preservation Distance from the city of Hyderabad, N.E., 86 miles. Lat. 17 58, long. 79 40'

**WARYE**—A petty protected state in the north western quarter of the province of Guzerat, traversed by the river Bunnaw The population consisting chiefly of Jutta, is estimated at 20 000 The town of Warye is in lat. 23 47' long. 71 29'

**WASEEOTA**.—A town in the British province of Sattara presidency of Bombay, 20 miles W of Sattara. Lat. 17° 40', long. 73 47'

**WASHISHTEE**—A river of the Rainagerry collectorate of Bombay rises in lat. 17 50' long. 73 36' and falls into the sea at lat. 17 33 long. 73 18'

**WASTARA**.—A town in the Mysore, 88 miles N W by W from Seringapatam and 66 miles E N E. from Mangalore Lat. 13 16' long. 75 48'

**WATAR**.—A town in the British province of Sattara presidency of Bombay 31 miles N.E. of Sattara. Lat. 17 56' long. 74 27'

**WAULOR**.—A town in the British district of Surat, presidency of Bombay 31 miles E. by S of Surat Lat. 21 long. 73 20'

**WAUNCANEER**, in the peninsula of Kattywar province of Guzerat, a town in the district of Jhallawar situate on the Budee or Vutoobee river Distance from Bombay N W, 275 miles Lat. 22° 36', long. 70° 59'

**WAUNDIA**.—A town in the native state of Cutch 63 miles E from Bheoj and 55 miles N by W from Rajpote. Lat. 23 14, long. 70 39'

**WAZEERABAD** a town in the Panjab, is situate about three miles from the left or eastern bank of the Chenab here half a mile broad. The country immediately about it is exceedingly fertile, and the view of the Himalaya probably the most extensive and magnificent anywhere. It is one of the best some towns in India. General Avitabile, a European officer in the service of Runjeet Singh, having caused it to be rebuilt in the European style, with wide streets and a hand some and commodious bazar. Runjeet Singh made here a pleasure-ground and palace of singular construction, and covered outside with rude full length figures of the ten Gurus, or spiritual leaders of the Sikhs, painted in fresco Population 15 846 Lat. 32 27 long. 74 10'

**WAZIRGANJ** in the territory of Oude, a town on the route from Goruckpoor eastward to that of Sekrora, 64 miles W of the former 28 S.E. of the latter Lat. 26° 59', long. 83° 5'

**WAZIR GARH**, in Garhwal a village on 1909

## WEA—WHA

the right bank of the Jomna. Its site is striking and picturesque, being on a slope over the river and in view of the snowy peaks of the ranges running southward from Jammotri. Elevation above the sea 5 818 feet. Lat. 80° 54' long 78° 28'.

**WEAMUNGALUM.**—A town in the British district of Malabar presidency of Madras, 16 miles N.N.W. from Calicut. Lat. 11° 28', long 75° 42'.

**WEER,** in the territory of Bhurtpore a town on the route from Agra to Ajmeer, by Jeypore, 55 miles S.W. of the former. In A.D. 1826 after the capture of Bhurtpore by Lord Combermere Weer was without resistance surrendered to the British. Distant N.W. of Calcutta, *via* Allahabad, 900 miles. Lat. 27°, long 77° 14'.

**WEINBOKE**—A town in the British district of Amherst, one of the Tanasserim provinces, 48 miles S.E. by E. of Amherst. Lat. 15° 44', long 98° 17'.

**WEINGO,** a river of Amherst one of the Tanasserim provinces, rises in lat. 15° 20' long 98° 25' and, flowing northerly for sixty-five miles, falls into the Attaran river, in lat. 16° 8', long 98° 9'.

**WEIN GUNGA**—A river of the Sangor and Nerbudda territory rising in lat. 22° 25' long 79° 8'. Its source is among the Mahadeo Mountains, at an elevation of 1 850 feet above the sea. Taking a direction easterly for a distance of eighty miles and subsequently southerly for thirty-four to lat. 22° 1' long 80° 11' it at that point becomes the boundary between the Sangor and Nerbudda territory and that of Nagpore, and still flowing in a southerly direction for the further distance of twenty-five miles, continues to be so to lat. 21° 47', long 80° 15'. At that point it enters the Nagpore territory and shortly after turning south-west for eighty miles, it receives, near Ambora, in lat. 21° 5' long 79° 39' and at the distance of 219 miles from its source, the river Kanhan, which joins it on the right side. One hundred and twenty miles farther down the stream, or more to the south, it receives, on the same side, the Wurda, in lat. 19° 38' long 79° 51'. Continuing to flow easterly, but generally southwards, for 100 miles farther, during which it is sometimes called the Pranbasta, it falls into the river Godavary, on its north or left side, in lat. 18° 58', long 79° 55', its total length of course being about 439 miles.

**WEILAUP**—A town in the British district of Amherst one of the Tanasserim provinces, 22 miles S.E. of Amherst. Lat. 15° 49', long 97° 51'.

**WELLESLEY PROVINCE** is a dependency of Prince of Wales Island, and comprises a narrow strip of land on the western coast of the Malayan peninsula, immediately opposite the island. It is thirty-five miles in length and four in width, with an area of 140 square

miles. "Province Wellesley" says Newbold "presents a gently undulating superficies, sloping gradually to the sea with a few narrow strips of sandy soil, well adapted for the cultivation of the coconut from which produce a few hills of granite." The general appearance of the province in 1822 is thus described by Finlayson, who visited it about that period:—The country here, to the distance of seven or eight miles from the sea, is low flat, and swampy covered for the most part with almost impenetrable jungle, the secure haunts of tigers, leopards, rhinoceroses, and occasionally of elephants its vast swamps being unfavourable to the latter. Such was the condition of Province Wellesley when transferred to the British. For some years it appears to have been allowed to remain in much the same state lately however cultivation has been making rapid strides and in 1836 according to Captain Low the extent of land under cultivation was about 120 square miles, being six-sevenths of the whole province. The staple production is rice, which is cultivated to a great extent, the low swampy lands of the province being well suited for its culture. Sugar is also extensively cultivated in the central and southern portions of Province Wellesley. Several species of indigo exist, but it is not of the first quality and its manufacture is so crude as to render it only fit for home consumption. The sandy soil which frequently occurs in the province is generally appropriated to the coconut, which thrives here exceedingly well. Province Wellesley was ceded to the British for a pecuniary consideration by the king of Quada, in 1802. The population is returned at 51 509.

**WENRA.**—A town in the British district of Amherst, one of the Tanasserim provinces, 38 miles E. of Amherst. Lat. 16° 1' long 98° 11'.

**WER**—A town in the British district of Boolandshuhur, head-q. of the N.W. Provinces 36 miles S.E. of Delhi. Lat. 28° 21', long 77° 45'.

**WERAH,** in the British district of Agra, a village on the route from Agra to Mittra, and 27 miles N.W. of former. Lat. 27° 28' long 77° 45'.

**WERANG,** in Bussahr a pass in the district of Koonawar, over a range separating the valley of the Pajur from that of the Satly. Elevation above the sea 13 000 feet. Lat. 31° 55', long 78° 28'.

**WESSEERPOOR,** in the Barce Doab division of the Punjab, a town situated 10 miles from the right bank of the Sutlej. Lat. 30° 34' long 73° 45'.

**WHARTOO** in Bussahr, a peak of considerable elevation in the lower or more southern part of the Himalaya. It was the most westerly of the stations employed in the great trigonometrical survey of the Himalaya by Hodgson and Herbert. They found it wooded

to the very summit, which is surmounted by a ruined fortification, formerly occupied by the Gorkhas. Elevation above the sea 10 675 feet. Lat 31 14 long 77 34

**WODIAKPOLLIUM**—A town in the British district of Trichinopoly, presidency of Madras, 48 miles N E. by E. of Trichinopoly. Lat. 11 11, long 79 21

**WODNAPOOR**—A town in Onda, 62 miles N by W from Lucknow. Lat. 27° 45', long 80 51

**WOJERABAD**—A town in Hyderabad or territory of the Nizam situate on the left bank of the Kistnah, and 92 miles S.E. by E from Hyderabad. Lat 16 42, long 79 43

**WOMOLUR**—A town in the British district of Salem, presidency of Madras, 11 miles W N W of Salem. Lat 11 44 long 78 5

**WON or WUEN** in the territory of Indore, or possessions of Holkar's family, a decayed town situate in the fertile tract of Nimar in a slight hollow amidst low hills. In the present ruined town are everywhere to be seen fragments of images and other elaborate sculptures, neglected and prostrate, or built into walls and fences, to serve the purposes of the present poverty stricken inhabitants. Throughout a great extent of country around, vestiges of temples are of frequent occurrence. Won formerly contained a population of above 10 000 persons: it is at present a collection of ruins, about three furlongs in length and one in breadth with only seventy inhabited houses. Distant N E. from Bombay 270 miles, S W of British cantonment Mow 51 S W of Indor 61. Lat. 21 51, long 75 31

**WOODUNTA RIVER** rises in Orissa, and flowing easterly falls into the Tell river in Lat. 20 11 long 83 19

**WOONY**, in Hyderabad or territory of the Nizam, a town on the right bank of the river Godavery on the route from the city of Nagpur to that of Hyderabad 81 miles S of the former 186 N of latter. Lat. 20, long 79 2

**WOREGAUM**—A town in Hyderabad or territory of the Nizam, 73 miles E S E. from Ahmednuggur. Lat. 18 49, long 75 50

**WOW**—A petty native district on the north western frontier of Guzerat. It extends from north to south about thirty miles, and from east to west fifteen and is traversed by the route from Pales to the Dholera and Mandave ports. The population, consisting principally of Chocra Rajpoots, amounts to about 10 000 the revenues average only about 5 000 rupees per annum the district being much divided amongst different kinsmen of the chiefs the disbursements are about equal to the revenue. Wow pays no tribute to any government. The chief entertains about twenty horse and foot for his personal guard, trusting entirely to the British government for protection from foreign invasions. Lat of town 24 22 long 71 30

**WOZUR**—A town in the British district of Ahmednuggur, presidency of Bombay 10 miles N E. by E. of Nasik. Lat. 20° 4, long 73 54

**WUDDAKERRY** in the British district of Malabar presidency of Madras. It is rather a considerable place, and well built, on the north side of one of those backwaters or extensive shallow estuaries receiving the waters of several streams descending from the Western Ghats. The population consists of Moplah Mussulmans. Distance from Cannanore, S E., 22 miles from Calicut, N W., 28. Lat. 11 36, long 75 37

**WUDDAMURRY**—A town in Hyderabad, or territory of the Nizam, 23 miles N E. by N from Hyderabad. Lat. 17 37, long 78 44

**WUDJAR CUREOOR**—A town in the British district of Bellary presidency of Madras, 26 miles E. by S of Bellary. Lat. 15 1 long 77 28

**WUDOO**—A town in the British district of Bellary presidency of Madras, 18 miles W by N of Bellary. Lat. 15 16, long 76 42

**WUDWAN** in the peninsula of Kattywar province of Guzerat, a town in the district of Jhalawar, situate on a small river, which, a few miles farther eastward, is lost in the Ruon or Salt-marsh dividing the peninsula of Guzerat from the mainland. It is the principal place of a subdivision of the same name containing thirty towns and villages, and a population of 82 220. The talook is kept in a state of high cultivation, producing the finest cotton in Kattywar: it consequently yields a considerable revenue in proportion to its area and in 1828 the rajah was reported to draw from it an annual revenue of 1 00 000 rupees of which he pays to the British government an annual tribute of 27 831 rupees. Distance from Ahmedabad S W 65 miles, Baroda, N W 105. Lat. 22 40 long. 71 39

**WUEKCHONG**—A town of Eastern India, in the native state of Munseepoor, situate on the left bank of the Mythia Khyoung river, and 29 miles S. from Munseepoor. Lat. 24 28, long 94

**WUGGUN**—A town in the British district of Shikarpoor province of Souda, 21 miles W S W of Shikarpoor. Lat. 27 54, long 68 20

**WUHOAH** in the Daman division of the Punjab a town situated 44 miles W from the right bank of the Indus 103 miles N W by W of the town of Mooltan. Lat. 30 58 long 70 2

**WULEEPOOR**, in Sirhind, a village situate on the left bank of the Sutlej, at the spot where it is joined by the navigable nullah or watercourse flowing by Ludianah. It contains from thirty to forty mud-built houses. Distant N W from Calcutta 1,107 miles. Lat. 30° 58, long 75 41

**WULENDURPETT.**—A town in the British district of South Arcot, presidency of Madras, 81 miles W of Cuddalore. Lat.  $11^{\circ} 48'$ , long.  $78^{\circ} 21'$

**WULLKEH.**—A town in the province of Guzerat, situate 71 miles E.S.E. from Rajkote. Lat.  $21^{\circ} 50'$ , long.  $71^{\circ} 50'$

**WULTAIR.**—A town in the British district of Vinsagapatam, presidency of Madras, three and a half miles N.E. of Vinsagapatam. Lat.  $17^{\circ} 44'$ , long.  $83^{\circ} 24'$

**WULUR.** in Cashmere, is the largest lake in the valley and may be regarded as a dilatation of the river Jhelum. It is, according to Hügel, twenty one miles long from west to east, and nine wide from north to south. In the lake is a small island, which contains the extensive ruins of a Buddhist temple of great antiquity destroyed by the fanatic Mahometans. The lake is subject to violent squalls. The centre is in lat  $34^{\circ} 20'$ , long  $74^{\circ} 45'$

**WUNN.**—A town in the British district of Ahmednuggur, presidency of Bombay 26 miles N by E of Nasik. Lat.  $20^{\circ} 20'$ , long.  $73^{\circ} 58'$

**WUNVARIY.**—A town in Hyderabad or territory of the Nizam, 87 miles S from Ellichpoor. Lat.  $19^{\circ} 58'$ , long.  $77^{\circ} 80'$

**WURDA.**—A river rising in the Sagar and Nerbudda territory near the town of Mooltaee and about lat  $21^{\circ} 44'$ , long  $78^{\circ} 25'$ . Taking a southerly course for a few miles, it leaves the district, and becomes the common boundary of the territory of Nagpore and of the dominions of the Nizam or territory of Hyderabad to its fall into the Wen Gunga on its right side in lat  $19^{\circ} 37'$ , long  $79^{\circ} 51'$ . The total length of course of the Wurda is about 250 miles, and it flows throughout generally from north west to south east. At about 180 miles from its source and in lat.  $19^{\circ} 57'$ , long  $79^{\circ} 15'$  it, on the right side receives the Payne Gunga, a stream little inferior to itself in magnitude. It has many fine pools in the hottest weather, but is generally fordable at all seasons except at the height of the rains when it is so full as to be navigable for moderate-sized boats 100 miles above its mouth

**WURNA.** a river of Bombay rises on the eastern declivity of the Western Ghats, in lat  $17^{\circ} 18'$ , long  $73^{\circ} 46'$  and flowing south east for eighty miles during which course it divides the territory of Sattara from the native state of Kalapoor, falls into the Kistna river in lat.  $18^{\circ} 50'$ , long  $74^{\circ} 38'$

**WURNEIR.**—A town in the British district of Ahmednuggur, presidency of Bombay 24 miles N.E. by N of Nasik. Lat.  $20^{\circ} 16'$ , long  $74^{\circ}$

**WURR.**—A town in the native state of Cutch, 28 miles N from Bhoo, and 63 miles E. by S. from Luckpoor. Lat.  $23^{\circ} 37'$ , long  $69^{\circ} 46'$

**WURRODAH.**—A town in one of the re-

cently sequestered districts of Hyderabad, 64 miles W by S of Ellichpoor. Lat.  $21^{\circ} 2'$ , long  $76^{\circ} 38'$

**WURWANRA.** in the peninsula of Katty war province of Guzerat, a town in the subdivision of the Mueho Canto. Here is a ferry across the gulf to the opposite shore of Cutch. Distance from Ahmedabad, W, 120 miles. Lat.  $23^{\circ} 4'$ , long  $70^{\circ} 44'$

**WURRAVEE.**—A native Rheel state in Guzerat, under the protection of the British government. It is bounded on the north by that of Raj Peepa, on the east by the British territory of Khandesh on the south by the territory of the Deang rajahs and on the west by the Gulf of Cambay and the British districts of Surat and Broach. It extends from lat  $20^{\circ} 55'$  to  $21^{\circ} 38'$  and from long  $74^{\circ} 46'$  to  $72^{\circ} 51'$  is sixty miles in length from east to west, and forty one in breadth. Its area is 450 square miles, with a population of 33 800. Wurravee, the chief town is in lat.  $21^{\circ} 25'$ , long  $73^{\circ} 19'$

**WUTATUR.**—A town in the British district of Trichinopoly, presidency of Madras, 20 miles N.N.E. of Trichinopoly. Lat.  $11^{\circ} 5'$ , long  $78^{\circ} 54'$

**WUZERGUNJE.** in the British district of Buddaon, lieutenant gov. of the N.W. Provinces, a town 14 miles N by W of Buddaon. Lat.  $28^{\circ} 14'$ , long  $79^{\circ} 8'$

**WUZERA.**—A town in the British district of Ahmednuggur, presidency of Bombay 53 miles N.W. by W of Ahmednuggur. Lat.  $19^{\circ} 30'$ , long  $74^{\circ} 4'$

**WYNAAD.**—A talook or subdivision of the British district of Malabar, presidency of Madras an elevated mountainous and wooded tract separated from the low country of Malabar by the culminating ridge of the Western Ghats from which it slopes eastward and north eastward towards Mysore. The area is 1 188 square miles. Though rugged and overrun by forest and jungle, it is less difficult in a military point of view than Coorg farther north, and hence the Mysorean invaders of Malabar have usually taken their route through it. Though at the head of an insignificant population the chief or petty rajah gave much trouble to the British government after the cession of the country by Tippoo Sultan at the pacification of 1792 but for some years there does not appear to have been any serious disturbance in that quarter a military force being stationed for its control at Manantoddy

**WYRAGUR.** in the territory of Nagpore near the left bank of the river Waingunga Diamonds were formerly found in its vicinity in yellow earth forming small hills but the mines have not latterly been worked as the number and value of the gems obtained were not found to afford a remunerating return. Traces of the former workings are however, observable in several places. It is a place of some trade, and contains about 300 houses,

# YAI—YEO

and a population of 2 000 Distance from the city of Nagpore, S.E. 80 miles. Lat. 20° 27', long 80 10'

## Y

**YAILAGHERY**—A town in the British district of Salem, presidency of Madras, 73 miles N N E of Salem Lat. 12 37 long 78 39'

**YAINUR** in the British district of South Canara, presidency of Madras a small town containing eight temples of votaries of the Jain persuasion one of the Brahminical Here is an immense colossal image of one of the gods worshipped by the Jains It is formed of one solid piece of granite, and stands in the open air Distance from Mangalore N E. 22 miles from Madras, W, 350 Lat. 13 2' long 75 13

**YAJGO**—A town of Burmah 16 miles W from the right bank of the Khyendwan river, and 100 miles N W from Ava. Lat. 23 23', long 94 26'

**YAKOOTGUNJ**, in the British district of Furruckabad, head-gov of the N W Provinces, a village situate in lat 27 19' long 79 40'

**YAKOOTPOOR** in the British district of Allypore, head-gov of the N W Provinces, a village situate in lat 27 52' long 78 11

**YALLOONG**—A river of Nepal rising in lat. 27 35 long 88 5' on the southern base of Kangchang a peak of the Himalayas It flows in a south westerly direction for forty miles, and in lat 27 21 long 87 31 falls into the Tambar river The town of the same name is in lat 27 32' long 87 56'

**YAMBEESSEE**—A town in the British district of Hyderabad, province of Scinde 63 miles N by E of Hyderabad Lat. 26° 20', long 68 43'

**YAMETHEN**—A town of Burmah situate 124 miles S. from Ava. Lat 20 5 long 95 53

**YANAON or YANAN**—A French settlement within the limits of the British district of Rajahmundry presidency of Madras, situate near the bifurcation of the Godavary and the river of Coringa, and about nine miles above the embouchure of the former The mouth of the Godavary is obstructed by sand banks, which preclude the entrance of ships, but the Coringa river has a deep channel, which admits of vessels of 200 tons burthen proceeding as high as Yanaon. The French territory dependent on the factory stretches along the banks of the two rivers for the distance of six miles, and contains an area of 8 147 acres which in 1836, were classified as under —

	Acres.
Land under cultivation	4 310
Woods and forests	562
Barren land	215
Public estates	2,760
<b>Total</b>	<b>8 147</b>

The population in 1840 consisted of 6,581 inhabitants. The town of Yanaon is in lat. 16 44 long 82° 16'

**YANDABOO**—A town of Burmah, on the left bank of the Irrawady river, 63 miles W by S. from Ava. Here, on the 26th February, 1826, was concluded the treaty with the Burmese in which it was provided that the coast of Tenasserim together with Arracan and its dependencies, should be retained by the British, and that the king of Ava should renounce all claims upon Assam and the adjoining states of Cachar Jyntee and Manipore Lat 21 28', long 95 4

**YANG**—A town of Eastern India, in the native state of Munnepoor 99 miles S.E. from Nowgong Lat. 25 31, long 94

**YANGMA**—A river of Nepal tributary to the Tambar, with which it forms a junction in lat. 27 38 long 87 32'

**YARDWALL**—A town in the British district of Belgaum presidency of Bombay, 52 miles N E by E of Belgaum. Lat 16 13', long 75 15

**YAROO** in the Daman division of the Punjab a town situate 25 miles from the right bank of the Indus Lat. 30 10' long 70 30

**YARWUFADAR**—See SORTZ.

**YATLAKEE**—A town in the British district of Bellary presidency of Madras, 69 miles E by S of Bellary Lat 15 2 long 77 55'

**YAVNESUREN**—A town in the British district of Madura presidency of Madras, 43 miles S.E. of Madura. Lat. 9° 31', long 78 38

**YAVGEE**—A town in the British province of Legu situate on the right bank of one of the arms of the Irrawady river Lat. 17 14, long 95 14

**YE**—The province of Ye is the smallest in extent of the Tenasserim provinces. It is bounded on the north by Amherst on the south by Tavoy on the west by the Bay of Bengal, and on the east by the Sumatran range of mountains. It is a mountainous district, and with the exception of a few places which are appropriated to the cultivation of rice, it is overgrown with thick forests brushwood or jungle Besides a profusion of excellent timber, the province yields no production of any value, and the district is of less note than any other on the coast. The Ye is the only river in the province and its mouth is so unprotected and at the same time obstructed as to render it unsafe for ships of much burthen. The town of Ye which is the capital, is situate on its banks, and about six miles from its mouth. Lat. 15° 15 long 98 4

**YRAVAN GHEOUN**—A town of Burmah situate on the left bank of the Irrawady river 123 miles S.W. from Ava. Lat. 20° 31', long 94 42'

**YEDDAPAUDY**—A town in the British 1013

district of Salem, presidency of Madras, 24 miles W by S. of Salem Lat. 11 33', long 77° 58'

YEDDAPULLEY.—See IRAPAZZ.

YEDDIACOTTIAH.—A town in the British district of Madras, presidency of Madras, 50 miles N N W of Madras. Lat. 10 35', long 77° 52'

YEDTORRA.—A town in the Mysore state on the Cauvery, 22 miles W by N from Seringapatam. Lat. 12° 25', long 76° 25'

YEHYAPOOR.—A town in the British district of Sarun, lieutenant-gov. of Bengal, 41 miles S W of Bettiah. Lat. 26 22', long 84 7'

YEKALL.—A town in Hyderabad, or territory of the Nizam 63 miles W N W from Hyderabad. Lat. 17 40', long 77 40'

YEKTHOON.—A town in Hyderabad, or territory of the Nizam, 18 miles W S W from Jaulnah. Lat. 19° 44', long 75° 41'

YELBOORGA.—A town in one of the recently sequestered districts of Hyderabad, 69 miles W N W of Bellary Lat. 15 33', long 76 4'

YELDOORTY.—A town in the British district of Kurnool, presidency of Madras, 21 miles S S W of Kurnool. Lat. 15 32', long 77 59'

YELJAL.—A town in Hyderabad or territory of the Nizam 40 miles S. by W from Hyderabad. Lat. 16 49', long 78° 24'

YELLAGODE.—A town in the British district of Kurnool, presidency of Madras, 36 miles E by S of Kurnool Lat. 15 44', long 78° 38'

YELLANOOR.—A town in the British district of Bellary presidency of Madras, 86 miles E.S.E. of Bellary Lat. 14 40', long 76 8'

YELLAPOOR, in the British district of North Canara, presidency of Madras, a small town, distant from Madras, N W, 400 miles Lat. 14 53', long 74 40'

YELLUANDER.—A town in the Mysore, 36 miles S E from Seringapatam and 73 miles N from Combatoor Lat. 12 8', long 77° 4'

YELWALL.—A town in the Mysore, nine miles S.W. from Seringapatam Lat. 12° 20', long 76 40'

YEMHATTI.—A town in the British district of Combatoor, presidency of Madras, 92 miles N E. by N of Combatoor Lat. 12 10', long 77° 40'

YEMWUN.—A town of Burmah, situate 100 miles N W from Ava. Lat. 25°, long 95 9'

YENKHE.—A town of the Tenasserim provinces, falling into the Thaluang Mycot river in lat. 12° 30', long 97° 45'

YENNA.—A town, an offshoot of the Irrawaddy falling into the Sittoung river in lat. 14 54', long 96 6'

YENNIGUL GOOTA.—A town in the Mysore 111 miles N from Seringapatam. Lat. 14 1 long 76 52'

YEWAW.—A town of Burmah, situate on the right bank of the Irrawaddy river 103 miles S.W. from Ava. Lat. 20° 56', long 94 40'

YERNAGODEM.—A town in the British district of Masulipatam presidency of Madras 63 miles N N E. of Masulipatam Lat. 17°, long 81° 33'

YERRUMAOOR.—A town in the British district of Malabar, presidency of Madras, 63 miles S E by E. of Calicut Lat. 10° 40', long 76° 38'

YESWANTGURH.—See RAJAH.

YEWUR.—A town in the native territory of the Deang rajahs, 52 miles S E by E from Burat. Lat. 20° 40', long 73 30'

YEY MULLAY or MOUNT DELLY, in the British district of Malabar presidency of Madras, 18 miles N W of Cannanore Lat. 12 2', long 75 15'

YINKOLU.—A town in the British district of Guntoor presidency of Madras, 36 miles S.S.W. of Guntoor Lat. 15 50', long 80 15'

YIRODU.—A town in the British district of Combatoor presidency of Madras, 56 miles E N E of Combatoor Lat. 11 20', long 77 46'

YOOLA, in Koonawar, a district of Basahur, is a considerable stream rising on the eastern declivity of the Danau Chu Mountains, forming the boundary towards Ladakh. It holds a course nearly southerly for about fifteen miles, and falls into the Sutlej on the right side, in lat. 31 31 long 78 11'

YOOLANG.—A torrent in the district of Koonawar in Basahur falls into the La, or river of Spiti on the right side, in lat. 31 55', long 78 37' after a course of about eight miles in a south-easterly direction

YOOMADOUNG MOUNTAINS.—A long range of mountains stretching from lat. 16 to lat. 23° 20' in a direction N N E, and forming a natural barrier between Arracan and Ava and thence stretching southerly, through the British province of Pegu, to Cape Negrais. It is a continuation of the great mountain chain commencing at the south of Assam, in lat. 26° 30' and extending southwards, running parallel with the river Irrawaddy. This range has received, and been known under, various designations, but the one above mentioned is that generally adopted. The mountains vary in height, according to Crawford, from 200 to 3,000 feet. The loftiest point is the Blue Mountain, in lat. 22 37', long 93° 11'. From this peak, proceeding southward, the mountains gradually decrease in height.

There are several rivers which water the province of Arracan flowing from these mountains, but none are large and they derive their importance only from the towns situate on

# YOO—ZYN

their banks. The chief are the Arracan or Kuledyee river, the Talak, Aeng, and Sando-way rivers.

**YOOSOO** (so called from a village of the same name at its southern base)—A pass in Buzmahur over the range of the Himalaya forming the southern boundary of Koonawar. Elevation of the pass above the sea 15,877 feet. Lat. 21° 24' long. 78° 9'.

**YOUNGAI**—A town in the British district of Tavoy, one of the Tenasserim provinces, 114 miles S.S.E. of Amherst. Lat. 14° 30', long. 98° 18'.

**YOUN ZERAY**—A town in the British province of Pegu, situate on the Irawady river 13 miles S. by W. from Promé. Lat. 13° 31', long. 95°.

## Z.

**ZAFFARGHUR**—A town in the territory of the Nizam, 72 miles E.N.E. from Hyderabad. Lat. 17° 46', long. 79° 31'.

**ZAFURABAD** in the British district of Jounpoor, a town situate on the right bank of the river Goomtee, six miles S.E. of Jounpoor cantonment. It is mentioned by Ferishta as early as 1595. Lat. 25° 42' long. 82° 47'.

**ZAHOORABAD**, in the British district of Ghaseepoor, lieut. gov. of Agra, a town, the principal place of the pergunnah of the same name, is 14 miles N.E. of Ghaseepoor cantonment. Lat. 25° 41', long. 83° 48'.

**ZANSKAR**, in Ladakh, or Middle Tibet, an elevated region lying between the Indus on the north, and the Chenab on the south. It is about eighty miles long from south-east to north-west, sixty wide from south-west to north-east, and lies between lat. 33°—34° 30', long. 76° 20'—77° 40'.

**ZEBUEEEN**—A town of Burmah, situate on the Irawady river 121 miles S.W. from Ava. Lat. 20° 41', long. 94° 34'.

**ZEEMANIA**—See NERUTHPUR.

**ZEERAPPOOR**—A town in the territory of Holkar, 103 miles N.N.E. from Indore and 100 miles E.S.E. from Neemuch. Lat. 24° 2', long. 76° 36'.

**ZILLAHFUR**, in the British district of Cawnpore, a village on the route from Allahabad to Etawah, and 57 miles S.E. of the latter. Lat. 26° 16' long. 79° 46'.

**ZIMNIS RIVER**—See ATTARAN.

**ZOIYA**—A town in the British district of Amherst, one of the Tenasserim Provinces, 54 miles E. by N. of Moulmein. Lat. 16° 33', long. 93° 30'.

**ZONGRI**—A town in the native state of Sikhun, 36 miles N. by W. from Darjeeling, and 182 miles E. from Khatmandoo. Lat. 27° 31' long. 83° 11'.

**ZOORHUR GHAT** in the British territory of Saugor and Nerbudda, lieut. gov. of the N.W. Provinces, a town on the route from Hoesungabad to Nagpoor 31 miles S.E. of the former. Lat. 22° 26' long. 78° 6'.

**ZOPHALING**—A town of Assam in the British district of Suddiya, lieut. gov. of Bengal, 48 miles E. by N. of Suddiya. Lat. 27° 53' long. 93° 29'.

**ZORAWURGUNJE**—A town in the British district of Bulloah, lieut. gov. of Bengal, 46 miles E. by S. of Bulloah. Lat. 22° 49' long. 91° 39'.

**ZUMMAWALA**, in the Sude Sagar Doab division of the Punjab, a town situated nine miles from the left bank of the Indus, 80 miles S. of the town of Peshawar. Lat. 32° 52' long. 71° 48'.

**ZURKEYL**—A town in the British district of Shikarpoor province of Souda, 10 miles N. of Shikarpoor. Lat. 28° 9' long. 68° 40'.

**ZUTO**—A town of Burmah, nine miles W. from the Irawaddy, and 145 miles S.W. from Ava. Lat. 20° 15' long. 94° 34'.

**ZUZ NAR**—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate 34 miles S.W. by S. from Srinagar and 81 miles N. from Sealkote. Lat. 33° 38', long. 74° 48'.

**ZYNPORE** in the British district of Cawnpore, lieut. gov. of the N.W. Provinces, a small town on the route, by Nanamow Ghat, from the cantonment of Etawah to Lucknow, in Oude, and 53 miles E. of Etawah. Lat. 26° 55', long. 79° 56'.

THE END.
